The Boundaries of Medicare

2023-02-15 Katherine Fierlbeck While almost all universal health coverage in Canada is provided under the Canada Health Act, there is Medicare coverage that is provided outside of the act. This is the first book to explain the nature of these boundary health services, why they exist, and how to navigate them in practice. The Boundaries of Medicare examines the complex range of public health care services and coverage arrangements that predate or have developed alongside the Canada Health Act. These provisions – including for workers’ compensation, military personnel and veterans, incarcerated persons, migrants, and Indigenous Peoples – are often not well understood, even by those working at policy and delivery levels. Katherine Fierlbeck and Gregory Marchildon aim to improve understanding of these boundary services: why they were established, who is eligible for them, how services are provided, how they are paid for, and how they are managed within a multilevel governance system. They also look at the dramatic increase in virtual health care services since the onset of the COVID-19 pandemic and their relationship to the Canada Health Act. Explaining the origins, operations, and tensions of government-funded health care outside the Canada Health Act, The Boundaries of Medicare is an essential resource for policymakers, providers, administrators, and patients seeking to navigate Medicare in Canada.

S Programming

2013-03-09 William Venables S is a high-level language for manipulating, analysing and displaying data. It forms the basis of two highly acclaimed and widely used data analysis software systems, the commercial S-PLUS® and the Open Source R. This book provides an in-depth guide to writing software in the S language under either or both of those systems. It is intended for readers who have some acquaintance with the S language and want to know how to use it more effectively, for example to build re-usable tools for streamlining routine data analysis or to implement new statistical methods. One of the outstanding strengths of the S language is the ease with which it can be extended by users. S is a functional language, and functions written by users are first-class objects treated in the same way as functions provided by the system. S code is eminently readable and so a good way to document precisely what algorithms were used, and as much of the implementations are themselves written in S, they can be studied as models and to understand their subtleties. The current implementations also provide easy ways for S functions to call compiled code written in C, Fortran and similar languages; this is documented here in depth. Increasingly S is being used for statistical or graphical analysis within larger software systems or for whole vertical-market applications. The interface facilities are most developed on Windows® and these are covered with worked examples. The authors have written the widely used Modern Applied Statistics with S-PLUS, now in its third edition, and several software libraries that enhance S-PLUS and R; these and the examples used in both books are available on the Internet. Dr. W.N. Venables is a senior Statistician with the CSIRO/CMIS Environmetrics Project in Australia, having been at the Department of Statistics, University of Adelaide for many years previously. Professor B.D. Ripley holds the Chair of Applied Statistics at the University of Oxford, and is the author of four other books on spatial statistics, simulation, pattern recognition and neural networks. Both authors are known and respected throughout the international S and R communities, for their books, workshops, short courses, freely available software and through their extensive contributions to the S-news and R mailing lists.

African Philanthropy

2023-03-02 Bhekinkosi Moyo Opening novel avenues of knowledge in the study of African philanthropy and development, this incisive book provides a critical assessment of philanthropic responses during crisis and non-crisis periods. It explores how collaboration between multilateral institutions and philanthropic organisations during a crisis can be harnessed and replicated to address the continent’s developmental challenges during non-crisis periods.

Monitoring food security in food crisis countries with conflict situations

2022-10-06 Food and Agriculture Organization of the United Nations This report provides an update on the acute food insecurity in countries and territories that have the world’s highest burden of people in need of emergency food, nutrition and livelihood assistance as a result of protracted conflict combined with other factors. This issue focuses on the following countries: Afghanistan, Burkina Faso, Cameroon, the Central African Republic, Chad, the Democratic Republic of the Congo, Ethiopia, Haiti, Iraq, Mali, Mozambique, Myanmar, northern Nigeria, the Niger, Palestine, Somalia, South Sudan, the Sudan, the Syrian Arab Republic and Yemen. Specific information on Ukraine is also included given the situation currently unfolding. The Food and Agriculture Organization of the United Nations (FAO) and the World Food Programme (WFP) have jointly produced this report for the members of the United Nations Security Council (UNSC) since June 2016.

Towards Climate Resilience and Neutrality in Latin America and the Caribbean Key Policy Priorities

2023-10-06 OECD This report identifies LAC countries’ main climate change policy priorities, which were discussed through a series of Regional Policy Dialogues and Expert Workshops and complements these with findings of recent

analyses by the OECD and other international partners. It explores issues related to their implementation on climate adaptation, mitigation, and cross-cutting policy areas.

Rethinking Infrastructure in Latin America and the Caribbean

2017-08-02 Marianne Fay Latin America and the Caribbean (LAC) does not have the infrastructure it needs, or deserves, given its income. Many argue that the solution is to spend more; by contrast, this report has one main message: Latin America can dramatically narrow its infrastructure service gap by spending efficiently on the right things. This report asks three questions: what should LAC countries’ goals be? How can these goals be achieved as cost-effectively as possible? And who should pay to reach these goals? In doing so, we drop the ‘infrastructure gap’ notion, favoring an approach built on identifying the ‘service gap’. Benchmarking Latin America in this way reveals clear strengths and weaknesses. Access to water and electricity is good, with the potential for the region’s electricity sector to drive competitive advantage; by contrast, transport and sanitation should be key focus areas for further development. The report also identifies and analyses some of the emerging challenges for the region—climate change, increased demand and urbanization—that will put increasing pressure on infrastructure and policy makers alike. Improving the region’s infrastructure performance in the context of tight fiscal space will require spending better on well identified priorities. Unlike most infrastructure diagnostics, this report argues that much of what is needed lies outside the infrastructure sector †“ in the form of broader government issues—from competition policy, to budgeting rules that no longer solely focus on controlling cash expenditures. We also find that traditional recommendations continue to apply regarding independent, well-performing regulators and better corporate governance, and highlight the critical importance of cost recovery where feasible and desirable, as the basis for future commercial finance of infrastructure services. Latin America has the means and potential to do better; and it can do so by spending more efficiently on the right things.

Development Banks and Sustainability in the Andean Amazon

2019-10-10 Rebecca Ray This book explores what development banks, governments, and communities have learned in the last decade of careful negotiation between social and environmental protections in the Andean Amazon, and the pressures of a surging infrastructure and development boom. While mega-dams, highways, and ports are filling up the pipelines of planners, the national governments of Andean and Amazon-basin countries and major development banks have enacted ambitious social and environmental protections. The book traces the development of social and environmental protections after years of struggle by affected communities, going beyond official policies to discover how these reforms work in practice, and ultimately whether they are enough to stem the risks of infrastructure mega-projects. As Chinese public banks play an increasingly important role in the region, the book also demonstrates that there is a risk of governments undercutting their own standards. By contrast, this book shows that making infrastructure work for everyone involved requires mutually reinforcing networks of support and accountability among communities, governments, and development banks. This book, led by an expert multi-disciplinary, international team, will be of considerable interest to researchers in the fields of development and development economics, geography, anthropology, and ecology, as well as practitioners in development banks and in government regulatory and foreign aid agencies.

Representations of Global Poverty

2013-09-30 Nandita Dogra Through the efforts of increasingly global and media-aware NGOs, people in the west are bombarded with images of poverty, suffering and inequality. Representations of Global Poverty is the first comprehensive study of the communications and imagery used by international NGOs to represent the developing world. An enlightening study, this book explores the discursive constructions of global poverty and development by international charities and their role in mediating between developed countries and the developing world. It presents a detailed empirical review of the communications of international NGOs, utilizing an original postcolonial analytical framework to better understand and evaluate these public messages. The book examines three interlinked levels of the public messages of UK-based international development NGOs (INGOs) - representation, production and reception. This review of the fundraising and advocacy messages of INGOs shows a dualism of 'difference' and 'oneness'. While these messages portray the developing world as different and distant, they are also at pains to present it as sharing the same human values. These oversimplified representations circumvent the historical context of, and continuities between, European colonialism and current global poverty. Instead they connect the globe through a de-historicised universal humanism. This decontextualization in INGOs' communications stems from both institutional isomorphism and sociological assumptions about audiences. Dogra's book goes on to reveal the role of western collective histories in shaping global inequalities and our subjectivities in the way we perceive and position ourselves in relation to the majority world. From historical amnesia to denial, charity to justice and rights, feel-good consumerism to activism, humanism and cosmopolitanism to Eurocentrism and Britishness, it analyses NGO representations through a variety of discourses. Boldly interdisciplinary, the book draws upon sociology, NGO management, development, social policy, political science, postcolonial, cultural and media studies and as such is essential reading for students and scholars across these diverse fields. This book should become the starting point for future debates on representations and global poverty that concern not just charities, international aid bodies, governments and academic institutions but all of us who live in a deeply connected but divided world.

Strengthening Asset-backed Pension Systems in a Post-COVID World

2022-11-25 OECD This publication analyses the impact COVID-19 has had on asset-backed pension arrangements and the main policies countries have implemented in response to date. It then presents policy guidelines to help strengthen asset-backed pension arrangements and improve retirement outcomes in a post-COVID world.

observation caf pdf pdf:The work "Analyzing Casual Conversation" by Suzanne Eggins and Diana Slade, originally published in 1997, develops a organized model for the study and depiction of casual conversation in English. The scholars argue that in spite of its occasionally aimless seeming and ostensibly unstructured substance, casual conversation is a very structured undertaking and plays a crucial part in the social construction of reality. The publication proceeds through genuine examples of casual conversations including participants varying in age, gender, ethnicity, and socio-economic class². Drawing on insights from sociology, linguistics, and critical semiotics, the publication furnishes readers with the examinative skills to describe the levels of structure and critical interpretive structures to clarify the 'social work' that happens on through chat.

Chapter four of the Holt Chemistry textbook, titled "The Periodic Table", provides a comprehensive overview of the periodic table and its elements. The chapter begins with a dialogue on the traits of groups and periodic groups, clarifying how the Russian chemist Dmitri Mendeleev ordered elements by their atomic weight in increasing order¹. It then dives into the concept of valence electrons and levels of energy of atoms, highlighting the function of valence electrons in chemical reactions and transformations to atomic structures and molecules.

The chapter further distinguishes between transition metals and main group elements, detailing on their characteristics and traits. It also clarifies the notion of ionization energy and its tendencies among groupings and periods on the periodic table¹. The chapter converses about atom's and radii, and how these can be forecasted based on an atom's place on the table of elements.

Electronegativity, which quantifies an element's inclination to attract a bonding pair of electrons, is another key theme addressed in this part¹. The chapter finishes with a conversation on the diagonal relationship, metallic character, and point of boiling of constituents.

In terms of questions, the chapter provides a array of questions and preparation for tests resources to reinforce the notions studied. These questions cover a variety of topics, from understanding the order of components to studying the patterns in the table of elements.

A Gripping Tale of Unrelenting Pursuit

This is not a mere work of fiction, nor is it a product of cinematic imagination. This is the chilling reality, the chronicle of a serial killer who, with cold-blooded intent, extinguished the lives of 17 innocent souls. He relished in the infamous moniker "Zodiac," taunting the authorities and the public with cryptic messages and elusive clues. His actions were driven by a twisted sense of purpose, a self-proclaimed divine mission. He harbored the delusion of intellectual superiority, believing himself to be an unstoppable force. But his arrogance proved to be his undoing. This is the narrative of his eventual downfall, orchestrated by the one individual who possessed an intimate understanding of his psyche – his own brother.

It involves present and future economic factors, making it critical to obtain reliable estimates of future costs, benefits, and other economic parameters. Engineers frequently deal with projects whose scale, complexity, and uncertainty call for complex approaches to planning and budgeting^[2][1]. Several methods are used for cost estimation, including rough estimates, semi-detailed estimates, or detailed estimates, depending on the needs for the estimates^[1][2]. Key concepts in this field include overhead costs, cost driver identification, cost allocation methods, capital budgeting, flexible budgeting, zero-based budgeting, budgets, and estimates. A number of models are available for developing cost (or benefit) estimates, such as the per-unit model, the segmenting model, cost indexes, the power-sizing model, and learning curve cost estimating. The quality of a cost estimate generally increases as the resources allocated to developing the estimate increase.

Story of" caf pdf pdf.The publication "Analyzing Casual Conversation" by Suzanne Eggins and Diana Slade, originally issued in 1997, creates a systematic model for the analysis and portrayal of casual conversation in English. The authors argue that despite its occasionally aimless look and seemingly unstructured material, casual conversation is a very structured undertaking and performs a vital function in the social construction of reality. The work goes through authentic instances of casual conversations involving participants differing in age, gender, ethnicity, and socio-economic class¹². Drawing on understandings from sociology, linguistics, and critical semiotics, the publication equips readers with the examinative skills to portray the strata of structure and critical interpretive frameworks to explain the 'social work' that occurs on through chat.
