Pirate Cinema 2012-10-02 Cory Doctorow From the New York Times bestselling author of Little Brother, Cory Doctorow, comes Pirate Cinema, a new tale of a brilliant hacker runaway who finds himself standing up to tyranny. Trent McCauley is sixteen, brilliant, and obsessed with one thing: making movies on his computer by reassembling footage from popular films he downloads from the net. In the dystopian near-future Britain where Trent is growing up, this is more illegal than ever; the punishment for being caught three times is that your entire household's access to the internet is cut off for a year, with no appeal. Trent's too clever for that too happen. Except it does, and it nearly destroys his family. Shamed and shattered, Trent runs away to London, where he slowly learns the ways of staying alive on the streets. This brings him in touch with a demimonde of artists and activists who are trying to fight a new bill that will criminalize even more harmless internet creativity, making felons of millions of British citizens at a stroke. Things look bad. Parliament is in power of a few wealthy media conglomerates. But the powers-that-be haven't entirely reckoned with the power of a gripping movie to change people's minds.... Terrorists' Target Selection 1998-08-26 C. Drake The author examines the factors which influence terrorists' target selection. In particular he looks at the influence of the ideologies, strategies and tactics of terrorist groups, and describes how these are restricted by the terrorists' resources, by protective and anti-terrorist measures, by the society within which the terrorists operate, and by the nature of the terrorists and their supporters. He concludes that terrorists' target selection is often both explicable and logical.

The Secret Team 2011-04-01 L. Fletcher Prouty The Secret Team, L. Fletcher Prouty's CIA exposé, was first published in the 1970s, but virtually all copies of the book disappeared upon distribution, purchased en masse by shady "private buyers." Certainly Prouty's amazing allegations—that the U-2 Crisis of 1960 was fixed to sabotage Eisenhower-Khrushchev talks, and that President Kennedy was assassinated to keep the U.S., and its defense budget, in Vietnam—cannot have pleased the CIA. Though suppressed (until now), The Secret Team was an important influence for Oliver Stone's Academy Award-winning film JFK and countless other works on U.S. government conspiracies, and it raises the same crucial question today that it did on its first appearance: who, in fact, is in control of the United States and the world?

Angry Brigade 2008-11-01 Gordon Carr “You can’t reform profit capitalism and inhumanity. Just kick it till it breaks.” – Angry Brigade, communiqué. Between 1970 and 1972 the Angry Brigade used guns and bombs in a series of symbolic attacks against property. A series of communiqués accompanied the actions, explaining the choice of targets and the Angry Brigade philosophy: autonomous organization and attacks on property alongside other forms of militant working class action. Targets included the embassies of repressive regimes, police stations and army barracks, boutiques and factories, government departments and the homes of Cabinet ministers, the Attorney General and the Commissioner of the Metropolitan Police. These attacks on the homes of senior political figures increased the pressure for results and brought an avalanche of police raids. From the start the police were faced with the difficulty of getting to grips with a section of society they found totally alien. And were they facing an organization—or an idea? This documentary, produced by Gordon Carr for the BBC (and first shown in January 1973, shortly after the trial), covers the roots of the Angry Brigade in the revolutionary ferment of the 1960s, and follows their campaign and the police investigation to its culmination in the “Stoke Newington 8” conspiracy trial at the Old Bailey—the longest criminal trial in British legal history. Produced after extensive research—among both the libertarian opposition and the police—it remains the essential study of Britain’s first urban guerilla group. Extra: The Persons Unknown (1980, 22 minutes) The so-called “Persons Unknown” case in which members of the Anarchist Black Cross were tried (and later acquitted) at the Old Bailey on charges of “conspiring with persons unknown, at places unknown, to cause explosions and to overthrow society.” Featuring interviews and footage of Stuart Christie, Nicholas Walter, Crass and many other UK anarchist activists and propagandists of the time.

Twelve Years A Slave, Illustrated Edition 2014-04-08 Solomon Northup Kidnapped and sold into slavery in the American South, freeman Solomon Northup spent twelve years in bondage before being freed. Twelve Years a Slave is Northup’s moving memoir, revealing unimaginable details of the horrors he faced as a slave on Southern plantations, and his unshakable belief that he would return home to his family. Written in the year after Northup was freed and published in the wake of Harriet Beecher Stowe’s Uncle Tom’s Cabin, Northup’s story was quickly taken up by abolitionist groups and news organizations as part of the fight against slavery, and continues to resonate more than a century after the end of the American Civil War.

The Economics of Tourism Destinations 2012-06-30 Guido Candela The book aims at providing an overview of the main economic issues related to tourism activities. While tourism is an important sector, contributing to more than 10% of the European Union’s GDP, research and teaching at the university level has only recently grown to a considerable level, and the field still lacks a firm research methodology. This book approaches tourism economics as an applied field of study in which tourism markets are represented as imperfect markets, with asymmetric and incomplete information among agents, bounded rationality, and with a strong presence of externalities and public goods. The economic issues studied in the book are approached both intuitively, largely using examples and case studies, and formally, with mathematical formalizations in text boxes.

Race and State 1997 Eric Voegelin In Part II Voegelin deals with race ideas, which he distinguishes from race theories. Race ideas, like other political ideas, form a part of political reality itself, contributing to the formation of social groups and societies. Voegelin shows that the modern race idea is just one "body idea" among others, such as the tribal state and the Kingdom of Christ, each offering a different symbolic image of community.

Private Market Financing 1995-01-01 International Monetary Fund This paper reports the growing number of low-income countries that are making efforts to resolve their debt problems, often aided by the resources of the debt reduction facility for countries of the International Development Association (IDA). Progress for most, however, remains slow. With the backing of IDA resources and assistance from official bilateral sources, debt buy-backs have been concluded by Bolivia, Guyana, Mozambique, Niger, Sao Tome and Principe, Uganda, and Zambia. Preliminary discussions on similar operations are under way with several other countries. Although most of the major baric debt cases have been resolved, attention still needs to be focused on the problems of low-income countries. In many of these countries, the process of debt restructuring has been delayed owing to economic and political difficulties. To maintain market access on reasonable terms, countries need consistently to implement strong macroeconomic and structural policy programs. Maintenance of such programs is likely to be particularly important in the period ahead, given the high degree of uncertainty with regard to interest rate movements in the industrial countries.

Historical Dictionary of International Intelligence 2015-05-21 Nigel West Intelligence is now acknowledged as the hidden dimension to international diplomacy and national security. It is the hidden piece of the jigsaw puzzle of global relations that cements relationships, undermines alliances and topples tyrants, and after many decades of being deliberately overlooked or avoided, it is now regarded as a subject of legitimate study by academics and historians. This second edition of Historical Dictionary of International Intelligence covers its history through a chronology, an introductory essay, and an extensive bibliography. The dictionary section has over 500 cross-referenced entries on espionage techniques, categories of agents, crucial operations spies, defectors, moles, double and triple agents, and the tradecraft they apply. This book is an excellent access point for students, researchers, and anyone wanting to know more about the international intelligence.

David Vizard’s How to Port and Flow Test Cylinder Heads 2012 David Vizard Porting heads is an art and science. It takes a craftsman's touch to shape the surfaces of the head for the optimal flow characteristics and the best performance. Porting demands the right tools, skills, and application of knowledge. Few other engine builders have the same level of knowledge and skill porting engine heads as David Vizard. All the aspects of porting stock as well as aftermarket heads in aluminum and cast-iron constructions are covered. Vizard goes into great depth and detail on porting aftermarket heads. Starting with the basic techniques up to more advanced techniques, you are shown how to port iron and aluminum heads as well as benefits of hand and CNC porting. You are also shown how to build a high-quality flow bench at home so you can test your work and obtain professional results. Vizard shows how to optimize flow paths through the heads, past the valves, and into the combustion chamber. The book covers blending the bowls, a basic porting procedure, and also covers pocket porting, porting the intake runners, and many advanced procedures. These advanced procedures include unshrouding valves, porting a shortside turn from the floor of the port down toward the valve seat, and developing the ideal port area and angle. All of these changes combine to produce optimal flow velocity through the engine for maximum power.

Transport, Energy and CO2 2009 International Energy Agency Car ownership is set to triple by 2050, trucking activity will double and air travel could increase fourfold. This book examines how to enable mobility without accelerating climate change. It finds that if changes are made to the way people travel, adoption of technologies to improve vehicle efficiency and a shift to low-CO2 fuels, it is possible to move onto a different pathway where transport CO2 emissions by 2050 are far below current levels, at costs that are lower than many assume. the report discusses the prospects for shifting more travel to the most efficient modes and reducing travel growth rates, improving vehicle fuel efficiency by up to 50% using cost-effective, incremental technologies, and moving toward electricity, hydrogen, and advanced biofuels to achieve a more secure and sustainable transport future. If governments implement strong policies to achieve this scenario, transport can play its role and dramatically reduce CO2 emissions by 2050.

Leadership in Europe 1998-02 Heller, Johnny Although leadership is obviously a topic with global significance, this special issue has a distinctive European flavor. This is partly due to the fact that the contributors and editors hail from five European countries, but even the two chapters that describe major cross-national research covering up to 60 countries, concentrate attention on European issues including eastern countries that only moved into the center of Europe six or seven years ago. The justification for inclusion in this special issue is that each report makes a potentially practical contribution to work and organizational psychologists and those working in organizations in the area of Human Resource Management or Consultancy. European psychology has not yet given leadership anything like the attention it deserves and consequently the contrast with the United States, where this subject is extensively researched, is very noticeable. This special edition may lead to a reassessment of the opportunities and perhaps also act as a stimulus for more applied research to be carded out to engage with the prevalent conditions in Europe. The growth of the European Union and its various harmonization provisions seeks to establish what is often called a 'level playing field' for organizations and this will give leaders in competing enterprises new challenges and new opportunities. Several contributions in the present special issue begin to relate to these developing areas.

Geomorphology and Soils 2021-09-15 Taylor & Francis Group Soils and sediments influence current processes, preserve evidence of past processes, indicate evolutionary phases in landscapes and provide a basis for relative and absolute chronologies. They provide an important key to the integration of short-term process studies and investigation of longer-term landform evolution. This book, first published in 1985, has been arranged to provide wide temporal and spatial coverage, with studies ranging from historic to geologic time scales and micro- to macro-spatial scales. The interdisciplinary nature of the subject is reflected in contributions from soil scientists, engineering geologists, hydrologists and geomorphologists.

The book's also a great source of troubleshooting and preventive maintenance techniques. Japanese engines are also highlighted for the first time.

Mike Busch on Engines 2018-05-12 Mike Busch "The risk of engine failure is greatest when your engine is young, NOT when it's old. You should worry more about pediatrics than geriatrics." -Mike Busch A&P/IA Mike Busch on Engines expands the iconoclastic philosophy of his groundbreaking first book Manifesto to the design, operation, condition monitoring, maintenance and troubleshooting of piston aircraft engines. Busch begins with the history and theory of four-stroke spark-ignition engines. He describes the construction of both the "top end" (cylinders) and "bottom end" (inside the case), and functioning of key systems (lubrication, ignition, carburetion, fuel injection, turbocharging). He reviews modern engine leaning technique (which your POH probably has all wrong), and provides a detailed blueprint for maximizing the life of your engine. The second half presents a 21st-century approach to health assessment, maintenance, overhaul and troubleshooting. Busch explains how modern condition monitoring tools-like borescopy, oil analysis and digital engine monitor data analysis-allow you to extend engine life and overhaul strictly on-condition rather than an arbitrary TBO. The section devoted to troubleshooting problems like rough running, high oil consumption, temperamental ignition and turbocharging issues is worth its weight in gold. If you want your engine to live long and prosper, you need this book.

A intriguing package arrived, sent by her grandmother, who had left this world years ago. Within the package lay an ancient leather-bound book, its cover adorned with the inscription, "The Book of Shadows". As Eva opened the book, a torrent of magic coursed through her veins. But she also discovered that she was not alone. There were others like her, individuals who possessed similar abilities, and some of them sought to wield their magic for evil purposes. Eva faced a pivotal decision: embrace her destiny as a witch and delve into the world of sorcery, or reject her newfound powers and continue living her life as she had always known it.
