The Peabody Picture Vocabulary Test Fourth Edition (PPVT-4) is a highly regarded vocabulary test that has been in practice for almost 50 years. Created by Lloyd M. Dunn and Douglas M. Dunn, the test is made to measure receptive vocabulary for American English. It is quick and simple to administer, saving precious time so that concentration can be placed on implementing successful strategies.

The PPVT-4 test content includes a extensive range of vocabulary comprehension ranks, extending from pre-kindergarten through adult age. The test questions broadly feature words that represent 20 topic fields (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and home and educational vocabulary.

The evaluation gives two equal forms which hold various vocabulary items, making sure that the test-taker has not “memorized” the assessment. One version can be utilized before intervention implementation to assess individuals’ vocabulary understanding and the second edition can be employed for re-testing to assess and note progress. The PPVT-4 also contains a special Growth Scale Value (GSV) which is sensitive to slight changes over time.
