International Reflections on the Netherlands

Didactics of Mathematics

Marja van den Heuvel-

Panhuizen 2019-08-13 This

open access book, inspired

by the ICME 13 Thematic

Afternoon on “European

Didactic Traditions”, takes

readers on a journey with

mathematics education

researchers, developers and

educators in eighteen

countries, who reflect on

their experiences with

Realistic Mathematics

Education (RME), the

domain-specific instruction

theory for mathematics

education developed in the

Netherlands since the late

1960s. Authors from outside

the Netherlands discuss

what aspects of RME appeal

to them, their criticisms of

RME and their ~~Downloaded from~~

enhance assessment alongside the pupil texts, these resources offer a range of material for the OCR specification. They provide test questions for each chapter together with detailed mark schemes to make assessment easy. Two versions of each question are provided, one allows pupils to write their answers in the spaces provided and the other requires pupils to have separate writing paper. Questions can be grouped according to needs. Master grids are provided to cut and paste tests together in a consistent format to use the resource in any order. Chapter tests can be grouped to form a module test after chapters. End-of-chapter examinations can also be produced in this way. A free non-calculator supplement organised by unit/chapter is also included in this resource.

OCR Gcse (9-1) Computer Science S Robson

2016-06-15 The aim of this book is to provide an accessible text for students, covering each of the elements in the OCR GCSE (9-1) Computer Science specification J276. It will be invaluable both as a course text and in revision for students nearing the end of the course. It is divided into eight sections, each broken down into manageable chapters of roughly one lesson. Sections 5 and 6 of the textbook cover

algorithms and
Gcse Maths Ocr Pdf
upload Donald g
Williamson

programming concepts with a theoretical approach to provide students with experience of writing, tracing and debugging pseudocode solutions without the aid of a computer. These sections would complement practical programming experience. Each of the eight sections cover one of the major topics in this course, and each subtopic contains sample examination questions from past papers, which can be set as homework.
