the quality of public services. Whereas much attention has been paid to technical reforms to improve budgeting, expenditure control, accounting, and auditing, less attention has been given to the process of developing skilled financial managers, whose expertise is key to sustained improvement in the management of public finances. Successive governments in the United Kingdom have recognized the need to strengthen professionalism in financial management, but the financial crisis gave an additional impetus for change. This change has been reflected in policy statements, changes in recruitment and human resource management practices, and the development of professional networks in accounting, audit, procurement, and project management. inquiry powers of administrative governance and this book examines the use of these powers in administrative law across seven jurisdictions. The book brings together recent developments in mixed inquisitorial-adversarial administrative decision-making on a hitherto neglected area of comparative administrative process and institutional design. Reaching important conclusions about their own jurisdictions and raising questions which may be explored in others, the book's chapters are comparative. They explore the terminology and scope of the concept of inquisitorial process, justifications for the use of inquiry powers, the effectiveness of inquisitorial processes and the implications of the adoption of such powers. The book will set in motion continued dialogue about the

museum library's value within its institution. It documents the broad changes in the environment that art museum libraries now function within and to celebrate the many innovative initiatives that are flourishing in this new landscape. Librarians working in art museum face unique challenges as museums redefine what object-based, visitor-centric learning looks like in the 21st century. These unique challenges mean that art museum libraries are developing new strategies and initiatives so that they can continue to thrive

in this environment. The unique nature of these initiatives mean that they will be useful to librarians working in a wide range of special libraries, as well as more broadly in academic and public libraries. The New Art Museum Library is uniquely positioned to present new strategies and initiatives including digital art history initiatives, the new norms in art museum library staffing, and the public programming priorities that are core to many art museum libraries today. This book is an endorsed project of ARLIS/NA.
