## **Apprenticeship in a Globalised World**

2013 Salim Akoojee In April 2013, the International Network on Innovative Apprenticeship (INAP) hosted its fifth international conference in Johannesburg, South Africa, in co-operation with the International Labor Organization (ILO), bringing together researchers, policy makers, and practitioners from 34 nations. The title of the conference - "Apprenticeship in a Globalized World: Premises, Promises and Pitfalls" - points out the need for apprenticeship to deliver on its promise of workplace skills and for it to develop and change as world economies develop. An international exchange of ideas among researchers from all over the world is necessary to identify cases of good practice and facilitate the transfer of knowledge and innovation, also within the frame of informal apprenticeships. This book, a summary of the papers presented and discussed at the Johannesburg conference, is split up equally into five key topics: Introducing Apprenticeship: Backgrounds, Changes, and Difficulties \* Enabling Learning Opportunities in Workplaces and Informal Contexts \* Competence Assessment and Development \* Managing Transitions from VET into the World of Work \* Curriculum Design, Apprenticeships, and National Qualification Frameworks. (Series: Bildung und Arbeitswelt - Vol. 27)

2023-10-16 Xibin Han This is an open access book. Covering both theories and practices in Technical Vocational Education and Training (TVET) teacher development, this book provides up-to-date discussions and recommendations on issues relating to TVET teacher development in the digital age. It caters for the needs of in-service teachers and trainers, as well as TVET leaders who want to upscale their professional learning and development in terms of vision, knowledge, expertise, and industry skills needed in the transition to the digital era. Teachers and trainers may also find the exemplary cases of teachers' professional development from various countries inspiring and motivating. The book also serves as a useful reference for TVET leaders, administrators and teacher trainers. ## **Competence Development and Assessment in TVET (COMET)**

2012-07-26 Felix Rauner The transferability of vocational education and training qualifications across international borders is a live issue in this heterogeneous field. Key to this goal is defining a common methodology for measuring vocational competences. This publication sets out a proposal for just that, based on the results of a pilot project known as 'COMET' on competence diagnostics in the field of electrical engineering. The study deploys longitudinal analysis to explore issues of competence development, the development of vocational identity, and occupational commitment. It focuses on two discrete occupational profiles in electrical engineering in an ambitious test of a model currently applied to other professions as well. The model's success in its first phase is detailed in the second part of the volume, where the authors show that the transfer of the competence framework into an empirical model was successful. They also demonstrate that the methodology can be applied to designing and evaluating vocational

education and training processes, making the material relevant to VET teachers and trainers as well as academics. With its first section comprising a full description of the theoretical framework, this book is a significant step forward in an urgent task facing administrations, labor forces and employers around the world. The achievement is in proportion to the notorious complexities of a field whose diversity makes tough demands on large-scale methods of assessment.

#### **Vocational Education and Training in Times of Economic Crisis**

2016-12-20 Matthias Pilz This book brings together a broad range of approaches and methodologies relevant to international comparative vocational education and training (VET). Revealing how youth in transition is affected by economic crises, it provides essential insights into the strengths and weaknesses of the various systems and prospects of VET in contexts ranging from North America to Europe, (e.g. Spain, Germany or the UK) to Asia (such as China, Thailand and India). Though each country examined in this volume is affected by the economic crisis in a different way, the effects are especially apparent for the young generation. In many countries the youth unemployment rate is still very high and the job perspectives for young people are often limited at best. The contributions in this volume demonstrate that VET alone cannot solve these problems, but can be used to support a smooth transition from school to work. If the quality of VET is high and the status and job expectations are good, VET can help to fill the skills gap, especially at the intermediate skill level. Furthermore, VET can also offer a realistic alternative to the university track for young people in many countries.
