The End of Illusions

2021-06-28 Andreas Reckwitz We live in a time of great uncertainty about the future. Those heady days of the late twentieth century, when the end of the Cold War seemed to be ushering in a new and more optimistic age, now seem like a distant memory. During the last couple of decades, we've been battered by one crisis after another and the idea that humanity is on a progressive path to a better future seems like an illusion. It is only now that we can see clearly the real scope and structure of the profound shifts that Western societies have

undergone over the last 30 years. Classical industrial society has been transformed into a late-modern society that is molded by polarization and paradoxes. The pervasive singularization of the social, the orientation toward the unique and exceptional, generates systematic asymmetries and disparities, and hence progress and unease go hand in hand. Reckwitz examines this dual structure of singularization and polarization as it plays itself out in the different sectors of our societies and, in so doing, he outlines the central structural features of the present:

guide to understanding ourselves and to developing a sense of responsibility and morality. Approaching conscious will as a topic of psychological study, Wegner examines the issue from a variety of angles. He looks at illusions of the will—those cases where people feel that they are willing an act that they are not doing or, conversely, are not willing an act that they in fact are doing. He explores conscious will in hypnosis, Ouija board spelling, automatic writing, and facilitated communication, as well as in such phenomena as spirit possession, dissociative identity disorder, and trance channeling. The result is a book that sidesteps endless debates to focus, more fruitfully, on the impact on our lives of the illusion of conscious will.

of our daily lives back into the deepest and most revelatory histories of the last two hundred years and earlier, Hamid Dabashi's *The End of Two Illusions* is a daring, provocative, and groundbreaking work that dismantles the most dangerous delusions manufactured between two vastly fetishized abstractions: "Islam" and "the West." With this book, Dabashi shows how the civilizational divides imagined between these two cosmic binaries have defined their entanglement—in ways that have nothing to do with the lived experiences of either Muslims or the diverse and changing communities scarcely held together by the myth of "the West." Through detailed historical and contemporary analysis, *The End of Two Illusions* untangles the

motivations that produced this global fiction. Dabashi demonstrates how "the West" was an ideological commodity and civilizational mantra invented during the European Enlightenment, serving as an epicenter for the rise of globalized capitalist modernity. In turn, Orientalist ideologues went around the world manufacturing equally illusory abstractions in the form of inferior civilizations in India, China, Africa, Latin America, and the Islamic world. The result was the projection of "Islam and the West" as the prototype of a civilizational hostility that has given false explanations and flawed prognoses of our contemporary history, with weaponized Islamophobia on one side and militant Islamism on the other as ~~the~~ ~~end~~ ~~of~~ ~~the~~ ~~illusion~~ ~~of~~ ~~the~~ ~~end~~

palpable manifestations. Dabashi argues it is long past time to dismantle this dangerous liaison, expose and overcome its perilous delusions, and reimagine the world beyond its shimmering mirage. The End of Two Illusions is the most iconoclastic work of critical thought and scholarship to emerge in recent memory, clearing the way toward a far more liberating imaginative geography of the world we share.

Empire of Illusion

2009-07-28 Chris Hedges Pulitzer prize-winner Chris Hedges charts the dramatic and disturbing rise of a post-literate society that craves fantasy, ecstasy and illusion. Chris Hedges argues that we now live in two societies: One, the minority, functions in a print-based, literate world, that can cope with complexity and can separate illusion from truth. The other, a growing majority, is retreating from a reality-based world into one of false certainty and magic. In this "other society," serious film and theatre, as well as newspapers and books, are being pushed to the margins. In the tradition of Orwell and

analysis of European diplomacy between the First World War and Hitler's advent. She explores in clear and lively prose the reasons why successive efforts failed to create a lasting peace in the interwar era. Building on the theories of the first edition - many of which have become widely accepted since its publication in 1976 - Marks reassesses Europe's leaders of the period, and the policies of the powers between 1918 and 1933, and beyond. Strongly interpretative and archivally based, *The Illusion of Peace* examines the emotional, ethnic, and economic factors responsible for international instability, as well as the distortion of the balance of power, the abnormal position of the Soviet Union, the weakness of France and the uncertainty of her relationship with Britain, and the inadequacy of the League of Nations. In so doing, the study clarifies the complex topics of reparations and war debts and challenges traditional assumptions, concluding that

widespread western devotion to disarmament and dedication to peace were two of several reasons why democratic statesmen could not respond decisively to Hitler's threat. In this new edition Marks also argues that the Allied failure to bring defeat home to the German people in 1918-19 generated a resentment which contributed to interwar instability and Hitler's rise. This highly successful study has been thoroughly revised and updated to reflect the latest scholarship. Now in its second edition, it remains the essential introduction to the tense political and diplomatic situation in Europe during the interwar years.

theorist of postmodernity, argues that the notion of the end is part of the fantasy of a linear history. Today we are not approaching the end of history but moving into reverse, into a process of systematic obliteration. We are wiping out the entire twentieth century, effacing all signs of the cold War one by one, perhaps even the signs of the First and Second World Wars and of the political and ideological revolutions of our time. In short, we are engaged in a gigantic process of historical revisionism, and we seem in a hurry to finish it before the end of the century, secretly hoping perhaps to be able to begin again from scratch. Baudrillard explores the "fatal strategies of time" which shape our ways of thinking about history and its imaginary end. Ranging from the revolutions in Eastern Europe to the Gulf War, from the transformation of nature to the hyper-reality of the media, this postmodern mediation on modernity and its aftermath will be widely read.
