Rorschach (2020-) #7 2021-04-13 Tom King Wil Myerson might have been the creator of Pontius Pirate, the most popular comic in history, before he put on the Rorschach mask and tried to kill a would-be president, but he's not the only artist who worked on the character. Other artists fell under Wil's influence, and now all these years later, his more renowned acolyte has fallen sway to Laura, the #1 Myerson superfan. Is it possible she influenced another comic book legend into playing vigilante? The key here is that tape the detective is trying to decipher, the one with the séance that has been haunting him since the very first issue! All this and a cameo by Dr. Manhattan to boot!

A Lady's Guide to Gossip and Murder 2020-06-30 Dianne Freeman
Though American by birth, Frances Wynn, the now-widowed Countess of Harleigh, has adapted admirably to the quirks and traditions of the British aristocracy. On August twelfth, otherwise known as the Glorious Twelfth, most members of the upper class retire to their country estates for grouse-shooting season. Frances has little interest in hunting-for birds or a second husband-and is expecting to spend a quiet few months in London with her almost-engaged sister, Lily, until the throng returns. Instead, she's immersed in a shocking mystery when a friend, Mary Archer, is found murdered. Frances had hoped Mary might make a suitable bride for her cousin, Charles, but their courtship recently fizzled out. Unfortunately, this puts Charles in the spotlight-along with dozens of others. It seems Mary had countless notes hidden in her home, detailing the private indiscretions of society's elite. Frances can hardly believe that the genteel and genial Mary was a blackmailer, yet why else would she hoard such juicy tidbits? Aided by her gallant friend and neighbor, George Hazelton, Frances begins assisting the police in this highly sensitive case, learning more about her peers than she ever wished to know. Too many suspects may be worse than none at all-but even more worrying is that the number of victims is increasing too. And unless Frances takes care, she'll soon find herself among them . . .

Stories in Stone 2011-05-01 Jelle Zeilinga de Boer In a series of entertaining essays, geoscientist Jelle Zeilinga de Boer describes how early settlers discovered and exploited Connecticut's natural resources. Their successes as well as failures form the very basis of the state's history: Chatham's gold played a role in the acquisition of its Charter, and Middletown's lead helped the colony gain its freedom during the Revolution. Fertile soils in the Central Valley fueled the state's development into an agricultural power house, and iron ores discovered in the western highlands helped trigger its manufacturing eminence. The Statue of Liberty, a quintessential symbol of America, rests on Connecticut's Stony Creek granite. Geology not only shaped the state's physical landscape, but also provided an economic base and played a cultural role by inspiring folklore, paintings, and poems. Illuminated by 50 illustrations and 12 color plates, Stories in Stone describes the marvel of Connecticut's geologic diversity and also recounts the impact of past climates, earthquakes, and

meteorites on the lives of the people who made Connecticut their home.

Saturation 2020-05-19 C. Riley Snorton Essays, conversations, and artist portfolios confront questions at the intersection of race, institutional life, and representation. Controversies involving race and the art world are often discussed in terms of diversity and representation—as if having the right representative from a group or a larger plurality of embodied difference would absolve art institutions from historic forms of exclusion. This book offers another approach, taking into account not only questions of racial representation but also issues of structural change and the redistribution of resources. In essays, conversations, discussions, and artist portfolios, contributors confront in new ways questions at the intersection of art, race, and representation. The book uses saturation as an organizing concept, in part to suggest that current paradigms cannot encompass the complex realities of race. Saturation provides avenues to situate race as it relates to perception, science,

aesthetics, the corporeal, and the sonic. In color theory, saturation is understood in terms of the degree to which a color differs from whiteness. In science, saturation points describe not only the moment in which race exceeds legibility, but also how diversity operates for institutions. Contributors consider how racialization, globalization, and the production and consumption of art converge in the art market, engaging such topics as racial capitalism, the aesthetics of colonialism, and disability cultures. They examine methods for theorizing race and representation, including "aboutness," which interprets artworks by racialized subjects as being "about" race; modes of unruly, decolonized, and queer visual practices that resist disciplinary boundaries; and a model by which to think with and alongside blackness and indigeneity.
