**Applied Demography for Biologists** 1993-02-04 James R. Carey This is the first book to comprehensively apply the fundamental tools and concepts of demography to a nonhuman species. It provides clear and concise treatment of standard demographic techniques such as life table analysis and population projection; introduces models that have seldom appeared outside of the demographic literature including the multiple decrement life table, the intrinsic sex ratio, and multiregional demography; and addresses demographic problems that are unique to nonhuman organisms such as the demographic theory of social insects and harvesting techniques applied to insect mass rearing. The book also contains a synthesis of fundamental properties of population such as momentum and convergence to the stable age distribution, with a section on the unity of demographic models, and appendices detailing analytical methods used to quantify and model the data gathered in a ground-breaking study on the mortality experience of 1.2 million medflies. Based on an insect demography course at the University of California, Davis, the book is intended for practicing entomologists, population biologists, and ecologists for use in research or as a graduate text.

**Environmental Engineering Dictionary and Directory** 2000-09-22 Thomas M. Pankratz Like most technical disciplines, environmental science and engineering is becoming increasingly specialized. As industry professionals focus on specific environmental subjects they become less familiar with environmental problems and solutions outside their area of expertise. This situation is compounded by the fact that many environmental science related terms are confusing. Prefixes such as bio-, enviro-, hydra-, and hydro- are used so frequently that it is often hard to tell the words apart. The Environmental Engineering Dictionary and Directory gives you a complete list of brand terms, brand names, and trademarks - right at your fingertips.

**Capitalism at the Crossroads** 2007-07-18 Stuart L. Hart "Capitalism at the Crossroads is built on strong theoretical underpinnings and illustrated with many practical examples. The author offers a pioneering roadmap to responsible macroeconomics and corporate growth." -Clayton Christensen, Professor of Business Administration, Harvard Business School and author of The Innovator's Dilemma "I hope this book will be able to influence the thought processes of corporations and motivate them to adapt to forthcoming business realities for the sake of their own long-term existence. Besides business leaders, this is a thought-provoking book for the readers who are looking for solutions to capitalism's problems." -Muhammad Yunus, Founder and Managing Director, Grameen Bank, Bangladesh and 2007 Nobel Peace Prize recipient "Capitalism at the Crossroads is a practical manifesto for business in the twenty-first century. Professor Stuart L. Hart provides a succinct framework for managers to harmonize concerns for the planet with wealth creation and unambiguously demonstrates the connection between the two. This book represents a turning point in the debate about the emerging role and responsibility of business in society." -C.K. Prahalad, Ross School of Business, University of Michigan, co-author of Competing for the Future and author of The Fortune at the Bottom of the Pyramid "Stuart Hart was there at the beginning. Years ago when the term 'sustainability' had not yet reached the business schools, Stuart Hart stood as a beacon glowing in the umbrage. It is clear commerce is the engine of change, design the first signal of human intention, and global capitalism is at the crossroads. Stuart Hart is there again; this time lighting up the intersection." -William McDonough, University of Virginia, co-author of Cradle to Cradle "Professor Hart is on the leading edge of making sustainability an understandable and useful framework for building business value. This book brings together much of his insights developed over the past decade. Through case studies and practical advice, he argues powerfully that unlimited opportunities for profitable business growth will flow to those companies that bring innovative technology and solutions to bear on some of the world's most intractable social and environmental problems." -Chad Holliday, Chairman and CEO, DuPont "Capitalism at the Crossroads clearly reveals the essence of what sustainability means to today's business world. Hart's analysis that businesses must increasingly adopt a business framework based on building sustainable value speaks to the entire sustainability movement's relevance. Sustainability is more than today's competitive edge; it is tomorrow's model for success." -Don Pether, President and CEO, Dofasco Inc. "Stuart Hart has written a book full of big insights painted with bold strokes. He may make you mad. He will certainly make you think." -Jonathan Lash, President, The World Resources Institute "A must-read for every CEO—and every MBA." -John Elkington, Chairman, SustainAbility "This book provides us with a vast array of innovative and practical ideas to accelerate the transformation to global sustainability and the role businesses and corporations will have to play therein. Stuart Hart manages to contribute in an essential way to the growing intellectual capital that addresses this topic. But, beyond that, the book will also prove to be a pioneer in the literature on corporate strategy by adding this new dimension to the current thinking." -Jan Oosterveld, Professor, IESE Business School, Barcelona, Spain Member, Group Management Committee (Ret.), Royal Philips Electronics "Capitalism at the Crossroads captures a disturbing and descriptive picture of the global condition. Dr. Hart constructs a compelling new corporate business model that simultaneously merges the metric of profitability along with societal value and environmental integrity. He challenges the corporate sector to take the lead and to invoke this change so that the benefits of capitalism can be shared with the entire human community worldwide." -Mac Bridger, CEO of Tandus Group "Stuart L. Hart makes a very important contribution to the understanding of how enterprise can help save the world's environment. Crucial reading." -Hernando de Soto, President of The Institute for Liberty and Democracy and author of The Mystery of Capital "Stuart Hart's insights into the business sense of sustainability come through compellingly in Capitalism at the Crossroads. Any businessperson interested in the long view will find resonance with his wise reasoning." -Ray Anderson, Founder and Chairman, Interface, Inc. "This stimulating book documents the central role that business will play in humanity's efforts to develop a sustainable global economy. Professor Hart presents an attractive vision of opportunity for those corporations that develop the new technologies, new business models, and new mental frames that are essential to a sustainable future." -Jeffrey Lehman, Former President of Cornell University "The people of the world are in desperate need of new ideas if global industrial development is ever to result in something other than the rich getting richer and the poor getting poorer, with nature (and potentially all of us) suffering the collateral damage. Few have contributed more to meeting this need over the past decade than Stuart Hart by helping to illuminate the potential role for business and new thinking in business strategy in the journey ahead. Capitalism at the Crossroads challenges, provokes, and no doubt will stimulate many debates—which is exactly what is needed." -Peter Senge, Massachusetts Institute of Technology, Chairperson of the Society for Organizational Learning, and author of The Fifth Discipline: The Art and Practice of The Learning Organization New Foreword by Al Gore Brand-New Second Edition, Completely Revised with: Up-to-the-minute trends and lessons learned New and updated case studies The latest corporate responses to climate change, energy, and terrorism Global capitalism stands at a crossroads-facing terrorism, environmental destruction, and anti-globalization backlash. Today's global companies are at a crossroads, too-searching desperately for new sources of profitable growth. Stuart L. Hart's Capitalism at the Crossroads, Second Edition is about solving both of those problems at the same time. It's about igniting new growth by creating sustainable products that solve urgent societal problems. It's about using new technology to deliver profitable solutions that reduce poverty and protect the environment. It's about becoming truly indigenous to all your markets, and avoiding the pitfalls of first-generation "greening" and "sustainable" strategies. Hart has thoroughly revised this seminal book with new case studies, trends, and lessons learned-including the latest experiences of leaders like GE and Wal-Mart. You'll find new insights from the pioneering BoP Protocol initiative, in which multinationals are incubating new businesses in income-poor communities. You'll also discover creative new ways in which corporations are responding to global warming and terrorism. More than ever, this book points the way toward a capitalism that's more inclusive, more welcome, and far more successful-for both companies and communities, worldwide. **Insect Hearing** 2016-06-14 Gerald S. Pollack Insect Hearing provides a broadly based view of the functions, mechanisms, and evolution of hearing in insects. With a single exception, the chapters focus on problems of hearing and their solutions, rather than being focused on particular taxa. The exception, hearing in *Drosophila*, is justified because, due to its ever growing toolbox of genetic and optical techniques, *Drosophila* is rapidly becoming one of the most important model systems in neurobiology, including the neurobiology of hearing. Auditory systems, whether insectan or vertebrate, must perform a number of basic tasks: capturing mechanical stimuli and transducing these into neural activity, representing the timing and frequency of sound signals, distinguishing between behaviorally relevant signals and other sounds and localizing sound sources. Studying how these are accomplished in insects offers a valuable comparative view that helps to reveal general principles of auditory function.

**Mammalian Sterols** 2020-08-10 Damjana Rozman This book provides a comprehensive description of sterols and their novel biological roles in mammalian signaling, the book covers their biosynthesis and structure, describes sterol receptor - mediated actions, their tissue distribution and their role in disease. It offers insight into new research findings, focusing specifically on novel discoveries in bile acid and oxysterol signaling, including the lanosterol-to-cholesterol intermediates. Special attention is paid on the sex distribution of these sterols (male or female) and their sexually dimorphic roles in mammalian species, such as human, rat and mouse. Since sterols and drugs (xenobiotics) use many identical receptor-mediated signaling pathways, the book will be interesting for researchers working on the cross-road of endogenous and xenobiotic metabolism, it is intended for advanced students and scientists in molecular biology and biochemistry as well as for medical doctors in hepatology.

**Insect Pathology** 2012-12-02 Yoshinori Tanada *Insect Pathology* is designed for a broad spectrum of readers. Is should be useful to students, lecturers, and researchers requiring information about the principles in insect pathology and the biology of pathogens. It should serve as a resource for specialists to learn about other insect pathogen systems, for generalists to become aware of advances in insect pathology, and for scientists and students, beginning or otherwise, interested in learning about insect pathology. This book was originally intended to update the 1949 test by E. A. Steinhaus entitled Principles of Insect Pathology. The purpose for this book was twofold: To serve (1) as a text for an insect pathology and/or biological control class and (2) as a comprehensive reference source. Because this book summarizes much of the available information, its usefulness as a textbook for an insect pathology class is apparent. Although the literature citations are extensive, they are far from complete. The literature in insect pathology is voluminous and for the past decade has been expanding at an almost exponential rate. A complete review of the literature is beyond the scope of the book, and an omission of a reference does not preclude its importance. Our citations, however, should serve as a good starting point for those who wish to obtain further information. We have attempted to cover equally all subdisciplines, but shortcomings are unavoidable. For these, we take full responsibility.

**The Dassie and the Hunter** 2005 Jeff Opland This book chronicles the life, times and poetry of extraordinary Xhosa praise poet, the late David Yali-Manisi, and his growing friendship and fruitful working relationship with author Jeff Opland. Opland is a renowned scholar who is recognized world-wide as a foremost authority on Xhosa izibongo or praises. His perceptive account gives insight not only into Manisi himself, but the complex art form of praise poetry-a spontaneous performance art of extraordinary subtlety and sophistication that, as Opland notes, embodies in itself the ancestral culture, history and politics of the Xhosa nation. What is unique about this book is the personal dimension that Opland brings to the subject, fusing impeccable scholarship with self-reflective autobiographical narrative. The book incorporates a variety of styles, from autobiographical to verbatim interview, and its shift of voice reflect the author's own internal journey as his deepening friendship with Manisi works its humanizing alchemy. The book is a celebration of the supreme talent of a gifted African poet, and the interaction of a black and a white South African reaching out to each other.

Learning from Gal Oya 1996 Norman Thomas Uphoff This first paperback edition - with a new introduction - recounts the drama of a remarkably successful experiment that introduced farmer organization for self-managed development in the largest and most run down, conflict-ridden irrigation system in Sri-Lanka, and now updates the story to record the author's picture of Gal Oya in 1996. Gal Oya, initially considered one of the least desirable areas in the country, became one of the most progressive and peaceful during the 1980's. People reshaped their working and living conditions and accomplished changes no-one previously thought possible. In an unusual combination of description and analysis, Norman Uphoff seeks to interpret the Gal Oya project and draws far-reaching conclusions for participatory development and contemporary social science. He documents and analyses the remarkable progress made by farmers, community organizers, researchers and, finally, policy-makers, iteratively forging progressive changes in the midst of ethnic and political strife.

He was exhausted of his existence. He was dull, unhappy, and unsatisfied. He had a work he hated, a boss he abhorred, and a girlfriend he didn't love. He had no passion, no goal, no value. He sensed like he was misusing his hours, his capability, his existence. He desired to modify, he wished to escape, he wished to live. He chose to leave his work, to break up with his significant other, to sell his belongings, and to buy a direct pass to the opposite end of the world. He didn't understand where he was going, he didn't know what he was carrying out, he didn't know what he was seeking. He only realized that he had to depart, that he had to discover, that he had to discover. A number of models are available for developing cost (or benefit) estimates, such as the per-unit model, the segmenting model, cost indexes, the power-sizing model, and learning curve cost estimating. The quality of a cost estimate usually increases as the resources allocated to developing the estimate increase.

The Peabody Picture Vocabulary Test 4th Edition (PPVT-4) is a widely recognized vocabulary test that has been in practice for almost half a century. Developed by Lloyd M. Dunn and Douglas M. It is quick and easy to conduct, saving important time so that attention can be set on executing successful approaches.

The PPVT-4 test subject matter includes a extensive array of receptive vocabulary ranks, extending from preschool through adult age. The assessment problems broadly feature words that represent 20 topic fields (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and home and educational vocabulary.

One edition can be utilized before intervention implementation to assess individuals' vocabulary comprehension and the other form can be employed for re-assessment to measure and note progress. The PPVT-4 also contains a distinctive Growth Scale Value (GSV) which is sensitive to small changes in time.
