Assistive and Rehabilitation Engineering

2019-12-04 Yves Rybarczyk Rehabilitation enables people with sensorimotor and cognitive disabilities to regain functions and autonomy. However, over the past few years, there has been a reduction in healthcare providers to assist patients. Fortunately, this decline has been accompanied by an increase in technological applications to support health systems. This new paradigm brings promising perspectives but raises questions regarding the therapy assisted by computers. To address these issues, this book intends to clarify the multidisciplinary aspects of medical engineering. The volume covers studies on the technical challenges in and barriers to the development of efficient rehabilitation and assistive technologies. It also provides a comprehensive approach to the recent advances in tele-health as a complementary medium to support the recovery process and to enhance patients' empowerment.

Psychology and Pathophysiological Outcomes of Eating

2021-12-01 Akikazu Takada The psychology of eating is regulated by neural mechanisms. When not well controlled, eating may result in disorders and health hazards such as obesity, type 2 diabetes mellitus, and vascular diseases. Lifestyles and cultures influence eating habits, thus there are differences in the prevalence of health problems depending upon living environments. This book examines the psychology and the pathophysiological outcomes of eating. Chapters address such topics as the influence of lifestyle, circadian rhythm, sleep, and fragrant odors on appetite and weight regulation; the impact of glucose, sucrose, lactate, and ketone bodies on the brain; the consequences of glycation stress on the skeletal muscle; and much more.

Children and Their Environments

2006-02-23 Christopher Spencer This fascinating book examines theories of children's perceptions of space and place and explores how these theories are applied to the world of children. The focus is on children in large real world spaces; places that children live in, explore and learn from. An international team of authors compare the experiences of children from different cultures and backgrounds. This book will appeal to environmental and developmental psychologists and geographers, and also to planners by linking research on children's understandings and on their daily lives to recommendations for practice.

Risk Management and Assessment

2020-10-14 Jorge Rocha Risk analysis, risk evaluation and risk management are the three core areas in the process known as 'Risk Assessment'. Risk assessment corresponds to the joint effort of identifying and analysing potential future events, and evaluating the acceptability of risk based on the risk analysis, while considering influencing factors. In short, risk assessment analyses what can go wrong, how likely it is to happen and, if it happens, what are the potential consequences. Since risk is a multi-disciplinary domain, this book gathers contributions covering a wide spectrum of topics with regard to their theoretical background and field of application. The work is organized in the three core areas of risk assessment.

Therapeutic Landscapes

2017-05-15 Allison Williams The therapeutic landscape concept, first introduced early in the 1990s, has been widely employed in health/medical geography and gaining momentum in various health-related disciplines. This is the first book published in several years, and provides an introduction to the concept and its applications. Written by health/medical geographers and anthropologists, it addresses contemporary applications in the natural and built environments; for special populations, such as substance abusers; and in health care sites, a new and evolving area - and provides an array of critiques or contestations of the concept and its various applications. The conclusion of the work provides a critical evaluation of the development and progress of the concept to date, signposting the likely avenues for future investigation.

Qualitative versus Quantitative Research

2017-06-28 Soneyl Oflazoglu The objective of this book is to fill the gap combining several studies from qualitative and quantitative research methods. The various chapters presented here follow several approaches that researchers explore in different context. This book intends to contribute to better understanding of the application areas of qualitative research method and to show how these business practices in social sciences can stimulate in various areas.

Internet of Things (IoT) for Automated and Smart Applications

2019-11-27 Yasser Ismail Internet of Things (IoT) is a recent technology paradigm that creates a global network of machines and devices that are capable of communicating with each other. Security cameras, sensors, vehicles, buildings, and software are examples of devices that can exchange data between each other. IoT is recognized as one of the most important areas of future technologies and is gaining vast recognition in a wide range of applications and fields related to smart homes and cities, military, education, hospitals, homeland security systems, transportation and autonomous connected cars, agriculture, intelligent shopping systems, and other modern technologies. Anorexia and Bulimia Nervosa

2019-10-02 Hubertus Himmerich The prevalence of eating disorders such as anorexia and bulimia nervosa is growing, and these disorders are affecting adolescents and young adults at increasingly younger ages. This has led to a greater number of patients presenting to health services. Although novel therapeutic approaches have been introduced in recent decades, the mortality rates of patients with anorexia and bulimia nervosa remain alarmingly high. The course of anorexia nervosa in particular is often chronic and can lead to persistent disability. This book covers the clinical features and symptoms, neurobiology, pathophysiology, and current and potential future treatment options for both anorexia and bulimia nervosa. It also highlights the important aspects of support for families and their perspectives on these disorders.

It involves present and future economic factors, making it vital to obtain accurate estimates of future costs, benefits, and other economic parameters. Engineers often deal with projects whose scale, complexity, and uncertainty call for advanced approaches to planning and budgeting^{[2][1]}. A number of methods are used for cost estimation, including rough estimates, semi-detailed estimates, or detailed estimates, depending on the needs for the estimates^{[1][2]}. Key concepts in this field include overhead costs, cost driver identification, cost allocation methods, capital budgeting, flexible budgeting, zero-based budgeting, budgets, and estimates. Several models are available for developing cost (or benefit) estimates, such as the per-unit model, the segmenting model, cost indexes, the power-sizing model, and learning curve cost estimating. The quality of a cost estimate typically increases as the resources allocated to developing the estimate increase.

The Peabody Picture Vocabulary Test 4th Edition (PPVT-4) is a well-respected vocabulary assessment that has been in use for almost 50 years. Developed by Lloyd M. Dunn and Douglas M. Dunn, the evaluation is made to assess receptive vocabulary for Standard American English. It is quick and effortless to administer, saving important time so that concentration can be set on executing successful strategies.

The PPVT-4 test material covers a wide array of receptive vocabulary levels, spanning from pre-kindergarten through adult age. The test problems widely sample words that portray 20 subject fields (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and home and educational vocabulary.

The assessment gives two equal versions which contain various vocabulary words, guaranteeing that the individual has not "learned" the evaluation. One version can be used before intervention implementation to evaluate individuals' vocabulary knowledge and the second version can be used for re-testing to assess and note progress. The PPVT-4 also features a distinctive Growth Scale Value (GSV) which is sensitive to slight changes in time.

The story revolves around the character of William Bellman, who as a boy commits a small cruel act that seems to have unforeseen and terrible consequences. The killing of a rook with his catapult is soon forgotten amidst the riot of boyhood games. However, as he grows up and has a family of his own, he seems to be a man blessed by fortune until tragedy strikes. A stranger in black comes into his life, and William starts to wonder if all his happiness is about to be eclipsed. In a desperate bid to save the one precious thing he has left, he enters into a rather strange bargain, with an even stranger partner, to found a decidedly macabre business. And thus, Bellman & Black is born.

Nightmare that Never Ends

Sam awoke with a scream, his body drenched in sweat. The same unsettling nightmare had once again plagued his sleep, the one where he was chased by a ominous figure wielding a blade. He glanced at the clock; it was 3:15 am. He tried to soothe his thundering heart, attempting to convince himself that it was merely a product of his subconscious. Yet, deep down, he knew it was far more than that. He knew the enigmatic figure was tangible, and it was approaching towards him. He had seen it before, in the frightening news reports, in the detailed police sketches, in the haunted faces of the victims. It was the notorious serial killer that had been terrorizing the city for what seemed like an eternity. And Sam was the killers next victim.
