Cyberbullying Trijntje Völlink 2015-10-23 The study of cyberbullying has exploded since its first appearance in a peer-reviewed journal article in 2005. *Cyberbullying: From theory to intervention* aims to make clear and practical sense of this proliferation of coverage by defining the problem of cyberbullying and examining its unique features. The volume provides a thorough overview of state-of-the-art research into the phenomenon, and discusses the development and evaluation of interventions to prevent and combat it. Whereas most research papers offer limited space to describe actual intervention methods, this book provides tremendous insight into the different theoretical methods and practical strategies available to combat cyberbullying. Part One provides readers with a critical review of the existing research literature and collects insights from international researchers involved in bullying and cyberbullying research, tackling key questions such as: how is cyberbullying defined, what is the overlap with traditional bullying, and what are the negative consequences of cyberbullying? Part Two gives an overview of the development and content of evidence-based ICT interventions aimed at preventing and combating bullying and cyberbullying. In addition, some of the important outcomes of the effect evaluations will be described. The book's final chapter integrates the information from Part One with advice regarding practical applications from Part Two. *Cyberbullying: From theory to intervention* is essential reading for academics and researchers concerned with both cyberbullying and traditional bullying. It can be used in graduate seminars or advanced undergraduate courses in cyberbullying and will also be of interest to teachers, field experts and organisations involved and disseminating cyberbullying solutions.

Cyberbullying in Schools, Workplaces, and Romantic Relationships Gary W. Giumetti 2019-03-21 This volume brings together research on cyberbullying across contexts, age groups, and cultures to gain a fuller perspective of the prevalence and impact of electronic mistreatment on individual, group, and organizational outcomes. This is the first book to integrate research on cyberbullying across three contexts: schools, workplaces, and romantic relationships, providing a unique synthesis of lifespan contexts. For each context, the expert chapter authors bring together three different 'lenses': existing research on the predictors and outcomes of cyberbullying within that context; a cross-cultural review across national borders and cultural boundaries; and a developmental perspective that examines age-related differences in cyberbullying within that context. The book closes by drawing commonalities across these different contexts leading to a richer understanding of cyberbullying as a whole and some possible avenues for future research and practice. This is fascinating reading for researchers and upper-level students in social psychology, counseling, school psychology, industrial-organizational psychology, and developmental psychology, as well as educators and administrators.

Protecting Children Online? Tijana Milosevic 2018-02-02 A critical examination of efforts by social media companies—including Facebook, Twitter, Snapchat, and Instagram—to rein in cyberbullying by young users. High-profile cyberbullying cases often trigger exaggerated public concern about children's use of social media. Large companies like Facebook respond by pointing to their existing anti-bullying mechanisms or coordinate with nongovernmental organizations to organize anti-cyberbullying efforts. Do these attempts at self-regulation work? In this book, Tijana Milosevic examines the effectiveness of efforts by social media companies—including Facebook, Twitter, YouTube, Snapchat, and Instagram—to rein in cyberbullying by young users. Milosevic analyzes the anti-bullying policies of fourteen major social media companies, as recorded in companies' corporate documents, draws on interviews with company representatives and e-safety experts, and details the roles of nongovernmental organizations examining their ability to provide critical independent advice. She draws attention to lack of transparency in how companies handle bullying cases, emphasizing the need for a continuous independent evaluation of

effectiveness of companies' mechanisms, especially from children's perspective. Milosevic argues that cyberbullying should be viewed in the context of children's rights and as part of the larger social problem of the culture of humiliation. Milosevic looks into five digital bullying cases related to suicides, examining the pressures on the social media companies involved, the nature of the public discussion, and subsequent government regulation that did not necessarily address the problem in a way that benefits children. She emphasizes the need not only for protection but also for participation and empowerment—for finding a way to protect the vulnerable while ensuring the child's right to participate in digital spaces.

Violence Goes to College Christopher Bollinger 2018-06-14 This updated and expanded new edition continues the theme of the second edition that presents a framework by which the reader can gain a broader and deeper understanding of the issues involved with campus violence incidents. In order to understand the current state of campus violence, two sources of information must be considered—the factual and the theoretical. The editors of this book bring together a powerful team of practitioners and scholars from across multiple disciplines to discuss the critical elements associated with campus violence. With the rise of public protest and civil unrest, this book provides a detailed examination of prevention, intervention, and long-term responses to campus violence. Divided into four parts, Part I guides the reader in understanding violence and how it impacts college campuses. Facts, theories, institutional culture, and threats of violence are included. Part II explores how campuses can invest in human infrastructure, prevention, policies, safety strategies, intervention, and response efforts to make campuses safer. Part III covers the ways in which college violence occurs within the context of the law, alcohol, social media, and speakers, including speech and protest. Part IV discusses the specific strains of gender-based violence, suicide, hate crimes, hateful violence, cyberbullying, hazing, kinetic insider violence, and mass shootings. High profile cases provide many examples of catalyst events that changed the paths for institutions of higher education. This user-friendly resource provides college personnel, students, and parents with directed, well-researched strategies to prepare for the possibility of tragedy before it strikes. Cyberbullying Prevention and Response Justin W. Patchin 2012-03-28 Just as the previous generation was raised in front of televisions, adolescents at the turn of the 21st century are being raised in an internet-enabled world where blogs, social networking, and instant messaging are competing with face-to-face and telephone communication as the dominant means through which personal interaction takes place. Unfortunately, a small but growing proportion of our youth are being exposed online to interpersonal violence, aggression, and harassment via cyberbullying. The mission of this book is to explore the many critical issues surrounding this new phenomenon. Key features include the following. Comprehensive - The book provides a

Narratives in Research and Interventions on Cyberbullying

among Young People Heidi Vandebosch 2019-01-23 This book describes innovative ways to do research about, and design interventions for, cyberbullying by children and adolescents. It does this by taking a narrative approach. How can narrative research methods complement the mostly quantitative methods (e.g. surveys, experiments, ...) in cyberbullying research? And how can stories be used to inform young people about the issue and empower them? Throughout the book, special attention is paid to new information and communication technologies, and the opportunities ICTs provide for narrative research (e.g. as a source of naturally occurring stories on cyberbullying), and for narrative health interventions (e.g. via Influencers). The book thus integrates research and insights from the fields of cyberbullying, narrative methods, narrative health communication, and new information and communication technologies.

Handbook of Children's Rights Martin D. Ruck 2016-12-08 While the notion of young people as individuals worthy or capable of having rights is of relatively recent origin, over the past several decades there has been a substantial increase in both social and political commitment to children's rights as well as a tendency to grant young people some of the rights that were typically accorded only to adults. In addition, there has been a noticeable shift in orientation from a focus on children's protection and provision to an emphasis on children's participation and self-determination. With contributions from a wide range of international scholars, the Handbook of Children's Rights brings together research, theory, and practice from diverse perspectives on children's rights. This volume constitutes a comprehensive treatment of critical perspectives concerning children's rights in their various forms. Its contributions address some of the major scholarly tensions and policy debates comprising the current discourse on children's rights, including the best interests of the child, evolving capacities of the child, states' rights versus children's rights, rights of children versus parental or family rights, children as citizens, children's rights versus children's responsibilities, and balancing protection and participation. In addition to its multidisciplinary focus, the handbook includes perspectives from social science domains in which children's rights scholarship has evolved largely independently due to distinct and seemingly competing assumptions and disciplinary approaches (e.g., childhood studies, developmental psychology,

sociology of childhood, anthropology, and political science). The handbook also brings together diverse methodological approaches to the study of children's rights, including both quantitative and qualitative perspectives, and policy analysis. This comprehensive, cosmopolitan, and timely volume serves as an important reference for both scholarly and policy-driven interest in the voices and perspectives of children and youth.

Development and Evaluation of Positive Adolescent Training through Holistic Social Programs (P.A.T.H.S.)

Daniel T.L. SHEK 2013-06-28 This book outlines the development, implementation and evaluation of a project entitled "P.A.T.H.S. to Adulthood: A Jockey Club Youth Enhancement Scheme," with P.A.T.H.S. denoting Positive Adolescent Training through Holistic Social programmes. This pioneer project was conducted in Hong Kong between 2005 and 2012 with more than 210,000 participants. Its goal was to help students meet various challenges in their path to adulthood, with a focus on their psychosocial competencies, developmental assets and the promotion of healthy peer relationships. The project was initiated by The Hong Kong Jockey Club Charities Trust in collaboration with the Government's Social Welfare Department, Education Bureau and five universities in Hong Kong. Edited by the researchers of the project, Development and Evaluation of Positive Adolescent Training through Holistic Social Programs explores the nature of positive youth development (PYD), the application of PYD constructs to youth programs and implementation issues. Using multiple strategies, the book evaluates the overall effectiveness of the P.A.T.H.S. school-based programme and reveals that stakeholders had positive perceptions of the project, its implementers and benefits. Students in the program showed better positive development and displayed lower levels of substance abuse and delinquent behaviour than students in the control schools. The book also details lessons learned, emergent issues, future directions as well as insights into the development of positive youth development programs particularly in Chinese communities. Development and Evaluation of Positive Adolescent Training through Holistic Social Programs will appeal to all educators, administrators, psychologists, social workers and allied professionals looking to promote whole-person development in their students, especially those with an interest in education in China.

Securing the Schoolyard Nicholas D. Young 2018-12-14 This book explores the growing crisis in school safety and security.

Blowing Up Randi Minetor 2017-09-21 This is a powerful resource for anyone who wants to understand the nature of interpersonal conflict—to study it, understand why it's a consistent part of human history, and perhaps avert it in their own lives. Why does conflict surround us in everyday life, from spats between individuals to major conflicts involving large groups? Is conflict inevitable? Why are conflicts and differences of opinion often so hard to resolve? *Blowing Up: The Psychology of Conflict* focuses on interpersonal conflict and the ways that this level of conflict can move beyond the original relationship to permeate larger constructs—small groups, large groups, whole organizations, and even entire nations. By examining both the positive and negative consequences of conflict—and by documenting its existence as normal and common—readers can appreciate how conflict does not immediately equate to negative feelings and how it also can be useful in creating rules and laws, aiding in negotiation, and bringing people together to work toward a common goal. This clear and accessibly written book in Greenwood's Psychology of Everyday Life series provides students with an understanding of the important role conflict

plays in our lives, the many forms conflict may take, and the ways that conflict can actually be constructive and useful as well as destructive to relationships, discussions, and groups. The historical overview of established theories and the study of conflict to date provides readers with invaluable perspective into the subject by identifying and analyzing specific conflicts, including well-publicized conflicts in foreign countries. The book also charts conflict throughout the life cycle to help students identify the reasons for conflicts that occur in their own lives—with parents, friends, siblings, employers, romantic partners, and people in authority.

Examining Internet and Technology around the World Laura M. Steckman 2020-12-02 This book offers comparative insights into the challenges and opportunities surrounding emerging technology and the internet as it is used and perceived throughout the world, providing students with cross-cultural and cross-national perspectives. The United Arab Emirates has a national goal of colonizing Mars by 2117, and China seeks to modernize its entire manufacturing process to produce cutting-edge technologies and research advances by 2025. How are other countries using the internet and emerging technologies to their advantage? This volume in the Global Viewpoints series examines 10 issues pertaining to the internet and technology, including access and censorship, alternative energy technologies, artificial intelligence, autonomous robots, cyberbullying, cybercrime, e-learning, GMOs, online privacy, and virtual and augmented reality. For each topic, the volume features eight country-level perspectives that span the world to allow for comparisons of different nations' specific approaches to the technology or issue. This encyclopedia takes a new direction in understanding the importance and impact of emerging technologies on the world, showing that even when experiencing similar technologically related challenges or advances, these technologies do not form one-size-fits-all solutions for every nation and population. Even when nations develop similar technologies, human dimensions—from policy to social norms to culture—influence people and society across the world differently.
