Vanhercke 2011 was a year marked by some key progress in European integration: new moves towards Treaty revision, new rules for economic and budgetary coordination, and a more evident role of the EU in national policymaking. In parallel, the destabilisation of the euro zone progressed: the long-term effects of the Greek crisis have not been tackled by European policymakers, while tension shifted from the EU periphery to the very core of the euro zone. Most Member States pursued punitive austerity measures. All these trends undoubtedly represent worrying signs for the future of the European Social Model. The European Union is therefore dealing with crucial questions about its future sustainability: the fate of the euro is in jeopardy, as is the very

meaning of the European integration project. A new compromise is needed between economic competitiveness and social solidarity. Otherwise, the risk will be an increase in public disaffection towards Europe and reciprocal accusations of egoism and lack of strategic views among the Member States. This 2011 edition of Social developments in the European Union examines the ways in which the EU has changed in this turbulent phase. Institutional innovations were paralleled by new economic governance tools and further reinforcement of the austerity paradigm. Beyond economic governance, this volume sheds light on the state of European social dialogue, the role of structural funds, the fate of the social dimension of Europe 2020, and the activities of the European Court

citizenship, Charlotte O'Brien provides her characteristic blend of rigorous legal scholarship and compelling social vision. She identifies challenging questions about the relationship between justice and vulnerability that should concern the shaping of law at all levels of governance.' Professor Niamh Nic Shuibhne, University of Edinburgh 'Piercing the veil of well-known proclamations of "equality" and "non-discrimination", in this intimate portrait of Union law O'Brien sounds a sobering wake up call. The Union, to the genuine surprise of some converted, is a powerful actor of injustice, failing the vulnerable Europeans at many a turn, blinded by its own proclaimed righteousness and goodness to be aware of the plight of those it lets

down. The sooner we dispel the oxymoronic myth of a "market citizen" as a necessary tool of the uniquely benevolent EU internal market project, the sooner the process of healing the Union turning its back on the majority of Europeans can begin. This book is an important part of this beginning.' Professor Dmitry Kochenov, University of Groningen 'Doctrinal mastery. Intellectual rigour. Conceptual depth. Empirical enrichment. O'Brien's landmark text offers its readers all of these qualities. But she also writes with a clarity and honesty of purpose that is an inspiration to her readers. Particularly at a time when certain political actors seek to vilify "expertise", Unity in Adversity is a testament to the value of independent and critical academic research.'

Professor Michael Dougan, University of Liverpool The EU is at a crossroads of constitution and conscience. *Unity in Adversity* argues that EU market citizenship is incompatible with a pursuit of social justice, because it contributes to the social exclusion of women and children, promotes a class-based conception of rights, and tolerates in-work poverty. The limitations of EU citizenship are clearest when EU nationals engage with national welfare systems, but this experience has been neglected in EU legal research. *Unity in Adversity* draws upon the ground-breaking EU Rights Project, working first hand with EU nationals in the UK, providing advice and advocacy, and giving ethnographic insight into the process of navigating EU and UK welfare law. Its

study of EU law in action is a radical new approach, and the case studies illustrate the political, legal and administrative obstacles to justice faced by EU nationals. Taken together, the strands demonstrate that 'equal treatment' for EU nationals is an illusion. The UK's welfare reforms directed at EU nationals are analysed as a programme of declaratory discrimination, and in light of the subsequent referendum, should be treated as a cautionary tale – both to the EU, to take social justice seriously, and to other Member States, to steer away from xenophobic law-making. The EU Economic and Social Model in the Global Crisis 2014-01-28 Prof Dr Dagmar Schiek This book addresses the viability of the EU economic and social model within and after the global economic crisis. It identifies four key issues which warrant further discussion: (1) the asymmetry of the

legal and policy framework of the euro and potential recalibration; (2) substantive tensions between the EU 'economic constitution' and its normative aim of social justice and impacts on national policy; (3) the role of civil society, including the two sides of industry in overcoming these tensions; and (4) the EU's global aspirations towards the creation of a viable socio-economic model. Its chapters offer two perspectives on each of the four main issues. In drawing these debates together, the book provides a broad understanding as well as starting points for future research. In the field of anti-poverty policies, the interplay between the Europe 2020 overarching strategy and the 'Semester' have marked major discontinuity vis-à-vis the Open Method of Coordination for social protection and social inclusion (Social OMC) of the Lisbon phase. This book therefore asks whether and how Europe matters in the fight against poverty and social exclusion by assessing the emergence and possible institutionalisation of a European multi-level, multi-stakeholder and integrated policy arena in the new institutional framework. Microfinance, EU Structural Funds and Capacity Building for Managing Authorities 2016-09-30 Pasqualina Porretta In recent years, the European Commission has attached increasing importance to the use of financial engineering instruments rather than traditional grant-based financing for the microcredit sector, considering these to be the most efficient option available. This book presents a study of capacity building and structural funds in public managing authorities for the microcredit sector. It presents two surveys to highlight the strengths and weaknesses of the managing

authorities' capacity building. The first survey investigates the authorities' need for and interests in capacity building activities, assessing the areas in which capacity building support is needed, and explores the different types of support offered. The second survey analyses the results of the microcredit and microfinance programming activity, investigating its target groups and other operational features. It examines the key monitoring and reporting issues involved in this activity, before analysing the regulatory framework of the microcredit and microfinance sector. This book presents an in-depth analysis of structural funds and their management by policy-makers in the European convergence regions. It explores the interests of managing

authorities, microcredit institutions, operators and other financial intermediaries involved in microcredit programming activities, and offers some core strategic and operational recommendations for the use of structural funds in the microcredit sector.

Ethical Dilemmas for Critically Ill Babies 2015-10-06 Eduard Verhagen Most neonates who now survive intensive care would have died 50 years ago, and "nature" would have decided the outcomes, making ethical discussions about initiating or withholding resuscitation irrelevant. Medical developments in neonatology have changed the way we respond to diseases of neonates, to their illness, and to their parents. Not only as physicians, but also as a society. Decisions on when to start, withhold, or withdraw life-saving interventions in critically ill neonates are among the most difficult decisions in pediatric practice. These decisions are fraught with
