*American Studies* Philip J. Deloria 2017-08-22  
*American Studies* has long been a home for adventurous students seeking to understand the culture and politics of the United States. This welcoming spirit has found appeal around the world, but at the heart of the field is an identity crisis. Nearly every effort to articulate an American Studies methodology has been rejected for fear of losing intellectual flexibility and freedom. But what if these fears are misplaced? Providing a fresh look at American Studies in practice, this book contends that a shared set of "rules" can offer a springboard to creativity. *American Studies: A User's Guide* offers readers a critical introduction to the history and methods of the field as well as useful strategies for interpretation.

Next. Please note that  
these settings are not  
optimal, in the sense  
that with enough  
tweaking, you can  
probably get similar  
quality with faster  
render times. The beauty  
of these settings,  
though, is that they  
require almost no  
tweaking, and you are  
guaranteed to get a good  
result in the end. The  
advantages of these  
settings are: o very  
little parameters for  
controlling render  
quality vs. speed o  
works for a very large  
number of scenes o  
produces high-quality  
results With the  
Progressive Image  
Sampler, the default  
Render time (min) is set  
to 1.0, which might be  
insufficient for some  
scenes. You can reset  
this to 0.0 min and  
rendering will continue  
until the Noise  
threshold is reached.  
Setting the V-Ray  
Renderer 1. Set V-Ray as  
the current rendering

V-Ray settings). 2. The  
default settings are

universally, so it is recommended to keep them: Progressive image sampler with 100 Max. subdivs and 1 Min. subdivs; GI enabled, using Brute Force as Primary GI engine and Light Cache as Secondary GI engine. 3. You can further refine the noise levels from the Progressive Image sampler rollout by adjusting the Noise Threshold and placing a 0 value for the Render time (min). 4. You can control the amount of AA vs shading samples (for materials/lights/GI) using the Min shading rate parameter in the Image Sampler rollout but the default value is optimised to work well for the majority of scenes.
