One of the foremost effects of acupuncture on the body is relaxation. Stress is frequently pinpointed as the main precursor for a host of physical ailments. There are particular points all over the body that direct the flow of harmony and relaxation and when these are enthused, the patient becomes more at ease.

Another positive effect of this alternative therapy is increased pain control. During a session, a patient will usually feel very minimal pain as the thin needles are being inserted gradually. However, the needles are deliberately placed in varying depths, depending on the health requirements of the patient. When the needles reach the right depth, the patient will feel deeper pain, although the entire procedure is not necessarily painful.

It is also recommended for relief from chemotherapy fatigue as well as chemotherapy-related nausea. It has also been found to be largely effective for back pains, migraines, menstrual cramps, and as a pain controller for patients after undergoing surgical operations.

Amenorrhea is the condition in which the female skips her menses for more than three consecutive menstrual cycles. Amenorrhoea is also classified as primary amenorrhoea and secondary amenorrhoea. Primary amenorrhoea develops from the onset of menstrual periods. In this condition, the adolescent might not get periods when she enters puberty. Secondary amenorrhoea is a condition where periods become irregular after a period of time and not from the start.

There are many causes of amenorrhoea such as ovulation abnormality, eating disorders, birth defects, anatomical abnormalities, malnourishment, anorexia, bulimia, pregnancy, over exercising, thyroid disorder, obesity and other medical conditions. Out of these ovulation abnormalities are a common cause for absent or irregular periods. It is a must that an adolescent start getting menses at least by the age of sixteen. If not, anatomical abnormality, birth defect and other medical conditions are the cause. Adolescents who participate in sports actively and are athletic have a lower body fat content because of which they have absent menses. Even because of malnourishment, the body is incapable of sustaining pregnancy. So in turn the body itself shuts down the reproductive system and menses. Extra fat cells in the body interfere with ovulation and that is the reason why obese female have irregular menses. Amenorrhoea is treated by dietary modifications, ovulation inhibitors and hormone treatment.

In order for chi to course through the body unobstructed, there has to be a balance between the strengths of yin and yang. In ancient Chinese philosophy, yin and yang represent the forces of the universe- yin is for feminine, while yang is for masculine. Every single thing in the universe is believed to contain both yin and yang for harmony.

When the yin and yang are not balanced, chi cannot stream through the body liberally. Therefore, the meridian points through which chi courses through need to be stimulated. This is done by the insertion of hair-thin, disposable needles in specific areas on a person’s body to induce bodily harmony and bring about healing.

Instruments

Modern acupuncturists nowadays use disposable fine stainless steel needles that are 0.007 to 0.020 inches in diameter which are sterilized with either ethylene oxide or by autoclave. Since they are way finer than hypodermic syringe needles, being poked by these needles are relatively painless. The upper third of the needle is covered with either a thicker bronze wire or plastic to make the needle sturdier and easier to handle. The length of the needle and how far they are inserted is all up to the acupuncturist and his practised style of acupuncture.

Example Of Treatment

If a patient has a headache, he/she is diagnosed and is treated by stimulating the sensitive points located at the webs between the thumbs and palms. In acupuncture theory, these points are connected to the face and head and can be used for treatment of headaches and other ailments involved. Needles are then carefully inserted into the skin until the patient feels a twinge, which is usually accompanied by a slight involuntary twitching of the area. During this treatment, a number of things may occur.

- Sensitivity to pain in where needles are inserted.
- A hint of nausea during treatment in case of bad headaches.
- Near-immediate headache relief.

Nicotine is the addictive and toxic substance present in a cigarette. This is the same substance that makes quitting a big challenge for most smokers. The nicotine that you get from smoking will attach itself to the pleasure areas in the brain, making it hard for you to stop. Without a steady stream of this substance, a smoker will tend to feel depressed and uncomfortable.

People who have undergone acupuncture treatment reported that they no longer find cigarettes as tempting or as satisfying. Oftentimes, smoking would leave an awful taste in their mouths prompting them to stop their habit for once. Some patients would even resort to eating mints or lozenges to clear to get rid of the terrible aftertaste.

According to skilled practitioners, approximately 7 out of 10 smokers will successfully extricate themselves from their smoking habit after 2 or 3 weeks. While the others are unable to quit totally, these smokers will be able to cut down on their cigarette consumption quite significantly.

Acne in Adolescents

Acne is one of the most common problems in adolescent teens affecting nearly seventeen million people in the United States. Acne is nothing but a disorder involving sebaceous glands and hair follicles. Acne results from the clogging of sebaceous glands leading to the formation of pimples and cysts. The condition usually begins with the onset of puberty. Going by the facts, as teens attain puberty the androgens also called male sex hormones are produced in high number leading to sebaceous glands becoming over active which results in sebum being produced in high proportions.

Sebum, which is nothing but oil is produced by sebaceous glands which travel to the skin surface through hair follicles. But, skin cells block the follicles which results in oil also being blocked. When these hair follicles are blocked it results in the development of skin bacteria known as Propionibacterium Acnes within the follicles which in turn results in swelling of the skin called Acne. If the hair follicles are partially blocked it results in blackheads. If the follicles are completely blocked they result in whiteheads. But if these plugged follicles are not treated they ultimately burst causing the oil, bacteria and skin cells to spill all over the skin resulting in irritation and formation of pimples. Acne can be shallow as well as deep in various individuals depending on the nature of skin and amount of oil produced.

example akai 4000 user guide pdf pdf-But acupuncture is not risk free. Hematoma may develop if the needle punctures a circulatory structure. It is also possible that pneumothorax may occur if the needle is inserted too deep. There is also the risk of HIV and hepatitis if the needle was not properly sterilized.

Now that you know what acupuncture is, you must not forget that it is merely an alternative and not a proper form of medical treatment. This means you should still be examined by a professional in the medical field who can determine the severity of your illness or disease.

For Free akai 4000 user guide pdf pdf__Treatment of acne is classified into topical and systemic drug therapies which are given based on extent of severity. Some of the examples of topical medication are: Benzoyl Peroxide which kills the Propionibacterium Acnes bacteria, antibiotics helps in stopping or slowing down the growth of the bacteria and also reduces inflammation, Tretinoin helps in stopping the formation of new acne lesions and Adapalene reduces formation of comedo.

The examples of antibiotics prescribed are Doxycycline, erythromycin and tetracycline.
