## **Classics of Political and Moral Philosophy**

Steven M. Cahn 2012 Classics of Political and Moral Philosophy provides in one volume the major writings from nearly 2,500 years of political and moral philosophy, from Plato through the twentieth century. The most comprehensive collection of its kind, it moves from classical thought (Plato, Aristotle, Epicurus, Cicero) through medieval views (Augustine, Aquinas) to modern perspectives (Machiavelli, Hobbes, Spinoza, Locke, Rousseau, Hume, Adam Smith, Kant). It includes major

nineteenth-century thinkers (Bentham, Hegel, Mill) and considerably more twentieth-century theorists than are found in competing volumes (Rawls, Nozick, Taylor, Foucault, Habermas, Held, Nussbaum). Also included are numerous essays from The Federalist Papers and a variety of notable documents and addresses, among them Pericles' Funeral Oration, The Declaration of Independence, The Constitution of the United States, The Declaration of the Rights of Man and of the Citizen, and speeches by Edmund Burke, Abraham Lincoln, Elizabeth Cady

Stanton, John Dewey, and Martin Luther King, Jr. The readings are substantial or complete texts, not fragments. The second edition contains two new readings--by Charles Taylor and Virginia Held--and adds The Universal Declaration of Human Rights. It also presents two works by John Locke in their entirety and includes a new translation of Kant's Groundwork for the Metaphysics of Morals. An especially valuable feature of this volume is that the writings of each author are introduced with a substantive and engaging essay by a leading contemporary authority. These introductions include Richard Kraut on Plato, Aristotle, Epicurus, and Cicero; Paul J. Weithman on Augustine and Aquinas; Roger D. Masters on Machiavelli; Jean Hampton on Hobbes; Steven B. Smith on Spinoza and Hegel; A. John Simmons on Locke; Joshua Cohen on Rousseau and Rawls; Donald W. Livingston on Hume; Charles L. Griswold, Jr., on Smith; Bernard E. ### **A Moral Defense of**

### **Recreational Drug Use**

Rob Lovering 2015-08-12 Why does American law allow the recreational use of some drugs, such as alcohol, tobacco, and caffeine, but not others, such as marijuana, cocaine, and heroin? The answer lies not simply in the harm the use of these drugs might cause, but in the perceived morality—or lack thereof—of their recreational use. Despite strong rhetoric from moral critics of recreational drug

however, it is surprisingly difficult to discern the reasons they have for deeming the recreational use of (some) drugs morally wrong. In this book, Rob Lovering lays out and dissects various arguments for the immorality of using marijuana, cocaine, heroin, and other drugs recreationally. He contends that, by and large, these arguments do not succeed. Lovering's book represents one of the first works to systematically present, analyze, and critique arguments for the moral wrongness of recreational drug use. Given this, as well as the popularity of the morality-based defense of the United States' drug laws, this book is an important and timely contribution to the debate on the recreational use of drugs.

**Moral Skepticism** Walter Sinnott-Armstrong 2007-10-19 "All contentious moral issues - from gay marriage to abortion and affirmative action - raise difficult questions about the justification of moral beliefs. How can we be justified in holding on to our own moral beliefs while recognizing that other intelligent people feel quite differently and that many moral beliefs are distorted by self-interest and by corrupt cultures? Even when almost everyone agrees - e.g. that experimental surgery without consent is immoral - can we know that such beliefs are true? If so, how?" "These profound questions lead to fundamental issues about the nature of morality, language, metaphysics, justification, and knowledge. They also have tremendous practical importance in handling controversial moral questions in health care ethics."

law, and education. Walter Sinnott-Armstrong here provides an extensive overview of these difficult subjects, looking at a wide variety of questions, including: Are any moral beliefs true? Are any justified? What is justified belief? The second half of the book explores various moral theories that have grappled with these issues, such as naturalism, normativism, intuitionism, and coherentism, all of which are attempts to answer moral skepticism. Sinnott-Armstrong argues that all these approaches fail to rule out moral nihilism - the view that nothing is really morally wrong or right, bad or good. Then he develops his own novel theory, - "moderate Pyrrhonian moral skepticism"--Which concludes that some moral beliefs can be justified out of a modest contrast class but no moral beliefs can be justified out of an extreme contrast class. While explaining this original position and criticizing alternatives, Sinnott-Armstrong provides a wide-ranging survey of the epistemology of moral

landscape for generations. His powerful and enduring argument for a new approach to faculty roles and rewards continues to play a significant part of the national conversation on scholarship in the academy. Though steeped in tradition, the role of faculty in the academic world has shifted significantly in recent decades. The rise of the non-tenure-track class of professors is well documented. If the historic rule of promotion and tenure is waning, what role can scholarship play in a fragmented, unbundled academy? Boyer offers a still much-needed approach. He calls for a broadened view of scholarship, audaciously refocusing its gaze from the tenure file and to a wider community. This expanded edition offers, in addition to the original text, a critical introduction that explores the impact of Boyer's views, a call to action for applying Boyer's message to the changing nature of faculty work, and a discussion guide to help readers start a new

**Morality and War** David Fisher 2011-03-03 With the ending of the strategic certainties of the Cold War, the need for moral clarity over when, where and how to start, conduct and conclude war has never been greater. There has been a recent revival of interest in the just war tradition. But can a medieval theory help us answer twenty-first century security concerns? David Fisher explores how just war thinking can and should be developed to provide such guidance. His in-depth study examines philosophical challenges to just war thinking, including those posed by moral scepticism and relativism. It explores the nature and grounds of moral reasoning; the relation between public and private morality; and how just war teaching needs to be refashioned to provide practical guidance not just to politicians and generals but to ordinary service people. The complexity and difficulty of

moral decision-making requires a new ethical approach - here characterised as virtuous consequentialism - that recognises the importance of both the internal quality and external effects of agency; and of the moral principles and virtues needed to enact them. Having reinforced the key tenets of just war thinking, Fisher uses these to address contemporary security issues, including the changing nature of war, military pre-emption and torture, the morality of the Iraq war, and humanitarian intervention. He concludes that the just war tradition provides not only a robust but an indispensable guide to resolve the security challenges of the twenty-first century.
