## Minimum Design Loads for Buildings and Other Structures

2010 American Society of Civil Engineers Minimum Design Loads for Buildings and Other Structures, ASCE/SEI 7-10, is a complete revision of ASCE Standard 7-05. ASCE 7-10 offers a complete update and reorganization of the wind load provisions, expanding them from one chapter into six to make them more understandable and easier to follow. ASCE 7-10 provides new ultimate event wind maps with corresponding reductions in load factors, so that the loads are not affected. It updates the seismic loads of ASCE 7-05, offering new risk-targeted seismic maps. The snow load, live load, and atmospheric icing provisions of ASCE 7-05 are all updated as well. ASCE Standard 7-10 provides requirements for general structural design and includes means for determining dead, live, soil, flood, wind, snow, rain, atmospheric ice, and earthquake loads, and their combinations that are suitable for inclusion in building codes and other documents. A detailed commentary containing explanatory and supplementary information to assist users of ASCE 7-10 is included with each chapter: ASCE 7-10 is an integral part of the building codes of the United States. Structural engineers, architects, and those engaged in preparing and administering local building codes will find the structural load requirements essential to their practice.

## Automated People Mover Standards

2006 American Society of Civil Engineers ANSI/ASCE/T&DI 21.3-08 presents the minimum requirements for the design, construction, operation, and maintenance of APM systems. Part 3 covers electrical equipment, stations, and guideways.

## Seismic Rehabilitation of Existing Buildings

2007 American Society of Civil Engineers Standard ASCE/SEI 41-06 presents the latest generation of performance-based seismic rehabilitation methodology.

## **Flood Resistant Design and Construction**

2015 Standard ASCE/SEI 24-14 provides minimum requirements for design and construction of structures located in flood hazard areas and subject to building code requirements.

## Subsurface Utility Engineering for Municipalities

2019 James H. Anspach This report is a resource for understanding subsurface utility engineering (SUE) and bringing up-to-date practices to the application of SUE for public works projects.

## Minimum Design Loads and Associated Criteria for Buildings and Other Structures

2022-02 American Society of Civil Engineers Standard ASCE/SEI 7-22 provides requirements for general structural design and includes means for determining various loads and their combinations, which are suitable for inclusion in building codes and other documents.

## ASCE Standard, ASCE/SEI, 41-17, Seismic Evaluation and Retrofit of Existing Buildings

2017 American Society of Civil Engineers Standard ASCE/SEI 41-17

describes deficiency-based and systematic procedures that use performance-based principles to evaluate and retrofit existing buildings to withstand the effects of earthquakes.

## Design of Steel Transmission Pole Structures

2012 American Society of Civil Engineers This Standard provides a uniform basis for the design, detailing, fabrication, testing, assembly, and erection of steel tubular structures for electrical transmission poles. These guidelines apply to cold-formed single- and multipole tubular steel structures that support overhead transmission lines. The design parameters are applicable to guyed and self-supporting structures using a variety of foundations, including concrete caissons, steel piling, and direct embedment. Standard ASCE/SEI 48-11 replaces the previous edition (ASCE/SEI 48-05) and revises some formulas that are based on other current industry standards. This Standard includes a detailed commentary and appendixes with explanatory and supplementary information. This Standard will be a primary reference for structural engineers and construction managers involved in designing and building electrical transmission lines, as well as engineers and others involved in the electric power transmission industry.

## Tsunami Loads and Effects

2018 Ian Nicol Robertson Author Ian Robertson provides a comprehensive, authoritative guide to the new tsunami design provisions of Standard ASCE/SEI 7-16 using a series of detailed examples based on prototypical buildings.

Zara had always dreamed of exploring the world, but she never imagined that she would discover a hidden civilization. She had joined an expedition to the Amazon rainforest, hoping to find clues about her missing father, who had vanished while searching for the legendary city of Z. She had inherited his passion for adventure, and his journal, which contained maps and notes about his quest. But she soon realized that she was not the only one looking for Z. A ruthless treasure hunter, who had a personal vendetta against her father, was also on her trail. He would stop at nothing to find the city and claim its secrets for himself. Zara had to race against time and danger, and rely on her courage and intelligence, to uncover the truth about Z and her father's fate. But she also had to face the mysteries of her own heart, as she found herself drawn to a mysterious native guide, who seemed to know more than he let on. Zara was about to embark on the most thrilling and dangerous journey of her life, and she would never be the same again.
