The Peabody Picture Vocabulary Test Fourth Edition (PPVT-4) is a well-respected vocabulary evaluation that has been in use for close to half a century. Created by Lloyd M. Dunn and Douglas M. Dunn, the test is designed to evaluate receptive vocabulary for Standard American English. It is swift and easy to administer, conserving important time so that concentration can be placed on implementing effective interventions.

The PPVT-4 test material covers a broad scope of receptive vocabulary ranks, extending from preschool through adult age. The evaluation problems broadly sample words that represent 20 subject fields (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and household and school vocabulary.

The test gives two identical editions which hold different vocabulary terms, making sure that the individual has not “learned” the evaluation. One form can be utilized prior to intervention to assess individuals’ vocabulary comprehension and the alternative version can be utilized for re-evaluation to measure and note advancement. The PPVT-4 also contains a special Growth Scale Value (GSV) which is reactive to slight changes with time.
