WebThe Mind in the Cave is thus the product of two hypotheses, both of them contentious – the shamanistic interpretation of west European Upper Palaeolithic cave art, and the cognitive separation of modern humans and Neanderthals. But is it as simple as that? Was cave art the hallmark of a new cognitive ability and social consciousness that

Webdiscovery, cave art has provoked great curiosity about why it appeared when and where it did, how it was made, and what it meant to the communities that created it. David Lewis-Williams proposes that the explanation for this lies in the evolution of the human mind. Cro-Magnons, unlike the Neanderthals, possessed a more
