Tribology of Diamond-like Carbon Films

2007-12-06 Christophe Donnet This book highlights some of the most important structural, chemical, mechanical and tribological characteristics of DLC films. It is particularly dedicated to the fundamental tribological issues that impact the performance and durability of these coatings. The book provides reliable and up-to-date information on available industrial DLC coatings and includes clear definitions and descriptions of various DLC films and their properties.

New General Mathematics

1991-02 J.B. Channon

Principles Of Applied Mathematics

2019-05-20 James P. Keener Principles of Applied Mathematics provides a comprehensive look at how classical methods are used in many fields and contexts. Updated to reflect developments of the last twenty years, it shows how two areas of classical applied mathematics spectral theory of operators and asymptotic analysis are useful for solving a wide range of applied science problems. Topics such as asymptotic expansions, inverse scattering theory, and perturbation methods are combined in a unified way with classical theory of linear operators. Several new topics, including wavelength analysis, multigrid methods, and homogenization theory, are blended into this mix to amplify this theme.This book is ideal as a survey course for graduate students in applied mathematics and theoretically oriented engineering and science students. This most recent edition, for the first time, now includes extensive corrections collated and collected by the author.

Principles of Accounting Volume 1 - Financial Accounting

2019-04-11 Mitchell Franklin The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

Public Housing and the Legacy of Segregation

2009 Margery Austin Turner For the past two decades the United States has been transforming distressed public housing communities, with three ambitious goals: replace distressed developments with healthy mixed-income communities; help residents relocate to affordable housing, often in the private market; and empower former public housing families toward economic self-sufficiency. The transformation has focused on deconcentrating poverty, but not on the underlying role of racial segregation in creating these distressed communities. In Public Housing and the Legacy of Segregation, scholars and public housing officials assess whether--and how--public housing policies can simultaneously address the problems of poverty and race.

MAX Phases

2013-11-13 Michel W. Barsoum In this comprehensive yet compact monograph, Michel W. Barsoum, one of the pioneers in the field and the leading figure in MAX phase research, summarizes and explains, from both an experimental and a theoretical viewpoint, all the features that are necessary to understand and apply these new materials. The book covers elastic, electrical, thermal, chemical and mechanical properties in different temperature regimes. By bringing together, in a unifi ed, self-contained manner, all the information on MAX phases hitherto only found scattered in the journal literature, this one-stop resource offers researchers and developers alike an insight into these fascinating materials.

Market Theory and the Price System

2007 Israel Mayer Kirzner Israel Kirzner's outstanding book on price theory is back in print. It is been very difficult to obtain it for decades, even though it is surely the best textbook on Austrian price theory ever written. The prose is crystal clear and the organization exceptional. He takes the reader through the foundations of individual action, exchange, utility, demand and supply, production, and the market process itself. Had it been in print, it would have schooled generations in Austrian price theory, and it is surely useful in the classroom today, or for general reading. Not a collection of essays, it is an integrated presentation from top to bottom, written early in Kirzner's post-doctoral career.

Atomic Layer Deposition for Semiconductors

2013-10-18 Cheol Seong Hwang Offering thorough coverage of atomic layer deposition (ALD), this book moves from basic chemistry of ALD and modeling of processes to examine ALD in memory, logic devices and machines. Reviews history, operating principles and ALD processes for each device.

Negative Contexts

2002-11 Ton van der Wouden This research emphasizes semantic, syntactic and pragmatic considerations illustrating a wide array of linguistic approaches. Written from within the theoretical framework of Generalized Quantifiers, the three main areas considered are collocations, polarity items and multiple negations.

Science and Technology of Rubber

2011-07-28 James E. Mark The 3rd edition of The Science and Technology of Rubber provides a broad survey of elastomers with special emphasis on materials with a rubber-like elasticity. As in the 2nd edition, the emphasis remains on a unified treatment of the material; exploring topics from the chemical aspects such as elastomer synthesis and curing, through recent theoretical developments and characterization of equilibrium and dynamic properties, to the final applications of rubber, including tire engineering and manufacturing. Many advances have been made in polymer and elastomers research over the

past ten years since the 2nd edition was published. Updated material stresses the continuous relationship between the ongoing research in synthesis, physics, structure and mechanics of rubber technology and industrial applications. Special attention is paid to recent advances in rubber-like elasticity theory and new processing techniques for elastomers. This new edition is comprised of 20% new material, including a new chapter on environmental issues and tire recycling. · Explores new applications of rubber within the tire industry, from new filler materials to “green tires (a tire that has yet to undergo curing and vulcanization). · 30% of the material has been revised from the previous edition with the addition of 20% new material, including a chapter on the environment. · A mixture of theory, experiments, and practical procedures will offer value to students, practitioners, and research & development departments in industry.

Mystery of the Missing Diamond

It was a gloomy and stormy night. The rain was falling heavily, and the gale was roaring. In the heart of the town, there was a museum, where an invaluable diamond was on display. The diamond was called the African Star, and it was the largest and most gorgeous diamond in the globe. It was secured by an advanced security mechanism, and a team of armed guards. No one could rob it, or so they believed. But somebody did. Somebody managed to bypass the safeguard, to avoid the guards, to smash the pane, and to take the diamond. And no one observed them, no one heard them, no one identified who they were. They departed from no sign, no lead, no evidence. They faded into the night, with the Star of Africa. And the riddle of the vanished diamond commenced.

She made an CD, a smash, a phenomenon. She became a star, a celebrity, a marvel. She had it all, fans, wealth, awards. She was on cloud nine, she was living her vision. But she also had a dark side. She had a mystery, an issue, an habit. She started to fall apart, to make mistakes, to stir up trouble. She faced condemnation, fallout, legal actions. She gave up her followers, her wealth, her honors. She tumbled down, she became a mockery, a tragedy. She gave up it all, her fame, her wealth, her prestige. She was the ascent and downfall of a pop star.
