2014 International Conference on Computer, Network  
2014-03-12 The objective of the 2014 International Conference on Computer, Network Security and Communication Engineering (CNSCE2014) is to provide a platform for all researchers in the field of Computer, Network Security and Communication Engineering to share

the most advanced knowledge from both academic and industrial world, to communicate with each other about their experience and most up-to-date research achievements, and to discuss issues and future prospects in these fields. As an international conference mixed with academia and industry, CNSCE2014 provides attendees not only the free exchange of ideas and challenges faced by these two key stakeholders and encourage future collaboration between members of these groups but also a

good opportunity to make friends with scholars around the world. As the first session of the international conference on CNSCE, it covers topics related to Computer, Network Security and Communication Engineering. CNSCE2014 has attracted many scholars, researchers and practitioners in these fields from various countries. **National Human Development Report 2014** United Nations Publications 2015 Over the 15 years since the country's last National Human Development Report (NHDR) was published Ethiopia has undergone significant economic and social changes and has recorded some of the highest growth rates in the world-over 10 per cent in some years. However, Ethiopia's Human Development Index (HDI) and its relative ranking have not moved appreciably during the past decade. Even though Ethiopia is one of the 10 countries globally that has attained the largest absolute gains in its HDI over the last several years, it still ranks 173rd out of 186 countries in the latest UNDP Human Development Report. It is this development challenge that underlines the fact that the preparation of the NHDR is so opportune now and why the focus of the report on inclusive growth for sustainable human development is so apposite. In 1998, when the last NHDR was written, the development challenges facing the country were considerably different.

*BRICS and MICs: Implications for Global Agrarian Transformation* Ben Cousins 2020-05-21 The economic and political rise of the BRICS countries (Brazil, Russia, India, China and South Africa), and powerful middle-income countries (MICs) such as Argentina, Indonesia and Turkey, has far-reaching implications for global agrarian transformation. These countries are key sites of agricultural commodity production, distribution, circulation and consumption and are contributing to major shifts in the character of agro-food systems. This comprehensive collection explores these issues through the lens of critical agrarian studies, which examine fundamental social change in, and in relation to, rural worlds. The authors explore key themes such as the processes of agrarian change associated with individual countries within the grouping, the role and impact of BRICS countries within their respective regions, the role of other MICs within these regions and the rising importance of MICs within global and regional agro-food systems. The book encompasses a wide variety of case studies, including the expansion of South African agrarian capital within Africa; Brazil as a regional agro-food power and its complex relationship with China, which has been investing heavily in Brazil; the role of BRICS and MICs in Bolivia's soy complex; crop booms within China; China's role in land deals in Southeast Asia; and Vietnamese investment in Cambodia. This book will be of interest to students and researchers of critical agrarian studies, with a focus on BRICS and MICs. It was originally published as a special issue of the journal *Globalizations*.

Asia in International Relations Pinar Bilgin 2017-02-01 *Asia in International Relations* decolonizes conventional understandings and representations of Asia in International Relations (IR). This book opens by including all those geographical and cultural linkages that constitute Asia today but are generally ignored by mainstream IR. Covering the Indian subcontinent, Turkey, the Mediterranean, Iran, the Arab world, Ethiopia, and Central-Northeast-Southeast Asia, the volume draws on rich literatures to develop our understanding of power relations in the world's largest continent. Contributors "de-colonize", "de-imperialize", and "de-Cold War" the region to articulate an alternative narrative about Asia, world politics, and IR. This approach reframes old problems in new ways with the possibility of transforming them, rather than recycling the same old approaches with the same old "intractable" outcomes.

**Look East, Cross Black Waters** Jonah Blank 2015-10-13 India's core goals for Southeast Asia are in basic harmony with those of the United States, including regional stability, peaceful settlement of territorial disputes, and containment of radicalism Still, America should not expect India to enter any sort of alliance, nor join any coalition to balance against China, but should demonstrate strategic patience and willingness to cultivate a long-term relationship.

**World Scientific Reference On Entrepreneurship, The (In 4 Volumes)** 2016-12-28 This book examines an important economic development in East Asia during the first decade of the 21st century. Whereas regional arrangements were, with the sole significant exception

of ASEAN, conspicuously absent before 2000, they have proliferated since 2000 in both the monetary and trade areas. The book places this political development in the changing nature of the national economies, especially their increasing integration into regional and global value chains with the fragmentation of production processes. This is a freshly written, coherent analysis of the topic, drawing upon (updated) material from a series of articles that the author has published on the subject over the years. Although the book is based on theoretical and, especially, empirical analysis of regionalism, it is written in a non-technical style accessible to a wide range of readers. The book is likely to be adopted as supplementary reading for university courses on Asian economies, whether be it in area studies or economics/political economy disciplines.

**A Brief History of String Theory** Dean Rickles 2014-02-18 During its forty year lifespan, string theory has always

had the power to divide, being called both a 'theory of everything' and a 'theory of nothing'. Critics have even questioned whether it qualifies as a scientific theory at all. This book adopts an objective stance, standing back from the question of the truth or falsity of string theory and instead focusing on how it came to be and how it came to occupy its present position in physics. An unexpectedly rich history is revealed, with deep connections to our most well-established physical theories. Fully self-contained and written in a lively fashion, the book will appeal to a wide variety of readers from novice to specialist.

**India's Africa Policy** Philipp Gieg 2023-06-03 The book analyses how India's rise to the status of an emerging power has affected New Delhi's Africa policy, after sketching the historical evolution and normative underpinnings of Indo-African relations, and what challenges it has brought for New Delhi's engagement with the continent. India and Africa share a history dating back millennia. Today, India is one of Africa's biggest trading partner countries, second only to China. The country regularly extends lines of credit worth billions to African nations, and its pharmaceutical producers dominate many African markets; almost one-fifth of India's oil imports and more than one-quarter of its natural gas imports come from the continent. However, relations between India and Africa are far from being limited to economic cooperation. The book scrutinises three foreign policy fields: (1) India's foreign economic policy towards Africa with an in-depth analysis of Indo-African trade, investment and lines of credit; (2) New Delhi's development cooperation policy vis-à-vis Africa, its principles, instruments and volume; (3) India's politico-diplomatic foreign and security policy vis-à-vis Africa, including New Delhi's high-level diplomacy, security and diaspora policy as well as multilateral Africa policy.

**Global Technology and Legal Theory** Guilherme Cintra Guimarães 2019-06-05 The rise and spread of the Internet has accelerated the global flows of money, technology and information that are increasingly perceived as a challenge to the traditional regulatory powers of nation states and the effectiveness of their constitutions. The acceleration of these flows poses new legal and political problems to their regulation and control, as

shown by recent conflicts between Google and the European Union (EU). This book investigates the transnational constitutional dimension of recent conflicts between Google and the EU in the areas of competition, taxation and human rights. More than a simple case study, it explores how the new conflicts originating from the worldwide expansion of the Internet economy are being dealt with by the institutional mechanisms available at the European level. The analysis of these conflicts exposes the tensions and contradictions between, on the one hand, legal and political systems that are limited by territory, and, on the other hand, the inherently global functioning of the Internet. The EU's promising initiatives to extend the protection of privacy in cyberspace set the stage for a broader dialogue on constitutional problems related to the enforcement of fundamental rights and the legitimate exercise of power that are common to different legal orders of world society. Nevertheless, the different ways of dealing with the competition and fiscal aspects of the conflicts with Google also indicate the same limits that are generally attributed to the very project of European integration, showing that the constitutionalization of the economy tends to outpace the constitutionalization of politics. Providing a detailed account of the unfolding of these conflicts, and their wider consequences to the future of the Internet, this book will appeal to scholars working in EU law, international law and constitutional law, as well as those in the fields of political science and sociology.

**Virtual Reality, Empathy and Ethics** Matthew Cotton 2021-09-21 This book examines the ethics of virtual reality (VR) technologies. New forms of virtual reality are emerging in society, not just from low-cost gaming headsets, or augmented reality apps on phones, but from simulated "deep fake" images and videos on social media. This book subjects the new VR technological landscape to ethical scrutiny: assessing the benefits, risks and regulatory practices that shape it. Though often associated with gaming, education and therapy, VR can also be used for moral enhancement. Journalists, artists, philanthropic and non-governmental organisations are using VR films, games and installations to stimulate user empathy to marginalised peoples through a combination of immersion, embodiment and persuasion. This book critically assesses the use of VR for empathy arousal and pro-social behaviour change, culminating in the development of a VR "ethical tool" – a device to facilitate reflective ethical judgement. Drawing upon the pragmatist philosophy of John Dewey, virtual reality is reshaped as "dramatic rehearsal". This book explains how a combination of immersive environment-building, moral imagination, choice architecture and reflective engagement can stimulate a future-focused and empathic ethics for users of the technology.
