The Peabody Picture Vocabulary Test Fourth Edition (PPVT-4) is a well-respected vocabulary assessment that has been in practice for close to half a century. Formulated by Lloyd M. Dunn and Douglas M. Dunn, the test is crafted to measure vocabulary comprehension for American English. It is swift and easy to carry out, saving valuable time so that attention can be set on applying intelligent interventions.

The PPVT-4 assessment material encompasses a broad range of vocabulary comprehension ranks, ranging from preschool through adulthood. The test questions extensively include words that represent 20 topic fields (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and household and educational vocabulary.

The assessment provides two equivalent versions which hold different vocabulary items, guaranteeing that the test-taker has not "memorized" the evaluation. One version can be used before intervention implementation to assess test-takers' vocabulary comprehension and the alternative form can be employed for re-evaluation to assess and note progress. The PPVT-4 also contains a unique Growth Scale Value (GSV) which is responsive to small changes over time.
