Leading Works in Criminal Law 2023-08-11 Chloë Kennedy This book analyses a selection of leading works in the criminal law to ask questions about how the modern discipline of criminal law has developed, how it has been deployed in colonial and postcolonial contexts, and how criminal law scholarship has engaged with traditionally marginalised perspectives such as feminism, queer theory, and anti-carceral and abolitionist movements. The works analysed range from Macaulay's *Indian Penal Code* (1837) to more recent textbooks and monographs on criminal law, and their jurisdictional reach extends to India, Canada, Australia, Malawi, the UK and the USA. The contributing authors include scholars, activists and legal practitioners, each of whom explores the intellectual development and geographical reach of Anglocriminal law via the work they analyse. Across the collection, the editors and contributors address the question of what it means to be a leading work in criminal law. The book will be a valuable resource for students, academics and researchers working in the area of criminal law.

Corporations and Criminal Responsibility 2001 Celia Wells Contemporary concern about technological hazards posed by business enterprises has intensified interest in the criminality of corporations. Incorporating ideas from a wide range of literature, the book argues that there is no magic answer to corporate power, to issues of personal safety and their inter-relationship with criminal law and justice. The attention paid to corporate criminal liability by courts, legislatures, law reform bodies and international organizations has increased markedly in the past decade. As in the first edition, the book takes what might be called a panoptic approach to the subject. Corporations and their susceptibility to criminal law are examined from sociological, psychological, philosophical and organizational perspectives as the book progresses. This edition has been revised and updated to take account of the burgeoning scholarly literature. Detailed analysis of judicial and legislative movements in England and Wales, in other national jurisdictions and at the level of international organizations follows. Two new chapters, on corporate manslaughter and on comparative and international responses to corporate crime, accommodate these changes. The book is distinctive in combining legal analysis and discussion of law reform debates with a theoretical account of the relationship between legal institutions and the role of risk and blame in shaping criminal law and the practices of the criminal justice system.

The Oxford Handbook of Criminal Law 2014-11-27 Markus D Dubber The Oxford Handbook of Criminal Law reflects the continued transformation of criminal law into a global discipline, providing scholars with a comprehensive international resource, a common point of entry into cutting edge contemporary research and a snapshot of the state and scope of the field. To this end, the Handbook takes a broad approach to its subject matter, disciplinarily, geographically, and systematically. Its contributors include current and future research leaders representing a variety of legal systems, methodologies, areas of expertise, and research agendas. The Handbook is divided into four parts: Approaches & Methods (I), Systems & Methods (II), Aspects & Issues (III), and Contexts & Comparisons (IV). Part I includes essays exploring various methodological approaches to criminal law (such as criminology, feminist studies, and history). Part II provides an overview of systems or models of criminal law, laying the foundation for further inquiry into specific conceptions of criminal law as well as for comparative analysis (such as *Lacey Wells And Quick Reconstructing Criminal Law Text And Materials Law In Context Pdf Pdf* upload Arnold u Paterson

Islamic, Marxist, and military law). Part III covers the three aspects of the penal process: the definition of norms and principles of liability (substantive criminal law), along with a less detailed treatment of the imposition of norms (criminal procedure) and the infliction of sanctions (prison or corrections law). Contributors consider the basic topics traditionally addressed in scholarship on the general and special parts of the substantive criminal law (such as jurisdiction, mens rea, justifications, and excuses). Part IV places criminal law in context, both domestically and transnationally, by exploring the contrasts between criminal law and other species of law and state power and by investigating criminal law's place in the projects of comparative law, transnational, and international law.

On Crime, Society, and Responsibility in the work of Nicola Lacey 2021-03-18 Iyiola Solanke Few contemporary scholars have done more in their work to develop the idea of responsibility than Nicola Lacey. She ranks alongside thinkers and writers such as HLA Hart and Antony Honoré in developing approaches to understanding responsibility. Like these authors, the influence of her work has spread beyond academia to change the perception of responsibility amongst practitioners. Both Hart and Honoré have during their lifetime had volumes dedicated to their work. This book does the same for Nicola Lacey, marking her ongoing influence and accomplishments in the common law world through a collection of essays by leading international scholars reflecting and interrogating her contribution to understanding criminal responsibility. Additionally, the book aims to promote the best legal scholarship on responsibility in the common law world and inspire the brightest legal scholars through a collection of essays designed to mark Professor Lacey's ongoing contribution to the understanding of criminal responsibility. The role of Professor Lacey's work in this area (as well as others) cannot be overlooked: her scholarship includes not only a prize-winning biography of HLA Hart himself but numerous articles and tomes on the subject, culminating with her most recent work *In Search of Criminal Responsibility: Ideas, Interests, and Institutions* (OUP 2016). This Festschrift, one of few common law publications to pay homage to the erudition of a female jurist, can be seen as a continuation of the themes in this book via reflection and interrogation of her work by leading scholars on the topic. The Festschrift will therefore not only be a celebration of her work but also an attempt to take forward intellectual engagement with the topic of responsibility by continued engagement with her ideas. Each author brings new ideas to bear on her work, touching upon important aspects of responsibility that are current in the scholarship: categorization, frameworks for understanding criminal responsibility and the relationships between them, women in criminal law, the history of criminal law, blameworthiness and ascriptions of responsibility, moral responsibility, the role of politics and political economy. Nicola Lacey is a School Professor of Law, Gender, and Social Policy. From 1998 to 2010 she held a Chair in Criminal Law and Legal Theory at the LSE; she returned to the LSE in 2013 after spending three years as Senior Research Fellow at All Souls College, and Professor of Criminal Law and Legal Theory at the University of Oxford. She has held a number of visiting appointments, most recently at Harvard Law School and the Australian National University. She is an Honorary Fellow of New College Oxford and University College Oxford; and a Fellow of the British Academy. In 2011 she was awarded the Hans Sigrüst Prize by the University of Bern for outstanding scholarship on the function of the rule of law in late modern societies; and in 2018, an Honorary Doctorate by the University of Edinburgh. In 2017 she was awarded a CBE for services to Law, Justice, and Gender Politics.

International Criminal Law and Philosophy 2010 Larry May The purpose of this book series is to clarify and improve the theoretical foundations of international law. Too often the progressive development and implementation of international law has foundered on confusion about first principles. This series will raise the level of public and scholarly discussion about the structure and purposes of the world legal order and how best to achieve global justice through law. The idea for this series grows out of the International Legal Theory project of the American Society of International Law. Each year for the past decade, the ASIL has devoted special attention to a different aspect of international law and has invited scholars and practitioners to discuss the theoretical basis of such topics as customary international law, humanitarian law, and human rights. The ASIL Studies in International Legal Theory series will deepen this exchange by publishing scholarly monographs and edited volumes of essays considering subjects in international legal theory. Ranging across such central issues as moral luck, mistake, and mental illness, Action and Value in Criminal Law aims to reorientate the study of criminal law.

The Preventive Turn in Criminal Law 2017-04-28 Henrique Carvalho Through a theoretical examination of the preventive turn in criminal law and justice which has gained momentum in Anglo-American criminal justice systems since the late-twentieth century, The Preventive Turn in Criminal Law demonstrates how recent transformations in criminal law and justice are intrinsically related to and embedded in the way liberal society and liberal law have been imagined, developed, and conditioned by its social, political, and historical context. Henrique Carvalho identifies a tension between the idea of punishment as an expression of individual justice, and prevention as a manifestation of the need for security and the promotion of welfare. Tracing this tension back to an intrinsic ambivalence within the modern conception of individual liberty, which is both repressed and preserved by liberal conceptions of responsibility and punishment, Carvalho proves that as long as this ambivalence remains unexamined, liberal law has the potential to both promote and undermine individual justice. Engaging with the dominant contemporary literature on criminal law, prevention, risk, security, and criminalisation, this volume deploys a theoretical perspective developed through a critical analysis of both classical and contemporary works of social and political theory. The book reveals that the pervasiveness of prevention in 21st century criminal justice systems represents not only the consequence of new and unprecedented features of contemporary politics and society, but also the manifestation of essential aspects of the liberal legal and political tradition.

Principles and Values in Criminal Law and Criminal Justice 2012-08-16 Lucia Zedner Celebrating the scholarship of Andrew Ashworth, Vinerian Professor of English Law at the University of Oxford, this collection brings together leading international scholars to explore questions of principle and value in criminal law and criminal justice. Internationally renowned for elaborating a body of principles and values that should underpin criminalization, the criminal process, and sentencing, Ashworth's contribution to the field over forty years of scholarship has been immense. Advancing his project of exploring normative issues at the heart of criminal law and criminal justice, the contributors examine the important and fascinating debates in which Ashworth's influence has been greatest. The essays fall into three distinct but related areas, reflecting Ashworth's primary spheres of influence. Those in Part 1 address the import and role of principles in the development of a just criminal law, with contributions focusing upon core tenets such as the presumption of innocence, fairness, accountability, the principles of criminal liability, and the grounds for defences. Part 2 addresses questions of human rights and due process protections in both domestic and international law. In Part 3 the essays are addressed to core issues in sentencing and punishment: they explore questions of equality, proportionality, adherence to the rule of law, the totality principle (in respect of multiple offences), wrongful acquittals, and unduly lenient sentences. Together they demonstrate how important Ashworth's work has been in shaping how we think about criminal law and criminal justice, and make their own invaluable contribution to contemporary discussions of criminalization and punishment.

The Constitution of the Criminal Law 2013-01-31 R. A. Duff The third book in the Criminalization series examines the constitutionalization of criminal law. It considers how the criminal law is constituted through the political processes of the state; how the agents of the criminal law can be answerable to it themselves; and finally, how the criminal law can be constituted as part of the international order. Addressing the ways in which and the grounds on which types of conduct can be justifiably criminalized, the first four chapters of this volume focus on the questions that arise from a consideration of the political constitution of the criminal law. The contributors then turn their attention to the role of the state, its institutions and officials, and their role not only as creators, enactors, interpreters, and enforcers of the criminal law, but also as subjects of it. How can the agents of the criminal law also be answerable to it? Finally, discussion turns to how the criminal law can be

constituted as part of an international order. Examining the relationships between domestic laws of different nation-states, and between domestic criminal law and international or transnational law, the chapters also look at the authority and jurisdiction of international criminal law itself, and its relationship to other dimensions of the international order. A vital examination of one of the most important topics in modern criminal legal theory, this volume raises new questions central to the study of the criminal law and offers new suggestions for addressing them.

Criminal Law for Criminologists 2020-03-09 Noel Cross Criminal Law for Criminologists uses theoretical and practical research to bridge the gap between 'the law in the books' (criminal law doctrine) and 'the law in action' (criminal justice process). It introduces the key policies and principles that drive criminal law in England and then explains the law itself in terms of relevant statute and case law. Starting with an outline of the basic principles and theories of criminal law and criminal justice, the author goes on to discuss: Criminal law and criminal justice in historical perspective, General principles of criminal law, including actus reus and mens rea, Specific types of criminal offence, including property, homicide, sexual, public order and drug offences, An overview of defences to crime, An appendix outlining essential legal skills. In examining the links between the worlds of criminal law and criminal justice, Criminal Law for Criminologists brings a fresh perspective to this field of research. Written in a clear and direct style, this book will be essential reading for students of criminology, criminal justice, law, cultural studies, social theory, and those interested in gaining an introduction to criminal law.

Criminal Law Principles and the Enforcement of EU and National Competition Law 2019-11-20 Marc Veenbrink Although Article 23(5) of EU Regulation 1/2003 provides that competition law fines 'shall not be of a criminal law nature', this has not prevented certain criminal law principles from finding their way into European Union (EU) competition law procedures. Even more significantly, the deterrent effect of competition law fines has led courts in the Netherlands and the United Kingdom (UK), as well as the European Court of Human Rights, to conclude that competition law proceedings can lead to a criminal charge. This book offers the first book-length study of whether courts do indeed apply criminal law principles in competition law proceedings and, if so, how these principles are adapted to the needs and characteristics of competition law. Focusing on competition law developments (both legislative and judicial) over a period of twenty years in three jurisdictions – the Netherlands, the UK and the EU – the author compares how each of the following (criminal law) principles has emerged and been interpreted in each jurisdiction's proceedings: freedom from self-incrimination; non bis in idem; burden

and standard of proof; legality and legal certainty; and proportionality of sanctions. The author offers proposals involving both legislative and judicial actions, with examples of judges invoking criminal law principles to develop an appropriate level of safeguards in competition law proceedings. The book shows that criminal law can provide a rich source of inspiration for the judiciary on the appropriate level of legal safeguards in competition law proceedings. As such, it provides an important source of information and guidance for lawyers and judges dealing with competition law matters. "The work is well argued and well researched. Indeed, it is almost encyclopaedic in its use and citation of case law and secondary material....This book provides a valuable resource for anyone (whether as advocate, investigator, adjudicator or academic researcher) who wishes to understand how these criminal law principles are used in, and to protect those subject to, administrative law-based competition investigations." In Search of Criminal Responsibility 2016-04-26 Nicola Lacey What makes someone responsible for a crime and therefore liable to punishment under the criminal law? Modern lawyers will quickly and easily point to the criminal law's requirement of concurrent actus reus and mens rea, doctrines of the criminal law which ensure that someone will only be found criminally responsible if they have committed criminal conduct while possessing capacities of understanding, awareness, and self-control at the time of offense. Any notion of criminal responsibility based on the character of the offender, meaning an implication of criminality based on reputation or the assumed disposition of the person, would seem to today's criminal lawyer a relic of the 18th Century. In this volume, Nicola Lacey demonstrates that the practice of character-based patterns of attribution was not laid to rest in 18th Century criminal law, but is alive and well in contemporary English criminal responsibility-attribution. Building upon the analysis of criminal responsibility in her previous book, *Women, Crime, and Character*, Lacey investigates the changing nature of criminal responsibility in English law from the mid-18th Century to the early 21st Century. Through a combined philosophical, historical, and socio-legal approach, this volume evidences how the theory behind criminal responsibility has shifted over time. The character and outcome responsibility which dominated criminal law in the 18th Century diminished in ideological importance in the following two centuries, when the idea of responsibility as founded in capacity was gradually established as the core of criminal law. Lacey traces the historical trajectory of responsibility into the 21st Century, arguing that ideas of character responsibility and the discourse of responsibility as founded in risk are enjoying a renaissance in the modern criminal law. These ideas of criminal responsibility are explored through an examination of the institutions through which they are produced, interpreted and executed; the interests which have shaped both doctrines and institutions; and the substantive social functions which criminal law and punishment have been expected to perform at different points in history.

The Realm of Criminal Law 2018-06-14 R A Duff We are said to face a crisis of over-criminalization: our criminal law has become chaotic, unprincipled, and over-expansive. This book proposes a normative theory of criminal law, and of criminalization, that shows how criminal law could be ordered, principled, and restrained. The theory is based on an account of criminal law as a distinctive legal practice that functions to declare and define a set of public wrongs, and to call to formal public account those who commit such wrongs; an account of the role that such practice can play in a democratic republic of free and equal citizens; and an account of the central features of such a political community, and of the way in which it constitutes its public realm-its civil order. Criminal law plays an important, but limited, role in such a political community in protecting, but also partly constituting, its civil order. On the basis of this account, we can see how such a political community will decide what kinds of conduct should be criminalized - not by applying one or more of the substantive master principles that theorists have offered, but by considering which kinds of conduct fall within its public realm (as distinct from the private realms that are not the polity's business), and which kinds of wrong within that realm require this distinctive kind of response (rather than one of the other kinds of available response). The outcome of such a deliberative process will probably be a more limited, and a more rational and principled, criminal law.

Criminal Law and the Man Problem 2019-04-04 Ngaire Naffine Men have always dominated the most basic precepts of the criminal legal world – its norms, its priorities and its character. Men have been the regulators and the regulated: the main subjects and objects of criminal law and by far the more dangerous sex. And yet men, as men, are still hardly talked about as the determining force within criminal law or in its exegesis. This book brings men into sharp focus, as the pervasively powerful interest group, whose wants and preoccupations have shaped the discipline. This constitutes the 'man problem' of criminal law. This new analysis probes the *Lacey, Women and Crime: Reconstructing Criminal Law Text*

unacknowledged thinking of generations of influential legal men, which includes the psychological and legal techniques that have obscured the operation of bias, even to the legal experts themselves. It explains how men's interests have influenced the most cherished legal norms, especially the rules of human contact, which were designed to protect men from other men, while specifically securing lawful sexual access to at least one woman. The aim is to test the discipline's broadest commitments to civility, and its trajectory towards the final resolution, when men and women were declared to be equal and equivalent legal persons. In the process it exposes the morally and intellectually limiting consequences of male power.

General Defences in Criminal Law 2016-04-15 Alan Reed The law relating to general defences is one of the most important areas in the criminal law, yet the current state of the law in the United Kingdom reveals significant problems in the adoption of a consistent approach to their doctrinal and theoretical underpinnings, as exemplified by a number of recent developments in legislation and case law. A coherent and joined-up approach is still missing. This volume provides an analysis of the main contentious areas in British law, and proposes ways forward for reform. The collection includes contributions from leading experts across various jurisdictions. Part I examines the law in the United Kingdom, with specialist contributions on Irish and Scottish law. Part II consists of contributions by authors from a number of foreign jurisdictions, all written to a common research grid for maximum comparability, which provide a wider background of how other legal systems treat problems relating to general defences in the context of the criminal law, and which may serve as points of reference for domestic law reform.

Scots Criminal Law 2015-01-01 Pamela R Ferguson *Scots Criminal Law* & "A Critical Analysis provides a clear statement of the current law for students and practitioners, with a theoretical and critical focus. Criminal Liability for Non-Aggressive Death 2016-05-13 Sally Cunningham The crime of manslaughter exists as a 'catch-all offence' to punish those who are blameworthy in causing the death of another but whose culpability falls short of that required for murder. Manslaughter is an extremely broad offence and it has a difficult task in ensuring that all those who warrant punishment for 'non-aggressive' deaths are convicted. Simultaneously, it should not be too broad in covering those who do not warrant punishment for such deaths. There is little consistency in whether a particular dangerous activity leads to liability for a specific offence or for the generic offence of manslaughter when death is caused. This book examines the current law and includes a variety of perspectives on the subject with chapters on specific modes of killing as well as issues that permeate all areas. The first half of the book deals with issues such as how any special offences for non-aggressive death should relate to a hierarchy of homicide offences. The second half deals with issues specific to different activities, which may or may not justify the creation of specific homicide offences. The book includes a comparative chapter on Australian law.

The Teaching of Criminal Law 2016-08-19 Kris Gledhill *The Teaching of Criminal Law* provides the first considered discussion of the pedagogy that should inform the teaching of criminal law. It originates from a survey of criminal law courses in different parts of the English-speaking world which showed significant similarity across countries and over time. It also showed that many aspects of substantive law are neglected. This prompted the question of whether any real consideration had been given to criminal law course design. This book seeks to provide a critical mass of thought on how to secure an understanding of substantive criminal law, by examining the course content that best illustrates the thought process of a criminal lawyer, by presenting innovative approaches for securing active learning by students, and by demonstrating how criminal law can secure other worthwhile graduate attributes by introducing wider contexts. This edited collection brings together contributions from academic teachers of criminal law from Australia, New Zealand, the United Kingdom, and Ireland who have considered issues of course design and often implemented them. Together, they examine several innovative approaches to the teaching of criminal law that have been adopted in a number of law schools around the world, both in teaching methodology and substantive content. The authors offer numerous suggestions for the design of a criminal law course that will ensure students gain useful insights into criminal law and its role in society. This book helps fill the gap in research into criminal law pedagogy and demonstrates that there are alternative ways of delivering this core part of the law degree. As such, this book will be of key interest to researchers, academics and lecturers in the fields of criminal law, pedagogy and teaching methods.

Ideology and Criminal Law 2019-09-05 Stephen Skinner With populist, nationalist and repressive governments on the rise around the world, questioning the impact of politics on the nature and role of law and the state is a pressing concern. If we are to

understand the effects of extreme ideologies on the state's legal dimensions and powers – especially the power to punish and to determine the boundaries of permissible conduct through criminal law – it is essential to consider the lessons of history. This timely collection explores how political ideas and beliefs influenced the nature, content and application of criminal law and justice under Fascism, National Socialism, and other authoritarian regimes in the twentieth century. Bringing together expert legal historians from four continents, the collection's 16 chapters examine aspects of criminal law and related jurisprudential and criminological questions in the context of Fascist Italy, Nazi Germany, Nazi-occupied Norway, apartheid South Africa, Francoist Spain, and the authoritarian regimes of Brazil, Romania and Japan. Based on original archival, doctrinal and theoretical research, the collection offers new critical perspectives on issues of systemic identity, self-perception and the foundational role of criminal law; processes of state repression and the activities of criminal courts and lawyers; and ideological aspects of, and tensions in, substantive criminal law.

The Moral Foundations of the Youth Justice System 2016-12-01 Raymond Arthur When is it fair to hold young people criminally responsible? If young people lack the capacity to make a meaningful choice and to control their impulses, should they be held criminally culpable for their behaviour? In what ways is the immaturity of young offenders relevant to their blameworthiness? Should youth offending behaviour be proscribed by criminal law? These are just some of the questions asked in this thoughtful and provocative book. In *The Moral Foundations of the Youth Justice System*, Raymond Arthur explores international and historical evidence on how societies regulate criminal behaviour by young people, and undertakes a careful examination of the developmental capacities and processes that are relevant to young people's criminal choices. He argues that the youth justice response needs to be reconceptualised in a context where one of the central objectives of institutions regulating children and young people's behaviour is to support the interests and welfare of those children. This timely book advocates a revolutionary transformation of the structure and process of contemporary youth justice law: a synthesised and integrated approach that is clearly distinct from that used for dealing with adults. This book is a key resource for students, academics and practitioners across fields including criminal law, youth justice, probation and social work.

Law and Order 2013-04-22 Robert Reiner Law and order has become a key issue throughout the world. Crime stories saturate the mass media and politicians shrilly compete with each other in a race to be the toughest on crime. Prisons are crammed to bursting point, and police powers and resources extended repeatedly. After decades of explosive increase in crime rates, these have plummeted throughout the Western world in the 1990s. Yet fear of crime and violence, and the security industries catering for these anxieties, grow relentlessly. This book offers an up-to-date analysis of these contemporary trends by providing all honest and concerned citizens with a concise yet comprehensive survey of the sources of current problems and anxieties about crime. It shows that the dominant tough law and order approach to crime is based on fallacies about its nature, sources, and what works in terms of crime control. Instead it argues that the growth of crime has deep-seated causes, so that policing and penal policy at best can only temporarily hold a lid down on offending. The book is intended to inform public debate about these vital issues through a critical deconstruction of prevailing orthodoxy. With its focus on current policies, problems and debates this book is also an excellent introduction to criminology for the growing numbers of students of the subject at all levels.

Instead it argues that the growth of crime has deep-seated causes, so that policing and penal policy at best can only temporarily hold a lid down on offending. The book is intended to inform public debate about these vital issues through a critical deconstruction of prevailing orthodoxy. With its focus on current policies, problems and debates this book is also an excellent introduction to criminology for the growing numbers of students of the subject at all levels.

Consent 2016-10-14 Alan Reed This volume presents a leading contribution to the substantive arena relating to consent in the criminal law. In broad terms, the ambit of legally valid consent in extant law is contestable and opaque, and reveals significant problems in adoption of consistent approaches to doctrinal and theoretical underpinnings of consent. This book seeks to provide a logical template to focus the debate. The overall concept addresses three specific elements within this arena, embracing an overarching synergy between them. This edifice engages in an examination of UK provisions, with specialist contributions on Irish and Scottish law, and in contrasting these provisions against alternative domestic jurisdictions as well as comparative contributions addressing a particularised research grid for consent. The comparative chapters provide a wider background of how other legal systems' treat a variety of specialised issues relating to consent in the context of the criminal law. The debate in relation to consent principles continues for academics, practitioners and within the criminal justice system. Having expert descriptions of the wider issues surrounding the particular discussion and of other legal systems' approaches serves to stimulate and inform that debate. This collection will be a major source of reference for future discussion.

Assessing the Harms of Crime 2022-04-28 Victoria A. Greenfield Assessing the Harms of Crime provides a firm analytical foundation for making normative decisions about criminal and related policy, taking harm—and its reduction—as a conceptual starting point and supplying the means for systematic, empirical analysis in a harm assessment framework. By exploring harm's place in legal history, theory, criminology, and related fields and by considering the relevance of harm and its reduction for both criminal policy and the governance of security, the book demonstrates the centrality of harm, including its reduction, to crime, policy, and governance. It also highlights a substantial gap in methods available to the policy community to take on harm and the challenges of developing them. Working to fill that gap, the book presents the authors' "Harm Assessment Framework," consisting of tools and a process to identify, evaluate, and rank harms and to carefully distinguish between harms that result directly from activities and those that are remote or driven at least partially by policy. The book also presents applications to complex crimes, primarily involving coca and cocaine, that show the framework's value with new, actionable insight to harm and policy. On this basis, the book argues that criminology would benefit from expanding its mission to include harm and target harm reduction and from positioning harm assessment as a core task. Lastly, it posits that systematic, empirical harm-based policy analysis can contribute positively to decisions about criminal policy and the governance of security and to advancing justice.

Crime, Reason and History 2014-10-09 Alan Norrie Many books seek to explain the general principles of the criminal law. *Crime, Reason and History* stands out and alone as a book that critically and concisely analyses these principles and comes up with a different viewpoint: that the law is shaped by social history and therefore systematically structured around conflicting elements. Updated extensively to include two new chapters on loss of control and self defence and with an extended treatment of offence and defence, this new edition combines challenging and sophisticated analysis with accessibility.

Sentencing and Human Rights 2022-10-06 Sarah J Summers This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. There has been little sustained consideration of the ways in which human rights act to safeguard the individual from substantive unfairness or injustice in the imposition of punishment. Human rights might be expected to play a pivotal role at the sentencing stage, regulating the process and substance of sentencing, mapping out the state's role, and affording it legitimacy in the imposition of punishment. The traditional view that sentencing theory is best understood as a branch of moral philosophy has obscured the importance of consideration of the special nature of state punishment as mediated by and through law and the significance of human rights principles, notably legality, proportionality, equality, and judicial responsibility for the determination of the

sentence. Sarah J Summers focusses on sentencing practices which are widespread across Europe and indeed further afield and their compatibility with constitutional or human rights principles. Sentencing and Human Rights develops a systematic account of the importance of human rights principles at sentencing stage. Consideration of these principles provides the basis for an examination of the way in which they might be expected to limit important sentencing practices, such as the imposition of aggravated sentences for previous convictions, the treatment of confessions and mandatory minimum sentences. It is not just that punishment follows a multitude of aims but rather that the balance of these aims may, and in the context of lengthy prison sentences almost certainly will, change during the sentence. This examination of the human rights limits on the sentence suggests that it might be necessary to reconsider the way in which state punishment is conceptualised in sentencing theory.

Sentencing Rape 2020-05-14 Graeme Brown This book presents an in-depth comparative study of sentencing practice for rape in six common law jurisdictions: England and Wales, Scotland, Ireland, Canada, New Zealand, and South Africa. It provides a thorough review of the medical literature on the physical and psychological effects of rape, the legal and philosophical literature on the seriousness of the offence, and the victim's role in sentencing. Given the increasingly common practice of perpetrators using mobile and online technologies to film or photograph the commission of sexual offences, the book examines recent socio-legal research on technology-facilitated sexual violence and considers the implications for sentencing. By building on recent scholarship on judicial decision making in sentencing and case law – comprising over 250 decisions of the relevant appellate courts – the book explores and critically analyses judicial approaches to rape sentencing. The analysis is undertaken with a view to suggesting possible reforms to rape sentencing in 'non-guideline' jurisdictions. In so doing, this book seeks to establish general principles for sentencing rape, assisting in the imposition of proportionate sentences. This book will be of interest to judges and practising lawyers; to those researching criminal law, criminal justice, criminology, and gender studies; and to policy makers, including sentencing councils and commissions, in common law jurisdictions worldwide.

Criminalization 2014-12-04 R A Duff The Criminalization series arose from an interdisciplinary investigation into criminalization, focussing on the principles that might guide decisions about what kinds of conduct should be criminalized, and the forms that criminalization should take. Developing a normative theory of criminalization, the series tackles the key questions at the heart of the issue: what principles and goals should guide legislators in deciding what to criminalize? How should criminal wrongs be classified and differentiated? How should law enforcement officials apply the law's specifications of offences? The fourth book in the series examines the political morality of the criminal law, exploring general principles and theories of criminalization. Chapters provide accounts of the criminal law in the light of ambitious theories about moral and political philosophy - republicanism and contractarianism, or reflect upon on the success of important theories of criminalization by viewing them in a novel light. Ideas that are fundamental to any complete theory of the criminal law - liberty, harm, and the effect on victims - are investigated in depth. Sociological investigation of the criminal law grounds a critical investigation into the principles of criminalization, both as a legislative matter, and with respect to criminalization practices, in contemporary and historical contexts. The volume broadens our conceptions of the theory of criminalization, and clarifies the role of the series in the development of this theory. It is essential reading for all interested in legal, political, and social theories of criminalization.

Kinship, Law and Politics 2020-07-02 Joseph E. David Why are we so concerned with belonging? In what ways does our belonging constitute our identity? Is belonging a universal concept or a culturally dependent value? How does belonging situate and motivate us? Joseph E. David grapples with these questions through a genealogical analysis of ideas and concepts of belonging. His book transports readers to crucial historical moments in which perceptions of belonging have been formed, transformed, or dismantled. The cases presented here focus on the pivotal role played by belonging in kinship, law, and political order, stretching across cultural and religious contexts from eleventh-century Mediterranean religious legal debates to twentieth-century statist liberalism in Western societies. With his thorough inquiry into diverse discourses of belonging, David pushes past the politics of belonging and forces us to acknowledge just how wide-ranging and fluid notions of belonging can be.
