This collection of papers arises from a meeting of distinguished scholars at Tautavel in 1993, sponsored by the European Science Fund.

The Re-invention of the European Radical Right 2011 Andrej Zaslove Political commentators were surprised at the re-emergence of right-wing parties in Western Europe in the 1970s and early 1980s given that right-wing extremists had largely disappeared from successful electoral politics after the end of the Second World War. Since their resurgence, such parties have become permanent fixtures across Europe. The Re-invention of the European Radical Right examines what accounts for their initial rise and their continued success as well as how they should be classified: are they fascist, neo-fascist,

radical, extreme, or populist? Combining an in-depth case study of the Italian Northern League with a comparative focus on other parties, Andrej Zaslove employs a socio-economic, institutional, and ideological analysis to argue that the new wave of right-wing parties in Western Europe converged into a radical right populist party family in the 1990s. He examines the transformation of the Northern League from its regionalist roots while focusing on the party's nationalism, authoritarianism, support for a market economy, opposition to globalization, and scepticism regarding Italian integration into the European Union. He also scrutinizes the Northern League's participation in political power between 2001 and 2006 and its influence on

federalism, immigration, economic policy, and European integration. A thorough and thought-provoking work, The Re-invention of the European Radical Right offers remarkable insight into the ongoing effects of radical right populism on politics and public policy in Europe.

Trading Promises for Results  
2019-09-23 Mauricio Mesquita  
Moreira Thirty years after the region embarked on large-scale liberalization, trade policy could have been expected to become all but irrelevant. Instead, a mismatch between expectations and what could realistically be delivered set the stage for much of the disappointment, skepticism, and fatigue regarding trade policy in the region, particularly in the early 2000s. By setting the bar unrealistically high, governments and analysts made trade policies an easy target for special interests that were hurt by liberalization and for those ideologically opposed to free trade. The most immediate victims were the

Chiefly focusing on teaching and learning mathematics, the book also includes two chapters that address the evidence for technologies' effects on school mathematics. The diverse technologies considered provide a broad overview of the potential that digital solutions hold in connection with teaching and learning. The chapters provide both a snapshot of the status quo of technologies in school mathematics, and outline how they might impact school mathematics ten to twenty years from now.

between theory and practice that dominates SLA and language teaching. This approach is based on Vygotsky's sociocultural theory, according to which the two activities are inherently connected so that each is necessarily rooted in the other; practice is the research laboratory where the theory is tested. From the perspective of language education, this is what is meant by the 'pedagogical imperative.' Sociocultural Theory and the Pedagogical Imperative in L2 Education • Elaborates a new approach to dealing with the relationship between theory and practice—an approach grounded in praxis—the dialectical unity of theory and practice • Presents an analysis of empirical research illustrating praxis-based principles in real language classrooms • Brings together cognitive linguistics and sociocultural theory – the former provides the theoretical knowledge of language required of praxis and the latter furnishes the theoretical

Heterostructured (HS) materials represent an emerging class of materials that are expected to become a major research field for the communities of materials, mechanics, and physics in the next couple of decades. One of the biggest advantages of HS materials is that they can be produced by large-scale industrial facilities and technologies and therefore can be commercialized without the scaling up and high-cost barriers that are often encountered by other advanced materials. This book collects recent papers on the progress

Predatory States 2012-07-10 J. Patrice McSherry This powerful study makes a compelling case about the key U.S. role in state terrorism in Latin America during the Cold War. Long hidden from public view, Operation Condor was a military network created in the 1970s to eliminate political opponents of Latin American regimes. Its key members were the anticommunist dictatorships of Chile, Argentina, Uruguay, Bolivia, Paraguay, and Brazil, later joined by Peru and Ecuador

with covert support from the U.S. government. Drawing on a wealth of testimonies, declassified files, and Latin American primary sources, J. Patrice McSherry examines Operation Condor from numerous vantage points: its secret structures, intelligence networks, covert operations against dissidents, political assassinations worldwide, commanders and operatives, links to the Pentagon and the CIA, and extension to Central America in the 1980s. The author convincingly shows how, using extralegal and terrorist methods, Operation Condor hunted down, seized, and executed political opponents across borders. McSherry argues that Condor functioned within, or parallel to, the structures of the larger inter-American military system led by the United States, and that declassified U.S. documents make clear that U.S. security officers saw Condor as a legitimate and useful 'counterterror' organization. Thinking with Theory in Qualitative Research  
2011-12-02 Alecia Youngblood Jackson Winner of the 2013 American Educational Studies Association's Critics Choice Award! Thinking With Theory In Qualitative Research shows how to use various philosophical concepts in practices of inquiry; effectively opening up the process of data analysis in qualitative research. It uses a common data set and utilizes various theoretical perspectives through which to view the data. It challenges qualitative researchers to use theory to accomplish a rigorous, analytic reading of qualitative data. "Plugging in" the theory and the data produces a variety of readings applying various theorists and their concepts, including:

- Derrida - Deconstruction
  - Spivak - Postcolonial Marginality
  - Foucault - Power/Knowledge
  - Butler - Performativity
  - Deleuze - Desire
  - Barad - Material Intra-activity

mechanistic coding, reducing data to themes, and writing up transparent narratives. These do little to critique the complexities of social life; such simplistic approaches preclude dense and multi-layered treatment of data. It shows that "thinking with theory" pushes research and data and theory to its exhaustion in order to produce knowledge differently. By refusing a closed system for fixed meaning, a new analytic is engaged to keep meaning on the move. The result is an extension of thought beyond an easy sense. Special features of the book include schematic cues to help guide the reader through what might be new theoretical terrain, interludes that explain the possibilities of thinking with a particular concept and theorist and detailed chapters that plug the same data set into a specific concept. This vital tool will help researchers understand and fully utilize their powers of data analysis and will prove invaluable to both students and experienced researchers across all of the social sciences.

The Right in Latin America  
2016-04-14 Barry Cannon Most current analysis on Latin American politics has been directed at examining the shift to the left in the region. Very little attention, however, has been paid to the reactions of the right to this phenomenon. What kind of discursive, policy, and strategic responses have emerged among the right in Latin America as a result of this historic turn to the left? Have there been any shifts in attitudes to inequality and poverty as a result of the successes of the left in those areas? How has the right responded strategically to regain the political initiative from the left? And what implications might such responses have for democracy in the region? The Right in Latin

answers to these questions while helping to fill a gap in the literature on contemporary Latin American politics. Unlike previous studies, Barry Cannon's book does not simply concentrate on party political responses to the contemporary challenges for the right in the region. Rather he uses a wider, more comprehensive theoretical framework, grounded in political sociology, in recognition of the deep social roots of the right among Latin America's elites, in a region known for its startling inequalities. Using Michael Mann's pioneering work on power, he shows how elite dominance in the key areas of the economy, ideology, the military, and in transnational relations, has had a profound influence on the political strategies of the Latin American right. He shows how left governments, especially the more radical ones, have threatened elite power in these areas, influencing right-wing strategic responses as a result. These responses, he persuasively argues, can be found

from elections, through street protests and media campaigns, to military coups, depending on the level of perceived threat felt by elites from the left. In this way, Cannon uncovers the dialectical nature of the left/right relationship in contemporary Latin American politics, while simultaneously providing pointers as to how the left can respond to the challenge of the right's resurgence in the current context of left retrenchment. Cannon's multi-faceted interdisciplinary approach, including original research among right-leaning actors in the region makes the book an essential reference not only for those interested in the contemporary Latin American right but for anyone interested in the region's politics at a critical juncture in its history.

The Obama Doctrine

whether these issues of continuity have been equally as prevalent during the president's second term as his first. Is Obama still acting within the foreign policy shadow of Bush, or has he been able to establish his own approach towards international affairs, distinct from his predecessor? Within this context, the volume also addresses the idea of legacy and whether Obama has succeeded in establishing his own distinct foreign policy doctrine. In addressing these questions, the chapters explore continuity and change from a range of perspectives in International Relations and Foreign Policy Analysis, which are broadly representative of a spectrum of theoretical positions. With contributions from a range of US foreign policy experts, this book will be of great interest to students and scholars of US foreign policy, Foreign Policy Analysis and American politics.

political, economic and geopolitical dynamics that China's presence has initiated throughout Latin America and the Caribbean between 2008 and 2020. Written by experts across three continents, contributions to this edited volume explore the bilateral relations that China has developed with almost all Latin American and Caribbean countries, charting both the benefits they have brought and the problems that these relations have created for local actors. The book analyses the emergence of new forms of "dependence", considers issues such as the existence of a deindustrialization phenomenon throughout Latin America and ultimately questions whether China and the United States are engaged in a zero-sum game in the region. It also investigates challenges that the densification of the web of China's relations and exchanges with Latin America and the Caribbean countries pose; not only to the United States and European countries, but also to Latin American regionalism.

Framing Age 2017-05-12 Iris Loffeier Ageing populations have gradually become a major concern in many industrialised countries over the past fifty years, drawing the attention of both politics and science. The target of a raft of health and social policies, older people are often identified as a specific, and vulnerable, population. At the same time, ageing has become a specialisation in many disciplines - medicine, sociology, psychology, to name but three - and a discipline of its own: gerontology. This book questions the framing of old age by focusing on the relationships between policy making and the production of

knowledge. The first part explores how the meeting of scientific expertise and the politics of old age anchors the construction of both individual and collective relationships to the future. Part II brings to light the many ways in which issues relating to ageing can be instrumentalised and ideologised in several public debate arenas. Part III argues that scientific knowledge itself composes with objectivity, bringing ideologies of its own to the table, and looks at how this impacts discourse about ageing. In the final part, the contributors discuss how the frames can themselves be experienced at different levels of the division of labour, whether it is by people who work on them (legislators or scientists), by people working with them (professional carers) or by older people themselves. Unpacking the political and moral dimensions of scientific research on ageing, this cutting-edge volume brings together a range of multidisciplinary, European

The Ethics of Plea Bargaining

practice of plea bargaining plays a hugely significant role in the adjudication of criminal charges and has provoked intense debate about its legitimacy. This book offers the first full-length philosophical analysis of the ethics of plea bargaining. It develops a sustained argument for restrained forms of the practice and against the free-wheeling versions that predominate in the United States. In countries that have endorsed plea bargains, such as the United States, upwards of ninety percent of criminal defendants plead guilty rather than go to trial. Yet trials, which grant a presumption of innocence to defendants and place a substantial burden of proof on the state to establish guilt, are widely regarded as the most appropriate mechanisms for fairly and accurately assigning criminal sanctions. How is it that many countries have abandoned the formal rules and rigorous standards of public trials in favor of informal and veiled negotiations between state officials and

criminal defendants concerning the punishment to which the latter will be subjected? More importantly, how persuasive are the myriad justifications that have been provided for plea bargaining? These are the questions addressed in this book. Examining the legal processes by which individuals are moved through the criminal justice system, the fairness of those processes, and the ways in which they reproduce social inequality, this book offers an ethical argument for restrained forms of plea bargaining. It also provides a comparison between the different plea bargaining regimes that exist within the US, where it is well-established, England and Wales, where the practice is coming under considerable critique, and the European Union, where debate continues on whether it coheres with inquisitorial legal regimes. It suggests that rewards for admitting guilt are distinguished from penalties for exercising the right to trial, and argues for modest, fixed sentence reductions for

guilt. These suggestions for reform include discouraging the current practice of deliberate over-charging by prosecutors and charge bargaining, and require judges to scrutinize more closely the evidence against those accused of crimes before any guilty pleas are entered by them. Arguing that the negotiation of charges and sentences should remain the exception, not the rule, it nevertheless puts forward a normative defense for the reform and retention of the plea bargaining system.

Fortress Europe 2015-11  
Matthew Carr Revised and updated for 2015, Matthew Carr provides an urgent investigation into Europe's militarised borders. In a series of searing dispatches, he speaks to border officers and police, officials, migrants, asylum-seekers and activists from across the continent in a ground-breaking critique of an epic political, institutional and humanitarian failure that now threatens the future of the European Union itself.

cultural crossovers and overlaps in a global perspective and through a variety of disciplinary approaches. It starts from the premise that after the 'spatial turn' human action and cultural representations can no longer be grasped as firmly located in or clearly demarcated by territorial entities. The collection of essays investigates postcolonial articulations of various genres and media in their spatiality and locatedness while envisaging acts of location as dynamic cultural processes. It explores the ways in which critical spatial thinking can be made Productive: Testing the uses and limitations of 'translocation' as an open exploratory model for a critically spatialized postcolonial studies, it covers a wide range of cultural expressions from the anglophone world and beyond - literature, film, TV, photography and other forms of visual art, philosophy, historical memory, and tourism. various facets of spatial thinking from a variety of disciplines, and critically discusses their implications for postcolonial studies. The Contributors' essays range from theoretical interventions into the critical routines of postcolonial criticism to case studies of specific cultural texts, objects, and events reflecting temporal and spatial, material and intellectual, physical and spiritual mobility. What emerges is a fascinating survey of the multiple directions postcolonial translocations can take in the future. This book is aimed at students and scholars of postcolonial literary and cultural studies, diaspora studies, migration studies, transnational studies, globalisation studies, critical space studies, urban studies, film studies, media studies, art history, philosophy, history, and anthropology. The Diary of A Young Girl (Deluxe Hardbound Edition)  
2022-12-06 Anne Frank A thirteen-year-old Jewish girl and her family abandoned their house in Amsterdam and went into hiding in 1942, when Nazis occupied Holland. They and another family stayed cloistered in the "Secret Annex" of an old office building for the next two years, until their whereabouts were revealed to the Gestapo. They suffered starvation, boredom, the daily cruelties of living in tight quarters, and the ever-present prospect of discovery and death because they were cut off from the outside world. Anne Frank kept a diary throughout this time, recording vivid recollections of her events. Her story is a fascinating meditation on human tenacity.

Reagan, Bush, Gorbachev  
2008-06-30 Norman A. Graebner This work is a contemporary chronicle of the Cold War and offers an analysis of policy and rhetoric of the United States and Soviet Union during the 1980s. The authors examine the assumptions that drove political decisions and the rhetoric that defined the relationship as the Soviet Union began to implode. This work demonstrates that while the subsequent unraveling of the Soviet empire was an unintended side effect of Mikhail Gorbachev's reforms, termination of the Cold War was not. Ronald Reagan deserves full credit for recognizing Gorbachev's sincerity and his determination to change the direction of Soviet policies. For this, Reagan felt the full wrath of anticommunist hawks for doing

leader. But it was Gorbachev who concluded the superpowers had become mesmerized by ideological myths which ruled out any meaningful discussions of a possible accommodation of political issues for more than four decades. The evidence is compelling that Gorbachev himself broke the Cold War's ideological straight jacket that had paralyzed Moscow and Washington's ability to resolve their differences. Though politically weakened, Gorbachev conceded nothing to U.S. military superiority. Never did he negotiate from a position of weakness. In doing so, the last Soviet leader faced even greater political and physical risk. Without Gorbachev the end of the Cold War could have played out very differently and perhaps with great danger.

The Hidden Third 2016 Basarab Nicolescu Poetry. Philosophy. Translated from French by William Garvin. Foreword by Gonçalo Tavares. "Liminality landing between prose and poetry, science and art, philosophy and spirituality, THE HIDDEN THIRD charismatically disseminates a new renaissance transmission. Leaving the reader breathless. Re-imagined, re-generated. Mind duly sanctified."--Gary P. Hampson "A first phrase is always a first phrase: it begins. And in these poetic theorems, each theorem is always a first phrase."--Gonçalo Tavares "We could ask Basarab Nicolescu about the last constituents of matter or language, since, according to him, language is a truly quantum phenomena."-- Michel Camus

scholars at Tautavel in 1993, sponsored by the European Science Fund. The aim of the meeting was to discuss and review the evidence for the earliest occupation of different European regions, from Scandinavia to the Mediterranean and from the United Kingdom to the Russian Plains and including neighbouring areas such as the Caucasus and Northern Africa. Discussion focused on four themes: chronology, environment, industries and subsistence. The central dispute between proponents of the Long chronology (placing the first hominids in Europe almost 2m years ago) and the supporters of a Short chronology (no hominids until 500,000 years ago) is covered in detail. The disputed 1.5m years are crucial to our understanding of how our earliest ancestors adapted to the European environment and this book will be crucial in furthering the debate.
