[Urban Health](#) Sandro Galea 2019-04-04
An essential collection that advances our understanding of how cities influence our health More than half the world's population lives in cities -- a figure that will grow to two-thirds by 2030. As global populations rapidly consolidate around urban centers, the scientific understanding of what this means for human health faces a new and greater urgency. Urban Health connects urban exposures -- the experiences, choices, and behaviors shaped by living in a city -- to their impact on population health. By using the ubiquitous aspects of the urban experience as a lens to study these exposures across borders and demographics, it offers a new, scalable framework for understanding health and disease. Its applications to public health, epidemiology, and social science are virtually unlimited. Enriched with case studies that consider the state of health in cities all over the world, this book does more than capture the state of a nascent field; it holds a critical

mirror to itself, considering the next decade and arming a new generation with the tools for research and practice.
Planning in the USA Roger W. Caves 2023-08-29 Extensively revised and updated, *Planning in the USA*, fifth edition, continues to provide a comprehensive introduction to the policies, theory, and practice of planning. Outlining land use, urban planning, and environmental protection policies, this fully illustrated book explains the nature of the planning process and the way in which policy issues are identified, defined, and approached. The new edition incorporates new planning legislation and regulations at the state and federal layers of government and examples of local ordinances in a variety of planning areas. New material includes discussions of • education and equity in planning; • the City Beautiful Movement; • Daniel Burnham's plan for Chicago; • segregation; • Knick v. Township of Scott; • reforming single-family zoning and regulatory challenges in zoning and land use; •

Daniel Parolek's 'Missing Middle Housing'; • climate change, mitigation, adaptation, and resiliency; • the drinking water crisis in Flint, Michigan; • sharing programs for cars, bicycles, and scooters; • hybrid electric and autonomous vehicles; • Vision Zero; • COVID-19 relief for housing; • Innovation Districts, Promise Zones, and Opportunity Zones; • the sharing, gig, and creative economies; • scenic views and vistas, monuments, statues, and remembering the past; and • healthy cities, Health Impact Assessment, and active living. This detailed account of urbanization in the United States reveals the problematic nature and limitations of the planning process, the fallibility of experts, and the difficulties facing policy-makers in their search for solutions. Planning in the USA, fifth edition, is an essential book for students of urban planning, urban politics, environmental geography, and environment politics. It will be a valuable resource for planners and all who are concerned with the nature of contemporary urban and environmental problems.

Teachers and Teacher Unions in a Globalised World John Carr 2018-06-13 Teachers and Teacher Unions in a Globalised World asks a series of pressing questions of teacher educators, teachers and teacher unions worldwide in this era of global capitalism. As governments around the world support austerity politics in the face of financial meltdowns, social inequalities, terrorist threats, climate catastrophe, wars and mass migrations, the book questions whether practitioners in teaching and teacher education are succumbing to pressures to dismantle their nation-state systems of education. The authors present a clearly argued case in Ireland for teachers and teacher

educators organising to realise their moral and social responsibilities of free and fair schooling for all when it is most needed, as well as insisting on policy debates about a free publicly funded school system. At a time when teachers are feeling overwhelmed with workload and frustrated by the visible turning of events away from the historical record, the book emphasises the importance of practitioner research in informing decisions about a strategic and democratic way forward for education around the globe. Teachers and Teacher Unions in a Globalised World will be of great interest to academics and researchers in the field of education, as well as teacher educators, practitioners and policymakers.

The New Companion to Urban Design Tridib Banerjee 2019-06-19 The New Companion to Urban Design continues the assemblage of rich and critical ideas about urban form and design that began with the Companion to Urban Design (Routledge, 2011). With chapters from a new set of contributors, this sequel offers a more comparative perspective representing multiple voices and perspectives from the Global South. The essays in this volume are organized in three parts: Part I: Comparative Urbanism; Part II: Challenges; and Part III: Opportunities. Each part contains distinct sections designed to address specific themes, and includes a list of annotated suggested further readings at the end of each chapter. Part I: Comparative Urbanism examines different variants of urbanism in the Global North and the Global South,

produced by a new economic order characterized by the mobility of labor, capital, information, and technology. Part II: Challenges discusses some of the contemporary challenges that cities of the Global North and the Global South are facing and the possible role of urban design. This part discusses spatial claims and conflicts, challenges generated by urban informality, explosive growth or dramatic shrinkage of the urban settlement, gentrification and displacement, and mimesis, simulacra and lack of authenticity. Part III: Aspirations discusses some normative goals that urban design interventions aspire to bring about in cities of the Global North and the Global South. These include resilience and sustainability, health, conservation/restoration, justice, intelligence, access and mobility, and arts and culture. The New Companion to Urban Design is primarily intended for scholars and graduate students interested in cities and their built environment. It offers an invaluable and up-to-date guide to current thinking across a range of disciplines including urban design, planning, urban studies, and geography.

Review of the New York City Watershed Protection Program National Academies of Sciences, Engineering, and Medicine 2021-01-04 New York City's municipal water supply system provides about 1 billion gallons of drinking water a day to over 8.5 million people in New York City and about 1 million people living in nearby Westchester, Putnam, Ulster, and Orange counties. The combined water supply system includes 19 reservoirs and three controlled lakes with a total storage capacity of approximately 580 billion gallons.

The city's Watershed Protection Program is intended to maintain and enhance the high quality of these surface water sources. Review of the New York City Watershed Protection Program assesses the efficacy and future of New York City's watershed management activities. The report identifies program areas that may require future change or action, including continued efforts to address turbidity and responding to changes in reservoir water quality as a result of climate change.

Religion and Aging Andrea Bieler 2017-11-01 This collection of essays explores the intersection of religious, psychosocial, economic and cultural issues in relation to the dramatic demographic shifts we are facing on a global scale.

Theologians, gerontologists, anthropologists and practitioners reflect on the meaning of aging in diverse contexts such as Indonesia, South Africa, Tanzania, Botswana, Germany, Mexico, and Switzerland. Assuming that aging is an intricate process that encompasses enrichment and loss, the gain of wisdom and the loss of memory, and the expansion as well as the constraint of agency, the essays analyze how these dynamics play out in different cultural contexts. Special attention is given to the role of religion in processes of aging. [Religion und Altwerden. Interkulturelle und interdisziplinäre Erkundungen] Der Sammelband untersucht das Zusammenspiel

religiöser, psychosozialer, ökonomischer und kultureller Aspekte in Bezug auf die dramatischen demographischen Veränderungen, mit denen wir in globaler Perspektive konfrontiert sind. Wissenschaftler und Praktiker reflektieren aus theologischer, gerontologischer, sozialpsychologischer und anthropologischer Perspektive die Bedeutung von Alterungsprozessen in unterschiedlichen Kontexten, z. B. in Indonesien, Südafrika, Tansania, Botswana, Deutschland, Mexiko und der Schweiz. Ausgehend von Überlegungen, die zeigen, dass Alterungsprozesse komplex sind und sowohl Bereicherung und Verlust, den Zugewinn an Weisheit und den Verlust von Erinnerungsfähigkeit sowie die Ausweitung als auch die Einschränkung von Handlungsfähigkeit beinhalten können, wird danach gefragt, welche Gestalt diese Dynamiken in unterschiedlichen Kontexten annehmen. Dabei kommt insbesondere die Bedeutung von Religion in den Blick.

Review of the Department of Energy's Plans for Disposal of Surplus Plutonium in the Waste Isolation Pilot Plant National Academies of Sciences, Engineering, and Medicine 2020-07-01 In 2018, the National Academies of Sciences, Engineering, and Medicine issued an Interim Report evaluating the general viability of the U.S. Department of Energy's National Nuclear Security Administration's (DOE-NNSA's) conceptual plans for disposing of 34 metric tons (MT) of surplus plutonium in the Waste Isolation Pilot Plant (WIPP), a deep geologic repository near Carlsbad, New Mexico. It provided a preliminary assessment of the general viability of DOE-NNSA's conceptual plans, focused on some of the barriers to their implementation. This final report addresses the remaining issues and echoes the recommendations from the interim study.

Planning for Change Matthew Bentley 2008 The guidelines show how national governments can plan, develop, implement and monitor a national programme on sustainable consumption and production (SCP). This is a flexible approach to SCP programme development which will be adapted to local circumstances. The guidelines are also useful to countries that already have a SCP programme but are keen to improve and sustain the process. They contain nine case studies and several other examples of good practice, which illustrate how governments are implementing SCP programmes all over the world.

The Routledge Companion to Environmental Planning Simin Davoudi 2019-07-31 This Companion presents a distinctive approach to environmental planning by: situating the debate in its social, cultural, political and institutional context; being attentive to depth and breadth of discussions; providing up-to-date accounts of the contemporary practices in environmental planning and their changes over time; adopting multiple theoretical and analytical lenses and different disciplinary approaches; and drawing on knowledge and expertise of a wide range of leading international scholars from across the social science disciplines and beyond. It aims to provide critical reviews of the state-of-the-art theoretical and practical approaches as well as empirical knowledge and understandings of environmental planning; encourage dialogue across disciplines and national policy contexts about a wide range of environmental planning themes; and, engage with and reflect on politics, policies, practices and decision-making tools in environmental planning. The Companion provides a deeper understanding of the interdependencies between the themes in the four parts of the book (Understanding 'the environment', Environmental governance, Critical environmental pressures and responses, and Methods and approaches to environmental planning) and its 37 chapters. It presents critical perspectives on the role of meanings, values, governance, approaches and participations in environmental planning. Situating environmental planning debates in the wider ecological, political, ethical, institutional, social and cultural debates, it aims to shine light on some of the critical journeys that we have traversed and those that we are yet to navigate and their

implications for environmental planning research and practice. The Companion provides a reference point mapping out the terrain of environmental planning in an international and multidisciplinary context. The depth and breadth of discussions by leading international scholars make it relevant to and useful for those who are curious about, wish to learn more, want to make sense of, and care for the environment within the field of environmental planning and beyond.

Transportation Planning Handbook ITE (Institute of Transportation Engineers) 2016-07-11 A multi-disciplinary approach to transportation planning fundamentals. The Transportation Planning Handbook is a comprehensive, practice-oriented reference that presents the fundamental concepts of transportation planning alongside proven techniques. This new fourth edition is more strongly focused on serving the needs of all users, the role of safety in the planning process, and transportation planning in the context of societal concerns, including the development of

more sustainable transportation solutions. The content structure has been redesigned with a new format that promotes a more functionally driven multimodal approach to planning, design, and implementation, including guidance toward the latest tools and technology. The material has been updated to reflect the latest changes to major transportation resources such as the HCM, MUTCD, HSM, and more, including the most current ADA accessibility regulations. Transportation planning has historically followed the rational planning model of defining objectives, identifying problems, generating and evaluating alternatives, and developing plans. Planners are increasingly expected to adopt a more multidisciplinary approach, especially in light of the rising importance of sustainability and environmental concerns. This book presents the fundamentals of transportation planning in a multidisciplinary context, giving readers a practical reference for day-to-day answers. Serve the needs of all users Incorporate safety into the planning process Examine the latest transportation planning software packages Get up to date on the latest standards, recommendations, and codes Developed by The Institute of Transportation Engineers, this book is the culmination of over seventy years of transportation planning solutions, fully updated to reflect the needs of a changing society. For a comprehensive guide with practical answers, The Transportation Planning Handbook is an essential reference. Site Planning, Volume 2 Gary Hack 2018-04-27 Ebook Volume 2 of 3. A comprehensive, state-of-the-art guide to site planning, covering planning processes, new technologies, and sustainability, with extensive treatment of practices in rapidly urbanizing countries. Ebook Volume 2 of 3. Cities are built site by site. Site planning—the art and science of designing settlements on the land—encompasses a range of activities undertaken by architects, planners, urban designers, landscape architects, and engineers. This book offers a comprehensive, up-to-date guide to site planning that is global in scope. It covers planning processes and standards, new technologies, sustainability, and cultural context, addressing the roles of all participants and stakeholders and offering extensive treatment of practices in rapidly urbanizing countries. Kevin Lynch and Gary Hack wrote the classic text on the subject, and this book takes up where the earlier book left off. It can be used as a textbook and will be an essential reference for practitioners. Site Planning consists of forty self-contained modules, organized into five parts: The Art of Site Planning, which presents site planning as a shared enterprise; Understanding Sites, covering the

components of site analysis; Planning Sites, covering the processes involved; Site Infrastructure, from transit to waste systems; and Site Prototypes, including housing, recreation, and mixed use. Each module offers a brief introduction, covers standards or approaches, provides examples, and presents innovative practices in sidebars. The book is lavishly illustrated with 1350 photographs, diagrams, and examples of practice.

Health Assessment and Physical Examination

Mary Ellen Zator Estes
2019-10-24 Health assessment is an ongoing process that evaluates the whole person as a physical, psychosocial and functional being, whether they are young or old, well or ill. This market-leading text presents health assessment, physical examination information and skills for health professionals who undertake these types of assessments. Health Assessment and Physical Examination is scaffolded from foundation to more advanced health assessment, following a body-systems approach and a 'head-to-toe' approach. It uses the ENAP (Examine–Normal–Abnormal–Pathophysiology) approach as a tool for students to collect useful information. An applied case study at the end of each chapter walks students through an example of an assessment. This comprehensive yet student-friendly text is noted for its high-quality case studies, pedagogical elements, and excellent student resources. Unique to this text are the advanced topics and 'Urgent findings', which highlights serious or life-threatening signs or critical assessment findings that need immediate attention.

Institutional Translation and Interpreting

Fernando Prieto Ramos
2020-11-17 This collection brings together new insights around current

translation and interpreting practices in national and supranational settings. The book illustrates the importance of further reflection on issues around quality and assessment, given the increased development of resources for translators and interpreters. The first part of the volume focuses on these issues as embodied in case studies from a range of national and regional contexts, including Finland, Switzerland, Italy, Spain and the United States. The second part takes a broader perspective to look at best practices and questions of quality through the lens of international bodies and organizations and the shifting roles of translation and interpreting practitioners in working to manage these issues. Taken together, this collection demonstrates the relevance of critically examining processes, competences and products in current institutional translation and interpreting settings at the national and supranational levels, paving the way for further research and quality assurance strategies in the field. The Introduction, Chapter 7, and Conclusion of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

A Review of the HHS Family Planning Program Institute of Medicine
2009-08-07 A Review of the HHS Family

Planning Program provides a broad evaluation of the Title X family planning program since its establishment in 1970. The program successfully provides family planning services to its target audience of low-income individuals, but there is room for improvement. While the program's core goals are apparent, a secondary set of changing priorities has emerged without a clear, evidence-based strategic process. Also, funding for the program has increased in actual dollars, but has not kept pace with inflation or increased costs. Several aspects of the program's structure could be improved to increase the ability of Title X to meet the needs of its target population. At the same time, the extent to which the program meets those needs cannot be assessed without a greater capacity for long-term data collection. A Review of the HHS Family Planning Program recommends several specific steps to enhance the management and improve the quality of the program, as well as to demonstrate its direct contribution to important end results, such as reducing rates of unintended pregnancy, cervical cancer, and infertility. The book will guide the Office of Family Planning toward improving the effectiveness of the program. Other parties who will find the research and recommendations valuable include programs receiving Title X funding from the Office of Family Planning, policy makers, researchers, and professional organizations.

City Rules Emily Talen 2012-06-22
City Rules offers a challenge to students and professionals in urban planning, design, and policy to change the rules of city-building, using regulations to reinvigorate, rather than stifle, our communities. Emily Talen demonstrates that regulations are a primary detriment

to the creation of a desirable urban form. While many contemporary codes encourage sprawl and even urban blight, that hasn't always been the case—and it shouldn't be in the future. Talen provides a visually rich history, showing how certain eras used rules to produce beautiful, walkable, and sustainable communities, while others created just the opposite. She makes complex regulations understandable, demystifying city rules like zoning and illustrating how written codes translate into real-world consequences. Most importantly, Talen proposes changes to these rules that will actually enhance communities' freedom to develop unique spaces.

The Affordable Housing Market in India Padmini Ram 2020-11-13 This book examines the housing crisis in India and underlines the need for formal affordable housing markets. India is home to the world's largest population of slum dwellers. The book examines actual causes of the problem, and the financial and political issues which underlie it. The volume: Analyses multiple perspectives on affordable housing from the points of view of slum dwellers, builders, facilitators, bureaucrats, and politicians Presents a fresh overview of the housing sector in India based on the conditions of slum dwellers in a typical, medium-sized, fast-growing city – Raipur, in the state of Chhattisgarh Puts forward radical conclusions, practical solutions, and policy recommendations for a formal affordable housing market in India This will be a major intervention for scholars and researchers of urban sociology, built environment, public policy, development studies, economics, political economy, institutional economics, and urban studies as well as policymakers, planners, and professionals in the urban development sector.

Latino Immigrant Youth and

Interrupted Schooling Marguerite Lukes 2015-02-17 This book offers an innovative look at the pre- and post-migration educational experiences of immigrant young adults with a particular focus on members of the Latino community. Combining quantitative data with original interviews, this book provides an engaging and nuanced look at a population that is both ubiquitous and overlooked, challenging existing assumptions about those categorized as 'dropouts' and closely examining the historical contexts for educational interruption in the chosen subgroup. The combination of accessible prose and compelling new statistical data appeals to a wide audience, particularly academic professionals, education practitioners and policy-makers.

Natural and Engineered Solutions for Drinking Water Supplies Emily Alcott 2013-03-26 Illuminating opportunities to develop a more integrated approach to municipal water system design, *Natural and Engineered Solutions for Drinking Water Supplies: Lessons from the Northeastern United States and Directions for Global Watershed Management* explores critical factors in the decision-making processes for municipal water system delivery. The book offers vital insights to help inform management decisions on drinking water supply issues in other global regions in our increasingly energy- and carbon-constrained world. The study evaluates how six cities in the northeastern United States have made environmental, economic, and social decisions and adopted programs to protect and manage upland forests to produce clean drinking water throughout their long histories. New York, New York; Boston and Worcester, Massachusetts; New Haven and Bridgeport, Connecticut; and Portland, Maine have each managed city watersheds under different state

regulations, planning and development incentives, biophysical constraints, social histories, and ownerships. Some of the overarching questions the book addresses relate to how managers should optimize the investments in their drinking water systems. What is the balance between the use of concrete/steel treatment plants (gray infrastructure) and forested/grassland/wetland areas (green infrastructure) to protect surface water quality? The case studies compare how engineered and/or natural systems are employed to protect water quality. The conclusions drawn establish that it makes environmental, economic, and social sense to protect and manage upland forests to produce water as a downstream service. Such stewardship is far more preferable than developing land and using engineering, technology, and artificial filtration as a solution to maintaining clean drinking water. Lessons learned from this insightful study provide effective recommendations for managers and policymakers that reflect the scientific realities of how forests and engineering can be best integrated into effective watershed management programs and under what circumstances.

Innovating Development Strategies in Africa Landry Signé 2017-08-31 During the second half of the twentieth century, African states shifted away from state-led development strategies, and are now moving towards a strategy of regional economic integration. In this book, Landry Signé explores the key drivers of African policy and economic transformation, proposing a preeminent explanation of policy innovations in Africa through the

examination of postcolonial strategies for economic development. Scholars and practitioners in fields as varied as development studies, political science and public policy, economics, sociology and African studies will benefit from Signé's unprecedented comparative analysis, including detailed cases from the often understudied Francophone Africa. First studying why, how and when institutional or policy change occurs in Africa, Signé explores the role of international, regional and national actors in making African economic development strategies from 1960 to date, highlighting the economic transformations of the twenty-first century.

The Risk City Yosef Jabareen 2015-04-23 Contemporary cities face phenomenal risks, and they face particularly high levels of mounting social and environmental risks, including social polarization, urban conflicts, riots, terror, and climate change threats. This book suggests that climate change and its resulting uncertainties challenge the concepts, procedures, and scope of conventional approaches to planning, creating a need to rethink and revise current planning methods. Therefore, this book suggests a paradigm shift in our thinking, interrogation, and planning of our cities. Based on the contemporary conditions of risk at cities, this book conceptualizes the risk city as a construct of three interlinked concepts of risk, trust, and practice. It is a construct of risk and its new evolving conditions and knowledge of uncertainties stem from climate change and other risks and uncertainties. As a construct of practices, the risk city produces social and political institutional framework and promotes practices accordingly in order to reduce risk and risk possibilities and to increase trust. In light of the

complex challenges and risks to the human habitat that have emerged in recent years, many cities have prepared various types of plans aimed at addressing the challenges posed by climate change. Nonetheless, despite the importance of these plans and the major public resources invested in their formulation, we still know little about them and have yet to begin studying them and assessing their contributions. From the innovative perspective of the risk city, this book asks critical questions about the nature, vision, practices, and potential impact of the recent climate change-oriented plans. What kinds of risks do they attempt to address, what types of practices do they institute, and what types of approaches do they apply? Do they adequately address the risks and uncertainties posed? How do they contribute to the worldwide effort to reduce greenhouse gas emissions? This book uses the methodologically innovative Risk City framework to examine the nature, vision, outcomes, practices, and impact of these crucial plans, as well as their contribution to the resilience of our cities and to global efforts toward reducing greenhouse gas emissions.

European and International Experiences of Strategic

Environmental Assessment Barry Sadler
2016-03-17 This book brings together

the latest thinking in Strategic Environmental Assessment (SEA) and considers the key question of whether the processes are having a positive impact on strategic decision making, both in Europe and worldwide. As governments move to develop green agendas, the book explores the challenges of working within national systems, as well as the strengths and weaknesses of sector-specific SEA. The importance of stakeholder engagement is considered, as is the question of how to turn NIMBYs into WIMBYs – that is, creating positive reasons to encourage development and allow local stakeholders to profit. In assessing ways in which the practice of SEA can provide a new agenda for the 21st Century, the chapters explore current and emerging approaches, procedures and methods, along with ways in which SEA can be linked with other planning tools. The role of research and academia is considered, and the book looks beyond the current status of SEA to address the question of how practitioners can capitalise on the potential of SEA to become integrated into high-level policy as a key element of climate change mitigation strategies. Each chapter is written by internationally renowned authors and based on many years of experience in the field. The book will be essential reading for forward-thinking practitioners and students of SEA.
