The Criteria to Winner: Security and Risk Management for Printed Lottery
2010-06-02 Hyejung Moon The purpose of this criteria is to provide security control standards for the printed lottery system by providing detailed procedures, recommended technologies, and related examples for the lottery industry. Although WLA covers such topics at a good principle level, it is my goal to break them down into

further applicable details to help such lottery jurisdictions that have poor technological infrastructure and regulations to better manage their instant lottery business. This document is intended to present examples and to further assist in developing advanced security and risk management plan in order to effectively meet WLA standards. This document will offer basic and proven processes to support those instant lottery jurisdictions that have not yet matured and are sustaining technical operations via their own legacy solutions.

Behavioral Interventions in Schools

2011-01-19 David Hulac This book is a how-to manual for school mental health professionals, educators, and administrators that discusses a series of steps that can be used to proactively manage and prevent many different types of behavioral problems in a positive manner. It incorporates both the high structure and high behavioral expectations that are crucial for school success, but also describes following this structure in such a way that students feel included, important, and respected. Rather than requiring the mental health providers to investigate the research themselves and come up with a behavioral problem solving model, this book includes step-by-step guides on how to implement school-wide and classroom-wide

interventions in a response-to-intervention format. For those students who demonstrate more behavior problems, more intensive interventions are included to help alleviate those problems. The first section of the book discusses Tier I interventions and assessments designed to ensure that the school is effectively implementing a high quality, research-based behavioral management system. The next section covers Tier II interventions, those used for students who do not respond adequately to those of Tier I. These interventions are research-based, rigorous, and designed to address a broad range of behavior problems. Finally, the last section discusses Tier III interventions for students in need of highly individualized and intensive interventions to manage behavior problems.

Gambling Regulation and Vulnerability
2018-03-30 Malgorzata Anna Carran Since the UK Gambling Act of 2005 was introduced, gambling has stopped being seen, politically and legally as an inherent vice and is now viewed as a legitimate form of entertainment. Gambling Regulation and Vulnerability explores the laws around gambling that aim to protect society and individuals, examining the differences between regulatory rhetoric and the impact of legislative and regulatory measures. Malgorzata Carran finds that although the Gambling Act introduced many positive changes to gambling regulation, it has created an environment in which protection of vulnerable individuals becomes difficult.
