From Rhodesia to Zimbabwe 2013-10-22 Henry Wiseman From Rhodesia to Zimbabwe: The Politics of Transition studies the last phase of the transfer of power from illegal white minority control to freely elected majority rule in Zimbabwe. This book is divided into five chapters; the first of which describes the transition from Lusaka to Lancaster, including subtopics on the issues and results of commonwealth and constitutional conferences. This text then describes the implementation of the Lancaster House Agreement and the Monitoring Force. A chapter discusses the significance of the accredited observers in transitional process and the elections. This text ends with the general observations on the transition process. This book will be interesting to historians, academicians, public administrators, and students of politics.

Western Civilization: Volume II: Since 1500 2011-01-01 Jackson J. Spielvogel Best-selling author Jackson Spielvogel helped over one million students learn about the present by exploring the past. A Textbook of Historiography, 500 B.C. to A.D. 2000 2004 E. Sreedharan This book traces the development of historiography from the days of Herodotus to those of postmodernism. It covers the ancient, medieval and the modern aspects of the subject and offers easy comprehension, clear and precise guidance and immediate utility. The author provides a balanced view of competing ideas and leads the reader into the vast arena of the subject. Two thousand five hundred years of historiography, including Indian historiography and the poststructuralist critique of history, constitutes this clear, analytical work.

The Origins of the Civilization of Angkor volume 2 2007-10-10 Charles Higham Noen U-Loke and Non Muang Kao are two large, moated prehistoric settlements in Nakhon Ratchasima Province, Northeast Thailand. Excavations in 1997-8 revealed a cultural sequence that began in the late Bronze Age, followed by four mortuary phases covering the Iron Age. This report describes the palaeoenvironment, excavation, chronology and material culture, human remains and social structure of the prehistoric inhabitants of these two sites. It is the second volume reporting on the research programme "The Origins of the Civilization of Angkor".

African Empires: Volume 1 2016-11-21 J.P. Martin African Empires presents a comprehensive and in depth analysis of the major empires of the African continent over thousands of years. This book penetrates into the various kingdoms and rich cultures of Africa including East Africa, West Africa, North Africa, South Africa and Central Africa. African Empires brings to life a colorful cast of historical characters including African kings, queens, scholars, religious leaders, artists, warriors and merchants which helped to shape the direction of these great African civilizations. The epic landmark events of Africa are captured and explained in detail to provide a full understanding of this dynamic continent and it's contribution to world history.

The Wild Frontier 2009-11-18 William M. Osborn The real story of the ordeal experienced by both settlers and Indians during the Europeans' great migration west across America, from the colonies to California, has been almost completely eliminated from the histories we now read. In truth, it was a horrifying and appalling experience. Nothing like it had ever happened anywhere else in the world. In *The Wild Frontier*, William M. Osborn discusses the changing settler attitude toward the Indians over several centuries, as well as Indian and settler characteristics--the Indian love of warfare, for instance (more than 400 inter-tribal wars were fought even after the threatening settlers arrived), and the settlers' irresistible desire for the land occupied by the Indians. The atrocities described in *The Wild Frontier* led to the death of more than 9,000 settlers and 7,000 Indians. Most of these events were not only horrible but bizarre. Notoriously, the British use of Indians to terrorize the settlers during the American Revolution left bitter feelings, which in turn contributed to atrocious conduct on the part of the settlers. Osborn also discusses other controversial subjects, such as the treaties with the Indians, matters relating to the occupation of land, the major part disease played in the war, and the statements by both settlers and Indians each arguing for the extermination of the other. He details the disgraceful American government policy toward the Indians, which continues even today, and speculates about the uncertain future of the Indians themselves. Thousands of eyewitness accounts are the raw material of *The Wild Frontier*, in which we learn that many Indians tortured and killed prisoners, and some even engaged in cannibalism; and that though numerous settlers came to the New World for religious reasons, or to escape English oppression, many others were convicted of crimes and came to avoid being hanged. *The Wild Frontier* tells a story that helps us understand our history, and how as the settlers moved west, they often brutally expelled the Indians by force while themselves suffering torture and kidnapping.

Western Civilization: Alternate Volume: Since 1300 2011-01-01 Jackson J. Spielvogel Best-selling author Jackson Spielvogel helped over one million students learn about the present by exploring the past. Spielvogel's engaging, chronological narrative weaves the political, economic, social, religious, intellectual, cultural, and military aspects of history into a gripping story that is as memorable as it is instructive. **WESTERN CIVILIZATION: SINCE 1300** includes three to ten maps in each chapter and numerous excerpts from primary sources that enliven the past while introducing students to the source material of historical scholarship. Climate: Present, Past and Future (Routledge Revivals) 2013-09-05 H. H. Lamb First published in 1977, the second volume of *Climate: Present, Past and Future* covers parts 3 and 4 of Professor Hubert Lamb's seminal and pioneering study of climatology. Part 3 provides a survey of evidence of types of climates over the last million years, and of methods of dating that evidence. Through the earlier stages of the Earth's development the book traces what is known of the various geographies presented by the drifting continents and indicates what can be learnt about climatic regimes and the causes of climatic change. From the last ice age to the present our knowledge of the succession of climates is summarized, indicating prevailing temperatures, rainfalls, wind and ocean current patterns where possible. Part 4 considers events during the fifteen years prior to the book's initial publication, leading on to the problems of estimating the most probable future course of climatic development, and the influence of Man's activities on climate. Alongside the reissue of volume 1, this Routledge Revival will be essential reading for anyone interested in both the causes and workings of climate and in the history of climatology itself.

Black Athena 2006-11-03 Martin Bernal Could Greek philosophy be rooted in Egyptian thought? Is it possible that the Pythagorean theory was conceived on the shores of the Nile and the Euphrates rather than in ancient Greece? Could it be that much of Western civilization was formed on the "Dark Continent"? For almost two centuries, Western scholars have given little credence to the possibility of such scenarios. In *Black Athena*, an audacious three-volume series that strikes at the heart of today's most heated culture wars, Martin Bernal challenges Eurocentric attitudes by calling into question two of the longest-established explanations for the origins of classical civilization. To use his terms, the Aryan Model, which is current today, claims that Greek culture arose as the result of the conquest from the north by Indo-European speakers, or "Aryans," of the native "pre-Hellenes." The Ancient Model, which was maintained in Classical Greece, held that the native population of Greece had initially been civilized by Egyptian and Phoenician colonists and that additional Near Eastern culture had been introduced to Greece by Greeks studying in Egypt and Southwest Asia. Moving beyond these prevailing models, Bernal proposes a Revised Ancient Model, which suggests that classical civilization in fact had deep roots in Afroasiatic cultures. This long-awaited third and final volume of the series is concerned with the linguistic evidence that contradicts the Aryan Model of ancient Greece. Bernal shows how nearly 40 percent of the Greek vocabulary has been plausibly derived from two Afroasiatic languages--Ancient Egyptian and West Semitic. He also reveals how these derivations are not limited to matters of trade, but extended to the sophisticated language of politics, religion, and philosophy. This evidence, according to Bernal, greatly strengthens the hypothesis that in Greece an Indo-European-speaking population was culturally dominated by Ancient Egyptian and West Semitic speakers Provocative, passionate, and colossal in scope, this volume caps a thoughtful rewriting of history that has been stirring academic and political controversy since the publication of the first volume.

Church History in Plain Language 1996-04-19 Bruce Shelley It's about time that someone wrote church history that tells about people, not just about "eras" and "ages." Church History in Plain Language taps the roots of our Christian family tree. It combines authoritative research with a captivating style to bring our heritage home to us.

World History, Volume II: Since 1500 2006-01-03 William Duiker Noted teachers and scholars William J. Duiker and Jackson J. Spielvogel present a balanced, highly readable overview of world history that explores common challenges and experiences that unite the human past and that identify the key global patterns over time. Thorough coverage of political, economic, social, religious, intellectual, cultural, and military history in Volume 2 has been integrated into a chronologically ordered synthesis to help students gain an appreciation and understanding of the distinctive character and development of individual cultures in society. This edition of **WORLD HISTORY** continues to take a global approach to world history, with an emphasis on analytical comparisons between and among cultures throughout history. This approach helps students' link events together in a broad comparative and global framework, thereby placing the contemporary world in a more meaningful historical context. **WORLD HISTORY** is available in the following volume options: **WORLD HISTORY, FIFTH EDITION** (Chapters 1-29) ISBN: 0495050121; **WORLD HISTORY, VOLUME I: TO 1800, FIFTH EDITION** (Contains Chapters 1-17) ISBN: 0495050539; **WORLD HISTORY, VOLUME II: SINCE 1500, FIFTH EDITION** (Contains Chapters 13-29) ISBN: 0495050547; **WORLD HISTORY TO 1500, FIFTH EDITION** (Contains Chapters 1-12) ISBN: 0495050601. Ancient Civilizations of Africa 1990 Unesco. International Scientific Committee for the Drafting of a General History of Africa Volume 2 covers the period beginning at the close of the Neolithic era, from around the eighth millennium before our era. This period of some nine thousand years has been sub-divided into four major geographical zones. Chapters 1 to 12 cover the Nile, Egypt and Nubia: by far the largest part of the book is devoted to the ancient civilization of Egypt because of its pre-eminent place in the early history of Africa. Chapters 13 to 16 relate to the Ethiopian highlands. Chapters 17 to 20 describe the Maghrib and its Sahara hinterland, and Chapters 21 to 29 the rest of Africa including some of the Indian Ocean islands. The series is co-published in Africa with seven publishers, in the United States and Canada by the University of California Press, and in association with the UNESCO Press.

Ordering America 2010-07-21 William H. Young Ordering America, painting a felicitous portrait of Western civilization, shows that its defining ideals--rooted in man's common human nature, a perception newly substantiated by modern evolutionary psychology--were best fulfilled by realization of the American founding order. Twentieth-century progressivism and postmodern multiculturalism detoured America down the way of social constructionism--human nature and equality are produced by culture and the state, through groups. The book sets a course to revive the Western ideals and return to an opportune center-right American order, applying latest scientific insights and restoring individual responsibility and reciprocity under more limited, still energetic government befitting our century.

This Horrid Practice 2008-08-04 Paul Moon 'Though stronger evidence of this horrid practice prevailing among the inhabitants of this coast will scarcely be required, we have still stronger to give.' - Captain James Cook This Horrid Practice uncovers an unexplored taboo of New Zealand history - the widespread practice of cannibalism in pre-European Maori society. Until now, many historians have tried to avoid it and many Maori have considered it a subject best kept quiet in public. Paul Moon brings together an impressive array of sources from a variety of disciplines to produce this frequently contentious but always stimulating exploration of how and why Maori ate other human beings, and why the practice shuddered to a halt just a few decades after the arrival of Europeans in New Zealand. The book includes a comprehensive survey of cannibalism practices among traditional Maori, carefully assessing the evidence and concluding it was widespread. Other chapters look at how explorers and missionaries saw the practice; the role of missionaries and Christianity in its end; and, in the final chapter, why there has been so much denial on the subject and why some academics still deny that it ever happened. This Horrid Practice promises to be one of the leading works of New Zealand history published in 2008. It is a highly original work that every New Zealand history enthusiast will want to own and read.

State Formations 2018-03-29 John L. Brooke Featuring a sweeping array of essays from scholars of state formation and development, this book presents an overview of approaches to studying the history of the state. Focusing on the question of state formation, this volume takes a particular look at the beginnings, structures, and constant reforming of state power. Not only do the contributors draw upon both modernist and postmodernist theoretical perspectives, they also address the topic from a global standpoint, examining states from all areas of the world. In their diverse and thorough exploration of state building, the authors cross the theoretical, geographic, and chronological boundaries that traditionally shape this field in order to rethink the customary macro and micro approaches to the study of state building and make the case for global histories of both pre-modern and modern state formations.

Literature and Mass Culture 2017-09-08 Leo Lowenthal This first volume of the collected writings of sociologist Leo Lowenthal contains his classic theoretical and historical writings on the relationship of art to mass culture. This book series presents Lowenthal's contributions to a theory of the role of communication in modern society. This volume lays out the basis for a theory of mass culture. Lowenthal demonstrates that the juxtaposition of a "low"mass culture and a "high"esoteric culture did not originate in contemporary industrial, bourgeois society but can be traced back to the Middle Ages and antiquity.

W. E. B. Du Bois: International Thought 2022-11-17 W. E. B. Du Bois W. E. B. Du Bois was one of the most significant American political thinkers of the twentieth century. This volume collects 24 of his essays and speeches on international themes, spanning the years 1900-1956. These key texts reveal Du Bois's distinctive approach to the problem of empire and demonstrate his continued importance in our current global context. The volume charts the development of Du Bois's anti-imperial thought, drawing attention to his persistent concern with the relationship between democracy and empire and illustrating the divergent inflections of this theme in the context of a shifting geopolitical terrain; unprecedented political crises, especially during the two world wars; and new opportunities for transnational solidarity. With a critical introduction and extensive editorial notes, W.E.B. Du Bois: International Thought conveys both the coherence and continuity of Du Bois's international thought across his long life and the tremendous range and variety of his preoccupations, intellectual sources, and interlocutors.

Trust 2014-08-07 Geoffrey Hosking Today there is much talk of a 'crisis of trust'; a crisis which is almost certainly genuine, but usually misunderstood. Trust: A History offers a new perspective on the ways in which trust and distrust have functioned in past societies, providing an empirical and historical basis against which the present crisis can be examined, and suggesting ways in which the concept of trust can be used as a tool to understand our own and other societies. Geoffrey Hosking argues that social trust is mediated through symbolic systems, such as religion and money, and the institutions associated with them, such as churches and banks. Historically these institutions have nourished trust, but the resulting trust networks have tended to create quite tough boundaries around themselves, across which distrust is projected against outsiders. Hosking also shows how nation-states have been particularly good at absorbing symbolic systems and generating trust among large numbers of people, while also erecting distinct boundaries around themselves, despite an increasingly global economy. He asserts that in the modern world it has become common to entrust major resources to institutions we know little about, and suggests that we need to learn from historical experience and temper this with more traditional forms of trust, or become an ever more distrustful society, with potentially very destabilising consequences.

Dictionary of the Ben cao gang mu, Volume 2 2016-11-22 Hua Linfu The Ben cao gang mu, compiled in the second half of the sixteenth century by a team led by the physician Li Shizhen (1518-1593) on the basis of previously published books and contemporary knowledge, is the largest encyclopedia of natural history in a long tradition of Chinese materia medica works. Its description of almost 1,900 pharmaceutically used natural and man-made substances marks the apex of the development of premodern Chinese pharmaceutical knowledge. The Ben cao gang mu dictionary offers access to this

impressive work of 1,600,000 characters. This second book in a three-volume series verifies and localizes all 2,158 geographical and associated administrative names referred to in the Ben cao gang mu in connection with the origin and use of pharmaceutical substances.

The Past, Present, and Future of Theologies of Interreligious Dialogue 2017-03-17 Terrence Merrigan The Past, Present and Future of Theology of Interreligious Dialogue brings together several of the most widely regarded specialists who have contributed to theological reflection on religious diversity and interreligious encounter. The chapters are united by the consistent theme of the obligation to engage with the challenges that emerge from the tension between the doctrinal tradition(s) of Christianity and the need to reconsider them in light of and in response to the fact of religious otherness. As a whole, these reflections are motivated by the desire to bring together a significant selection of different theological approaches that have been developed and appropriated in order to engage with religious difference in the past and present, as well as to suggest possibilities for the future. This confluence of perspectives reveals the complexity of theological reflection on religious diversity, and gives some indication of future challenges that must be acknowledged, and perhaps successfully met, in the ongoing attempt to address a universal reality in light of traditional doctrinal particularities and cultural concerns.

Environmental History in the Pacific World 2022-03-01 J.R. McNeill This volume brings together a set of key articles from the last 30 years pertaining to the environmental history of the Pacific basin. It aims to treat the islands and waters of the Pacific as well as the lands around the Rim, from New Zealand to Japan, to California, to Chile, and is the first work of environmental history to take this inclusive view of the Pacific basin. The focus is mainly on recent centuries but, as environmental history requires, at times the work also takes the very long view of millennia. Several of the articles seek to bring a broad Pacific perspective to bear on their subjects, while others use Pacific-basin examples to try to establish broader theoretical points of interest to all who are drawn to the study of the interactions between nature and culture. The book includes a bibliography of Pacific-basin environmental history and an introduction that aims to sketch the contours and possible future directions of the field.

Bibliography of Art and Architecture in the Islamic World (2 Vol. Set) 2012 Susan Sinclair Following the tradition and style of the acclaimed "Index Islamicus," the editors have created this new Bibliography of Art and Architecture in the Islamic World. The editors have surveyed and, in many cases, annotated a wide range of books and articles from collected volumes and journals published in all European languages (except Turkish) between 1906 and 2011. The editors have ensured that material from a wide range of scholarly traditions and approaches has been consulted in order to make this comprehensive bibliography an indispensable tool for everyone involved in the study of material culture in Muslim societies.

A History of the Middle East 2014-01-10 Saul S. Friedman As the birthplace of three principal religions, the Middle East is holy to 15 million Jews, 2 billion Christians, and 1 billion Muslims. As the cradle of western civilization, it is fundamental to world history, the place where humans transformed themselves from nomadic hunters to settled farmers capable of building great cities and societies. This detailed history covers the Middle East from its ancient beginnings to the present. The confluence of events that produced civilized society is fully discussed, along with the establishment of Judaism, Christianity, and Islam. The emergence and decline of the Byzantine and Ottoman empires, which laid much of the framework for the region to move into the modern era, is covered in depth. Analysis of the area in recent decades focuses on World War I and II and the regional conflicts that inflame the Middle East of the 21st century. Instructors considering this book for use in a course may request an examination copy here.
