Dermatology Atlas for Skin of Color Diane Jackson-Richards 2014-07-19

This atlas, containing more than 300 color photos, focuses on those dermatologic conditions that are most common in ethnic skin or skin of color. It includes succinct explanations of each disease process, describes clinical findings and presents key information on diagnosis and treatment. Individual chapters are devoted to pigmentary disorders, follicular disorders, hair and scalp disorders, eczemas, papulosquamous disorders, granulomatous disorders, connective tissue diseases, infectious diseases, scarring disorders, cutaneous neoplasms, photodermatoses and drug eruptions. The fact that this atlas covers skin disorders that affect patients of all ethnic backgrounds ensures that it will be of worldwide relevance. It will serve as a valuable reference for dermatologists and a range of other health care providers.

Clinical Cases in Skin of Color Porcia B. Love 2015-11-25 This book

identifies the most common presentations and essential features of top dermatological conditions in patients with skin of color. It presents practical information in a case-based organization to assist dermatologists in clinical decision making, and discusses important cultural beliefs that must be considered in order to provide optimal care to patients with skin of color. There is an increasing demand for dermatologic treatments in patients with skin of color, as well as an accompanying need for education and training in this quickly expanding market. Skin of color is a key topic within dermatology as specific conditions can be harder to diagnose effectively in darker skin, and patients' treatment can be compromised by this. *Clinical Cases in Skin of Color: Medical, Oncological and Hair Disorders*, and *Cosmetic Dermatology* is a concise resource with practical guidance for board certified dermatologists and dermatologists in training.

*Lookingbill and Marks' Principles of Dermatology E-Book* James G. Marks 2013-04-11 This book meets your needs for an affordable, well-structured, user-friendly guide to dermatological diagnosis and treatment. It begins with principles of diagnosis and therapy before going on to discuss the major groups of skin diseases. Each skin disorder is illustrated with a color clinical photograph as well as a line drawing showing you exactly what the entity looks like. The logical organization of the chapters guides you towards an accurate diagnosis with therapy options in highlighted boxes. Tables in each chapter rank diseases according to frequency of incidence and highlights clinical features to assist you in making a differential diagnosis. Clinical examples of unusual presentations or unusual cases test your understanding and ability to apply key principles discussed in the text. Places cross-sectional line diagrams alongside color clinical photographs to show you what each syndrome looks like and provide schematic representation of the cause and condition. Uses tables to summarize main characteristics of major groups of skin conditions. Summarizes key information for easy comparison of variations of different skin diseases in same group. Presents a consistent format to help you find

information in a systematic way. Includes color clinical photos to facilitate diagnosis. Features self-assessment tests to polish your understanding of principles discussed. Adds extra content at the end of each chapter with photos of more uncommon presentations to encourage you to think about non-obvious solutions. Uses full-color histopathology illustrations for additional clarity.
