OBSERVATION: ORIGINS AND APPROACHES IN EARLY CHILDHOOD

2012-03-01 Podmore, Valerie This New Zealand adaptation looks both at historical roots of child observation as well as various approaches to observing young children in early years settings.

OBSERVING AND RECORDING THE BEHAVIOR OF YOUNG CHILDREN

2016 Dorothy H. Cohen In the Sixth Edition of their classic text, the authors reiterate the critical importance of observing and recording the behavior of young children, especially in the current atmosphere of accountability and testing. In addition, because children with special needs are now widely included in a majority of early childhood classrooms, they have completely rewritten a chapter to focus more broadly on observing behaviors that may be viewed as disquieting. Designed to help teachers better understand children's behavior, the book outlines methods for recordkeeping that provide a realistic picture of each child's interactions and experiences in the classroom. Numerous examples of teachers' observations of children from birth to age 8 enrich this work and make it accessible, practical, and enjoyable to read. With more than 130,000 copies in print, this valuable resource for pre- and inservice educators features: Fresh information about how children think and learn, how their language develops, and how their families, their culture, and their environment influence and help to shape them. Observations that reflect the increasingly diverse population in contemporary early childhood classrooms. The imperative for teachers to widen their lens in order to meet the needs of young children with a range of developmental capacities, abilities, and behaviors. "Responds to new knowledge about how children think, learn and develop language, and about the influences of families, culture, and other environmental influences."—Zero to Three (previous edition)

PSYCHOEDUCATIONAL ASSESSMENT AND REPORT WRITING

2014-11-10 Stefan C. Dombrowski This textbook provides in-depth instruction for conducting psychoeducational assessments of children in grades K-12 and conveying results through detailed, well-written reports. It takes readers step by step through the assessment process - collecting data, writing reports, and communicating conclusions - for students with conditions spanning the range of IDEA classifications such as autism, learning disabilities, emotional disturbances, and conditions covered by Section 504. The book offers not only a broad understanding of assessment and communication skills, but also of the ethical, legal, cultural, and professional considerations that come with psychoeducational evaluation. And its sample reports model clear, well-organized results accessible to parents and caregivers as well as teachers and colleagues. Key areas of coverage include: * Assessment basics: the testing environment and protocols, interviewing, and observation. * Report writing section by section, from reason for referral to summary and recommendations. * Guidelines for oral reporting, with case examples. * Special issues in psychoeducational assessment and report writing. * Sample psychoeducational reports using this framework. Psychoeducational Assessment and Report Writing is an essential text for graduate students, researchers, professors, and professionals in child and school psychology; assessment, testing, and evaluation; social work; and psychological methods/evaluation.

The Crowd

1896 Gustave Le Bon A work devoted to the study and characteristics of crowds. DESIGN FOR TOMORROW—VOLUME 1

2012-04-26 Amresh Chakrabarti This book showcases cutting-edge research papers from the 8th International Conference on Research into Design (ICoRD 2021) written by eminent researchers from across the world on design processes, technologies, methods and tools, and their impact on innovation, for supporting design for a connected world. The theme of ICoRD'21 has been "Design for Tomorrow". The world as we know it in our times is increasingly becoming connected. In this interconnected world, design has to address new challenges of merging the cyber and the physical, the smart and the mundane, the technology and the human. As a result, there is an increasing need for strategizing and thinking about design for a better tomorrow. The theme for ICoRD'21 serves as a provocation for the design community to think about rapid changes in the near future to usher in a better tomorrow. The papers in this book explore these themes, and their key focus is design for tomorrow: how are products and their development be addressed for the immediate pressing needs within a connected world? The book will be of interest to researchers, professionals and entrepreneurs working in the areas on industrial design, manufacturing, consumer goods, and industrial management who are interested in the new and emerging methods and tools for design of new products, systems and services.

TRANSFORMING THE WORKFORCE FOR CHILDREN BIRTH THROUGH AGE 8

2015-07-23 National Research Council Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.
