Global Trends 2040 National Intelligence Council 2021-03 "The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the

poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

What Has Government Done to Our Money? Murray Newton Rothbard 1990

Ethical Imperative for Reform of Our Immigration System United States. Congress. House. Committee on the Judiciary. Subcommittee on Immigration, Citizenship, Refugees, Border Security, and International Law 2010

The Handy Politics Answer Book Gina Misiroglu 2002-09 In these politically charged times, interest in the political process is peaking. The Handy

Politics Answer Book serves up 700 pages and 1,200 questions and answers for the common man, woman, or child on the basic nuts and bolts of our government and political history. Interesting, enlightening, and, most importantly, empowering, Handy Politic's fifteen chapters explore politics from our founding fathers to current trends, from our branches of government to how they work together (or don't), from noteworthy people and officials to major events.

The Divided States of America Donald F. Kettl 2022-03-15 "As James Madison led America's effort to write its Constitution, he made two great inventions—the separation of powers and federalism. The first is more famous, but the second was most essential because, without federalism, there could have been no United States of America. Federalism has always been about setting the balance of power between the federal government and the states—and that's revolved around deciding just how much inequality the country was prepared to accept in exchange for making peace among often-warring states. Through the course of its history, the country has moved through a series of phases, some of which put more power into the hands of the federal government, and some rested more power in the states. Sometimes this rebalancing led to armed conflict. The Civil War, of course, almost split the nation permanently apart. And sometimes it led to political battles. By the end of the 1960s, however, the country seemed to have settled into a quiet agreement that inequality was a prime national concern, that the federal government had the responsibility for addressing it through its own policies, and that the states would serve as administrative agents of that policy. But as that agreement seemed set, federalism drifted from national debate, just as the states began using their administrative role to push in very different directions. The result has been a rising tide of inequality, with the great invention that helped create the nation increasingly driving it apart"--

School Leadership and Education System Reform Toby Greany 2021-08-26 How can school leaders shape organisations that offer consistently high quality, rounded and equitable education in the context of rapid change? How can wider education systems support and encourage all schools to succeed in this way? What are the challenges and opportunities involved? What can we learn from existing evidence and research? School Leadership and Education System Reform considers the ways in which school leadership and its practice has changed and developed in response to a rapidly changing educational context over the last decade. This new edition is substantially revised and updated, with ten completely new chapters. It includes contributions from a range of leading thinkers and researchers in the field of educational leadership and management. Theoretically and conceptually informed, the contributors draw on recent empirical research studies into leadership, learning and system reform in England and more widely to explore the key issues for contemporary school leadership and management in high-autonomy-high-accountability systems. New chapters look at: · System governance and lateral accountability in 'self-improving' school systems · Leading curriculum development and accelerating progress for disadvantaged children in schools · Effective deployment of teaching assistants/leadership for inclusion · School collaboration, partnerships and 'system leadership' · Securing improvement at scale, across multiple schools and across localities · New conceptions of leadership, including ethical and invitational leadership School Leadership and Education System Reform provides accessible but research and theory-informed chapters, each of which includes summaries and suggestions for further reading.

University Initiatives in Climate Change Mitigation and Adaptation Walter Leal Filho 2018-06-18 This book focuses on the role of higher education institutions in addressing climate change mitigation and adaptation challenges, contributing to the development of this fast-growing field. Further, it includes the results of empirical research and offers ideas regarding on-going and future research initiatives. The contributions also

- showcase the research and projects on issues pertaining to climate change at universities from across the globe;
- document and promote ideas and experiences acquired in the execution of research projects, especially successful initiatives and best practices; and
- introduce methodological approaches and projects that offer a better understanding of climate change across society and economic sectors.

The book is structured around two parts: lessons learned from climate change research, education, studies and projects. Each part focuses on mitigation and adaptation respectively, with many responses of the two modalities overlapping. This book is a valuable resource for researchers and practitioners in the fields of environment, human geography, business and economics, as well as academics and students, as it presents education, communication and awareness-raising projects on matters

related to climate change at universities in both industrialised and developing countries, often in cooperation with government bodies, NGOs and other stakeholders.

Government's End Jonathan Rauch 2010-10-08 An earlier edition of this extraordinarily prescient, elegantly written book created a sensation among Washington and media insiders when it was published more than five years ago under the title `Demosclerosis. In it, Jonathan Rauch, a former correspondent for The Economist and a columnist for National Journal, showed with startling clarity the reasons why America's political system (and, in fact, other political systems as well) was becoming increasingly ineffective. Today, as Rauch's predictions continue to manifest themselves in a national politics of "sound and fury" and little effective legislation, and in increasing voter cynicism, this book has achieved renown as the classic and essential work on why politics and government don't work.

Model Rules of Professional Conduct American Bar Association. House of Delegates 2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

The Great Ormond Street Hospital Manual of Children and Young People's Nursing Practices Elizabeth Anne Bruce 2023-03-20 The Great Ormond Street Hospital Manual of Children and Young People's Nursing Practices Clinical skills are essential in the provision of care for children and young people. The Great Ormond Street Hospital Manual of Children and Young People's Nursing Practices provides expert guidance on evidence-based clinical procedures, helping students and newly registered nurses develop sound clinical judgement and confidence. This comprehensive resource covers all aspects of children's nursing, from the fundamentals of everyday practice to advanced care in high dependency and intensive care settings. As such, its relevance and usefulness reach beyond those newly registered; it remains a valuable resource for experienced nurses wishing to further expand their nursing skills. Now in its second edition, this thoroughly updated guide demonstrates each procedure, explains the underlying theory and evidence, and speaks to the unique challenges of working with children and young people. New chapters address mental health, complementary therapies, learning difficulties, and the deteriorating child, whilst expanded content examines blood glucose monitoring, glucocorticoid treatment, insulin administration, diabetes care, surgical diathermy, non-invasive ventilation, and much more. Key Features Provides evidence-based guidelines for more than 300 clinical procedures Features an abundance of colour photographs and illustrations Examines the needs of neonates and adolescents in the context of interdisciplinary care Includes new material on health research and evidence-based practice, stages of development, children with complex needs, and admission, transfer, and discharge Complements The Royal Marsden Manual of Clinical Nursing Procedures, offering continuity to those working in both adult and paediatric settings The second edition of The Great Ormond Street Hospital Manual is an indispensable resource for registered nurses, students, and other healthcare professionals involved in delivering clinically effective, evidenced-based, family-centred care. Praise for the previous edition "This manual builds on the knowledge, skills and expertise of one of the UK's finest children's hospital and explains comprehensive, evidence-based care clearly." Nursing Children and Young People Journal "All children's nurses should have this book as a reference." Nursing Standard "... a comprehensive resource for all qualified nurses, students and other healthcare professionals involved in caring for children in hospital and community settings." Times Higher Education Supplement

The Government Class Book Andrew White Young 2017-10-29 Excerpt from The Government Class Book: A Manual of Instruction in the Principles of Constitutional Government and Law; Part I, Principles of Government; Part II, the Government of Illinois The study of the principles of political science is a necessary part of a liberal education. In a country where the people govern themselves the science of government is a necessary part of a common-school education. In the United States the people elect their own law-makers and rulers, establish their own constitutions, and determine even the fundamental principles upon which men shall be

governed. The danger of entrusting such power to the ignorant has not failed of illustration in our States and cities. Having universal suffrage, the people must learn to govern themselves for the sake of their own preservation and welfare. Nor is a knowledge of the principles of legal science less necessary to every citizen. The laws of man know as little of mercy as the laws of nature, in that law never admits ignorance as an excuse for wrong. It is a proof of the essential justice of our system of jurisprudence, 'that so many citizens pass safely through life, totally ignorant of the law, and relying merely upon their own sense of what should be. And yet every day gives proof that ignorance is always dan gercus. The study of such a work as this will not make a youth a lawyer, but it will fix in his mind a system of broad principles, which cannot fail to be useful practically. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. The Beginner's Guide to Cooperative Learning Drew Howard 2021-12-15 The Education Endowment Foundation's Teaching and Learning Toolkit describes collaborative learning as an approach which 'involves pupils working together on activities or learning tasks' and in such a way that enables 'everyone to participate on a collective task that has been clearly assigned'. In the context of this book, Cooperative Learning relates to a number of such activities from simple memorising to more complex analysis and debating which are designed to boost learners' interdependence, participation and interaction. Drawing upon both research-informed theory and real-world examples, Jakob Werdelin and Drew Howard present both an insightful introduction to Cooperative Learning as a practice and philosophy and a practical guide to classroom application. The authors share their expertise on how to amplify the effect of current pedagogical approaches and schemes of work, simplify performance management as an empowering tool for teachers and leaders, and create an inclusive environment in which every pupil is able to fulfil their learning potential. Jakob and Drew also discuss how Cooperative Learning relates to a range of other aspects of teaching, including assessment, metacognition and Rosenshine's Principles. The book focuses on Catch1Partner as an exemplary Cooperative Learning Interaction Pattern (CLIP) as, by fully grasping the principles of staging and running Catch1Partner in its many forms, readers will then be better equipped with the foundational know-how to deploy other CLIPs, such as Sage and Scribe, Word-Round and Rotating Role Reading. The authors also provide a variety of ready-to-photocopy (and downloadable) sample teaching materials, tools, guidelines and an activity transcript in the appendices. Suitable for teachers and leaders in both primary and secondary school settings.

Achieving Evidence-Informed Policy and Practice in Education Chris Brown 2017-11-27 This book provides an overview of research and ideas in relation to evidence-informed policy and practice (EIPP) in education. The chapters all share a single overarching purpose: providing insight into how EIPP in education can be achieved. The result is a powerful account of Brown's recent work.

Crime, Justice and COVID-19 Christopher Kay 2023-05-31 This edited collection offers the first system-wide account of the impact of COVID-19 on crime and justice in England and Wales. It provides a critical discussion of the challenges faced by criminal justice agencies (prison, probation, youth justice, courts, police), professionals and service users in adapting to the extraordinary pressures of the pandemic on policy, practice and lived experience. The text integrates first-hand narrative and artistic accounts from a variety of key stakeholders experiencing the criminal justice system (CJS). The editors recommend a range of evidence-based policy and practice improvements, not only in terms of planning for future pandemics, but also those that will benefit the CJS and its stakeholders in the longer term.

Why Things Won't Work in Kenya Herman Manyora 2017

The State of Open Data Davies, Tim 2019-05-22 It's been ten years since open data first broke onto the global stage. Over the past decade, thousands of programmes and projects around the world have worked to open data and use it to address a myriad of social and economic challenges. Meanwhile, issues related to data rights and privacy have moved to the centre of public and political discourse. As the open data

movement enters a new phase in its evolution, shifting to target real-world problems and embed open data thinking into other existing or emerging communities of practice, big questions still remain. How will open data initiatives respond to new concerns about privacy, inclusion, and artificial intelligence? And what can we learn from the last decade in order to deliver impact where it is most needed? The State of Open Data brings together over 60 authors from around the world to address these questions and to take stock of the real progress made to date across sectors and around the world, uncovering the issues that will shape the future of open data in the years to come.

Forgotten Americans Isabel Sawhill 2018-09-25 A sobering account of a disenfranchised American working class and important policy solutions to the nation's economic inequalities One of the country's leading scholars on economics and social policy, Isabel Sawhill addresses the enormous divisions in American society—economic, cultural, and political—and what might be done to bridge them. Widening inequality and the loss of jobs to trade and technology has left a significant portion of the American workforce disenfranchised and skeptical of governments and corporations alike. And yet both have a role to play in improving the country for all. Sawhill argues for a policy agenda based on mainstream values, such as family, education, and work. While many have lost faith in government programs designed to help them, there are still trusted institutions on both the local and federal level that can deliver better job opportunities and higher wages to those who have been left behind. At the same time, the private sector needs to reexamine how it trains and rewards employees. This book provides a clear-headed and middle-way path to a better-functioning society in which personal responsibility is honored and inclusive capitalism and more broadly shared growth are once more the norm.

Functional Performance in Older Adults Bette R Bonder 2017-12-04 Support the very best health, well-being, and quality of life for older adults! Here's the ideal resource for rehabilitation professionals who are working with or preparing to work with older adults! You'll find descriptions of the normal aging process, discussions of how health and social factors can impede your clients' ability to participate in regular activities, and step-by-step guidance on how to develop strategies for maximizing their well-being.

GOVERNMENT CLASS BK A MANUAL O Andrew W. (Andrew White) 1802-18 Young 2016-08-26 This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Patriots Handbook Beverly Potter 2010-11-09 As disdain grows for the workings of Washington, patriots across the country have gathered in "tea parties," harkening back to the nation's roots in 1773 when "No taxation without representation" was the motto. Americans again feel overly taxed by rulers who don't listen, and the tea parties have grown into a movement comprised of deeply concerned Americans who have never previously participated in any demonstration. With this comes a renewed interest in our unique history as a nation, and Patriots Handbook offers just that. For those interested in actually reading the founding documents and learning about what the Founding Fathers had to say, Patriots Handbook offers our nation's founding documents, along with inspiring quotes and excerpts about the glorious history of our great nation.

The 10-Second Commute Terri R. Kurtzberg 2022-10-18 Virtual work, which was steadily on the rise even before the pandemic, is explored in this timely book that describes the impact of technology on our work experiences, ranging from the individual psychological level to the broad societal implications. Widespread remote work is now possible, but it comes with its share of frustrations. Virtual work has changed our lives in ways big and small, from trying to balance our time to what we wear and where we sit and from how we communicate to where we should look during a videoconference. It's also fundamentally changed what kinds of

jobs we can now do. Grounded in research and including lively personal anecdotes, *The 10-Second Commute* provides a thoughtful and comprehensive scan of the nature of virtual work. The authors, both researchers in management and technology, explore the current questions of our virtual lives, such as: Why Zoom instead of Skype? Why are emojis so useful? Why is videoconferencing so exhausting? How does diversity at work both help and hinder productivity? Virtual work is more than just work-it permeates our whole lives, and it will continue to do so as hybrid work arrangements become the new normal. Helping readers better understand the virtual work experience, this book will engage and inform everyone who is still trying to make it work.

Building State Capability Matt Andrews 2017-01-19 This is an open access title available under the terms of a CC BY-NC-ND 4.0 licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Governments play a major role in the development process, and constantly introduce reforms and policies to achieve developmental objectives. Many of these interventions have limited impact, however; schools get built but children don't learn, IT systems are introduced but not used, plans are written but not implemented. These achievement deficiencies reveal gaps in capabilities, and weaknesses in the process of building state capability. This book addresses these weaknesses and gaps. It starts by providing evidence of the capability shortfalls that currently exist in many countries, showing that many governments lack basic capacities even after decades of reforms and capacity building efforts. The book then analyses this evidence, identifying capability traps that hold many governments back - particularly related to isomorphic mimicry (where governments copy best practice solutions from other countries that make them look more capable even if they are not more capable) and premature load bearing (where governments adopt new mechanisms that they cannot actually make work, given weak extant capacities). The book then describes a process that governments can use to escape these capability traps. Called PDIA (problem driven iterative adaptation), this process empowers people working in governments to find and fit solutions to the problems they face. The discussion about this process is structured in a practical manner so that readers can actually apply tools and ideas to the capability challenges they face in their own contexts. These applications will help readers devise policies and reforms that have more impact than those of the past.

Invest in Women, Invest in America Congress (U.S.), Joint Economic Committee 2011 NOTE: NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT -- OVERSTOCK SALE -- Significantly reduced list price Provides a comprehensive review of women in the U.S. economy so that policymakers could have a better understanding of women's essential contributions to our economy and their potential to play a stronger role in our economic recovery. Social Policy Review 34 Jolly, Andy 2022-06-27 Experts review the leading social policy scholarship from the past year in this comprehensive volume. Published in association with the Social Policy Association, the latest volume in this long-running series addresses current issues and critical debates throughout the international social policy field with a particular focus on employment policy, housing policy and climate justice. Contributors also explore key developments including researching during the COVID-19 pandemic, migrants' access to social benefits in Germany, the right(s) to healthcare in Italy, American and European homelessness policies and much more. This annual review is essential reading for students and academics in social policy, social welfare and related disciplines.

The Ladder Andrew Bernard 2021-02-19 Foreword by Colonel Dame Kelly Holmes. Regardless of one's plans for the future, many people's careers are founded on a series of chance encounters, experiences and serendipity. School, college, university, jobs, family, sports, hobbies, friends, relationships - these are all fertile grounds for career-related conversations and explorations. What if we teachers, guides, mentors, parents and peers started to notice these seemingly unconnected happenings and, indeed, started to engineer and encourage them to happen? Using the mantra 'every adult is a careers teacher', *The Ladder* will inspire teachers to explicitly link their subject area to students' futures, both in school and outside its walls, and support them in doing so. Bernie draws upon his 30-year career in education and business development to bring clarity, focus and ideas to educators as to how they can best start students on their own ladders to success. Ultimately, in writing this book, Bernie's aim is to bring young people's futures to life with some personal skills reflection and forward planning designed to help

them as they embark on their fulfilling futures - regardless of their upbringing, academic achievements or ethnic background.

Making Open Development Inclusive Matthew L. Smith 2020-08-25 Drawing on ten years of empirical work and research, analyses of how open development has played out in practice. A decade ago, a significant trend toward openness emerged in international development. "Open development" can describe initiatives as disparate as open government, open health data, open science, open education, and open innovation. The theory was that open systems related to data, science, and innovation would enable more inclusive processes of human development. This volume, drawing on ten years of empirical work and research, analyzes how open development has played out in practice.
The Emerald Handbook of Public-Private Partnerships in Developing and Emerging Economies João Leitão 2017-12-07 This Handbook aims to support policy-makers, national governments, national and regional public administrations, PPP officers, practitioners and academia in the design, implementation and assessment of appropriate responses to foster PPPs' uptake in the context of developing and emerging economies.
Small Business Management: Launching & Growing Entrepreneurial Ventures Justin G. Longenecker 2019-02-01 Follow the dream of owning a successful small business with the insights found in Longenecker/Petty/Palich/Hoy's market-leading SMALL BUSINESS MANAGEMENT: LAUNCHING AND GROWING ENTREPRENEURIAL VENTURES, 19E. This market-leading book provides the practical concepts, entrepreneurial insights, and comprehensive resources you'll find essential both now and throughout your management future. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Behind Closed Doors: SHORTLISTED FOR THE ORWELL PRIZE FOR POLITICAL WRITING Polly Curtis 2022-02-03 'BRILLIANT . . . I LOVE THIS BOOK' LEMN SISSAY 'A MUST-READ BOOK' JACQUELINE WILSON 'EXTRAORDINARY' OLIVER BULLOUGH 'EVERYONE SHOULD READ THIS BOOK' HILARY COTTAM Meet the mother whose children were taken away, and the father who fought for his son. Listen to the radical social worker, the judge, the lawyer. See inside the homes of foster carers, adoptive parents and children in care. Because behind closed doors, a scandal is ongoing. We now remove more children from their parents than ever before, more than any other western country. Not because of a rise in physical or sexual abuse, but because of complex factors that are overlooked and misunderstood. Children's Care is a system where fathers are ignored, and mothers are punished for experiencing abuse. Rife with prejudices about race, ableism and class, determined by a postcode lottery. Blind to poverty and its effects on family life. And, at its very worst, an exercise in social engineering that can never replace parental love. This is not a soft issue. Not a 'women and children' problem. It is a prism through which we can understand the deepest issues at play in politics, economics and society today, and it is happening behind closed doors. Because of legal restrictions against reporting in family courts, the uneasy work of social care and the shame poured on parents, these problems remain out of our sight. They are the subject of horror headlines or stale statistics. But family life is at the heart of who we are as people, and it is they who can help us understand. From North to South, rich and poor, Black and white, these are the people who know, first-hand, what is going wrong - and how we can fix it. These are their stories. 'IMPORTANT' IAN BIRRELL 'VITAL' HANNAH JANE PARKINSON 'ONE OF BRITAIN'S BEST JOURNALISTS WRITING ABOUT SOCIAL JUSTICE' MARIANA MAZZUCATO
Developing Practical Skills for Nursing Children and Young People

Alan Glasper 2009-11-27 Clinical skills are essential to the practice of nursing and learning these skills requires a wealth of both factual knowledge and technical expertise. Supplementing practical teaching, *Developing Practical Skills for Nursing Children and Young People* is a comprehensive skills text that describes clinical skills in the style of a tutor teaching at

American Criminal Courts Casey Welch 2013-02-19 *American Criminal Courts: Legal Process and Social Context* is an introductory-level text that offers a comprehensive study of the legal processes that guide criminal courts and the social contexts that introduce variations in the activities of actors inside and outside the court. Specifically the text focuses upon: Legal Processes. U.S. criminal courts are constrained by several legal processes and organizational structures that determine how the courts operate and how laws are applied. This book explores how democratic processes develop the criminal law in the United States, the documents that define law (federal and state constitutions, legal codes, administrative policies), the organizational structure of courts at the federal and state levels, the overlapping authority of the appeals process, and the effect of legal processes such as precedent, jurisdiction, and the underlying legal philosophies of various types of courts. Although most texts on criminal courts do a credible job of describing legal processes, this text looks more deeply into the origins of criminal law, historic turning points in the criminal law, conditions that affect the decision-making of criminal justice practitioners, and the contentious political process that affects how criminal laws are considered. Social Contexts. The criminal courts are staffed by people who represent different perspectives, occupational pressures, and organizational goals. The text includes chapters on actors in the traditional courtroom workgroup (judges, prosecutors, and defense attorneys), as well as those outside the court who seek to influence it, including advocacy groups, media, and politicians. It is the interplay between the court legal processes and the social actors in the courtroom that makes the application of the criminal laws so fascinating. By focusing on the tension between the law (legal processes) and the actors inside and outside the courts system (social contexts), this text demonstrates how the courts are a product of "law in action," and it presents the course content in a way that enables students to understand not only the "how" of the U.S. criminal court system but also the "why."

The Prescription-to-Prison Pipeline Michelle Smirnova 2023-02-23 In *The Prescription-to-Prison Pipeline* Michelle Smirnova argues that the ongoing opioid drug epidemic is the result of an endless cycle in which suffering is medicalized and drug use is criminalized. Drawing on interviews with eighty incarcerated individuals in Missouri correctional institutions, Smirnova shows how contradictions in medical practices, social ideals, and legal policies disproportionately criminalize the poor for their social condition. This criminalization further exacerbates and perpetuates drug addiction and poverty. Tracing the processes by which social issues are constructed as biomedical ones that necessitate pharmacological intervention, Smirnova highlights how inequitable surveillance, policing, and punishment of marginalized populations intensify harms associated with both treatment and punishment, especially given that the distinctions between the two have become blurred. By focusing on the stories of people whose pain and pharmaceutical treatment led to incarceration, Smirnova challenges the binary of individual and social problems, effectively exploring how the conceptualization, diagnosis, and treatment of substance use may exacerbate outcomes such as relapse, recidivism, poverty, abuse, and death.

Technology and Public Management Alan R. Shark 2015-02-11 At last, here is a textbook that covers the field of technology and public management in an informative and engaging style. Ever since the National Association of Schools of Public Affairs and Administration required greater infusion of technology into the curriculum, faculty and administrators have struggled with finding the right course materials designed specifically for the public administration environment.

Technology is no longer the sole domain of an information technology office, as it has evolved into a growing set of complex tools that influence every area of government. To be effective, every public manager needs to be actively engaged in technology decisions. This textbook is designed for students of public administration at every level who need to know and understand how technology can be applied in today's public management workplace. The book explores the latest trends in public management, policy, and technology and focuses on best practices on governance issues. Finally, this book provides real-life examples about the need for policies and procedures to safeguard our technology infrastructure while providing greater openness, participation, and transparency. Technology and Public Management covers: How information system design relates to democratic theory How and where public policy and technology intersect Skills and tools that are useful in information management, information technology, and systems dedicated for the effective flow of information within organizations Understanding the role of e-government, m-government, and social media in today's society and in public organizations Possibilities and challenges associated with technology applications within public organizations How technology can be managed, through various governance models The latest technology trends and their potential impact on public administration.

Strangers in Their Own Land Arlie Russell Hochschild 2016-09-06 In *Strangers in Their Own Land*, the renowned sociologist Arlie Hochschild embarks on a thought-provoking journey from her liberal hometown of Berkeley, California, deep into Louisiana bayou country—a stronghold of the conservative right. As she gets to know people who strongly oppose many of the ideas she famously champions, Hochschild nevertheless finds common ground and quickly warms to the people she meets—among them a Tea Party activist whose town has been swallowed by a sinkhole caused by a drilling accident—people whose concerns are actually ones that all Americans share: the desire for community, the embrace of family, and hopes for their children. *Strangers in Their Own Land* goes beyond the commonplace liberal idea that these are people who have been duped into voting against their own interests. Instead, Hochschild finds lives ripped apart by stagnant wages, a loss of home, an elusive American dream—and political choices and views that make sense in the context of their lives. Hochschild draws on her expert knowledge of the sociology of emotion to help us understand what it feels like to live in "red" America. Along the way she finds answers to one of the crucial questions of contemporary American politics: why do the people who would seem to benefit most from "liberal" government intervention abhor the very idea?

Intelligence and Security Informatics Sharad Mehrotra 2006-05-10 This book constitutes the refereed proceedings of the IEEE International Conference on Intelligence and Security Informatics, ISI 2006. Gathers 39 revised full papers, 30 revised short papers, and 56 extended poster abstracts, organized in topical sections including intelligence analysis and knowledge discovery; access control, privacy, and cyber trust; surveillance and emergency response; infrastructure protection and cyber security; terrorism informatics and countermeasures; surveillance, bioterrorism, and emergency response.

Mental Health and Punishments Paul Taylor 2020-06-09 How might we best manage those who have offended but have mental vulnerabilities? How are risks identified, managed and minimized? What are ideological differences of care and control, punishment and therapy negotiated in practice? These questions are just some which are debated in the eleven chapters of this book. Each with their focus on a given area, authors raise the challenges, controversies, dilemmas and concerns attached to this particular context of delivering justice. Taking insights on imprisonment, community punishments and forensic services, this book provides a broad analysis of environments. But it also casts a critical light on how punishment of the mentally vulnerable sits within public attitudes and ideas, policy discourses, and the ways in which those seen to present as risky and dangerous are imagined. Written in a clear and direct style, this book serves as a valuable resource for those studying, working or researching at the intersections of healthcare and criminal justice domains. This book is essential reading for students and practitioners within the fields of criminology and criminal justice, social work, forensic psychology, forensic psychiatry, mental health nursing and probation.

Connecting America Barry Leonard 2010-11 Broadband is the great infrastructure challenge of the early 21st century. Broadband is a foundation for economic growth, job creation, global competitiveness and a better way of life. The number of Americans who have broadband at home has grown from 8 million in 2000 to nearly 200 million last year. But, 100 million Americans do not have broadband at home. In early

2009, Congress directed the FCC to develop a National Broadband Plan to ensure that every American has access to broadband capability. This plan must also include a strategy for achieving affordability and maximizing use of broadband. The plan presented here ensures that the entire broadband ecosystem – networks, devices, content and applications – is healthy. Illus.

The Great Transformation Judith Bessant 2018-04-24 While AI, robots, biotechnologies and digital media are transforming work, culture and social life, there is little understanding of or agreement about the scope and significance of this change. This new interpretation of the 'great transformation' uses history and evolutionary theory to highlight the momentous shift in human consciousness taking place. Only by learning from recent crises and rejecting technological determinism will governments and communities re-design social arrangements that ensure we all benefit from the new and emerging technologies. The book documents the transformations underway in financial markets,

entertainment, medicine, affecting all aspects of work and social life. It draws on historical sociology and co-evolutionary theory arguing that the radical evolution of human consciousness and social life now underway is comparable to, if not greater than the agrarian revolution (10,000 BCE), the explosion of science, philosophy and religion in the Axial age (600 BCE), and the recent industrial revolution. Turning to recent major socio-economic crisis, and asking what can be learnt from them, the answer is we cannot afford this time around to repeat the failures of elites and theoretical systems like economics to attend appropriately to radical change. We need to think beyond the constraints of determinist and reductionist explanations and embrace the idea of deep freedom. This book will appeal to educators, social scientists, policy-makers, business leaders and students. It concludes with social design principles that can inform deliberative processes and new social arrangements that ensure everyone benefits from the affordances of the new and emerging technologies.
