The Health Care Worker's Primer on Professionalism

2000 Sherry Makely A core text or self-study guide for a course in Professionalism for students preparing for careers in health care (whether as allied health professionals, nurses, or clerical or support staff), as well as for new and current health care workers who could benefit from additional professionalism training. Unique in approach, this handbook/workbook is the first text to cover all of the pertinent information that any worker, in any position, in any type of health care organization needs to know to present a professional image and to be successful in his/her job. It focuses on the "soft skills" (rather than on the hands-on technical skills) that are needed to perform in a professional, ethical, legal, and competent manner, regardless of one's job function/position e.g., communicating appropriately, working well on teams, respecting and valuing differences, and interacting effectively with co-workers, patients, visitors, and guests.

Potter & Perry's Fundamentals of Nursing - AUS Version - E-Book

2012-12-11 Jackie Crisp Potter and Perry's Fundamentals of Nursing, 4th ANZ edition ebook is the leading fundamentals text for nursing students in Australia and New Zealand. The dynamic fourth edition of Potter and Perry's Fundamentals of Nursing presents an engaging approach to the fundamentals of nursing while building on its renowned reputation as the foremost text for nursing students across Australia and New Zealand. The new editorial team presents a critical thinking approach, to encourage the critical skills and understandings students require to maintain a high level of active engagement in the development of their practice within the health care systems they will work throughout their careers. Meaningful clinical examples combined with critical thinking questions, promote reflection and support deeper learning. These examples underscore how putting quality nursing knowledge and skills into practice can mean the difference between patient recovery and independence versus life threatening complications and patient decline. Current research examples encourage students to see the dynamic nature of evidence for nursing practice and gain understanding that ongoing change in practice is the norm and should be embraced. Potter and Perry's Fundamentals of Nursing, 4th ANZ edition ebook is supported by the Fundamentals of Nursing: clinical skills workbook 2nd edition. The skills in this indispensable workbook are directly aligned to the National Competency Standards for the Registered Nurse for Australia and New Zealand and support the theory and practice of each skill. A mobile study app for iOS called ClinicalCases is also available via the Apple App store for purchase. The ClinicalCases app takes an engaging approach to learning and revision. Students will find it the perfect exam preparation and study tool. It consists of 24 progressive case studies with MCQs and explanations for all answers. It also features over 150 Flash card key terms and a Word game. A great way to learn at your own pace, whenever, wherever... Elsevier's Evolve platform also offers a wealth of online resources for nursing students and lecturers, including an impressive suite of Australian nursing clinical skills videos to be used in conjunction with the text and workbook. These videos are ideal for viewing in class or during independent study and are a valuable tool for revision prior to assessment. Other online resources include PowerPoint presentations, an exam view test bank, critical thinking questions and answers, integrated lesson plans, images, weblinks and a chapter on the Essentials of Care.

Student Workbook for The Administrative Dental Assistant - E-Book

2016-06-30 Linda J Gaylor An indispensable companion to the 3rd Edition of The Administrative Dental Assistant, this workbook combines textbook content and key objectives with new practice exercises, case scenarios, and critical thinking questions to help put your learning into practical context. This edition also includes an interactive demo CD with the latest version of the Dentrux Learning Edition practice management software to give you valuable experience working in a realistic dental office environment and a more accurate understanding of the challenges that administrative dental assistants encounter on the job. Trusted author Linda Gaylor taps into her years of experience as a practicing dental assistant, an instructor of dental assisting, and a curriculum director to share all the necessary knowledge and skills required to be a successful administrative dental assistant. Correlation with the textbook enables you to follow along every step of the way to ensure comprehension before moving forward. Case scenarios with questions encourage you to apply what you have learned within the textbook to solve everyday office dilemmas. Objective-style review questions include multiple-choice, short-answer, essay, and fill-in-the-blank to prepare you for examinations. Puzzles offer a fun and interactive way for you to master vocabulary. Chapter overviews recap chapter content, provide examples of why content is relevant in real-world practice, and set the stage for workbook questions and exercises. Learning objectives serve as checkpoints for comprehension, skills mastery, and readiness for examinations. Appendix forms familiarize you with the type of forms found in today's dental office. New content reflects the move toward the paperless dental office and new technology in the industry, specifically in the areas of scheduling, bookkeeping, electronic record regulations, and insurance coding. Original practice exercises, designed to be used in conjunction with the practice management software, expose you to a more realistic dental office environment. What Would You Do? scenarios mimic the types of issues you will deal with in practice and encourage you to put your knowledge to work on realistic situations. Additional artwork acquaints you with the technology you will use before beginning work in the dental office. Dentrux Learning Edition practice management software offers a flexible range of options to help you learn the ins and outs of a professional practice management software program and fully prepare you for work in an actual dental office.

Guide health careers today 5th edition workbook answers

There are basically 14 pathways throughout the body where chi flows continuously. These are called the meridian points. In order for chi to course through the body unobstructed, there has to be a balance between the strengths of yin and yang. In ancient Chinese philosophy, yin and yang represent the forces of the universe- yin is for feminine, while yang is for masculine. Every single thing in the universe is believed to contain both yin and yang for harmony.

When the yin and yang are not balanced, chi cannot stream through the body liberally. Therefore, the meridian points through which chi courses through need to be stimulated. This is done by the insertion of hair-thin, disposable needles in specific areas on a person’s body to induce bodily harmony and bring about healing.

A certified and trained acupuncturist will be able to carry out an excellent therapy session for the patient. Trainings for acupuncturists are given in order for them to obtain their licenses. A poor practitioner may not be proficient enough with the practice and could end up jeopardizing the results of the entire procedure. Nowadays, it is wise to verify on a practitioner’s credentials to ensure a safe and effective acupuncture treatment.

Heat-Related Illnesses in Teens

Heat related illnesses are caused due to prolonged exposure to heat and also humidity without any reprieve and due to inadequate intake of fluids. Kids and teens adjust to the variations in heat compared to adults who adapt more quickly. However the heat production is high in them when compared to adults but sweat relatively less. Sweating is the natural action of the body and cooling mechanism to counter heat. Kids and teens often ignore these facts and do not hydrate themselves enough while playing, participating in sports and exercises.

Kids and teens with health problems that are chronic or those who are on certain prescription could be more susceptible to heat related problems. Overweight adolescents or those who wear heavy clothing in times of exertion also suffer heat related illnesses. Heat related illnesses are basically classified into three types. They are: Heat cramps, heat stroke and heat exhaustion.

*Review health careers today 5th edition workbook answers:*An infant will have a normal blood pressure reading of 80/45, where as an adolescent will have a normal blood pressure reading of 110/70. Therefore, age, gender, and height are important factor when determining the normal blood pressure level. Adults will have a higher blood pressure than the infants and teenagers. Also, boys have a higher blood pressure when compared to girls and tall people have a higher blood pressure than short people. An adolescent is said to have high blood pressure when the blood pressure is more than the blood pressure of ninety percent people of his/her age, gender and height.

There are many risks associated with hypertension or high blood pressure. The risk of developing coronary heart disease increases proportionally. The arteries will develop greater resistance towards the blood flow, because of which the heart will pump blood harder. Stroke is also another risk. Adolescents who have had high blood pressure as a child, develop harmful effects on the blood vessels and heart till the time they turn twenty.

The causes of high blood pressure can be classified as primary and secondary. If the causes are definite, they are primary and if the cause is linked to some illness, it is secondary. Primary causes are high blood cholesterol levels, smoking, stagnant lifestyle and overweight. Secondary causes are obesity, immobility due to chronic illness, prescription drugs, intense pain due to burns or cancer and illegal drugs. High blood pressure can develop due to hereditary reasons.

Hope health careers today 5th edition workbook answers,The treatment is finished after an hour and when the needles are removed, you are advised to wear ear magnets so your session continues even when you leave the clinic. While acupuncture itself is a painless procedure, some smokers have claimed that they felt a prick or get sleepy. Most smokers will have to come to the clinic 4 to 6 times before seeing any significant results. Just to give you an idea, one study shows that the respondents reported a decrease in the number of cravings to smoke just after one or two sessions. Seven out of 10 of the respondents were able to kick the habit after 5 or 6 sessions.

Because the number of test subjects is small, there are some who doubt the effectiveness of acupuncture. This is because although there are positive signs with regards to the short term effects of this technique, its effects were not sustained. This is why some medical journals have stated that it is unclear what acupuncture can do in smoking cessation.

Basically, needles are inserted into the skin, each corresponding to one of the numerous pressure points located throughout the body. According to Traditional Chinese Medicine, by inserting a needle into the pressure point, an acupuncturist can manipulate the flow of chi or life force, thus relieving pain and gradually treating the patient. While most would say that the whole chi thing is a bunch of nonsense, science has suggested that with the needles inserted, the bodys natural painkillers called endorphins are released, thus helping with pain relief.

When you go visit an acupuncturist for the first time and tell him or her that you want to quit smoking, after answering some questions, the specialist will carry out an examination of your ears and search for areas where the energy is low.

Hope health careers today 5th edition workbook answers;Eight Myths About Acupuncture

There are a lot of myths with regards to acupuncture. Some of these are true; others are silly while the rest only have a half truth. As you read on, you will learn which ones are worth believing.

The first myth is that acupuncture is painful. This is not true because those who have tried it claimed they only experienced a tiny prick while others did not feel anything at all. There is no tissue damage when the needle is inserted into the skin or pulled out and only in very rare cases are there traces of bruising.

The second myth is that you can get hepatitis or AIDS from acupuncture. This is true only if the needles used are not sterilized. In the US, this will never happen because acupuncturists are required to use disposable needles thus you are not at risk from these two diseases.

Acupuncture Closely Revealed

The foundation of acupuncture rests on the relevance of an individual's chi in maintaining bodily and mental health. It is believed that chi is present in every living creature, and flows through specific pathways in the body. Health problems arise when the flow of chi on the body is blocked. As a result, a person may feel persistent headaches, muscle pain, fever, weakness, or in the worst case, becomes afflicted with more serious health conditions.

A Deeper Explanation of Acupuncture

Acupuncture has its origins in ancient Chinese philosophy and practice. More than ten thousand years ago, during the Old Stone Age of China, stones were fashioned into knives for medical purposes. After several years, during the New Stone Age, these stones were eventually made into needles intended for the same therapeutic end. These accounts are further evidenced by unearthed stone needles found to be of the same types used during the New Stone Age.

This has resulted in the establishment of clinics nationwide that only use acupuncture as the means of rehabilitation.

Acupuncturists in the US charge from \$75 to \$150 per session. This usually gets lower in the succeeding treatments. The person will probably have to undergo 10 to 15 treatments 2 to 3 times a week but this really depends on the condition of the patient.

Before you go to one, you should check if this is covered by your insurance. If it isn't, perhaps you should suggest that it should be included as it is much cheaper than having to undergo surgery.

Opportunity health careers today 5th edition workbook answers;The eighth myth is that acupuncture is only used in third world countries. This is not true because this technique originated in China more than 2000 years ago and this has spread to developed nations in Asia such as Japan, South Korea, Singapore and Malaysia.

Here at home, acupuncture been practiced for more than 2 decades and is legal in 30 states. In fact 22 of them, license professionals after they graduate once they pass the state board examination.

Although acupuncture has been around for a very long time, there is still a need for this form of holistic healthcare which is why this is being taught in colleges and in use today. It is painless and cost efficient and a lot of studies have shown that it is effective in treating various illnesses and preventing some of them.

Fifth, medical doctors do not believe in the potential of alternative medicine. This is not true because there are more doctors these days that are open to the idea that there are other ways to help patients aside from conventional medicine. In fact, some of them even recommend an acupuncturist if they know that what they have done is not effective.

Another myth is that every patient will undergo the four needle technique. This is not true and it will only be used when the specialist feels that the energy of the patient is virtually not moving as a last resort.

The seventh myth is that it is better for a medical doctor to perform acupuncture. This is wrong because the training is much different than that taught in medical school. Students who have an acupuncturist license train for 3,000 hours before they are allowed to practice this profession. So between an acupuncturist and a medical doctor, you should go with someone who has learned about this much longer.

Reading health careers today 5th edition workbook answers;The history of acupuncture is first discussed in an ancient Chinese medical text called the "Huang Di Nei Jing" or The Yellow Emperors Classic of Internal Medicine.

But there have been a few who are skeptic as archaeologists have found a 5,000 year old mummy in the Alps with similar acupuncture points in the body. This gives some people the idea that it was used even before the Chinese did but sine there is no written text to prove that, no one is certain and credit to this ancient practice goes back to the Chinese.

In the 6th century, this knowledge moved to Japan. In the 17th century, a man by the name of Waichi Sugiyama wanted to make this procedure painless for the patient so he developed the insertion tube, a small cylindrical tube through which the needle is inserted. Believe it or not, this technique is still being used today.

Ninety nine percent of the injuries are caused while playing sports. So it is necessary for the youngsters to wear protective eyewear while playing sports or when involved in outdoor recreational activities. A special helmet is designed with wire shield or polycarbonate face mask which is not only safe, but comfortable, too. Protective eyewear should also be worn while performing experiments in science lab. Fireworks must only be handled by adults.

Because of increasing use of computers, more and more youngsters are getting eye strains. The symptoms of eye strain caused by computer are red & watery eyes, focusing problems, aching & tired eyelids, eye muscle spasm, backache and headache. In such an environment, eye exercise must be done regularly. The eyes must be made to focus on distant objects and should be rotated from side to side. It is extremely important to give ample rest to the eyes. Glasses with UV shield must be worn when looking at the computer screen. Eye strain can be avoided by increasing the distance from the monitor.

Eye hazards are also caused when cosmetics are used improperly by contact lens wearers. Some of the adverse reactions are injury, eye irritation, allergy, dryness, infection, and lens deposition. That is the reason why adolescents must be made aware of the risk they will face when opting for contact lens. Girls should understand that they should buy hypoallergenic cosmetics and especially the non-scented variety, manufactured by big brand names. Cosmetics should not be shared with anything else. The applicator brushes must be washed regularly and old mascara must be disposed and not refilled. Eye shadows which are glittery, pearlized, frosted or iridescent contain ground tinsel or oyster shell, which should be always avoided. Eyeliner should not be applied in the inner lid edge. Loose powder should be avoided. Cream should not be applied near the eyes. The wearer should wash hands while handling contact lens. No crying, washing of face or bathing should be done with the contact lens on.

Study case health careers today 5th edition workbook answers...Diabetes is a disease where the human body is incapable of producing or utilizing insulin. Insulin is a hormone produced by the body in order to get energy by converting starches, sugar and other items. Since the insulin isn't used properly in diabetic people, the blood sugar level increases. This glucose buildup is found in blood and is then passed onto the urine and comes out of the body and the major source of body energy is lost.

Diabetes is a serious chronic disease and should be handled at proper time; otherwise it can create serious problems. It can pose a risk and can damage parts of the human body such as eyes, teeth, gums, blood vessels, nerves, and kidneys. This is the reason why diabetes is responsible in most of the cases of adult blindness, kidney failure and lower limb amputations. And if left untreated, it can cause stroke, heart disease and eventually, death. These problems are not only faced by adults, but also adolescents who get diabetes in their childhood. The important factor in treatment of diabetes is to keep the blood sugar level normal at all times.

In TCM, practitioners adhere to the concept of Qi, or energy flow, and the meridians in which they travel. They use longer needles and insert them deeper in order to reach the acupuncture points. Modern science has found little evidence to prove the existence of these energy channels, but this is the technique that has been used effectively for thousands of years.

In medical acupuncture, the practitioners are graduates of western medical schools. Their application of needles is not based on the traditional acupuncture points, but on anatomic data. These acupuncturists use shorter needles and the insertions are shallower. They also tend to use fewer needles and leave them inserted for shorter periods of time. Adherents to TCM feel this is a watered-down version of the real thing. Nevertheless, many patients have felt relief of symptoms through this method.

Conditions for Puncture Application

There is a broad and extensive list of ailments which can be treated with acupuncture. The conditions run the gamut from asthma to constipation, anxiety to weight loss. Most TCM practitioners believe that any health condition results from an imbalance in Qi flow, therefore amenable to needle therapy. Western acupuncturists tend to have a more limited list of indications, the most common of which is undoubtedly control of pain.

Anemia in Adolescents

To understand what is anemia one should begin with breathing. The oxygen that is inhaled simply doesn't stop in lungs. It circulates though out the body and fuels the brains also. Oxygen travels to all parts of the body though bloodstream and to be precise in the RBCs I.e. red blood cells. Now, these RBCs are produced in the bone marrow of the body and they serve as boats carrying oxygen in the bloodstream. RBCs have something called hemoglobin, a protein which holds oxygen. To make adequate hemoglobin body requires iron in plenty. The iron is supplied by the foods that we take along with other nutrients. When these RBCs are fewer in number than what is needed anemia occurs in the body. There can be 3 primary reasons: RBCs are lost due to some reason, the production of RBCs is slower than what is needed and lastly the body is destroying the RBCs. Different types of anemia are linked to at least one of these causes.

Challenge health careers today 5th edition workbook answers,**Cholesterol in Adolescents**

Parts of adolescent's body are filled with a waxy stuff identified as cholesterol. It helps to produce vitamin D, cell membranes and certain hormones. Blood cholesterol comes from two different sources, liver within the body and food. The adolescent's liver produces enough cholesterol to carry out proper functioning.

The blood acts as the carrier of cholesterol and transports it to different parts of the body. They are transported in round particle form known as lipoproteins. There are two types of lipoproteins called the low density lipoproteins or LDL and high density lipoproteins or HDL. Low density lipoprotein or LDL cholesterol is commonly known as bad cholesterol. It helps in the building up of plaque in arteries and this condition is known as atherosclerosis. The LDL level must be low in the blood and if it is high it must be decreased. Healthy weight must be maintained and exercise should be done regularly. Food items which have high contents of calories, dietary cholesterol and saturated fat must be avoided.

High density lipoprotein or HDL cholesterol is the good cholesterol. It is actually a kind of fat in blood which helps to remove bad cholesterol from the body and stops the build up of plaque in the arteries. The more the HDL cholesterol in the blood the better it is. The HDL can be raised by at least twenty minutes of exercising daily, decreasing body mass and keeping away from food with saturated fat. Some adolescents need to take medications in order to increase HDL. In such cases, increasing HDL can be a complicated procedure and the physician can make a therapeutic plan to increase HDL in the blood stream.

Happiness health careers today 5th edition workbook answers___There is a great consensus among the parents whether their children would outgrow asthma as they grow up. But the truth is it depends from child to child. While some children experience improvement in their teens others see asthma becoming even more severe. But almost half of the children who have asthma outgrow asthma as they grow although some symptoms may come back later. Many parents have questions like whether their children can take part in sport activities. The answer is both yes and no. Some kids may get an asthma attack when they participate in exercises like running. But with proper management a teenager suffering from asthma can actively participate in sports. Special aerobic exercises can improve airway function. This strengthens the breathing muscles. Some of the ways that one can participate in sports is to follow the regimen of stretching the muscles prior to and after exercising, nose-breathe instead of breathing through the mouth and make sure that humidified air passes through the airways. Also parents should make sure that the adolescent has taken all prescribed medication supposed to be taken before they begin exercising. Carrying a reliever is a must for asthmatic teens which would come handy if asthma attack occurs. Asthmatic teenagers should make sure that they wear something over their mouth and nose to stop cold air from entering. It is not easy for adolescent teens to attend school when they have asthma but it is not difficult also at the same time if proper coordination is made among the teenager, doctor, family and school employees. It is a good idea to consult teachers, nurses and other pertaining employees of the school and let them know that the teenager has asthma and may have special requirements. Also, let the school management know on medications the teenager regularly takes and how to help the teenager when an attack occurs. The school staff should be asked to treat the teen normally once the attack subsides. The physical education coach should also be informed about the condition so that he/she can let the kid stretch the muscles before any exercises or to deal with asthma attack induced due to exercises. Also, before admitting the teenager to a new school care must be taken to check the quality of air, irritants and allergens if any present in the school. The school staff should take considerations to avoid symptoms which could hamper the energy level kids. Also asthmatic teens should be assured from time to time that they are no different from others and asthma in any way does not slow them down, They need this emotional confidence otherwise they may have personality problems.

Seventy four percent of females above fourteen years and sixty percent of females below fifteen years have reported to have involuntary sex. Fifty percent of the adolescent pregnancies are within the time period of six months after the initial sexual intercourse. More than nine hundred thousand teenagers are reported to have become pregnant every year in the United States. Fifty one percent of the adolescent pregnancies result in live birth, thirty five percent result in induced abortion and fourteen percent result in stillbirths or miscarriages. Four out of ten adolescent females get pregnant, before they turn twenty, at least once. Twenty five percent of adolescent deliveries aren't the mother's first child. When a teenager gives birth to her first child, she increases the risk of begetting another child. One third of the adolescent parents are themselves result of adolescent pregnancies. There are many reasons why adolescents choose to become sexually active at an early stage in life. The reasons can be early pubertal development, poverty, sexual abuse in childhood, lack of parent's attention, lack of career goals, family and cultural patterns of early sex, substance abuse, dropping out from school and poor school performance. Factors which discourage an adolescent to become sexually active are stable family environment, parental supervision, good family income, regular prayers, connectedness with parents and living with complete family and both the parents. The factors which are responsible for the consistent use of contraceptive among adolescents are academic success, anticipation for successful future, and involvement in a stable relationship. There are many medical risks associated with adolescent pregnancies. Adolescents who are less than seventeen years are at a greater risk of developing medical complications, when compared to adult females. The risk is even more in teenagers below seventeen. The weight of the child, given birth by an adolescent, is very low in these pregnancies. It is usually below 2.5 kilogram. The rate of neonatal birth is also three times greater in adolescents, when compared to adults. Other problems caused by adolescent pregnancies are prematurity of the child, birth of underweight child, poor maternal weight gain, poor nutritional status, anemia, STDs and hypertension induced due to pregnancy.

OCD is a sign of brain circuitry's unusual functioning and it involves the striatum part of the brain. The brain activity patterns of such people differ from normal people and people with other mental disorders. Researchers have concluded that OCD is usually a family problem and is a disorder of the brain. Streptococcal bacterial infection can create or worsen the condition of OCD. Adolescents with no family history of OCD can also develop it. Most of the adolescents feel embarrassed to talk about their OCDs. They think that people will label them as crazy and this will make them feel ashamed. This will make it difficult for the parents to talk to their children about their OCD, in order to solve them. Parents need to develop good communication skills for this purpose. Parent's support is also very important to the adolescent. Cooperation is extremely important along with treatment, because if the problem is not treated the adolescent will grow into a disturbed adult. Most of the adolescents with OCD can receive effective treatment. The treatment can include psychotherapy and intake of medications such as fluoxetine, clomipramine, fluvoxamine, paroxetine, sertraline and other serotonin reuptake inhibitors. When OCD is caused due to streptococcal infection, the adolescent can be administered with antibiotics to kill the bacterium which is causing it. Exposure and response prevention behavioral therapy is very useful in solving OCD. In this therapy, the adolescent is wontedly exposed to his/her fears which give him/her obsessive thought. After that he/she is trained to avoid these thoughts and the rituals which he/she carries out to tackle the anxiety.

An adolescent having OCD can also have depression, substance abuse, attention deficit hyperactivity disorder, eating disorders, and other types of anxiety disorders. When a person with OCD and other mental illness, is treated, OCD becomes more difficult to treat and even diagnose.

A lot of people are unaware that acupuncture is not yet legal in every state. You can find work or start your own practice in California, New York, Texas, Hawaii and Oregon with 8 more states that are still pending legislation.

We mentioned that you have to study in a school certified by the Council of Colleges of Acupuncture and Oriental Medicine (CCAOM). One more hurdle you have to face before getting your license is passing an exam given by them except in the state of California which has its own regulating body and board certification exam in order for you to practice your profession.

An acupuncturist degree is just the first step in becoming your own boss. To become a master, you have to learn everything there is to know as a student so those who entrust themselves to you in the future will not have any problems.
