This book is a cutting-edge collection of articles inspired by the writings of Robert Cowen about comparative education. Professione DIRIGENTE SCOLASTICO 2018-01-28 Pietro Giaquinto Questo agile compendio si prefigge lo scopo di fornire, agli aspiranti dirigenti, uno strumento di riordino e riepilogo delle principali materie ed istituti che costituiscono la formazione di base dei futuri responsabili delle organizzazioni scolastiche; figura profondamente mutata nel corso degli ultimi trent'anni, quando, con una improvvisa accelerata legislativa, si sono stravolti gli assetti, fino ad allora staticamente adagiati sullo scheleto della scuola anni settanta, delle istituzioni scolastiche nel loro complesso. In esso si tracciano le basi fondamentali del diritto, con attenzione al diritto costituzionale, civile ed amministrativo, nella parte che più da vicino coinvolge la Pubblica Amministrazione in generale e la vita scolastica in particolare; al diritto penale, nella parte relativa ai reati contro la P. A. e alla legislazione in tema di reati commessi da ed in danno di minori, con una carrellata sui rischi a cui sono più esposti i giovani studenti) (bullismo, cyberbullismo, pedofilia on line); alla gestione contabile dello Stato ed al bilancio scolastico. Viene poi dettagliata l'immagine e la funzione del Dirigente Scolastico, prima e dopo le ultime riforme, si rappresenta l'evoluzione storica dell'Istituzione Scuola in Italia e la sua attuale composizione dopo il varo dei correttivi apportati dalla legge della cd "buona scuola", con attenzione ai processi di programmazione, gestione e valutazione o autovalutazione delle istituzioni scolastiche; si affrontano le tematiche relative alle organizzazioni complesse, alla comunicazione interna ed esterna in esse e, per la scuola, agli ambienti di apprendimento come prospettati dal MIUR nel progetto @apprendere digitale; chiude il compendio, la comparazione tra alcuni sistemi di istruzione europei e quello italiano.

It has well documented new evidence bases in the field of clinical psychology that have underpinned the conspicuous current global and national developments in perinatal mental health. Project Retrospectives 2013-07-15 Norman L. Kerth This is the digital copy of the printed book (Copyright © 2001). With detailed scenarios, imaginative illustrations, and step-by-step instructions, consultant and speaker Norman L. Kerth guides readers through productive, empowering retrospectives of project performance. Whether your shop calls them postmortems or postpartums or something else, project retrospectives offer organizations a formal method for preserving the valuable lessons learned from the successes and failures of every project. These lessons and the changes identified by the community will foster stronger teams and savings on subsequent efforts. For a retrospective to be effective and successful, though, it needs to be safe. Kerth shows facilitators and participants how to defeat the fear of retribution and establish an air of mutual trust. One tool is Kerth's Prime Directive: Regardless of what we discover, we must understand and truly believe that everyone did the best job he or she could, given what was known at the time, his or her skills and abilities, the resources available, and the situation at hand. Applying years of experience as a project retrospective facilitator for software organizations, Kerth reveals his secrets for managing the sensitive, often emotionally charged issues that arise as teams relive and learn from each project.

Sadhana 1984-09-01 Anthony De Mello Christian Exercises in Eastern Form Truly a one-of-a-kind, how-to-do-it book, this small volume responds to a very real hunger for self-awareness and holistic living. It consists of a series of spiritual exercises for entering the contemplative state -- blending psychology, spiritual therapy, and practices from both Eastern and Western traditions. Anthony de Mello offers here an unparalleled approach to inner peace that brings the whole person to prayer -- body and soul, heart and mind, memory and imagination. In forty-seven exercises that teach things such as awareness of physical sensations, stillness, healing of hurtful memories, and consciousness of self and world, de Mello succeeds in helping all who have ever experienced prayer as difficult, dull, or frustrating. The essential key, he notes, is to journey beyond mere thought-forms and discover satisfying new depths in prayer from the heart. This allows for a greater sense of awareness amid silence, and disposes the one who prays to untold riches, spiritual fulfillment, and ultimately, a mystical experience of God-centeredness. Drawing on Scripture, as well as insights from Eastern and Western spiritual masters, the author has a unique appeal that transcends time, culture, and religious background. For many years a bestseller in the English language, Sadhana has now been translated into more than two dozen foreign languages. Readers the world over have eagerly received this sincere spiritual leader, who has led many toward the wealth of insight and spirit that dwells within them.

Networked Collaborative Learning 2010-01-20 Guglielmo Trentin The sustainability of Networked Collaborative Learning (NCL) is a key topic of discussion amongst the institutions where it has been or may potentially be introduced. In order to determine the extent of NCL's sustainability, the added value university education may yield by adopting collaborative learning strategies must be quantified. In turn, an understanding of the implications NCL produces in terms of design and management is gained. After comparing NCL with other Technology Enhanced Learning (TEL) approaches and discussing the possible reasons for adopting it, a multidimensional model for the sustainability of NCL is proposed. The model is characterized by four dimensions: pedagogical approaches, e-teacher professional development, instructional design models and valuation/assessment approaches. Each of these dimensions is examined on the basis of the author's direct experience gained through applying NCL to his university teaching. Delineates a framework for NCL sustainability Provides an instructional design model for NC Describes an original approach to the evaluation of collaborative learning processes

Governing Educational Spaces 2015-12-14 Hans-Georg Kotthoff The governance of education in many countries and regions of the world is currently in transition, challenging histories, remaking subjectivities and shaping possible futures. This book provides an up to date analysis and discussion of the cutting edge theme of educational governance from an international comparative perspective. The volume explores the landscape of educational governance in its broadest sense; considering new forms of steering, leadership and management, assessment and evaluation, teaching and learning, knowledge creation and the realities and possibilities for different forms of political engagement. The new spatial dynamics of education are explored in institutional settings such as schools and universities and via professional groupings such as teachers, administrators and leaders. The chapters in this book are based on the best peer reviewed papers and keynote speeches, which were delivered at the XXVI Conference of the Comparative Education Society in Europe (CESE) in June 2014 in Freiburg, Germany. Comparative Education is uniquely situated to explore the emerging dynamics of educational governance within changing and newly emerging educational spaces because it provides the opportunity to learn more about different local, national or regional educational processes and trajectories and to share knowledge about the logics, ideologies and impacts of different techniques and regimes of governance across Europe and beyond. Hans-Georg Kotthoff is Professor of Comparative Education and School Pedagogy at the University of Education Freiburg, Germany, and President of the Comparative Education Society in Europe (CESE) since 2012. Eleftherios Klerides is Lecturer in Comparative Education and History of Education at the University of Cyprus and the Secretary-Treasurer of the Comparative Education Society in Europe (CESE).

Macroeconomic Imbalances 2012 European Commission. Directorate-General for Economic and Financial Affairs On 14 February 2012, the European Commission presented its first Alert Mechanism Report (AMR), prepared in accordance with Article 3 of Regulation (EU) No 1176/2011 on the prevention and correction of macroeconomic imbalances. The AMR serves as an initial screening device, helping to identify Member States that warrant further in-depth analysis to determine whether imbalances exist or risk emerging. According to Article 5 of Regulation No. 1176/2011, these country-specific ?in-depth reviews? should examine the nature, origin and severity of macroeconomic developments in the Member State concerned which constitute, or could lead to, imbalances. On the basis of this analysis, the Commission will establish whether it considers that an imbalance exists and what type of policy follow-up it will recommend to the Council. For Slovenia, the AMR noted that two indicators in the scoreboard exceeded their thresholds in 2010 and suggested the need to assess the development and drivers of potential imbalances. The AMR explained that in the years before the crisis, Slovenia enjoyed strong growth and domestic demand conditions, coupled with some losses in price competitiveness and a gradual widening of the current account deficit. It identified signs that overheating occurred, particularly as regards private sector credit growth, construction value added and property prices. The Slovenian economy was hit hard by the global crisis and the AMR noted that this has brought some, perhaps temporary, adjustment in the external balance but this is still at an early stage. Against this background, Section 2 examines the external and internal dimensions of imbalances including developments in competitiveness, private sector indebtedness and in asset markets. This is followed by a closer look at the implications of indebtedness of non-financial corporations for the banking sector in Section 3. Section 4 presents possible policy considerations.

The Schoolwide Enrichment Model 2021-10-10 Joseph S. Renzulli The Schoolwide Enrichment Model: A How-to Guide for Talent Development (3rd ed.) presents a common sense approach for helping students achieve and engage in joyful learning. Based on years of research, the Schoolwide Enrichment Model (SEM) is founded on highly successful practices originally developed for programs for gifted students. The SEM promotes "a rising tide lifts all ships" approach to school improvement by applying general enrichment strategies to all students and opportunities for advanced level follow-up opportunities for superior learners and highly motivated students. This guidebook shows educators step by step how to develop their own SEM program based on their own local resources, student population, and faculty strengths and interests. Instead of offering students a one-size-fits-all curriculum, the model helps educators look at each student's strengths, interests, learning styles, and preferred modes of expression and capitalize on these assets. The book highlights the model's fundamentals and underlying research and provides information about organizational components, service delivery options, and resources for implementation. The book suggests methods for engaging and challenging identified gifted students and provides practical resources for teachers using the SEM with all students.

The Forgotten Revolution 2013-12-01 Lucio Russo The period from the late fourth to the late second century B. C. witnessed, in Greek-speaking countries, an explosion of objective knowledge about the external world. WhileGreek culture had reached great heights in art, literature and philosophyalreadyin the earlier classical era, it is in the so-called Hellenistic period that we see for the 7rst time — anywhere in the world — the appearance of science as we understand it now: not an accumulation of facts or philosophically based speculations, but an or- nized effort to model nature and apply such models, or scientist?theories in a sense we will make precise, to the solution of practical problems and to a growing understanding of nature. We owe this new approach to scientists such as Archimedes, Euclid, Eratosthenes and many others less familiar todaybut no less remarkable. Yet, not long after this golden period, much of this extraordinary dev- opment had been reversed. Rome borrowed what it was capable of from the Greeks and kept it for a little while yet, but created very little science of its own. Europe was soon smothered in theobscurantism and stasis that blocked most avenues of intellectual development for a thousand years — until, as is well known, the rediscovery of ancient culture in its fullness paved the way to the modern age.

The imbalance in the Qi may go one way or the other because of Yin and Yang. The person can only be normal if there is harmony between the two which is what acupuncture is trying to achieve. This can only be restored by stimulating these acupuncture points so your Qi can be adjusted, balanced and harmonized.

Apart from using needles, practitioners also use friction, heat, impulses of electromagnetic energy and pressure to stimulate these points in order to balance the movement of energy in the body to reduce one’s health.

An example of this is sonopuncture where an ultrasound device that transmits sound waves is applied to these points in the body. Some use a tuning fork and other vibration devices.

Acne is one of the most common problems in adolescent teens affecting nearly seventeen million people in the United States. Acne is nothing but a disorder involving sebaceous glands and hair follicles. Acne results from the clogging of sebaceous glands leading to the formation of pimples and cysts. The condition usually begins with the onset of puberty. Going by the facts, as teens attain puberty the androgens also called male sex hormones are produced in high number leading to sebaceous glands becoming over active which results in sebum being produced in high proportions.

Sebum, which is nothing but oil is produced by sebaceous glands which travel to the skin surface through hair follicles. But, skin cells block the follicles which results in oil also being blocked. When these hair follicles are blocked it results in the development of skin bacteria known as Propionibacterium Acnes within the follicles which in turn results in swelling of the skin called Acne. If the hair follicles are partially blocked it results in blackheads. If the follicles are completely blocked they result in whiteheads. But if these plugged follicles are not treated they ultimately burst causing the oil, bacteria and skin cells to spill all over the skin resulting in irritation and formation of pimples. Acne can be shallow as well as deep in various individuals depending on the nature of skin and amount of oil produced.

The insertion of needles at these points is aimed to help loosen blocks and normalize flow.

Fifth, medical doctors do not believe in the potential of alternative medicine. This is not true because there are more doctors these days that are open to the idea that there are other ways to help patients aside from conventional medicine. In fact, some of them even recommend an acupuncturist if they know that what they have done is not effective.

Another myth is that every patient will undergo the four needle technique. This is not true and it will only be used when the specialist feels that the energy of the patient is virtually not moving as a last resort.

The seventh myth is that it is better for a medical doctor to perform acupuncture. This is wrong because the training is much different than that taught in medical school. Students who have an acupuncturist license train for 3,000 hours before they are allowed to practice this profession. So between an acupuncturist and a medical doctor, you should go with someone who has learned about this much longer.

It seems that by simply starting to define one accounting term, it eventually leads to defining other terms as well. Net worth is another term that is quite difficult to understand. It refers to the resulting amount after deducting the liabilities of a company from the assets. Private companies refer to net worth as owner’s equity.

Why owner’s equity? Well, after deducting all the liabilities, what’s left basically belongs to the owner. In the case of public companies, the profit of the business is returned as dividends to shareholders. As you can see, before owner or shareholders of a company can take hold of the profits, all liabilities must be deducted first.

These acupuncturists use shorter needles and the insertions are shallower. They also tend to use fewer needles and leave them inserted for shorter periods of time. Adherents to TCM feel this is a watered-down version of the real thing. Nevertheless, many patients have felt relief of symptoms through this method.

Reactions And Research

Not everyone is impressed with acupuncture itself. Most western medical professionals have expressed either doubt or indifference to the oriental method while others have downright driven it down into the earth with criticisms and brutal skepticism. However, recent research shows the efficacy (or lack thereof) of acupuncture, and while more research has to be done, it has been proven to actually positively affect some, but not all, forms of ailments that it claims to cure.

So as the doors open to a new age of acupuncture, give it a try when you feel the need for pain relief and you will not be disappointed. As the Chinese have used it for many centuries, so should we.

As a result, various schools have been built and those who want to become licensed acupuncturists are now able to practice their profession.

Despite that, there were a lot of people who are not yet convinced on the positive effects of alternative forms of medication. It was only in 1995 that the US Food and Drug Administration decided to classify the needles used for acupuncture as medical instruments and assured the public that they are both safe and effective.

To further promote acupuncture, the NIH or National Institute of Health in 1997 has stated that this technique is very useful in treating various health conditions. These include ear, nose, throat, respiratory, gastrointestinal, eye, nervous system and muscular disorders. In some cases, acupuncture is able to prevent some of them from happening.
