The Peabody Picture Vocabulary Test 4th Edition (PPVT-4) is a widely recognized vocabulary test that has been in operation for nearly half a century. Formulated by Lloyd M. Dunn and Douglas M. Dunn, the test is designed to assess receptive vocabulary for Standard American English. It is swift and easy to conduct, conserving important time so that focus can be set on executing effective strategies.

The PPVT-4 evaluation subject matter includes a wide range of receptive vocabulary ranks, extending from pre-kindergarten through adult age. The assessment questions broadly sample words that portray 20 subject domains (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and home and educational vocabulary.

The assessment offers two identical editions which contain different vocabulary terms, ensuring that the individual has not “learned” the evaluation. One edition can be utilized ahead of intervention implementation to evaluate individuals’ vocabulary comprehension and the other edition can be utilized for re-evaluation to measure and document improvement. The PPVT-4 also contains a special Growth Scale Value (GSV) which is sensitive to minor changes over time.
