Changing Sexualities and Parental Functions in the Twenty-First Century

2018-03-26 Candida Se Holovko Recent societal changes have challenged long-established concepts in psychoanalysis, including the Oedipus complex, parental functions, and male and female psychosexuality. 'Postmodern families', based on sexual and emotional exchanges independent of gender, now include homoerotic couples who adopt children, or who create them through assisted fertilisation, as well as single parent families and blended families. A number of highly-renowned Latin American psychoanalysts have drawn attention to the urgency of revising theoretical and clinical concepts in the light of these new scenarios. In this book, they open up ideas which cover familiar territory of current concerns in psychoanalytic work, as well as other little-explored areas, with the emphasis on evolving sexualities and new experiences of parenthood. The first section revisits psychoanalytic theories, particularly parental functions in the area of sexuality and gender. The following section discusses new family configurations, and vicissitudes of the desire to have a child in men and women, with the authors presenting some psychic consequences for parents in therapy who have turned to assisted fertilisation.

On Freud's "The Question of Lay Analysis"

2019-02-18 Paulo Cesar Sandler The questions of what psychoanalysis is, and does, and who can and should practice it, remains key within the modern profession. Has the invaluable material packed into Freud's *The Question of Lay Analysis* (1926) been underestimated by contemporary psychoanalysis? This book explores how the issues raised in this paper can continue to impact contemporary Freudian theory and practice. The chapters examine why the arguably litigious nature of the paper might be contributing to its neglect and underestimation. The editors of this book put forth a hypothesis: is there an underlying, still unrecognized, but heartrending factor underlying the century-old quarrel between "lay analysts" and what might be described as medically or psychiatrically trained analysts? They then brought together a selection of major contemporary psychoanalytic thinkers from around the world to attempt to bridge the seemingly unbridgeable gap between medical and non-medical analysis, using *The Question of Lay Analysis* as a central pivot. The work of the key figure, in social and historic terms, on this issue, Theodor Reik, is also duly honoured. *On Freud's "The Question of Lay Analysis"* will be of great interest to all psychoanalysts and psychoanalytic psychotherapists.

On Freud's The Unconscious

2018-03-08 Salman Akhtar If there ever was one word that could represent the essence of Freud's work, that word would be 'unconscious'. Indeed, Freud himself regarded his 1915 paper 'The Unconscious' as central to clarifying the fundamentals of his metapsychology. The paper delineates the topographic model of the mind and spells out the concepts of primary and secondary process thinking, thing and word presentations, timelessness of the unconscious, condensation and symbolism, unconscious problem solving, and the relationship between the system Ucs and repression. Examining these proposals in the light of contemporary psychoanalytic theory as well as from the perspective of current neurophysiology and ethology, nine distinguished analysts take Freud's ideas further in ways that have implications for both psychoanalytic theory and practice.

On Freud's Negation

2018-03-22 Salman Akhtar Ever since Freud proposed that certain ideas can be permitted to become conscious only in their inverted and negative forms, interest has grown into the entire realm of the presence of absence, so to speak. Or, perhaps, it is better to term such mental contents as the presence in the form of absence. These two ways of conceptualizing Freud's negation have led to a panoply of ideas that include negative hallucination, psychic holes, negative narcissism, selfishly motivated erasure of the Other, and the so-called "work of the negative". This volume elucidates these concepts and refines the distinction between Freud's negation and subsequently described mental mechanisms of denial, repudiation, isolation, and undoing. The book also provides contemporary perspectives on the developmental underpinnings of negation and the technical usefulness of the concept, including its implicit role in negative therapeutic reactions. A thought-provoking and conceptually illuminating volume.

On Freud's "Formulations on the Two Principles of Mental Functioning"

2018-05-08 Lawrence J. Brown This book is a collection of papers by leading contemporary psychoanalysts who comment on the continuing important relevance of Freud's (1911) paper, *Formulations on the Two Principles of Mental Functioning*. The contributors gathered here represent current European, Latin American, and North American perspectives that elaborate the continuing value of *Two Principles* for present-day psychoanalytic thinking. Each author examines Freud's paper through a personal lens that is coloured by the psychoanalytic culture from which he or she comes. In each instance, the writers' chapters demonstrate the heuristic value of *Two Principles* for twenty-first century psychoanalytic theory and technique. A common thread that runs through all the chapters is the view that this brief paper by Freud, which he humbly introduced by stating, "The deficiencies of this short paper, which is preparatory rather than expository ...", is a masterpiece that contains within it the seeds of much of his later writing. The distinction he draws between the pleasure principle and the reality principle are profound and raise questions that still preoccupy analysis today.

On Freud's Mourning and Melancholia

2018-05-08 Thierry Bokanowski Both melancholia and mourning are triggered by the same thing, that is, by loss. The distinction often made is that mourning occurs after the death of a loved one while in melancholia the object of love does not qualify as irretrievably lost.

On Freud's Observations On Transference-Love

2018-05-11 Ethel S. Person This is the third volume in the series Contemporary Freud: Turning Points and Critical Issues, published for the International Psychoanalytical Association. Each volume presents a classic essay by Freud with commentaries by prominent psychoanalytic teachers and analysts from different theoretical backgrounds and geographical locations. "Observations on Transference-Love" may have been inspired, say the contributors, by the unfortunate emotional involvements of two of Freud's colleagues with female patients. In his paper, Freud speaks of the inevitability of "transference-love" in every well-conducted analysis, its important therapeutic functions, and its potential hazards. Transference love is discussed in the larger context of transference in general. The essays illuminate a persistent problem in all modalities of psychotherapy: unfortunate, often tragic, enactments of erotic transference and countertransference. This volume also includes the original essay by Freud.

Growth and Turbulence in the Container/Contained: Bion's Continuing Legacy

2013-02-11 Howard B. Levine Wilfred Bion remains the most cited author in psychoanalytic literature after Sigmund Freud. His formulation of alpha function, waking dream thoughts, his theory of thinking and of the container/contained have proven seminal for the elaboration of psychoanalytic theory and practice, as well as the exploration of psychic functioning and the primordial mind. Growth Turbulence in the Container/Contained is based on papers presented at the 2009 International Bion Conference held in Boston, Massachusetts. It represents the state of the art thinking of an outstanding international group of Bion scholars and experts. This book includes the most current trends in Bion scholarship, covering topics that range from the historical/biographical, to the clinical, the theoretical, the developmental, to the cultural and aesthetic. Proving a vital stimulus to further creative explorations in the field, Growth Turbulence in the Container/Contained will be of particular interest to psychoanalytic practitioners, graduate psychoanalysts, analytic candidates, psychoanalytic therapists, advanced therapy trainees, and scholars of all schools.
