Intellectual Appetite Paul J. Griffiths 2009-08 *Everyone wants to know things this book explains how to want to know them well*

Big Hunger Andrew Fisher 2018-04-13 How to focus anti-hunger efforts not on charity but on the root causes of food insecurity, improving public health, and reducing income inequality. Food banks and food pantries have proliferated in response to an economic emergency. The loss of manufacturing jobs combined with the recession of the early 1980s and Reagan administration cutbacks in federal programs led to an explosion in the growth of food charity. This was meant to be a stopgap measure, but the jobs never came back, and the "emergency food system" became an industry. In *Big Hunger*, Andrew Fisher takes a critical look at the business of hunger and offers a new vision for the anti-hunger movement. From one perspective, anti-hunger leaders have been extraordinarily effective. Food charity is embedded in American civil society, and federal food programs have remained intact while other anti-poverty programs have been eliminated or slashed. But anti-hunger advocates are missing an essential element of the problem: economic inequality driven by low wages. Reliant on corporate donations of food and money, anti-hunger organizations have failed to hold business accountable for offshoring jobs, cutting benefits, exploiting workers and rural communities, and resisting wage increases. They have become part of a "hunger industrial complex" that seems as self-perpetuating as the more famous military-industrial complex. Fisher lays out a vision that encompasses a broader definition of hunger characterized by a focus on public health, economic justice, and economic democracy. He points to the work of numerous grassroots organizations that are leading the way in these fields as models for the rest of the anti-hunger sector. It is only through approaches like these that we can hope to end hunger, not just manage it.

Tasting Difference Gitanjali G. Shahani 2020-05-15 *Tasting Difference* examines early modern discourses of racial, cultural, and religious difference that emerged in the wake of contact with foreign peoples and foreign foods from across the globe. Gitanjali Shahani reimagines the contact zone between Western Europe and the global South in culinary terms, emphasizing the gut rather than the gaze in colonial encounters. From household manuals that instructed English housewives how to use newly imported foodstuffs to "the spiced Indian air" of *A Midsummer Night's Dream*, from the repurposing of Othello as an early modern pitchman for coffee in ballads to the performance of disgust in travel narratives, Shahani shows how early modern genres negotiated the allure and danger of foreign tastes. Turning maxims such as "We are what we eat" on their head, Shahani asks how did we (the colonized subjects) become what you (the colonizing subjects) eat? How did we become alternately the object of fear and appetite, loathing and craving? Shahani takes us back several centuries to the process by which food came to be inscribed with racial character and the racial other came to be marked as edible, showing how the racializing of food began in an era well before chicken tikka masala and Balti cuisine. Bringing into conversation critical paradigms in early modern studies, food studies, and postcolonial studies, she argues that it is in the writing on food and eating that we see among the earliest configurations of racial difference, and it is experienced both as a different taste and as a taste of difference.

Eating Identities Wenying Xu 2018-03-31 The French epicure and gastronome Brillat-Savarin declared, "Tell me what you eat, and I will tell you who you are." Wenying Xu infuses this notion

with cultural-political energy by extending it to an ethnic group known for its cuisines: Asian Americans. She begins with the general argument that eating is a means of becoming—not simply in the sense of nourishment but more importantly of what we choose to eat, what we can afford to eat, what we secretly crave but are ashamed to eat in front of others, and how we eat. Food, as the most significant medium of traffic between the inside and outside of our bodies, organizes, signifies, and legitimates our sense of self and distinguishes us from others, who practice different foodways. Narrowing her scope, Xu reveals how cooking, eating, and food fashion Asian American identities in terms of race/ethnicity, gender, class, diaspora, and sexuality. She provides lucid and informed interpretations of seven Asian American writers (John Okada, Joy Kogawa, Frank Chin, Li-Young Lee, David Wong Louie, Mei Ng, and Monique Truong) and places these identity issues in the fascinating spaces of food, hunger, consumption, appetite, desire, and orality. Asian American literature abounds in culinary metaphors and references, but few scholars have made sense of them in a meaningful way. Most literary critics perceive alimentary references as narrative strategies or part of the background; Xu takes food as the central site of cultural and political struggles waged in the seemingly private domain of desire in the lives of Asian Americans. *Eating Identities* is the first book to link food to a wide range of Asian American concerns such as race and sexuality. Unlike most sociological studies, which center on empirical analyses of the relationship between food and society, it focuses on how food practices influence psychological and ontological formations and thus contributes significantly to the growing field of food studies. For students of literature, this tantalizing work offers an illuminating lesson on how to read the multivalent meanings of food and eating in literary texts. Insatiable Appetite Richard P. Tucker 2007 This book presents a comprehensive and critical historical overview of the role played by the US as a developer and consumer of tropical nature.

Hunger John R. Butterly 2010 A timely and provocative look at the role political developments and the biology of nutrition play in world famine

The Evolution of Obesity Michael L. Power 2013-02 Draws on popular examples and sound science to explain our expanding waistlines and to discuss the consequences of being overweight for different demographic groups. Reviews the various studies of human and animal fat use and storage, including those that examine fat deposition and metabolism in men and women; chronicle cultural differences in food procurement, preparation, and consumption; and consider the influence of sedentary occupations and lifestyles.

An Ethnography of Hunger Kristin Phillips 2018-08-29 In *An Ethnography of Hunger* Kristin D. Phillips examines how rural farmers in central Tanzania negotiate the interconnected projects of subsistence, politics, and rural development. Writing against stereotypical Western media images of spectacular famine in Africa, she examines how people live with—rather than die from—hunger. Through tracing the seasonal cycles of drought, plenty, and suffering and the

political cycles of elections, development, and state extraction, Phillips studies hunger as a pattern of relationships and practices that organizes access to food and profoundly shapes agrarian lives and livelihoods. Amid extreme inequality and unpredictability, rural people pursue subsistence by alternating between—and sometimes combining—rights and reciprocity, a political form that she calls "subsistence citizenship." Phillips argues that studying subsistence is essential to understanding the persistence of global poverty, how people vote, and why development projects succeed or fail.

Hunger in the Balance Jennifer Clapp 2015-10-27 Food aid has become a contentious issue in recent decades, with sharp disagreements over genetically modified crops, agricultural subsidies, and ways of guaranteeing food security in the face of successive global food crises. In *Hunger in the Balance*, Jennifer Clapp provides a timely and comprehensive account of the contemporary politics of food aid, explaining the origins and outcomes of recent clashes between donor nations and between donors and recipients. She identifies fundamental disputes between donors over "tied" food aid, which requires that food be sourced in the donor country, versus "untied" aid, which provides cash to purchase food closer to the source of hunger. These debates have been especially intense between the major food aid donors, particularly the European Union and the United States. Similarly, the EU's rejection of GMO agricultural imports has raised concerns among recipients about accepting GMO foodstuffs from the United States. For the several hundred million people who at present have little choice but to rely on food aid for their daily survival, Clapp concludes, the consequences of these political differences are profound.

Racial Indigestion Kyla Wazana Tompkins 2012-07-30 The act of eating is both erotic and violent, as one wholly consumes the object being eaten. At the same time, eating performs a kind of vulnerability to the world, revealing a fundamental interdependence between the eater and that which exists outside her body. *Racial Indigestion* explores the links between food, visual and literary culture in the nineteenth-century United States to reveal how eating produces political subjects by justifying the social discourses that create bodily meaning. Combing through a visually stunning and rare archive of children's literature, architectural history, domestic manuals, dietetic tracts, novels and advertising, *Racial Indigestion* tells the story of the consolidation of nationalist mythologies of whiteness via the erotic politics of consumption. Less a history of commodities than a history of eating itself, the book seeks to understand how eating became a political act, linked to appetite, vice, virtue, race and class inequality and, finally, the queer pleasures and pitfalls of a burgeoning commodity culture. In so doing, *Racial Indigestion* sheds light on contemporary "foodie" culture's vexed relationship to nativism, nationalism and race privilege.

Food and Poverty Leslie Hossfeld 2021-04-30 Food insecurity rates, which skyrocketed with the Great Recession, have yet to fall to pre-recession levels. Food pantries are stretched thin, and states are imposing new restrictions on programs like SNAP that are preventing people from getting crucial government assistance. At the same time, we see an increase in obesity that results from lack of access to healthy foods. The poor face a daily choice between paying bills and paying for food.

Famine Foods Paul E. Minnis 2021-04-27 How people eat today is a record of food use through the ages, and *Famine Foods* offers the first ever overview of the use of alternative foods during food shortages. Paul E. Minnis explores the unusual plants that have helped humanity survive throughout history.

Playboys and Mayfair Men Angus McLaren 2017-10-16 The shocking true story of a diamond theft gone wrong. In December 1937, four respectable young men in their twenties, all products of elite English public schools, conspired to lure to the luxurious Hyde Park Hotel a representative of Cartier, the renowned jewelry firm. There, the "Mayfair men" brutally bludgeoned diamond salesman Etienne Bellenger and made off with eight rings that today would be worth approximately half a million pounds. Such well-connected young people were not

supposed to appear in the prisoner's dock at the Old Bailey. Not surprisingly, the popular newspapers had a field day responding to the public's insatiable appetite for news about the upper-crust rowdies and their unsavory pasts. In *Playboys and Mayfair Men*, Angus McLaren recounts the violent robbery and sensational trial that followed. He uses the case as a hook to draw the reader into a revelatory exploration of key interwar social issues, from masculinity and cultural decadence to broader anxieties about moral decay. In his gripping depiction of Mayfair's celebrity high life, McLaren describes the crime in detail, as well as the police investigation, the suspects, their trial, and the aftermath of their convictions.

Feeding the Hungry Michelle Jurkovich 2020-10-15 Food insecurity poses one of the most pressing development and human security challenges in the world. In *Feeding the Hungry*, Michelle Jurkovich examines the social and normative environments in which international anti-hunger organizations are working and argues that despite international law ascribing responsibility to national governments to ensure the right to food of their citizens, there is no shared social consensus on who ought to do what to solve the hunger problem. Drawing on interviews with staff at top international anti-hunger organizations as well as archival research at the United Nations Food and Agriculture Organization, the UK National Archives, and the U.S. National Archives, Jurkovich provides a new analytic model of transnational advocacy. In investigating advocacy around a critical economic and social right—the right to food—Jurkovich challenges existing understandings of the relationships among human rights, norms, and laws. Most important, *Feeding the Hungry* provides an expanded conceptual tool kit with which we can examine and understand the social and moral forces at play in rights advocacy.

The Dark Fantastic Ebony Elizabeth Thomas 2020-09-22 Reveals the diversity crisis in children's and young adult media as not only a lack of representation, but a lack of imagination. Stories provide portals into other worlds, both real and imagined. The promise of escape draws people from all backgrounds to speculative fiction, but when people of color seek passageways into the fantastic, the doors are often barred. This problem lies not only with children's publishing, but also with the television and film executives tasked with adapting these stories into a visual world. When characters of color do appear, they are often marginalized or subjected to violence, reinforcing for audiences that not all lives matter. *The Dark Fantastic* is an engaging and provocative exploration of race in popular youth and young adult speculative fiction. Grounded in her experiences as YA novelist, fanfiction writer, and scholar of education, Thomas considers four black girl protagonists from some of the most popular stories of the early 21st century: Bonnie Bennett from the CW's *The Vampire Diaries*, Rue from Suzanne Collins's *The Hunger Games*, Gwen from the BBC's *Merlin*, and Angelina Johnson from J.K. Rowling's *Harry Potter*. Analyzing their narratives and audience reactions to them reveals how these characters mirror the violence against black and brown people in our own world. In response, Thomas uncovers and builds upon a tradition of fantasy and radical imagination in Black feminism and Afrofuturism to reveal new possibilities. Through fanfiction and other modes of counter-storytelling, young people of color have reinvented fantastic worlds that reflect their own experiences, their own lives. As Thomas powerfully asserts, "we dark girls deserve more, because we are more."

Carnal Appetites Elspeth Probyn 2003-09-02 In *Carnal Appetites*, Elspeth Probyn charts the explosion of interest in food - from the cults that spring up around celebrity chefs, to our love/hate relationship with fast food, our fetishization of food and sex, and the impact of our modes of consumption on our identities. 'You are what you eat' the saying goes, but is the tenet truer than ever? As the range of food options proliferates in the West, our food choices become inextricably linked with our lives and lifestyles. Probyn also tackles issues that trouble society, asking questions about the nature of appetite, desire, greed and pleasure, and shedding light on subjects including: fast food, vegetarianism, food sex, cannibalism, forced feeding, and fat

politics.

The Provisions of War Justin Nordstrom 2021-08-13 The Provisions of War examines how soldiers, civilians, communities, and institutions have used food and its absence as both a destructive weapon and a unifying force in establishing governmental control and cultural cohesion during times of conflict. Historians as well as scholars of literature, regional studies, and religious studies problematize traditional geographic boundaries and periodization in this essay collection, analyzing various conflicts of the nineteenth and twentieth centuries through a foodways lens to reveal new insights about the parameters of armed interactions. The subjects covered are as varied and inclusive as the perspectives offered—ranging from topics like military logistics and animal disease in colonial Africa, Indian vegetarian identity, and food in the counterinsurgency of the Malayan Emergency, to investigations of hunger in Egypt after World War I and American soldiers' role in the making of US-Mexico borderlands. Taken together, the essays here demonstrate the role of food in shaping prewar political debates and postwar realities, revealing how dietary adjustments brought on by military campaigns reshape national and individual foodways and identities long after the cessation of hostilities

The Edible Gardens of Ethiopia Valentina Peveri 2021-02-16 What is a beautiful garden to southern Ethiopian farmers? Anchored in the author's perceptual approach to the people, plants, land, and food, The Edible Gardens of Ethiopia opens a window into the simple beauty and ecological vitality of an ensete garden. The ensete plant is only one among the many "unloved" crops that are marginalized and pushed close to disappearance by the advance of farming modernization and monocultural thinking. And yet its human companions, caught in a symbiotic and sensuous dialogue with the plant, still relate to each exemplar as having individual appearance, sensibility, charisma, and taste, as an epiphany of beauty and prosperity, and even believe that the plant can feel pain. Here a different story is recounted of these human-plant communities, one of reciprocal love at times practiced in an act of secrecy. The plot unfolds from the subversive and tasteful dimensions of gardening for subsistence and cooking in the garden of ensete through reflections on the cultural and edible dimensions of biodiversity to embrace hunger and beauty as absorbing aesthetic experiences in small-scale agriculture. Through this story, the reader will enter the material and spiritual world of ensete and contemplate it as a modest yet inspiring example of hope in rapidly deteriorating landscapes. Based on prolonged engagement with this "virtuous" plant of southwestern Ethiopia, this book provides a nuanced reading of the ensete ventricosum (avant-)garden and explores how the life in tiny, diverse, and womanly plots offers alternative visions of nature, food policy, and conservation efforts.

Autobiography of My Hungers Rigoberto González 2013-05-06 Rigoberto González, author of the critically acclaimed memoir *Butterfly Boy: Memories of a Chicano Mariposa*, takes a second piercing look at his past through a startling new lens: hunger. The need for sustenance originating in childhood poverty, the adolescent emotional need for solace and comfort, the adult desire for a larger world, another lover, a different body—all are explored by González in a series of heartbreaking and poetic vignettes. Each vignette is a defining moment of self-awareness, every moment an important step in a lifelong journey toward clarity, knowledge, and the nourishment that comes in various forms—even "the smallest biggest joys" help piece together a complex portrait of a gay man of color who at last defines himself by what he learns, not by what he yearns for. Bill Whitehead Award for Lifetime Literary Achievement, Publishing Triangle "Told in a series of revealing vignettes and poems, González's *Autobiography of my Hungers* turns moments of need and want into revelations of truth and self-awareness, creating the portrait of an artist that is complex if not entirely complete."—El Paso Times "Through his provocative vignettes, González communicates a lifetime of struggle for affirmation and self-acceptance."—Make/Shift

Politics and the Passions, 1500-1850 Victoria Kahn 2009-01-10 Focusing on the new theories of human motivation that emerged during the transition from feudalism to the modern period, this is the first book of new essays on the relationship between politics and the passions from

Machiavelli to Bentham. Contributors address the crisis of moral and philosophical discourse in the early modern period; the necessity of inventing a new way of describing the relation between reflection and action, and private and public selves; the disciplinary regulation of the body; and the ideological constitution of identity. The collection as a whole asks whether a discourse of the passions might provide a critical perspective on the politics of subjectivity. Whatever their specific approach to the question of ideology, all the essays reconsider the legacy of the passions in modern political theory and the importance of the history of politics and the passions for modern political debates. Contributors, in addition to the editors, are Nancy Armstrong, Judith Butler, Riccardo Caporali, Howard Caygill, Patrick Coleman, Frances Ferguson, John Guillory, Timothy Hampton, John P. McCormick, and Leonard Tennenhouse.

On an Empty Stomach Tom Scott-Smith 2020-04-15 On an Empty Stomach examines the practical techniques humanitarians have used to manage and measure starvation, from Victorian "scientific" soup kitchens to space-age, high-protein foods. Tracing the evolution of these techniques since the start of the nineteenth century, Tom Scott-Smith argues that humanitarianism is not a simple story of progress and improvement, but rather is profoundly shaped by sociopolitical conditions. Aid is often presented as an apolitical and technical project, but the way humanitarians conceive and tackle human needs has always been deeply influenced by culture, politics, and society. These influences extend down to the most detailed mechanisms for measuring malnutrition and providing sustenance. As Scott-Smith shows, over the past century, the humanitarian approach to hunger has redefined food as nutrients and hunger as a medical condition. Aid has become more individualized, medicalized, and rationalized, shaped by modernism in bureaucracy, commerce, and food technology. On an Empty Stomach focuses on the gains and losses that result, examining the complex compromises that arise between efficiency of distribution and quality of care. Scott-Smith concludes that humanitarian groups have developed an approach to the empty stomach that is dependent on compact, commercially produced devices and is often paternalistic and culturally insensitive.

Hungry Britain Hannah Lambie-Mumford 2017-07-05 Examining the prolific growth of UK charitable emergency food provision over the past fifteen years, *Hungry Britain* uses the human right to food as a pathway to developing solutions to food poverty. Hannah Lambie-Mumford draws on data from the country's two largest charitable food providers to explore the effectiveness of this emerging system of food acquisition, its enduring sustainability, and, most importantly, where responsibility lies for ensuring that all people can realize their human right to food. She shows that the increasing tendency of charitable food providers to take responsibility for protecting people against food poverty occurs in tandem with significant cuts to the welfare state—cuts shaping both the need for and nature of emergency food provision. Arguing for a clear, rights-based framework, this book envisions a future where a range of actors—from the state to charities and the food industry—will be jointly accountable in combating food poverty.

Hungry Translations Richa Nagar 2019-08-30 Experts often assume that the poor, hungry, rural, and/or precarious need external interventions. They frequently fail to recognize how the same people create politics and knowledge by living and honing their own dynamic visions. How might scholars and teachers working in the Global North ethically participate in producing knowledge in ways that connect across different meanings of struggle, hunger, hope, and the good life? Informed by over twenty years of experiences in India and the United States, *Hungry Translations* bridges these divides with a fresh approach to academic theorizing. Through in-depth reflections on her collaborations with activists, theatre artists, writers, and students, Richa Nagar discusses the ongoing work of building embodied alliances among those who occupy different locations in predominant hierarchies. She argues that such alliances can sensitively engage difference through a kind of full-bodied immersion and translation that refuses comfortable closures or transparent renderings of meanings. While the shared and unending labor of politics makes perfect translation—or retelling—impossible, hungry translations

strive to make our knowledges more humble, more tentative, and more alive to the creativity of struggle.

Whose Hunger? Jenny Edkins 2000 We see famine and look for the likely causes: poor food distribution, unstable regimes, caprices of weather. A technical problem, we tell ourselves, one that modern social and natural science will someday resolve. To the contrary, Jenny Edkins responds in this book: Famine in the contemporary world is not the antithesis of modernity but its symptom. A critical investigation of hunger, famine, and aid practices in international politics, *Whose Hunger?* shows how the forms and ideas of modernity frame our understanding of famine and, consequently, shape our responses.

A Family for Louie Alexandra Thompson 2020-06-09 A foodie French bulldog finds a forever home in this heartwarming and adorable debut picture book, sure to appeal to fans of Gaston, Ellie, and Little Elliot, *Big City*. Meet Louie. He's a dog of very fine taste. He knows every chef in town, and each day he wanders the city, visiting his favorite restaurants. It's a good life, except... Louie is all on his own. What Louie wants more than anything is a family. But try as he might, Louie can't seem to find a family that's right for him. At the beach, he meets a little boy and his mother... but they're eating green jello salad and sardine sandwiches (Louie's least favorite foods!). At his favorite sushi restaurant, Louie spies a father and daughter with an open seat at their table... but their cat chases him away. At the park, he meets a nice family having a yummy barbecue, but when they invite him to play frisbee... Louie just can't keep up. Where-oh-where will Louie find a just-right family of his very own? Appetite for Change Warren J. Belasco 2014-01-21 In this engaging inquiry, originally published in 1989 and now fully updated for the twenty-first century, Warren J. Belasco considers the rise of the "countercuisine" in the 1960s, the subsequent success of mainstream businesses in turning granola, herbal tea, and other "revolutionary" foodstuffs into profitable products; the popularity of vegetarian and vegan diets; and the increasing availability of organic foods. From reviews of the previous edition: "Although Red Zinger never became our national drink, food and eating changed in America as a result of the social revolution of the 1960s. According to Warren Belasco, there was political ferment at the dinner table as well as in the streets. In this lively and intelligent mixture of narrative history and cultural analysis, Belasco argues that middle-class America eats differently today than in the 1950 because of the way the counterculture raised the national consciousness about food."—Joan Jacobs Brumberg, *The Nation* "This book documents not only how cultural rebels created a new set of foodways, brown rice and all, but also how American capitalists commercialized these innovations to their own economic advantage. Along the way, the author discusses the significant relationship between the rise of a 'countercuisine' and feminism, environmentalism, organic agriculture, health consciousness, the popularity of ethnic cuisine, radical economic theory, granola bars, and Natural Lite Beer. Never has history been such a good read!"—*The Digest: A Review for the Interdisciplinary Study of Food* "Now comes an examination of . . . the sweeping change in American eating habits ushered in by hippiedom in rebellion against middle-class America. . . . *Appetite for Change* tells how the food industry co-opted the health-food craze, discussing such hip capitalists as the founder of Celestial Seasonings teas; the rise of health-food cookbooks; how ethnic cuisine came to enjoy new popularity; and how watchdog agencies like the FDA served, arguably, more often as sleeping dogs than as vigilant ones."—*Publishers Weekly* "A challenging and sparkling book. . . . In Belasco's analysis, the ideology of an alternative cuisine was the most radical thrust of the entire counterculture and the one carrying the most realistic and urgently necessary blueprint for structural social change."—*Food and Foodways* "Here is meat, or perhaps miso, for those who want an overview of the social and economic forces behind the changes in our food supply. . . . This is a thought-provoking and pioneering examination of recent events that are still very much part of the present."—*Tufts University Diet and Nutrition Letter*

An Archive of Taste Lauren F. Klein 2020-05-12 A groundbreaking synthesis of food studies, archival theory, and early American literature There is no eating in the archive. This is not only a

practical admonition to any would-be researcher but also a methodological challenge, in that there is no eating—or, at least, no food—preserved among the printed records of the early United States. Synthesizing a range of textual artifacts with accounts (both real and imagined) of foods harvested, dishes prepared, and meals consumed, *An Archive of Taste* reveals how a focus on eating allows us to rethink the nature and significance of aesthetics in early America, as well as of its archive. Lauren F. Klein considers eating and early American aesthetics together, reframing the philosophical work of food and its meaning for the people who prepare, serve, and consume it. She tells the story of how eating emerged as an aesthetic activity over the course of the eighteenth century and how it subsequently transformed into a means of expressing both allegiance and resistance to the dominant Enlightenment worldview. Klein offers richly layered accounts of the enslaved men and women who cooked the meals of the nation's founders and, in doing so, directly affected the development of our national culture—from Thomas Jefferson's emancipation agreement with his enslaved chef to Malinda Russell's *Domestic Cookbook*, the first African American-authored culinary text. The first book to examine the gustatory origins of aesthetic taste in early American literature, *An Archive of Taste* shows how thinking about eating can help to tell new stories about the range of people who worked to establish a cultural foundation for the United States.

Black Hunger Doris Witt 2004-10-01 Assesses the complex interrelationships between food, race, and gender in America, with special attention paid to the famous figure of Aunt Jemima and the role played by soul food in the post-Civil War period, up through the civil rights movement and the present day. Beginning to End Hunger M. Jahi Chappell 2018-01-23 *Beginning to End Hunger* presents the story of Belo Horizonte, home to 2.5 million people and the site of one of the world's most successful city-run food security programs. Since its Municipal Secretariat of Food and Nutritional Security was founded in 1993, Belo Horizonte has sharply reduced malnutrition, leading it to serve as an inspiration for Brazil's renowned Zero Hunger programs. The secretariat's work with local family farmers shows how food security, rural livelihoods, and healthy ecosystems can be supported together. While inevitably imperfect, Belo Horizonte offers a vision of a path away from food system dysfunction, unsustainability, and hunger. In this convincing case study, M. Jahi Chappell establishes the importance of holistic approaches to food security, suggests how to design successful policies to end hunger, and lays out strategies for enacting policy change. With these tools, we can take the next steps toward achieving similar reductions in hunger and food insecurity elsewhere in the developed and developing worlds.

The Weight of Obesity Emily Yates-Doerr 2015-09-22 A woman with hypertension refuses vegetables. A man with diabetes adds iron-fortified sugar to his coffee. As death rates from heart attacks, strokes, and diabetes in Latin America escalate, global health interventions increasingly emphasize nutrition, exercise, and weight loss—but much goes awry as ideas move from policy boardrooms and clinics into everyday life. Based on years of intensive fieldwork, *The Weight of Obesity* offers poignant stories of how obesity is lived and experienced by Guatemalans who have recently found their diets—and their bodies—radically transformed. Anthropologist Emily Yates-Doerr challenges the widespread view that health can be measured in calories and pounds, offering an innovative understanding of what it means to be healthy in postcolonial Latin America. Through vivid descriptions of how people reject global standards and embrace fatness as desirable, this book interferes with contemporary biomedicine, adding depth to how we theorize structural violence. It is essential reading for anyone who cares about the politics of healthy eating.

The American Paradox David G. Myers 2008-10-01 DIVFor Americans entering the twenty-first century, it is the best of times and the worst of times. Material wealth is at record levels, yet disturbing social problems reflect a deep spiritual poverty. In this compelling book, well-known social psychologist David G. Myers asks how this paradox has come to be and, more important, how we can spark social renewal and dream a new American dream. Myers explores the

research on social ills from the 1960s through the 1990s and concludes that the materialism and radical individualism of this period have cost us dearly, imperiling our children, corroding general civility, and diminishing our happiness. However, in the voices of public figures and ordinary citizens he now hears a spirit of optimism. The national dialogue is shifting—away from the expansion of personal rights and toward enhancement of communal civility, away from efforts to raise self-esteem and toward attempts to arouse social responsibility, away from “whose values?” and toward “our values.” Myers analyzes in detail the research on educational and other programs that deal with social problems, explaining which seem to work and why. He then offers positive and well-reasoned advice, suggesting that a renewed social ecology for America will rest on policies that balance “me thinking” with “we thinking.”/div

The Mouth that Begg Gang Yue 1999 Drawing on narrative works across a century and across Chinese and Chinese-American cultural lines, Yue examines Chinese cultural politics of the twentieth century as an “alimentary discourse,” where the roles of food and “eating” with Your Heart, My Sky Margarita Engle 2022-04-19 In Cuba’s “special period in times of peace” of 1991, Liana and Amado find love after their severe hunger gives both courage to risk government retribution by skipping a summer of labor to seek food. Told in their two voices plus that of the stray dog that brought them together.

Culinary Shakespeare David B. Goldstein 2016-05-23 Eating and drinking—vital to all human beings—were of central importance to Shakespeare and his contemporaries. Culinary Shakespeare, the first collection devoted solely to the study of food and drink in Shakespeare’s plays, reframes questions about cuisine, eating, and meals in early modern drama. As a result, Shakespearean scenes that have long been identified as important and influential by scholars can now be considered in terms of another revealing cultural marker—that of culinary dynamics. Renaissance scholars, as David Goldstein and Amy Tigner point out, have only begun to grapple with the importance of cuisine in literature. An earlier generation of criticism concerned itself principally with cataloguing the foodstuffs in the plays. Recent analyses have operated largely within debates about humoralism and dietary literature, consumption, and interiority, working to historicize food in relation to the early modern body. The essays in Culinary Shakespeare build upon that prior focus on individual bodily experience but also transcend it, emphasizing the aesthetic, communal, and philosophical aspects of food, while also presenting valuable theoretical background. As various essays demonstrate, many of the central issues in Shakespeare studies can be elucidated by turning our attention to the study of food and drink. The societal and religious associations of drink, for example, or the economic implications of ingredients gathered from other lands, have meaningful implications for our understanding of both early modern and contemporary periods—including aspects of community, politics, local and global food production, biopower and the state, addiction, performativity, posthumanism, and the relationship between art and food. Culinary Shakespeare seeks to open new interpretive possibilities and will be of interest to scholars and students of Shakespeare and the early modern period as well as to those in food studies, food history, ecology, gender and domesticity, and critical theory.

Hidden Hunger Aya Hirata Kimura 2013-02-15 For decades, NGOs targeting world hunger focused on ensuring that adequate quantities of food were being sent to those in need. In the 1990s, the international food policy community turned its focus to the “hidden hunger” of micronutrient deficiencies, a problem that resulted in two scientific solutions: fortification, the addition of nutrients to processed foods, and biofortification, the modification of crops to produce more nutritious yields. This hidden hunger was presented as a scientific problem to be solved by “experts” and scientifically engineered smart foods rather than through local knowledge, which was deemed unscientific and, hence, irrelevant. In Hidden Hunger, Aya Hirata Kimura explores this recent emphasis on micronutrients and smart foods within the international development community and, in particular, how the voices of women were silenced despite their expertise in food purchasing and preparation. Kimura grounds her analysis in case studies of

attempts to enrich and market three basic foods—rice, wheat flour, and baby food—in Indonesia. She shows the power of nutritionism and how its technical focus enhanced the power of corporations as a government partner while restricting public participation in the making of policy for public health and food. She also analyzes the role of advertising to promote fortified foodstuffs and traces the history of Golden Rice, a crop genetically engineered to alleviate vitamin A deficiencies. Situating the recent turn to smart food in Indonesia and elsewhere as part of a long history of technical attempts to solve the Third World food problem, Kimura deftly analyzes the intersection of scientific expertise, market forces, and gendered knowledge to illuminate how hidden hunger ultimately defined women as victims rather than as active agents. **A Careful Hunger** Judy Young 2019-10-08 Judy Young (1940–2015) was a gifted but private poet. Over the years, she established provisional collections of her best work but refrained from seeking publication due to her trepidation with sharing her deeply personal poems with an audience. She found her voice in a collective group of creatives that included Susan Starr Richards, Mary Ann Taylor-Hall, and the late Donna Boyd, Jane Gentry, Audrey Robinson, and Carolyn Hisel. This illustrious circle of friends met monthly for almost thirty years and gave her the courage to share her work—a lyrical medley of pain, beauty, strength, and redemption. Revealed is the story of a woman’s inner life—an intimate tale of abuse and personal struggle—from a traumatic childhood through marriage, parenthood, and lifelong friendships. Based on the final manuscript that was drafted before the author’s death, this compilation traces the path of a woman finding her poetic voice in middle age, returning to an often-harrowing upbringing while closely observing the natural world—especially the populations of birds moving through the space between her back porch and the lake below—and meditating on the nature of creativity. With a submerged narrative behind the poems and several calls to nature through repeated motifs, the poet shares seminal emotions and experiences. **A Careful Hunger** is the last creative testament of this extraordinary artist—her final act of fearlessness in a troubled yet joyful life. In the words of the poet: “I am alive and must say so / one way or another.”

No Useless Mouth Rachel B. Herrmann 2019-11-15 “Rachel B. Herrmann’s **No Useless Mouth** is truly a breath of fresh air in the way it aligns food and hunger as the focal point of a new lens to reexamine the American Revolution. Her careful scrutiny, inclusive approach, and broad synthesis—all based on extensive archival research—produced a monograph simultaneously rich, audacious, insightful, lively, and provocative.”—*The Journal of American History* In the era of the American Revolution, the rituals of diplomacy between the British, Patriots, and Native Americans featured gifts of food, ceremonial feasts, and a shared experience of hunger. When diplomacy failed, Native Americans could destroy food stores and cut off supply chains in order to assert authority. Black colonists also stole and destroyed food to ward off hunger and carve out tenuous spaces of freedom. Hunger was a means of power and a weapon of war. In **No Useless Mouth**, Rachel B. Herrmann argues that Native Americans and formerly enslaved black colonists ultimately lost the battle against hunger and the larger struggle for power because white British and United States officials curtailed the abilities of men and women to fight hunger on their own terms. By describing three interrelated behaviors—food diplomacy, victual imperialism, and victual warfare—the book shows that, during this tumultuous period, hunger prevention efforts offered strategies to claim power, maintain communities, and keep rival societies at bay. Herrmann shows how Native Americans, free blacks, and enslaved peoples were “useful mouths”—not mere supplicants for food, without rights or power—who used hunger for cooperation and violence, and took steps to circumvent starvation. Her wide-ranging research on black Loyalists, Iroquois, Cherokee, Creek, and Western Confederacy Indians demonstrates that hunger creation and prevention were tools of diplomacy and warfare available to all people involved in the American Revolution. Placing hunger at the center of these struggles foregrounds the contingency and plurality of power in the British Atlantic during the Revolutionary Era. Thanks to generous funding from Cardiff University, the ebook editions of this book are available as Open Access volumes from Cornell Open (cornellpress.cornell.edu/cornell-open) and other
