In 1993, he was awarded the Nobel Peace Prize, alongside numerous other accolades and honors. On December 5, 2013, at the age of 95, Mandela passed away, leaving behind a

It was a dark and turbulent night. The downpour was pouring down, and the gale was howling. In the heart of the town, there was an exhibition, where an invaluable diamond was on display. The diamond was named the Star of Africa, and it was the biggest and most beautiful diamond in the world. It was secured by an advanced security setup, and a squad of weaponized guards. No one could pilfer it, or so they believed. But somebody did. Someone managed to bypass the protection, to elude the sentinels, to break the glass, and to take the diamond. And no one observed them, no one heard them, no one recognized who they were. They left no trace, no hint, no evidence. They faded into the darkness, with the Star of Africa. And the mystery of the vanished diamond started.

a premium 90° V engine line and GM's first production V-8 with overhead camshafts¹. However, despite its initial achievement, the Northstar engine has been associated with a array of problems over the years and years.

One of the most usual troubles is getting too hot, which can cause significant destruction to the engine block. An additional trouble is oil usage, which can cause low fuel efficiency and pricey repairs. Numerous Northstar engine operators also note problems with head gaskets, which can cause overheating troubles and result in expensive repairs.

Particularly, the Northstar engine versions from 1993 to 2005 have been noted to have seepage issues, broken seals, broken head gaskets, extra oil loss, harmed valve cover, faulty water pumps, and carbon accumulation. These issues are not major, but the cost to repair the troubles was significantly greater than most other engines because of the complex engineering.
