The White Queen

The Woodvilles

2013-10-01 Susan Higginbotham In 1464, the most eligible bachelor in England, Edward IV, stunned the nation by revealing his secret marriage to Elizabeth Woodville, a beautiful, impoverished widow whose father and brother Edward himself had once ridiculed as upstarts. Edward's controversial match brought his queen's large family to court and into the thick of the Wars of the Roses. This is the story of the family whose fates would be inextricably intertwined with the fall of the Plantagenets and the rise of the Tudors: Richard, the squire whose marriage to a duchess would one day cost him his head; Jacquetta, mother to the queen and accused witch; Elizabeth, the commoner whose royal destiny would cost her three of her sons; Anthony, the scholar and jousting knight who was one of Richard III's first victims; and Edward, whose military exploits would win him the admiration of Ferdinand and Isabella.

Elizabeth Woodville

2011-08-26 David Baldwin Elizabeth Woodville is a historical character whose life no novelist would ever have dared invent. She has been portrayed as an enchantress, as an unprincipled advancer of her family's fortunes and a plucky but pitiful queen in Shakespeare's histories. She has been alternatively championed and vilified by her contemporaries and five centuries of historians, dramatists and novelists, but what was she really like? In this revealing account of Elizabeth's life David Baldwin sets out to tell the story of this complex and intriguing woman. Was she the malign influence many of her critics held her to be? Was she a sorceress who bewitched Edward IV? What was the fate of her two sons, the 'Princes in the Tower'? What did she, of all people, think had become of them, and why did Richard III mount a campaign of vilification against her? David Baldwin traces Elizabeth's career and her influence on the major events of her husband Edward IV's reign, and in doing so he brings to life the personal and domestic politics of Yorkist England and the elaborate ritual of court life.

Elizabeth Widville, Lady Grey

2019-07-30 John Ashdown-Hill Wife to Edward IV and mother to the Princes in the Tower and later Queen Elizabeth of York, Elizabeth Widville was a central figure during the War of the Roses. Much of her life is shrouded in speculation and myth – even her name,

commonly spelled as 'Woodville', is a hotly contested issue. Born in the turbulent fifteenth century, she was famed for her beauty and controversial second marriage to Edward IV, who she married just three years after he had displaced the Lancastrian Henry VI and claimed the English throne. As Queen Consort, Elizabeth's rise from commoner to royalty continues to capture modern imagination. Undoubtedly, it enriched the position of her family. Her elevated position and influence invoked hostility from Richard Neville, the 'Kingmaker', which later led to open discord and rebellion. Throughout her life and even after the death of her husband, Elizabeth remained politically influential: briefly proclaiming her son King Edward V of England before he was deposed by her brother-in-law, the infamous Richard III, she would later play an important role in securing the succession of Henry Tudor in 1485 and his marriage to her daughter Elizabeth of York, thus ending the War of the Roses. Elizabeth Widville was an endlessly enigmatic historical figure, who has been obscured by dramatizations and misconceptions. In this fascinating and insightful biography, Dr John Ashdown-Hill brings shines a light on the truth of her life.

Jacquetta Woodville was a personal enemy of Warwick the Kingmaker, who was about to take his revenge. Elizabeth Woodville was the widowed mother of a child king, fighting Richard III for her children's lives. In *Royal Witches*, Gemma Hollman explores the lives of these four unique women, looking at how rumours of witchcraft brought them to their knees in a time when superstition and suspicion was rife.

The Queen's Sisters

2020-03-27 Sarah J. Hodder Whether Queen or commoner, the lives of women throughout history is a fascinating study. Elizabeth Woodville, 'The White Queen', managed to make the transition from commoner to Queen and became the epitome of medieval heroines - the commoner who married a King. When she became the wife of Edward IV her actions changed the life of her entire family. Vilified both by their contemporaries and by many historians since, the Woodville family were centre stage during the reigns of Edward IV and Richard III. Elizabeth Woodville became the ancestress of future Kings and Queens. This book takes a fresh look at the lives of Elizabeth's sisters. Although information on them is scarce, by looking at the men they married, their families, the places they lived and the events that they lived through we can catch a glimpse of their lives. Each sister has their own story to tell and they may

not have achieved the dizzying heights that their sister did, but they are all fascinating women.

Many doctors agree that as long as a medication is not detrimental to one's health, then there is no reason why it should not be used if there are noticeable benefits. Most scientists would also state that it is simply due to a lack of research that the therapeutic properties of acupuncture have not yet been proven.

One of the most debated issues between the East and the West is the use of acupuncture as a western means of medical treatment. Even though this form of medicine has been used as an effective method for over five thousand years in China, there is no concrete evidence from scientific research studies that have proven the healing properties of acupuncture.

Skeptics shrug off the positive effects of acupuncture as merely placebo effects. Believers in acupuncture, however, say that the benefits have simply not yet been proven. Believers promote that the treatment is harmless and can be used as a complement to western medicine.

There is no tissue damage when the needle is inserted into the skin or pulled out and only in very rare cases are there traces of bruising.

The second myth is that you can get hepatitis or AIDS from acupuncture. This is true only if the needles used are not sterilized. In the US, this will never happen because acupuncturists are required to use disposable needles thus you are not at risk from these two diseases.

High blood pressure is a condition where the blood pressure is more than normal. It is also known as hypertension. Heart pumps out blood, so that oxygen can reach to different parts of the body via blood. The pressure with which heart pumps blood is known as blood pressure. The blood pressure comprises of two measures, the systolic pressure and diastolic pressure. Systolic pressure is the larger figure and represents the pressure within the artery of the heart, when contractions take place which pump blood to different parts of the body. Diastolic pressure is the pressure within the artery of the heart, when the blood is filling in the heart and it is at rest. Both the pressures are measured in millimeters of mercury or mmHg. High blood pressure is abnormal increase in systolic pressure or diastole pressure.

Blood pressure is measured by putting a blood pressure cuff on the arm and placing a stethoscope on the chest. There can be very little variation in blood pressure depending upon the time, emotional moods, age, gender, weight, height, physical activity, stress and other illness such as heart disease and kidney disease. Children and adolescents become anxious when they visit the doctor. This is also an important factor which affects the blood pressure and the readings taken get tampered because of it. That is the reason why many blood pressure readings are taken in order to determine whether the adolescent has high blood pressure or not. The nurse may even ask the adolescent to calm down while taken the readings. Time gap is given between each reading, so as to give time to the adolescent to calm down. Emotions can also affect the blood pressure reading.

Therefore, age, gender, and height are important factor when determining the normal blood pressure level. Adults will have a higher blood pressure than the infants and teenagers. Also, boys have a higher blood pressure when compared to girls and tall people have a

higher blood pressure than short people. An adolescent is said to have high blood pressure when the blood pressure is more than the blood pressure of ninety percent people of his/her age, gender and height.

There are many risks associated with hypertension or high blood pressure. The risk of developing coronary heart disease increases proportionally. The arteries will develop greater resistance towards the blood flow, because of which the heart will pump blood harder. Stroke is also another risk. Adolescents who have had high blood pressure as a child, develop harmful effects on the blood vessels and heart till the time they turn twenty.

The causes of high blood pressure can be classified as primary and secondary. If the causes are definite, they are primary and if the cause is linked to some illness, it is secondary. Primary causes are high blood cholesterol levels, smoking, stagnant lifestyle and overweight. Secondary causes are obesity, immobility due to chronic illness, prescription drugs, intense pain due to burns or cancer and illegal drugs. High blood pressure can develop due to hereditary reasons.

Life Lessons from elizabeth woodville a life the real story; Acupuncture treatment for smokers should only be done by a license professional. You can do some research online to find out if they are accredited by the National Commission for Acupuncture and Oriental Medicine, ask how long they have been in the profession, find out how many smokers they have helped and how much will they charge.

Once you have found one, you have to commit yourself to the program because both you and the acupuncturist have to work together to give up this habit.

Acupuncture can help smokers in the same way that it has helped addicts and alcoholics quit their addictions. You just have to try it even if you may not believe in it.

Variations of Conventional Acupuncture

Auriculotherapy or ear acupuncture is one of the variations of conventional acupuncture. In this practice, it is believed that the ear provides a map for all the major bodily organs. A specific area or point on the ear corresponds to a particular organ, such as the heart, kidneys, or liver. Thus, the needles are placed in particular points around the ear and on the ear cartilage.

Staplepuncture is a method used in smoking cessation, wherein staples are placed for a certain period anywhere on the ear area to provide stimulation.

Indeed there is growing evidence that this traditional Oriental practice can rival any modern forms of treatment. If you are one of the many people who are looking for a widely recognized and time honored therapeutic practice, acupuncture may just be the alternative treatment for you.
