Twain's End Lynn Cullen 2016-06-07 "In March of 1909, Mark Twain cheerfully blessed the wedding of his private secretary, Isabel V. Lyon, and his business manager, Ralph Ashcroft. One month later, he fired both, wrote a ferocious 429-page rant about the pair, and then --with his daughter, Clara Clemens--slandered Isabel in the newspapers, erasing her nearly seven years of devoted service to their family."--Page 4 of cover

Joan Crawford David Bret 2009-04-15 In the first biography of Joan Crawford to give the full, uncensored story, bestselling author David Bret tells Crawford's rags to riches climb, from working in a Kansas City laundry to collecting an Oscar for her defining role in Mildred Pierce, and on to her devotion to Christian Science and reliance on vodka. He discusses the star's legendary relationship with Clark Gable, her countless love affairs, her marriages -- three of them to gay men -- and her obsession with rough sex. Bret divulges what really happened that led her to disinherit two of her four children, earning her the nickname "Mommie Dearest," as well as how her loathed mother forced Crawford to work as a prostitute, appear in pornographic films, and sleep her way to the top. Bret analyzes Crawford's films, many of which were constructed purely as vehicles where actress and character were often indistinguishable. Overtly generous towards her coterie of gay friends, she was heartless towards her enemies, particularly Bette Davis, her co-star in Whatever Happened to Baby Jane, with whom she shared a lifelong feud. Drawing on a wealth of unpublished material and interviews, David Bret presents a unique, fascinating portrait of a single-minded, uncompromising woman.

Aging Easy Mondresia Carver 2021-07-19 People often ask, "Why Seniors?" My response is always the same, "Why NOT Seniors?" I have always had an unwavering desire to serve and protect the elderly. Even as a child, when given the opportunity to choose, my choice was always to be in the company of the "older folk". I have found their wisdom and conversation to be priceless. For Seniors, living independently during their golden years can be an enjoyable and rewarding time of life. Most desire to maintain their dignity, quality of life, and independence while living at home. Sounds simple enough. However, what I have found to be true, both professionally and personally, is that things aren't always so simple. As a very young adult, I can recall experiencing the loss of my maternal great-grandmother. Having not been afforded the knowledge that I currently possess, watching her cognitive decline over a 5-year span was painful. On the day of her funeral, I can still recall feeling as though I'd lost my grandmother several years prior. A better understanding of her diagnosis would have added more quality to the time we shared. Experiencing the loss of my paternal grandmother was another taxing experience. Though her diagnosis did not rob her of her cognitive ability, Cancer certainly took everything else. During this experience, my knowledge base for the situation was greater. Therefore, medical attention, placement, and long-term planning were much easier. Most recently, the loss of my maternal grandfather was a challenge that tugged on every ounce of knowledge, experience, and emotion possible. Within a 7-month period, I watched my grandfather drift from what most called, "The World's Oldest Teenager" to being completely bedridden and dependent on others for care. Heart attack, stroke, cancer, kidney failure, dialysis, feeding tube, tracheostomy, cardiac arrest, and resuscitation were only among the most significant challenges that he endured. Fortunately, my family and I were able to make "informed" decisions to assure that he maintained quality of life. Working in Senior care for over 20 years, I have been exposed to all aspects. I have consoled weeping widows. I have found placement for seniors who have no family. I have advocated for seniors who were mistreated by family and/or professionals. I have found assistance for seniors that wanted to remain at home but needed a little help. I have helped family to understand that Hospice is actually very beneficial and not death sentence. I have hired good caregivers. I have terminated poor caregivers. I have also provided Psychotherapy for seniors who suffer from depression and anxiety. In short, Seniors and their families experience the same issues as those in other populations. For me, it is a God-given charge that I do all that is within my power to assure that this population is provided with the supports needed to be safe, healthy, and happy.

The Language of Gaming Astrid Ensslin 2012 This innovative text examines videogames and gaming from the point of view of discourse analysis. In particular, it studies two major aspects of videogame-related communication: the ways in which videogames and their makers convey meanings to their audiences, and the ways in which gamers, industry professionals, journalists and other stakeholders talk about games. In doing so, the book offers systematic analyses of games as artefacts and activities, and the discourses surrounding them. Focal areas explored in this book include: • aspects of videogame textuality and how games relate to other texts • the formation of lexical terms and use of metaphor in the language of gaming • gamer slang and 'buddylects' • the construction of game worlds and their rules, of gamer identities and communities • dominant discourse patterns among gamers and how they relate to the nature of gaming • the multimodal language of games and gaming • the ways in which ideologies of race, gender, media effects and language are constructed. Informed by the very latest scholarship and illustrated with topical examples throughout, The Language of Gaming is ideal for students of applied linguistics, videogame studies and media studies who are seeking a wide-ranging introduction to the field.

The Numinous Legacy Adair Buthcins 2002 Where is God in the universe if anywhere? Why did God make germs? Why should we be so special? Could the universe have been different? This is a book that brings home, in no uncertain fashion, the discrepancy between the universe envisaged by the ancient sages and prophets and that of modern scientific cosmology, where the possibility of divine intervention looks less and less likely. Buthcins demonstrates with clarity how the scientific method may be used, despite certain drawbacks, in an attempt to verify objective truth. It describes how the effect of the Copernican Revolution in the seventeenth century has steadily undermined the basic structure of the three great monotheistic religions of our day, Judaism, Christianity, and Islam, especially with respect to their eschatological concepts. The Eastern religions, being less anthropomorphic, are less affected. The theistic argument from design is shown to be powerful enough to have caused disagreement among present-day scientists, in spite of the strictures of Professor Dawkins. In general, the book attempts to make some sense of the structure of the universe in terms of our own consciousness; it behoves the reader to consider the

In addition, there have been major changes in the way that hearing aids work, and the features they offer. This book will provide an understanding of the changes in perception that take place when a person has cochlear hearing loss so the reader understands not only what does happen, but why it happens. It interrelates physiological and perceptual data and presents both this and basic concepts in an integrated manner. The goal is to convey an understanding of the perceptual changes associated with cochlear hearing loss, of the difficulties faced by the hearing-impaired person, and the limitations of current hearing aids.
