The Coffee Book

2012-05-01 Nina Luttinger A history of coffee from the sixth century to Starbucks that's "good to the last sentence" (Las Cruces Sun News). One of Library Journal's "Best Business Books" This updated edition of The Coffee Book is jammed full of facts, figures, cartoons, and commentary covering coffee from its first use in Ethiopia in the sixth century to the rise of Starbucks and the emergence of Fair Trade coffee in the twenty-first. The book explores the process of cultivation, harvesting, and roasting from bean to cup; surveys the social history of café society from the first coffeehouses in Constantinople to beatnik havens in Berkeley and Greenwich Village; and tells the dramatic tale of high-stakes international trade and speculation for a product that can make or break entire national economies. It also examines the industry's major players, revealing the damage that's been done to farmers, laborers, and the environment by mass cultivation—and explores the growing "conscious coffee" market. "Drawing on sources ranging from Molière and beatnik cartoonists to the Food and Agriculture Organization, the authors describe the beverage's long and colorful rise to ubiquity." —The Economist "Most stimulating." —The Baltimore Sun

Confronting the Coffee Crisis

2008 Christopher M. Bacon Explores small-scale farming, the political economy of the global coffee industry, & initiatives that claim to promote more sustainable rural development in coffee-producing communities.

Coffee Culture

2011-01-26 Catherine M. Tucker "The Anthropology of Stuff" is part of a new Series dedicated to innovative, unconventional ways to connect undergraduate students and their lived concerns about our social world to the power of social science ideas and evidence. Our goal with the project is to help spark social science imaginations and in doing so, new avenues for meaningful thought and action. Each "Stuff" title is a short (100 page) "mini text" illuminating for students the network of people and activities that create their material world. From the coffee producers and pickers who tend the plantations in tropical nations, to the middlemen and processors, to the consumers who drink coffee without ever having to think about how the drink reached their hands, here is a commodity that ties the world together. This is a great little book that helps students apply anthropological concepts and theories to their everyday lives, learn how historical events and processes have shaped the modern world and the contexts of their lives, and how consumption decisions carry ramifications for our health, the environment, the reproduction of social inequality, and the possibility of supporting equity, sustainability and social justice.

Hungry Capital

2013-03-27 Luigi Russi Over the past thirty years, the ability of global finance to affect aspects of everyday life has been increasing at an unprecedented rate. The world of food bears vivid testimony to this tendency, through the scars opened by the 2008 world food price crisis, the iron fist of retailing giants that occupy the supply chain and the unsustainable ecological footprint left behind by global production networks. Hungry Capital offers a rigorous analysis of the influence that financial imperatives exert on the food economy at different levels: from the direct use of edible commodities as an object of speculation to the complex food chains set up by manufacturers and supermarkets. It argues that the circular compulsion to build profits upon profits that global finance injects into the world of food restructures the basic nurturing relationship between man and nature into a streamlined process from which value has to be mined. The end result is a monstrous Leviathan that holds together while - at every step - risks to crumble.

Everything but the Coffee

2009-10-20 Bryant Simon Everything but the Coffee casts a fresh eye on the world's most famous coffee company, looking beyond baristas, movie cameos, and Paul McCartney CDs to understand what Starbucks can tell us about America. Bryant Simon visited hundreds of Starbucks around the world to ask, Why did Starbucks take hold so quickly with consumers? What did it seem to provide over and above a decent cup of coffee? Why at the moment of Starbucks' profit-generating peak did the company lose its way, leaving observers baffled about how it might regain its customers and its cultural significance? Everything but the Coffee probes the company's psychological, emotional, political, and sociological power to discover how Starbucks' explosive success and rapid deflation exemplify American culture at this historical moment. Most importantly, it shows that Starbucks speaks to a deeply felt American need for predictability and class standing, community and authenticity, revealing that Starbucks' appeal lies not in the product it sells but in the easily consumed identity it offers.

The Coffee Book

Food and World Culture [2 volumes]

2022-08-23 Linda S. Watts This book uses food as a lens through which to explore important matters of society and culture. In exploring why and how people eat around the globe, the text

focuses on issues of health, conflict, struggle, contest, inequality, and power. Whether because of its necessity, pleasure, or ubiquity, the world of food (and its lore) proves endlessly fascinating to most people. The story of food is a narrative filled with both human striving and human suffering. However, many of today's diners are only dimly aware of the human price exacted for that comforting distance from the lived-world realities of food justice struggles. With attention to food issues ranging from local farming practices to global supply chains, this book examines how food's history and geography remain inextricably linked to sociopolitical experiences of trauma connected with globalization, such as colonization, conquest, enslavement, and oppression. The main text is structured alphabetically around a set of 70 ingredients, from almonds to yeast. Each ingredient's story is accompanied by recipes. Along with the food profiles, the encyclopedia features sidebars. These are short discussions of topics of interest related to food, including automats, diners, victory gardens, and food at world's fairs. This project also brings a social justice perspective to its content—weighing debates concerning food access, equity, insecurity, and politics.
