Project Mustang 2012-06-12 Larry Lyles Project Mustang is a complete guide to restoring America's favorite muscle car, written by auto-restoration guru Larry Lyles, a regular contributor to Auto Restorer magazine. In this detailed 23-chapter volume, Lyles walks the car owner from the in-depth inspection of the vehicle and the beginning of the teardown to re-covering the seats and replacing the frame rail; and every step in between. The car restored for the project in the book is a 1968 California Special Mustang. The chapter titles themselves speak for what a straightforward DIY manual Lyles has written, as he details the step-by-step procedure of bringing a very cool rod back to life. Beginning the teardown, exterior and interior; repairing the sheet metal, door, and deck up; removing the major parts (driveshaft, engine, transmission, front suspension, steering system, etc.); removing old paint and replacing rust floors; no-weld rust repair; perfecting the metal; working with plastic body filler; priming and sanding; refinishing the components and underside, the door, interior, trunk, and body; wiring the car and installing the doors; applying the coatings, rebuilding the suspension, and installing the brake lines; installing the vinyl top cover, the headliner, and the glass; rebuilding and installing the engine; installing the front sheet metal, emblems, bumpers, stripes, carpet, and console; re-covering the seats; and replacing the frame rails. Each step in every chapter is photographed as the author progresses along, with captions to spell out exactly what has to happen. The book offers helpful advice about choice of

tools and tips to make even beginners feel confident about tackling the many steps involved. With nearly forty years experience in repairing, rebuilding, and restoring classic cars (and lots of non-classic ones!), Lyles emphasizes the reader's need to organize his or her project by determining the course of the project, researching suppliers, making lists of parts and their conditions, creating spreadsheets of estimated and actual costs, and photographing each component as a reference for later in case the restoration goes off track. Each chapter ends with a "notes" page for the reader to record his or her progress, making this manual a practical workbook as well. When the reader gets to the final pages of the book and reads the sections "Start the Engine" and "Test Drive the Car," there will be a true sense of accomplishment. An appendix of part suppliers and an index complete the book.

Spanish Mustangs in the Great American West 2009 John S. Hockensmith A stunning photographic legacy of the horse's reintroduction to North America Horses are an integral part of the American experience. They are so tied with the development of the nation and its psyche, it is impossible to imagine history without them. Yet prior to the arrival of Spanish explorers in the 1500s, horses had been absent from North America for millennia. In this beautifully illustrated volume, celebrated equine photographer John S. Hockensmith reveals how the return of horses with the conquistadors both altered American Indian

cultures and later supported the development of the United States. Gracing these pages are stunning full-color photographs of modern horses that carry the distinctive traits of their Spanish, Arab, and Barb forebears. Captured visually in the rugged Rocky Mountains or the rolling grassy plains of the West, these horses are our shared living legacy. From the tender private moments between mare and foal to the aggressive determination of clashing stallions, Hockensmith throws open a breathtaking window on these horses' lives. Given the ongoing debate about the future of North America's wild horses, many of which trace their ancestry to Spanish steeds and the early mustangs, this work will stand as a significant marker on the mutual path traveled by horse and human.

Me 262 vs P-51 Mustang 2019-12-26 Robert Forsyth Arguably two of the finest fighters built during the course of World War II, the Me 262 and P-51 Mustang heralded new dawns in aircraft performance. Making its operational debut in the summer of 1944, and powered by the Jumo 004 jet engine, the Me 262 outclassed Allied planes in terms of speed and firepower ratio, offering a formidable punch with four 30 mm MK 108 nose-mounted cannons. However, in the P-51, fitted with the Rolls-Royce (Packard) Merlin engine and drop tanks, the USAAF finally had a fighter that had the 'legs' to escort its heavy bombers deep into Reich airspace and back. If flown to its strengths, the P-51 was more than capable of taking on the feared Me 262 on an equal footing, despite the differences in power and top speed. Indeed, the Mustang proved to be the Luftwaffe fighter arm's nemesis. When the P-51D sortied over Germany from the summer of 1944 onwards, it shredded through the ill-trained and depleted Gruppen of the Luftwaffe's defence wings. This book examines the two fighters in detail, exploring their history and development and containing accurate descriptions of the combats between the P-51 Mustang and the Me 262 in what were some of the most bitter and large-scale aerial actions fought over Europe in

1944-45.

Flying beyond the stall 2014 Douglas A. Joyce The X-31 Enhanced Fighter Maneuverability Demonstrator was unique among experimental aircraft. A joint effort of the United States and Germany, the X-31 was the only X-plane to be designed, manufactured, and flight tested as an international collaboration. It was also the only X-plane to support two separate test programs conducted years apart, one administered largely by NASA and the other by the U.S. Navy, as well as the first X-plane

ever to perform at the Paris Air Show. Flying Beyond the Stall begins by describing the government agencies and private-sector industries involved in the X-31 program, the genesis of the supermaneuverability concept and its initial design breakthroughs, design and fabrication of two test airframes, preparation for the X-31's first flight, and the first flights of Ship #1 and Ship #2. Subsequent chapters discuss envelope expansion, handling qualities (especially at high angles of attack), and flight with vectored thrust. The book then turns to the program's move to NASA's Dryden Flight Research Center and actual flight test data. Additional tasking, such as helmet-mounted display evaluations, handling quality studies, aerodynamic parameter estimation, and a "tailless" study are also discussed. The book describes how, in the aftermath of a disastrous accident with Ship #1 in 1995, Ship #2 was prepared for its outstanding participation in the Paris Air Show. The aircraft was then shipped back to Edwards AFB and put into storage until the late 1990s, when it was refurbished for participation in the U. S. Navy's VECTOR program. The book ends with a comprehensive discussion of lessons learned and includes an Appendix containing detailed information.

Iacocca 1986-06-01 Lee Iacocca "Vintage Iacocca . . . He is fast-talking, blunt, boastful, and unabashedly patriotic. Lee Iacocca is also a genuine folk hero. . . . His career is breathtaking."—Business Week He's an American legend, a straight-shooting businessman who brought Chrysler back from the brink and in the process became a media celebrity, newsmaker, and a man many had urged to run for president. The son of Italian immigrants, Lee Iacocca rose spectacularly through the ranks of Ford Motor Company to become its president, only to be toppled eight years later in a power play that should have shattered him. But Lee Iacocca didn't get mad, he got even. He led a battle for Chrysler's survival that made his name a symbol

of integrity, know-how, and guts for millions of Americans. In his classic hard-hitting style, he tells us how he changed the automobile industry in the 1960s by creating the phenomenal Mustang. He goes behind the scenes for a look at Henry Ford's reign of intimidation and manipulation. He recounts the miraculous rebirth of Chrysler from near bankruptcy to repayment of its \$1.2 billion government loan so early that Washington didn't know how to cash the check.
