Review Essay: Poor Economics (Banerjee/Duflo) Christopher King 2013-10-07 Literature Review from the year 2013 in the subject Politics - International Politics - Topic: Development Politics, grade: 1,0, Indiana University (Department of Political Science), course: Politics of International Development, language: English, abstract: "After all, we have spent billions of dollars on aid. [...] Has it done any good? And sadly, we don't know. And worst of all, we will never know." (Duflo 2010, 01:37) Poverty alleviation is a huge humanitarian challenge and also the supreme discipline of some economists. The effort to fight poverty had a mixed success so far and scholars claim different reasons for that

outcome (cf. Besley 2012). In "Poor Economics", Abhijit Banerjee and Esther Duflo avoid the often polemic 'Sachs vs. Easterly' aid debate and promise a "radical rethinking of the way to fight global poverty": They make a convincing case about learning on the lives of the poor and the unique choices they have to face in their lives. Banerjee/Duflo understand how the poor perceive their conditions and come to the decision they make and are therefore able to craft better strategies and interventions that actually help the poor and do not produce unintended consequences. By doing that, they deliberately target the micro-level and leave out the level of politics or institutions, which is somewhat problematic, to search effective approaches in answers of the smaller questions. This essay is structured in the following way: After an introduction to the analysis (2.) and an overview of Randomized Controlled Trials (RCTs), the main method of Banerjee/Duflo (2.1), the analysis will provide an assessment of key examples of the two scholars' research (2.2). Subsequently, an evaluation of limitations (2.3) and shortcomings (2.4) of the book will be conducted. By evaluating the approach and findings of "Poor Economics", the essay will be able to compare it with other scholarly works (3.). A conclusion (4.) will summarize the review and end with a personal take on what has been learned through studying the book.

Globalization at Risk Gary Clyde Hufbauer 2010-10-19 History has declared globalization the winner of the 20th century. Globalization connected the world and created wealth unimaginable in the wake of the Second World War. But the financial crisis of 2008-09 has now placed at risk the liberal economic policies behind globalization. Engulfing the entire world, the crisis gave new fuel to the skeptics of the benefits of economic integration. Policy responses seem to favor anti-globalizers. New regulations could balkanize the global financial system, while widespread protectionist

impulses might undo the Doha Round. Issues from climate change to national security may be used as convenient excuses to keep imports out, keep jobs at home, and to clamp down on global capital. Will globalization triumph or perish in the 21st century? What reforms make sense in the post-crisis world? International economists Gary Clyde Hufbauer and Kati Suominen argue that globalization has been a force of great good, one that needs to be actively advanced and honed. Drawing on the latest economic analyses, they reveal the drivers and effects of global finance and trade, lay out the key risks to globalization, and offer a practical policy roadmap for managing the challenges while increasing the gains. Vital reading for anyone in business, finance, foreign affairs, or economics, Globalization at Risk is sure to advance public debate on this defining issue of the 21st century.

Poverty and Famines Amartya Sen 1999 Commodities and Capabilities presents a set of inter-related theses concerning the foundations of welfare economics, and in particular about the assessment of personal well-being and advantage. The argument presented focuses on the capability to function, i.e. what a person can do or can be, questioning in the process the more standard emphasis on opulence or on utility. In fact, a person's motivation behind choice is treated here as a parametric variable which may or may not coincide with the pursuit of self-interest. Given the large number of practical problems arising from the roles and limitations of different concepts of interest and the judgement of advantage and well-being, this scholarly investigation is both of theoretical interest and practical import.

The Federalist Papers Alexander Hamilton 2018-08-20 Classic Books Library presents this brand new edition of "The Federalist Papers", a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyze the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755–1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

Essays in Economics And Other Cheerful Themes S. Subramanian 2014-08-12 Essays in Economics and Other Cheerful Themes is a collection of pieces on economy, polity and society, written by a social scientist over a number of years. The book addresses conceptual and empirical issues in development at both national and global levels. The philosophical

bases of these issues are sought to be addressed in relatively non-technical and accessible terms. The book also makes space for essays that deal with less solemn phenomena, such as cricket, film, the conduct of academic institutions, and the esoteric excesses of scholarly writing in the social sciences and humanities. The book is something of a professional economist's ramble through territory that is both familiar and important to him, but undertaken in a spirit of some leisureliness which the author hopes will attract a readership beyond that, solely, of fellow-professionals. Written primarily with the non-specialist reader in mind, these essays aim to be of interest to younger students, policy-makers, and involved and interested 'lay' citizens.

Middle-Income Trap. Is there a way out? Tahsina Akbar 2018-02-26 Essay from the year 2017 in the subject Business economics - Economic Policy, grade: Distinction, London School of Economics, language: English, abstract: Middle-income trap has become a well-known phenomenon with a large number of countries falling into the trap and getting stagnated. The article is an attempt to investigate whether falling into the Middle-income trap is inevitable or there is a way out through in-depth review of secondary research. The article argues, supported by previous empirical and descriptive evidence, that countries (and regions within) are not systematically bound to fall into a MI trap, rather, certain determinants, such as institutions, economic structure, infrastructure and other factors make countries (and regions within) more susceptible to a MI trap. It discusses how the complex economic structure of a MI country (and region within) requires a shift to capital intensive, innovation-driven efficient economy to make a timely transition to HI economy. It also highlights the need for a certain level of infrastructure to capture the benefits of an export-based economy. Moreover, decentralization, inequality and demography play significant role in intensifying the MI trap period affecting growth. Therefore, the article concludes, while some countries (and regions within) fall into a MI trap and stagnate, others do not, due to uneven condition of their determinants.
