Guild Wars: Edge of Destiny J. Robert King
2010-12-28 Destiny Called - They Answered In the dark recesses of Tyria, elder dragons have awoken from millennial slumbers. First came Primordus, which stirred in the Depths forcing the asura to flee to the surface. Half a century later, Jormag awoke and drove the norn from the frozen climes of the Northern Shiverpeaks, corrupting sons and brothers along the way. A generation later, Zhaitan arose in a cataclysmic event that reshaped a continent and flooded the capital of the human nation of Kryta. The races of Tyria stand on the edge of destiny. Heroes have battled against dragon minions, only to be corrupted into service of the enemy. Armies have marched on the dragons and been swept aside. The dwarves sacrificed their entire race to defeat a single dragon champion. The age of mortals may soon be over. This is a time for heroes. While the races of Tyria stand apart, six heroic individuals will come together to fight for their people: Eir, the norn huntress with the soul of an artist; Snaff, the asuran genius, and his ambitious assistant Zojja; Rytlock, the ferocious charr warrior in exile; Caithe, a deadly sylvari with deep secrets; and Logan, the valiant human guardian dealing with divided loyalties. Together they become Destiny's Edge. Together they answer

the call. But will it be enough?

The King embodies the world Darleen N. Pryds
2000 Robert d Anjou, King of Naples (1309-1343), was a lay preacher. With his sermons, he expressed his piety and erudition, but most importantly, he preached in order to extend his royal office. This study provides an important contribution to the history of lay preaching.

The Thran J. Robert King 2018-03-27 Before the Brothers' War. Before the five colors of magic. Before history itself, the plane of Dominaria was ruled by the Thran. They built machines and artifacts, the likes of which have never since been seen. But amid this civilization, a shadow took root, one that would stretch its arms across space and time. The hideous evil of Phyrexia was born.
Scourge J. Robert King 2003 Out of the devastation, destruction, and chaos of the fierce struggle between Phage and Akroma a new force is born, as Kamahl confronts his greatest foe-- Karoma the destroyer. Original.

Comparing the Structure, Size, and Performance of Local and Mainstream Food Supply Chains
Robert P. King 2010 A series of coordinated case studies compares the structure, size, and performance of local food supply chains with those of mainstream supply chains. Interviews and site visits with farms and businesses, supplemented with secondary data, describe how food moves from farms to consumers in 15 food

supply chains. Key comparisons between supply chains include the degree of product differentiation, diversification of marketing outlets, and information conveyed to consumers about product origin. The cases highlight differences in prices and the distribution of revenues among supply chain participants, local retention of wages and proprietor income, transportation fuel use, and social capital creation. Charts and tables.

Unlocking Africa's Business Potential Landry Signé 2020-04-07 Africa welcomes business investment and offers some of the world's highest returns and impacts Africa has tremendous economic potential and offers rewarding opportunities for global businesses looking for new markets and long-term investments with favorable returns. Africa has been one of the world's fastest-growing regions over the past

decade, and by 2030 will be home to nearly 1.7 billion people and an estimated \$6.7 trillion worth of consumer and business spending. Increased political stability in recent years and improving regional integration are making market access easier, and business expansion will generate jobs for women and youth, who represent the vast majority of the population. Current economic growth and poverty-alleviation efforts mean that more than 43 percent of the continent's people will reach middle- or upper-class status by 2030.

Unlocking Africa's Business Potential examines business opportunities in the eight sectors with the highest potential returns on private investment—the same sectors that will foster economic growth and diversification, job creation, and improved general welfare. These sectors include: consumer markets, agriculture and agriprocessing, information and communication technology, manufacturing, oil and gas, tourism, banking, and infrastructure and construction. The book's analysis of these sectors is based on case studies that identify specific opportunities for investment and growth, along with long-term market projections to inform decision-making. The book identifies potential risks to business and offers mitigation strategies. It also provides policymakers with solutions to attract new business investments, including how to remove barriers to business and accelerate development of the private sector.

Volatility and friction in the age of disintermediation Tim Sweijs 2017-02-20 Events unfolded once again at a swirling pace in 2016. Terrorists hit Europe's capital in March. The British population voted for Brexit in June. Turkish armed forces failed to topple Erdoğan in July. A resurgent Russia flexed its military muscles again in the Middle East and actively interfered in American elections, in which the American population elected Trump, in November. We are worried but certainly not surprised by the volatility of contemporary international relations. In previous editions of our contribution to the Dutch government's Strategic Monitor, we already observed a surge in assertive behavior, noted a dangerous uptick in crises, and warned for the contagiousness of political violence. The current volatility is not a coincidence, but rather the result of fundamental disturbances of the global order that are greatly amplified by rapid technological developments. Most mainstream explanations of recent turbulence focus on power transitions (the decline of the West and the rise of the rest), the concomitant return to more aggressive forms of power politics, and a backlash against globalization. What strikes us is that many of the explanations ignore what we consider one of the most striking mega trends that is reshaping the dynamics of power: the ongoing process of disintermediation. The StratMon 2016-2017 analyzes global trends in confrontation,

cooperation and conflict based on different datasets. This year the report also contains case studies on Turkey, Moldova and The rise and fall of ISIS. Chapters analyzing the many faces of political violence and 'the other side of the security coin' are also included.

On Social Structure and Science Robert K. Merton 1996-09-15 Robert K. Merton is unarguably one of the most influential sociologists of his time. A figure whose wide-ranging theoretical and methodological contributions have become fundamental to the field, Merton is best known for introducing such concepts and procedures as unanticipated consequences, self-fulfilling prophecies, focused group interviews, middle-range theory, opportunity structure, and analytic paradigms. This definitive compilation encompasses the breadth and brilliance of his works, from the earliest to the most recent.

Merton's foundational writings on social structure and process, on the sociology of science and knowledge, and on the discipline and trajectory of sociology itself are all powerfully represented, as are his autobiographical insights in a fascinating coda. Anchored by Piotr Sztompka's contextualizing introduction, Merton's vast oeuvre emerges as a dynamic and profoundly coherent system of thought, a constant source of vitality and renewal for present and future sociology.

From the Bottom of the Heap Robert Hillary King 2012-10-05 In 1970, a jury convicted Robert

Hillary King of a crime he did not commit and sentenced him to 35 years in prison. He became a member of the Black Panther Party while in Angola State Penitentiary, successfully organizing prisoners to improve conditions. In return, prison authorities beat him, starved him, and gave him life without parole after framing him for a second crime. He was thrown into solitary confinement, where he remained in a six-by-nine-foot cell for 29 years as one of the Angola 3. In 2001, the state grudgingly acknowledged his innocence and set him free. This is his story. It begins at the beginning: born black, born poor, born in Louisiana in 1942, King journeyed to Chicago as a hobo at the age of 15. He married and had a child, and briefly pursued a semi-pro boxing career to help provide for his family. Just a teenager when he entered the Louisiana penal system for the first time, King tells of his attempts to break out of this system, and his persistent pursuit of justice where there is none. Yet this remains a story of inspiration and courage, and the triumph of the human spirit. The conditions in Angola almost defy description, yet King never gave up his humanity, or the work towards justice for all prisoners that he continues to do today. From the Bottom of the Heap, so simply and humbly told, strips bare the economic and social injustices inherent in our society, while continuing to be a powerful literary testimony to our own strength and capacity to overcome. The

paperback edition includes additional writings from Robert King and an update on the case of the Angola 3.

The Fun Factory Rob King 2008-12-10 From its founding in 1912, the short-lived Keystone Film Company—home of the frantic, bumbling Kops and Mack Sennett's Bathing Beauties—made an indelible mark on American popular culture with its high-energy comic shorts. Even as Keystone brought "lowbrow" comic traditions to the screen, the studio played a key role in reformulating those traditions for a new, cross-class audience. In The Fun Factory, Rob King explores the dimensions of that process, arguing for a new understanding of working-class cultural practices within early cinematic mass culture. He shows how Keystone fashioned a style of film comedy from the roughhouse humor of cheap theater, pioneering modes of representation that satirized film industry attempts at uplift. Interdisciplinary in its approach, The Fun Factory offers a unique studio history that views the changing politics of early film culture through the sociology of laughter.

Solitary Terry A. Kupers 2017-09-05 "When I testify in court, I am often asked: 'What is the

damage of long-term solitary confinement? . . .

Many prisoners emerge from prison after years in solitary with very serious psychiatric symptoms even though outwardly they may appear emotionally stable. The damage from isolation is dreadfully real.” –Terry Allen Kupers Imagine spending nearly twenty-four hours a day alone, confined to an eight-by-ten-foot windowless cell. This is the reality of approximately one hundred thousand inmates in solitary confinement in the United States today. Terry Allen Kupers, one of the nation’s foremost experts on the mental health effects of solitary confinement, tells the powerful stories of the inmates he has interviewed while investigating prison conditions during the past forty years. Touring supermax security prisons as a forensic psychiatrist, Kupers has met prisoners who have been viciously beaten or raped, subdued with immobilizing gas, or ignored in the face of urgent medical and psychiatric needs. Kupers criticizes the physical and psychological abuse of prisoners and then offers rehabilitative alternatives to supermax isolation. Solitary is a must-read for anyone interested in understanding the true damage that solitary confinement inflicts on individuals living in isolation as well as on our society as a whole.

A reissue of the classic report of Columbia’s Bureau of Applied Social Research, outlining techniques for eliciting specific responses of individuals and groups to particular events and situations. Reducing Urban Violence in the Global South

Jennifer Erin Salahub 2019-05-14 Reducing Urban Violence in the Global South seeks to identify the drivers of urban violence in the cities of the Global South and how they relate to and interact with poverty and inequalities. Drawing on the findings of an ambitious 5-year, 15-project research programme supported by Canada's International Development Research Centre and the UK's Department for International Development, the book explores what works, and what doesn't, to prevent and reduce violence in urban centres. Cities in developing countries are often seen as key drivers of economic growth, but they are often also the sites of extreme violence, poverty, and inequality. The research in this book

was developed and conducted by researchers from the Global South, who work and live in the countries studied; it challenges many of the assumptions from the Global North about how poverty, violence, and inequalities interact in urban spaces. In so doing, the book demonstrates that accepted understandings of the causes of and solutions to urban violence developed in the Global North should not be imported into the Global South without careful consideration of local dynamics and contexts. Reducing Urban Violence in the Global South concludes by considering the broader implications for policy and practice, offering recommendations for improving interventions to make cities safer and more inclusive. The fresh perspectives and insights offered by this book will be useful to scholars and students of development and urban violence, as well as to practitioners and policymakers working on urban violence reduction programmes.

The King in Yellow Robert William Chambers
2020-09-28 Toward the end of the year 1920 the Government of the United States had practically completed the programme, adopted during the last months of President Winthrop's administration. The country was apparently tranquil. Everybody knows how the Tariff and Labour questions were settled. The war with Germany, incident on that country's seizure of the Samoan Islands, had left no visible scars upon the republic, and the temporary occupation of

Norfolk by the invading army had been forgotten in the joy over repeated naval victories, and the subsequent ridiculous plight of General Von Gartenlaube's forces in the State of New Jersey. The Cuban and Hawaiian investments had paid one hundred per cent and the territory of Samoa was well worth its cost as a coaling station. The country was in a superb state of defence. Every coast city had been well supplied with land fortifications; the army under the parental eye of the General Staff, organized according to the Prussian system, had been increased to 300,000 men, with a territorial reserve of a million; and six magnificent squadrons of cruisers and battle-ships patrolled the six stations of the navigable seas, leaving a steam reserve amply fitted to control home waters. The gentlemen from the West had at last been constrained to acknowledge that a college for the training of diplomats was as necessary as law schools are for the training of barristers; consequently we were no longer represented abroad by incompetent patriots. The nation was prosperous; Chicago, for a moment paralyzed after a second great fire, had risen from its ruins, white and imperial, and more beautiful than the white city which had been built for its plaything in 1893. Everywhere good architecture was replacing bad, and even in New York, a sudden craving for decency had swept away a great portion of the existing horrors. Streets had been widened,

properly paved and lighted, trees had been planted, squares laid out, elevated structures demolished and underground roads built to replace them. The new government buildings and barracks were fine bits of architecture, and the long system of stone quays which completely surrounded the island had been turned into parks which proved a god-send to the population. The subsidizing of the state theatre and state opera brought its own reward. The United States National Academy of Design was much like European institutions of the same kind. Nobody envied the Secretary of Fine Arts, either his cabinet position or his portfolio. The Secretary of Forestry and Game Preservation had a much easier time, thanks to the new system of National Mounted Police. We had profited well by the latest treaties with France and England; the exclusion of foreign-born Jews as a measure of self-preservation, the settlement of the new independent negro state of Suanee, the checking of immigration, the new laws concerning naturalization, and the gradual centralization of power in the executive all contributed to national calm and prosperity. When the Government solved the Indian problem and squadrons of Indian cavalry scouts in native costume were substituted for the pitiable organizations tacked on to the tail of skeletonized regiments by a former Secretary of War, the nation drew a long sigh of relief. When, after the colossal Congress

of Religions, bigotry and intolerance were laid in their graves and kindness and charity began to draw warring sects together, many thought the millennium had arrived, at least in the new world which after all is a world by itself.

Onslaught J. Robert King 2002 The first in an all-new Magic(novel cycle and the first major novel release since the Odyssey* cycle revamps a large part of the Magic: The Gathering world. The land is in upheaval, yet amidst the turmoil there is civilization, brutal and unforgiving. Pit fighters battle to the death before crowds, making some rich while others lose everything. The games must continue. So must the struggle for survival.

The Other Side of the Security Coin Nicholas Farnham 2017-02-20 The presence of peace is more than the absence of conflict. Analyses and evaluations of the state of the international security environment often focus solely on the most concerning developments and tend to fall back on various conflict-centric metrics when providing assessments of a given security landscape. This chapter, entitled “The Other Side of the Security Coin” investigates a number of positive socioeconomic trends occurring on a global level and how they can contribute to sustainable peace in the future. Improving citizens’ access to socioeconomic opportunities and livelihood-enhancing goods and services is a key factor in increasing the stake that citizens hold in the state of peace in their communities.

Fitting within global trends such as the rise of the platform economy and social media, the role of technological and developmental processes improving individual empowerment will become more important for security and defense organizations in the near future. As to how we can leverage the dramatic changes ongoing throughout the world to better suit our security objectives remains yet to be seen. This study provides a brief overview of these trends and identifies the options for security and defense organizations to remain on top of them. This study is part of the 2016-2017 HCSS StratMon.

Suicide in Children and Adolescents Robert A King, M.D. 2003-08-28 In an epoch when rates of death and illness among the young have steadily decreased in the face of medical progress, the persistently high rates of youth suicide and suicide attempts around the world remain a tragic irony and a challenge to both our clinical practice and theoretical understanding. How can these deaths be prevented? Can they be anticipated? Are there perceptible patterns of risk and vulnerability? What role do families, gender, culture, and biology play? What are the treatments for and outcomes of suicide attempters? To address these questions, experts from around the world in all areas of psychiatry, from epidemiology, neurobiology, genetics and psychotherapy, have brought together their current findings in Suicide in Children and

Adolescents.

Mixed Messages Stefanie Mollborn 2017-02-14

Sex is bad. Unprotected sex is a problem. Having a baby would be a disaster. Abortion is a sin.

Teenagers in the United States hear conflicting messages about sex from everyone around them.

How do teens understand these messages? In

Mixed Messages, Stefanie Mollborn examines how social norms and social control work through in-depth interviews with college students and teen mothers and fathers, revealing the tough

conversations teenagers just can't have with adults. Delving into teenagers' complicated social

worlds Mollborn argues that by creating informal social sanctions like gossip and exclusion and

formal communication such as sex education, families, peers, schools, and communities

strategize to gain control over teens' behaviors. However, while teens strategize to keep control,

they resist the constraints of the norms, revealing the variety of outcomes that occur beyond

compliance or deviance. By showing that the norms existing today around teen sex are

ineffective, failing to regulate sexual behavior, and instead punishing teens that violate them,

Mollborn calls for a more thoughtful and consistent dialogue between teens and adults,

emphasizing messages that will lead to more positive health outcomes.

Chambers Robert William Chambers was an

American artist and fiction writer best known for his book entitled **The King in Yellow**, a collection

of short stories first published and copyrighted by F. Tennyson Neely in 1895. The book was

reprinted in 1902 by Harpers and Brothers and copyrighted by the author. This second edition

was illustrated, but omitted one of the original stories, "In the Court of the Dragon." With one

foot in the gothic horror genre and the other in early modern horror, **The King in Yellow** also

touches on fantasy, mystery, war, mythology, and science fiction. The book had a profound

influence on the work of Lovecraft and other similar writers of the early 20th Century. Unlike other authors of the past, Chambers was very successful in his lifetime, and *The King in Yellow* has seen brought back to the bestseller lists because of its tie with HBO's TV show *True Detective*. Much has been written about *The King in Yellow* and readers interested can find several online articles, including Wikipedia, with links to yet more sources. This new printing is unique as it includes all the stories of the original 1895 book and all the illustrations of the illustrated 1902 edition.
