Handbook of Research on Resource Management and the Struggle for Water Sustainability in Africa 2022-01-28 Nojiyeza, Innocent Simphiwe Access to water and sanitation remains a critical challenge in various countries in Africa. The crisis remains the crisis of governance rather than the physical and economic scarcity. In most countries, water is realized as a human right and subsidies are provided for the indigent households. The tricky issue in rural areas remains an issue of access that is often linked to willingness and ability to pay for the installation and daily consumption. The Handbook of Research on Resource Management and the Struggle for Water Sustainability in Africa presents practical examples of integrated water resources management

(IWRM) implementation in African countries. It further addresses the contemporary issues of alternative energy as part of climate change mitigation and utilizes case studies to examine how communities adapt to climate change. Covering topics such as climate justice, ecological governance, and political ecology, this major reference work is a dynamic resource for government officials, sociologists, climate scientists, activists, students and educators of higher education, academicians, and researchers in the fields of social sciences, government, developmental studies, international relations, and political science.

The success of these campaigns has seen increased programs in colleges and individuals embracing different programs based on cost and convenience, and so on. Some students work independently with little direction. This book is written to serve as a companion, providing the necessary guidance, on research methods and it is useful for

anyone involved in research primarily due to specific examples including case study research utilizing qualitative and quantitative designs.

Child Soldiers and Restorative Justice 2018-07-18 Jean Chrysostome K. Kiyala This book investigates how, while children used as soldiers are primarily perceived as victims of offences against international law, they also commit war atrocities. In the aftermath of armed conflict, the mainstream justice system targets warlords internationally, armed groups and militias' commanders who abduct and enrol children as combatants, leaving child perpetrators not being held accountable for their alleged gross human rights violations. Attempts to prosecute child soldiers through the mainstream justice system have resulted in child rights abuses. Where no accountability measures have been taken, demobilised young soldiers have experienced rejection,

Migration in Southern Africa 2022-05-30 Pragna Rugunanan This open access Regional Reader proposes new ways of theorizing migration in Southern Africa by arguing that traditional western forms of theorizing do not adequately fit the South-South migration context. It explores the existing definitions of a 'migrant' with a view to conceptualise a definition which will speak to the complexities,

envisioning a more inclusive Southern African region. The book investigates the various levels of migration moving from the local (rural to urban and urban to rural) to cross border migration; middle-class versus working-class migrant household livelihoods; livelihoods procurement versus wage earning; social capital (networks) and how they make meaning of their circumstances in a 'foreign' space. It also acknowledges the intertwined issues of gender and class as important in analyzing migration processes and the chapters feature both in varying dimensions. As such, the book provides a great resource for students, academics and policy makers.

Supervision and Agency Management for Counselors 2015-11-06 Elizabeth R.

O'Brien, PhD, LPC Integrates and fosters effective leadership/management and supervisory skills. The development of competency in management and leadership skills as well as clinical supervisory skills is of increasing importance to professional counselors who seek advancement in their careers. The SoJo Journal 2016-12-01 Brad J. Porfilio The SoJo Journal: Educational Foundations and Social Justice Education is an international peer-reviewed journal of educational foundations. The Department of Educational Leadership at California State University, East Bay, whose mission is to prepare and influence

bold, socially responsible leaders who will transform the world of schooling, hosts the journal. It publishes essays that examine contemporary educational and social contexts and practices from critical perspectives. The SoJo Journal: Educational Foundations and Social Justice Education is interested in research studies as well as conceptual, theoretical, philosophical, and policy analysis essays that advance educational practices that challenge the existing state of affairs in society, schools, and (in)formal education. The SoJo Journal: Educational Foundations and Social Justice Education is necessary because currently there is not an exclusively international, Foundations of Education journal. For instance, three of the leading

journal in Educational Foundations journals (e.g., The Journal of Educational Studies, British Journal of Sociology of Education, The Journal of Educational Foundations) solicit manuscripts and support scholarship mainly from professors who reside in Britain and the United States. This journal is also unique because it will bring together scholars and practitioners from disciplines outside of Educational Foundations, who are equally committed to social change and promoting equity and social justice inside and outside of K-16 schools.

Immigrant and Refugee Youth and Families 2021-05-19 Mo Yee Lee The United States is known as a nation of immigrants. Over the years the composition of immigrants has

significantly changed. From receiving immigrants from primarily Europe, the United States is now home to people from countries around the globe. One of the common challenges encountered by immigrant and refugee families and youth is to successfully resettle and integrate into the host country that is culturally different from their country of origin. Depending on the context of migration, families and youth oftentimes face additional challenges ranging from potential trauma prior to immigration, language, employment, education, healthcare accessibility, integration, discrimination, etc. This book focuses on different issues experienced by immigrant and refugee families and youth as well as programs implemented to serve these populations. These issues pertain to

the individual at a personal level (attachment, trauma, bi-cultural self-efficacy, behavioral problems, and mental health), family (parenting, work-family conflict, problems such as domestic violence), community (risk factors such as racial discrimination and protective factors such as social capital) and policy (immigration policy and enforcement). Part I of the book focuses on immigrant and refugee families and Part II focuses on immigrant and refugee youth. By increasing our awareness of issues pertinent to immigrant and refugee families and youth, we can better provide culturally respectful and sensitive services and policy to this population at a time when they are navigating between their host culture and home culture in addition to

dealing with challenges encountered in resettlement. The book is a significant new contribution to migration studies and social justice, and will be a great resource for academics, researchers, and advanced students of social work, public policy, law and sociology. The chapters in this book were originally published in the Journal of Ethic & Cultural Diversity in Social Work.

Standards for the Control of Algorithmic Bias 2023-07-04 Natalie Heisler Governments around the world use machine learning in automated decision-making systems for a broad

range of functions. However, algorithmic bias in machine learning can result in automated decisions that produce disparate impact and may compromise Charter guarantees of substantive equality. This book seeks to answer the question: what standards should be applied to machine learning to mitigate disparate impact in government use of automated decision-making? The regulatory landscape for automated decision-making, in Canada and across the world, is far from settled. Legislative and policy models are emerging, and the role of standards is evolving to support regulatory objectives. While acknowledging the contributions of leading standards development organizations, the authors argue that the rationale for standards must come from the law and

that implementing such standards would help to reduce future complaints by, and would proactively enable human rights protections for, those subject to automated decision-making. The book presents a proposed standards framework for automated decision-making and provides recommendations for its implementation in the context of the government of Canada's Directive on Automated Decision-Making. As such, this book can assist public agencies around the world in developing and deploying automated decision-making systems equitably as well as being of interest to businesses that utilize automated decision-making processes.

Thinking Like a Political Scientist
2017-03-07 Christopher Howard “A compelling case for transforming how research methods are taught to undergraduate students of political science.” –London School of Economics Review of Books Each year, tens of thousands of students who are interested in politics go through a rite of passage: they take a course in research methods. Many find the subject to be boring or confusing, and with good reason. Most of the standard books on research methods fail to highlight the most important concepts and questions. Instead, they brim with dry technical definitions and focus heavily on statistical analysis, slighting other valuable methods. This approach prevents

students from mastering the skills they need to engage more directly and meaningfully with a wide variety of research. With wit and practical wisdom, Christopher Howard draws on more than a decade of experience teaching research methods to transform a typically dreary subject and teach budding political scientists the critical skills they need to read published research more effectively and produce better research of their own. The first part of the book is devoted to asking three fundamental questions in political science: What happened? Why? Who cares? In the second section, Howard demonstrates how to answer these questions by choosing an appropriate research design, selecting cases, and working with numbers and written documents as

evidence. Drawing on examples from American and comparative politics, international relations, and public policy, *Thinking Like a Political Scientist* highlights the most common challenges that political scientists routinely face, and each chapter concludes with exercises so that students can practice dealing with those challenges.

Research Methods for Child Life Specialists 2021-03-05 Sarah Daniels
In today's evidence-based healthcare culture, child life specialists must demonstrate knowledge and skill not only in clinical care, but also in planning and evaluating the impact of their interventions—yet few resources exist to provide research skills and support for these practitioners. To

adequately evaluate, improve, and innovate patient and family outcomes, it is essential that all providers understand the key inquiry pathways of research. Combining clinical examples and skills with candid advice from seasoned child life specialist researchers, this text scaffolds the concept of inquiry into feasible units of action. From identifying a clinical question to assembling a team, designing a project, collecting and analyzing data, and reporting on results, it guides students, professionals, and administrators in actively exploring and improving healthcare outcomes for patients and their families. Case examples from the authors' own experiences as clinicians and researchers serve to demonstrate how to seamlessly translate clinical

skills into those needed for success in research, ensuring that child life specialists remain active contributors to today's research evidence on the needs of children and families during healthcare encounters.

Teaching and Learning in a Digital World 2018-02-09 Michael E. Auer This book gathers the Proceedings of the 20th International Conference on

Interactive Collaborative Learning (ICL2017), held in Budapest, Hungary on 27–29 September 2017. The authors are currently witnessing a significant transformation in the development of education. The impact of globalisation on all areas of human life, the exponential acceleration of technological developments and global markets, and the need for flexibility and agility are essential and challenging elements of this process that have to be tackled in general, but especially in engineering education. To face these current real-world challenges, higher education has to find innovative ways to quickly respond to them. Since its inception in 1998, this conference has been devoted to new approaches in learning with a focus on collaborative learning.

Today the ICL conferences offer a forum for exchange concerning relevant trends and research results, and for sharing practical experience gained while developing and testing elements of new technologies and pedagogies in the learning context.

Born into the Thembu royal family, he was bestowed with the name Rolihlahla, meaning “troublemaker” in Xhosa. Mandelas upbringing

unfolded amidst a backdrop of racial injustice, where he witnessed firsthand the unjust treatment inflicted upon the Black majority by the ruling white minority government. Driven by a deep sense of justice, he dedicated his life to the struggle for emancipation and equality, joining the African National Congress (ANC), a political organization dedicated to dismantling apartheid, the system of racial separation that plagued South Africa. Emerging as a inspiring lawyer, activist, and leader, Mandela faced numerous arrests and imprisonments for his unwavering resistance and defiance. For 27 years, he endured the harsh conditions and isolation of Robben Island, a notorious prison island, where his hope never wavered. His unwavering commitment to liberation continued to inspire and mobilize his people and the world at large. In 1990, he walked out of prison, free at last, and in 1994, he made history as South Africa's first democratically elected Black president. Mandelas leadership ushered in a period of peaceful transition, transforming South Africa into a nation of justice. His global impact extended far beyond South Africa's borders, as he became a beacon of peace, recognized for his unwavering dedication to these ideals. In 1993, he was awarded the Nobel Peace Prize, alongside numerous other accolades and honors. On December 5, 2013, at the age of 95, Mandela passed away, leaving behind a legacy of strength, insight, and kindness. Revered as the father of the nation and one of history's greatest heroes, Mandelas legacy continues to inspire generations to come.

Galactic Conflicts which Altered History

It had been the time 23, and the globe stood at the edge of battle. The U.S. and Peoples Republic of China, the two global powers, had been engaged in a fierce rivalry, contending for supplies, influence, and dominance. They had both developed sophisticated weapons, including laser weapons, unmanned aerial vehicles, and spacecrafts, which can strike any place, any time. They had clandestinely established orbital stations, which can fire nuclear missiles, which could obliterate the earth. They were both set to employ these weapons, if at all necessary. But they were not the sole ones. There was a 3rd entity, a secret entity, which had been watching them, waiting patiently for them, getting ready for them. They were ETs, and they had come to stop them. They had come to rescue the world, or to finish it all. They had arrived to begin the galactic wars which altered history.
