Practical Memory I. C. Robledo 2018-03-06 Simple, Practical, “Common Sense” Tips to Remember More & Forget Less You are here because your memory is not as good as you would like. Why might this be? Well, the internet has all the facts we need at our fingertips. Then cameras store our pictures, and smartphones contain the phone numbers of everyone we know. With so much information being recorded for us, the brain has little that it actually needs to remember. This may be good for productivity, but is bad for our memories. The problem is when we apply our memories less and less, our ability to remember can also get worse and worse.... The solution here is simple. We must practice and exercise our memories. Thankfully, in Practical Memory you will discover simple systems and exercises anyone can use to improve their memory. This way, you can see progress immediately, without needing to spend precious time learning difficult techniques (as with many other memory books). Internationally bestselling author I. C. Robledo has examined “ordinary” people with powerful memories. Studying such people is useful because they tend to use simple, practical “common sense” systems that we could all benefit from. Now, those tips are all compiled here into one convenient resource. Inside, you will discover: - How to recall even the most difficult memories (e.g., on the tip of your tongue) - Why intending or planning to remember is a key step to building memories - How to stop forgetting your purse/wallet, phone, camera, etc. - Why too much routine can be bad for your ability to remember - How to remember where you parked the car - Special tips for how to remember new locations when traveling (and stop getting lost) Start building a more powerful memory today with Practical Memory. EASYUNI Ultimate University Guide 2014 EasyUni Sdn Bhd 2014-07-02 Hi there! It’s nice to present you once again with another ‘hot’ issue of easyuni. On 11 June this year, we launched the unifrens social platform, an extension to easyuni’s existing vision of providing comprehensive and accurate information to students about colleges and universities. This is another milestone in the history of easyuni as one of Asia’s most popular education portals, committed to helping students with their higher education plans. unifrens is a social platform which allows students, searching for universities and colleges with similar interests, to connect with each other to help them make unbiased and community-driven decisions about their higher education. It also allows them to connect with students who are currently enrolled at universities who can tell them about their experiences about a particular city, country, university or a course. unifrens is something we had been planning for a while to complement our current family of tools for students. We always knew that our users would love it as they want more community-driven information instead of promotional content from universities and “study abroad” consultants. I believe this feature will democratise the way information about specific courses, countries or institutions is presented and this can only mean good news for students and their parents visitors, as it helps them make more informed decisions about which course, institution or country to pick. Students can also pose questions to their groups, which will be answered by experts and the community. The feature is still in its beta stage but has gained massive traction with over 100,000 users already registered and assigned to groups. Exciting, isn’t it? The issue you’re holding now has so much to offer as well. So, read every page and fill yourself with all the knowledge needed to make informed decisions about your higher education.
