*The Age of the Cloister* Christopher Brooke 2003  
Among the most beautiful, spiritual and evocative structures in stone ever built are the medieval monasteries of Europe. The importance of the monastic world, its ideas and ideals, to the rise of Western civilization is second to none. The age of the cloister offers a fascinating overview of the birth and flowering of monasticism, and describes in great detail the everyday monastic life and the faith, literature, economy, architecture and culture of countless monks, hermits, nuns, canons, friars and lay men and

buildings, statues, and monuments. Classical design formed our nation's capital. The soaring Washington Monument, the columns of the Lincoln Memorial and the spectacular dome of the Capitol Building speak to the founders' expansive vision of our federal city. Learn about the L'Enfant and McMillan plans for Washington, D.C., and how those designs are reflected in two hundred years of monuments, museums and representative government. View the statues of our Founding Fathers with the eye of a sculptor and gain insight into the criticism and controversies of modern additions to Washington's monumental structure.

for Europe 2018-01-16 This publication provides a comprehensive analysis of markets in the UNECE region and reports on the main market influences outside the UNECE region. It covers the range of products from the forest to the end-user: from roundwood and primary processed products to value-added and housing. Statistics-based chapters analyse the markets for wood raw materials, sawn softwood, sawn hardwood, wood-based panels, paper, paperboard and woodpulp. Other chapters analyse policies, trade barriers affecting forest products, and markets for wood energy. The Review highlights the role of sustainable forest products in international markets. It also analyses the effects of the current economic situation on forest products markets.

connut entre Antiquité et Moyen Âge un

puissant mouvement de christianisation. Celui-ci

se traduisit par une implantation de plus en plus

forte des institutions ecclésiastiques à partir du

VII<sup>e</sup> siècle, ce que manifestait l'influence

grandissante des évêques dans leurs cités, la

fondation de grands monastères ruraux et enfin

la floraison d'églises rurales édifiées par

l'aristocratie laïque. Mais l'histoire de la

christianisation ne peut aussi négliger l'étude

des modèles de sainteté que se donnèrent les

premières générations de chrétiens. Comme

l'écrivit un moine de Saint-Vaast d'Arras, la

Gaule du Nord a été durablement irradiée

, non seulement par l'activité que

manifestèrent les saints de leur vivant, mais

aussi par le souvenir que conservèrent et
