Global University Rankings and the Politics of Knowledge Michelle Stack 2021-06-01 For many institutions, to ignore your university's ranking is to become invisible, a risky proposition in a competitive search for funding. But rankings tell us little if anything about the education, scholarship, or engagement with communities offered by a university. Drawing on a range of research and inquiry-based methods, *Global University Rankings and the Politics of Knowledge* exposes how universities became servants to the education industry and its impact. Conceptually unique in its scope, *Global University Rankings and the Politics of Knowledge* addresses the lack of empirical research behind university and journal ranking systems. Chapters from internationally recognized scholars in decolonial studies provide readers with robust frameworks to understand the intersections of coloniality and Indigeneity and how they play out in higher education. Contributions from diverse geographical and disciplinary contexts explore the political economy of rankings within the contexts of the Global North and South, and examine alternatives to media-driven rankings. This book allows readers to consider the intersections of power and knowledge within the wider contexts of politics, culture, and the economy, to explore how assumptions about gender, social class, sexuality, and race underpin the meanings attached to rankings, and to imagine a future that confronts and challenges cognitive, environmental, and social injustice.

Handbook of Infant Mental Health, Fourth Edition Charles H. Zeanah 2018-10-09 This completely revised and updated edition reflects tremendous advances in theory, research and practice that have taken place over the past decade. Grounded in a relational view of infancy, the volume offers a broad interdisciplinary analysis of the developmental, clinical and social aspects of mental health from birth to age three. **Marriages and Families in the 21st Century** Tasha R. Howe 2017-07-05 Marriages and Families in the 21st Century puts contemporary relationships and family structures in context for today's students. Using a bioecological framework, the book reveals how families are shaped by multiple influences, from biological to cultural, that interact with one another. Chapters cover topics from parenting to gender

issues within an interdisciplinary context, weaving in stories, visuals, and examples of diverse families to dispel longstanding myths. The book creates a personalized learning experience with frequent self-assessments and strengths exercises, while ensuring that students come to understand the research and build scientific analysis and critical thinking skills along the way. Robust digital tools and resources including SAGE edge and an interactive eBook with SAGE Premium Video help readers develop a multi-layered understanding of today's modern families while challenging them to re-evaluate their own assumptions and experiences. SAGE Premium Video included in the Interactive eBook! Families Today videos boost comprehension and bolster analysis—easily accessible via the interactive eBook. SAGE coursepacks: Our Content Tailored to Your LMS! SAGE coursepacks makes it easy to import our quality instructor and student resource content into your school's learning management system (LMS). Intuitive and simple to use, SAGE coursepacks allows you to customize course content to meet your students' needs.

Handbook of Evidence-Based Practices for Emotional and Behavioral Disorders Hill M. Walker 2015-12-15 This authoritative volume provides state-of-the-art practices for supporting the approximately 20% of today's K-12 students who have emotional and behavioral disorders (EBD) that hinder school success. Leading experts present evidence-based approaches to screening, progress monitoring, intervention, and instruction within a multi-tiered framework. Coverage encompasses everything from early intervention and prevention to applications for high-risk adolescents. Exemplary programs are described for broad populations of EBD students as well as those with particular disorders, including autism spectrum disorders and externalizing behavior problems. The book combines theory and research with practical information on how to select interventions and implement them with integrity.

Statistical Methods in Psychiatry and Related Fields Ralitzia Gueorguieva 2017-11-20 Data collected in psychiatry and related fields are

complex because outcomes are rarely directly observed, there are multiple correlated repeated measures within individuals, there is natural heterogeneity in treatment responses and in other characteristics in the populations. Simple statistical methods do not work well with such data. More advanced statistical methods capture the data complexity better, but are difficult to apply appropriately and correctly by investigators who do not have advanced training in statistics. This book presents, at a non-technical level, several approaches for the analysis of correlated data: mixed models for continuous and categorical outcomes, nonparametric methods for repeated measures and growth mixture models for heterogeneous trajectories over time. Separate chapters are devoted to techniques for multiple comparison correction, analysis in the presence of missing data, adjustment for covariates, assessment of mediator and moderator effects, study design and sample size considerations. The focus is on the assumptions of each method, applicability and interpretation rather than on technical details. Features Provides an overview of intermediate to advanced statistical methods applied to psychiatry. Takes a non-technical approach with mathematical details kept to a minimum. Includes lots of detailed examples from published studies in psychiatry and related fields. Software programs, data sets and output are available on a supplementary website. The intended audience are applied researchers with minimal knowledge of statistics, although the book could also benefit collaborating statisticians. The book, together with the online materials, is a valuable resource aimed at promoting the use of appropriate statistical methods for the analysis of repeated measures data. Ralitza Gueorguieva is a Senior Research Scientist at the Department of Biostatistics, Yale School of Public Health. She has more than 20 years experience in statistical methodology development and collaborations with psychiatrists and other researchers, and is the author of over 130 peer-reviewed publications.

Mental Health Informatics Ardis Hanson 2013-01-17 Mental Health Informatics offers a comprehensive examination of contemporary issues in mental health that focuses on the innovative use of computers and other information technology in support of patient care, education, services delivery, and research in the field of mental health services. This text deals with resources, devices, and formalized methods for optimizing the storage, retrieval, and management of information for problem solving and decision-making in mental health. Mental health informatics is an interdisciplinary field based upon computer and information sciences, the cognitive and decision sciences, public health and mental health (including epidemiology), and telecommunications. Researchers in informatics have discovered new methods and techniques to enhance health and mental health care, scientific and applied research, and education through information technology. The fourteen chapters are divided into four main parts, including: 1) an introduction to informatics, public health, and mental health; 2) an overview of the ethical, legal, services delivery, and organizational issues in data/records standards and technology adoption; 3) discusses research in today's online environment, addressing issues including research competencies, standards for literature reviews, constructing research strategies, and synthesizing findings; and 4) provides a discussion of the globalization of information and future issues in policy and practice in mental health informatics.

Community series in mental illness, culture, and society: Dealing with the COVID-19 pandemic, volume VI Samer El Hayek 2023-07-12 *Science under siege* Peter Banks 2012-11-01 On Saturday 29 November 2008, the Royal Zoological Society of NSW held a forum with the theme of Science under siege. As the RZS is a zoological society, zoology under threat became the secondary theme and the basis for selecting speakers. This book records that forum with the papers developed for this book as the written word from the spoken presentations. Papers that were presented as posters are included, as are the edited plenary sessions which featured questions from the floor, with answers and comments encouraged from anyone in the forum. We were delighted that Mark Horstman, from ABC Catalyst, was willing to replace his peripatetic colleague Paul Willis, who was nonetheless very happy to write the foreword. There is a place for such skilled science communicators, we need more of them, and scientists at the lab bench, or in the field, or exploring computer models, or those that have now taken a job in the policy world, need to stay in touch with them. Some might say that the title "Science under siege" seems a bit extreme, but we invite you to examine the evidence as presented in this book. What follows is an edited version of the introductory material that advertised the forum: The title looks dramatic, but if you ask yourself, "is anything killing the science in your area of interest?" you might be surprised that you come up with a point or two. Then ask a wider set of questions, such as: are there any pressures that preclude people from doing good zoology; do either political/budgetary constraints impact on your field; is science in the media a subject that influences the outcome of your work; are there economic impediments to careers in zoology; is the education mix in Australia right for this new century; are the best researchers becoming full-time administrators, or the converse, the poor researchers becoming the administrators; can you place the Australian situation in an international context; are there reduced opportunities for human interactions with the natural world; is the virtual world killing reality; and what are your predictions of the future? To deal with such issues, the Royal Zoological Society of NSW has structured the day to emphasize a range of themes, beginning with identifying the issues, including those that are persistent and those that are emerging, and encompassing palpable hits to science. Direct and indirect hits to science include such matters as the withdrawal of funding, subversion of science, death by 1000 cuts, redirection of funding to fashion issues and using the name of science to justify things that are really not justifiable. The name of science is being dragged down. We need to confront the ever-present problem of ignoring the scientifically accurate for the politically correct. This raises such questions as to whether basic skills in biology are not being acquired because of public concern based on extreme animal rights propaganda. Good science is not optional, but what can be done if you are under siege? The answers include understanding the philosophy of science, the legal perspective and asking what scientists are (or should be) doing. Audience participation will be a central part of this forum. The plenary sessions will address questions raised by the speakers, and the posters, and debate issues and consider options for future directions. It is widely known that it is hard to pull a major paper together on this theme, but so many scientists know of at least one matter that they would like to draw to public attention. So, short contributions are included. Listen to the speakers present some overarching themes or compelling case studies, contribute to the debate on the day, then examine your stance on a variety of these subjects to see whether the day changes your view of this often cryptic aspect of zoology. As editors, we wish to acknowledge the skills of the referees (all papers were refereed by two peers), and the patience of the authors for what has been a long gap between the date of the forum and this publication. By the end of 2008, the Royal Zoological Society of NSW, along with everyone else, was caught by the GFC (Global Financial Crisis) and we simply had to extend the length of the queue for publication. We also reassessed our mode of publication. The Council of the Society voted to publish this production as an ebook, as well as a short print run for formal library deposit, and other essential matters. The ebook is open access to enhance the reach of the papers and the ideas. At the same time, the Royal Zoological Society of NSW signed a contract for a more international mode of access of the publications of the Society, and papers are now available via Metapress. <http://rzsnsw.metapress.com> Science remains under siege, in our view, and now we have been alerted to the range of issues it becomes easier to spot the small, irritating closing of options that collectively amount to a denial of science and its relegation to an optional way of looking at the world. During production of this book, this matter became obvious on a number of fronts, which led us to invite the paper by Rosie Cooney and colleagues to defend their science of kangaroo conservation and commercial harvesting from an attack on the science. We also saw that this issue of science under siege needs more airing, and the Royal Zoological Society of NSW is planning its forum for the end of 2012 to take up another strand of this theme by capitalizing on the lifelong insights of scientists under the rubric of "grumpy scientists: an ecological conscience of a nation". This idea in fact derives directly from the suggestions in the plenary sessions by Nick Holmes and Charley Krebs. We are also concerned for young scientists, with science under siege manifesting often in a failure to create permanent careers for science graduates that advance science itself, and zoology in particular, from flourishing and identifying problems and finding solutions. If we want to conserve the native fauna of Australia, then Australian zoologists will have to be key team members. We contend that to put science under siege, and zoology under threat, we not only further imperil our native wildlife, but also the careers of the small band of specialists that can see the issues, find the problems, implement solutions and

evaluate the outcomes. In short, science under siege is not a light matter and no one in this forum thought so. Read on, form an opinion, and speak up and publish your thoughts, your examples and your solutions.

Human Sexuality and its Problems J. H. J. Bancroft 2008-12-29 Prepared by one of the world's leading authorities, Human Sexuality and its Problems remains the foremost comprehensive reference in the field. Foremost experts review the "whats," "whys," and "how-tos" of progressive relaxation, biofeedback, meditation, hypnosis, cognitive methods, and other therapies. Chapters describe each method's theoretical foundations, evidence base, procedures, applications, and contraindications. Assessment and implementation are illustrated with extensive case examples. The volume examines the effects of stress on both mind and body, from basic science to practical implications for everyday life and health care. Subject areas/key words: managing, reduction, relaxation, mindfulness, meditation, pain, biofeedback, interventions, anxiety disorders, techniques, psychotherapy, hypnosis, cognitive therapy, breathing retraining, treatments, textbooks, clinical health psychology, behavioral medicine, psychosomatic Audience: Clinical and health psychologists, psychiatrists, clinical social workers, counselors, and nurses; advanced students in these fields"--

Heart, Brain and Mental Health Disparities for LGBTQ People of Color James J. Garcia 2021-05-01 This timely edited collection presents a holistic and biopsychosocial analysis of LGBTQ People of Color well-being, focused on heart, brain, and mental health, and employs a unique incorporation of minority stress, intersectionality, and allostatic load frameworks. Bringing together established and emerging academics, its authors present a critical analysis of the latest research that encompasses the study of both risk and resilience factors in LGBTQ People of Color health. Across the book, they highlight the precise nature of the behavioral health disparities experienced by these communities, but further, they reveal the unique roles of intersectional discrimination and structural stigma as mechanisms for these disparities. With chapters also dedicated to federal policies and public health, this multidisciplinary work marks a seminal contribution that will pave the way for further advances in research, theory, and practice. It offers a valuable resource on an understudied population that will appeal to researchers, practitioners and policy makers in the fields of health psychology, public health, epidemiology, sociology, health sciences and medicine.

Psychopathy and Criminal Behavior Paulo Marques 2021-11-01 Psychopathy and Criminal Behavior: Current Trends and Challenges fills a gap in the market by covering new topics and angles not addressed in other literature. Landscapes and Narratives of PhD by Publication Sin Wang Chong 2022-09-27 This book includes theoretical, conceptual, empirical, and reflective discussions on issues and experiences pertaining to PhD by Publication for both the prospective and retrospective route. It features formal work alongside reflections on stakeholders' experiences and addresses formal primary research and research syntheses which survey the landscapes of PhD by Publication regarding its policies, thesis and student experience. The book provides personal, context-specific and in-depth insider's perspectives towards PhD by Publication and offers a holistic understanding of micro- and macro-level issues by offering research and personal insights. 'Despite being in existence for over 20 years, the route to PhD is still often poorly understood by individuals and institutions. This lively, personal, informative, and affirming text will change that. Recognising the value and expansion of the route to a PhD by publication, and the current lack of published advice, Chong and Johnson have drawn together accounts by supervisors, student and graduates of their experiences of PhDs by publication, and what they learnt that will make the journey easier for others. Containing advice about how to apply, how to select publications, and how to prepare for the viva, it will be a valuable handbook for students and supervisors alike. Full of insights that will resonate with many research students and supervisors, and not only those involved in the 'by publication' route, it will help with tackling perennial barriers such as finding time to write, managing 'imposter syndrome;', and addressing the loneliness that many PhD student experience. An immensely useful, direct, profound and inspiring collection.' Professor Shân Wareing, Deputy Vice Chancellor, University of Northampton

Occupational Therapy with Elders - E-Book Rene Padilla 1920-03-15 The only comprehensive book on geriatric occupational therapy designed specifically for the COTA, Occupational Therapy with Elders: Strategies for the COTA, 3rd Edition provides in-depth coverage of each aspect of geriatric practice, from wellness and prevention to death and dying. A discussion of foundational concepts includes aging trends and strategies for elder care, and coverage of emerging areas includes low-vision rehabilitation, mobility issues including driving, and Alzheimer's disease and other forms of dementia. Expert authors René Padilla, Sue Byers-Connon, and Helene Lohman offer an unmatched discussion of diverse populations and the latest on geriatric policies and procedures in this fast-growing area of practice. Unique! A focus on the occupational therapy assistant highlights the importance of COTAs to the care of elder clients. Case studies illustrate principles and help you apply what you've learned to actual situations. Key terms, chapter objectives, and review questions highlight important content in each chapter. Use of the term "elder" reduces the stereotypical role of dependent patients and helps to dispel myths about aging. A multidisciplinary approach demonstrates how the OT and the COTA can collaborate effectively. Unique! Attention to diverse populations and cultures prepares you to respect and care for clients of different backgrounds. Unique! The companion Evolve website makes review easier with more learning activities, references linked to MEDLINE abstracts, and links to related OT sites. Unique! A discussion of elder abuse, battered women, and literacy includes information on how the COTA can address these often-overlooked issues. New information on alternative treatment settings for elders reflects new trends in OT care. Updated information on Medicare, Medicaid, and HIPAA regulations discusses the latest policies and how to incorporate the newest procedures into practice. Significant additions are made to the chapters on public policy, dementia, and oncology.

Women on Boards in China and India Alice de Jonge 2022-05-09 This book provides an in-depth comparative exploration of gender diversity in corporate leadership roles in China and India. Set in the context of changing corporate governance norms, it utilises both quantitative and qualitative research methods to understand the key determinants of gender disparity. It identifies global-, national-, and enterprise-level factors shaping gender diversity in the corporate boardroom and measures their economic, political, and socio-cultural impacts on two of the world's largest economies. The book draws upon narratives of women leaders to bridge the gap between theory and data, examining possible solutions to achieve gender parity in organisational hierarchies. Topical and detailed, this book will be an essential read for scholars, practitioners, and researchers of gender studies, corporate governance, business studies, human resource management, public policy, social anthropology, and Asian studies.

Disaster Mental Health Counseling Mark A. Stebnicki, PhD, LPC, DCMHS, CRC, CCM, CCMC 2016-12-07 Focuses on understanding cultural and psychosocial contexts to promote optimal healing for disaster survivors This is the first book for mental health professionals working with survivors of mass trauma to focus on the psychosocial and culture contexts in which these disasters occur. It underscores the importance of understanding these environments in order to provide maximally effective mental health interventions for trauma survivors and their communities. Global in scope, the text addresses the foundations of understanding and responding to the mental health needs of individuals and groups healing from traumas created by a wide range of natural and human-made critical events, including acts of terrorism, armed conflict, genocide, and mass violence by individual perpetrators. Designed for professional training in disaster mental health, and meeting CACREP standards, the text promotes the knowledge and skills needed to work with the psychosocial aspects of individual and group adaptation and adjustment to mass traumatic experience. Reflecting state-of-the-art knowledge, the book offers detailed guidelines in assessment and brief interventions related to survivors' posttraumatic stress symptoms and complex trauma associated with being at the epicenter of extraordinary stressful and traumatic events. In addition, this book also covers critical issues of self-care for the professional. Illustrated with first-person accounts of disaster survivors and case scenarios, this book emphasizes how counselors and other mental health professionals can foster resilience and wellness in individuals and communities affected by all types of disasters. Key Features: Considers disaster and mass trauma response from a culturally and globally relevant perspective—the first book of its kind Addresses CACREP's clinical standards and content areas related to disaster mental health response Covers many types of disasters and categories of survivors Includes updated information on PTSD, complex trauma, and self-care Addresses cultivating resiliency in individual and group survivors along with social justice issues

Masculinities in Contemporary American Culture Thomas Keith 2017-01-12 Masculinities in Contemporary American Culture offers readers a multidisciplinary, intersectional overview of masculinity studies that includes both theoretical and applied lenses. Keith combines current research with historical perspectives to demonstrate the contexts in which masculine identities have come evolved. With an emphasis on popular culture -- particularly film, TV, video games, and music -- this text invites students to examine their gendered sensibilities and discuss the ways in which different forms of media appeal to toxic masculinity.

Demystifying Scholarly Metrics Marc W. Vinyard 2022-02-25 Demystifying Scholarly Metrics gives librarians and faculty the confidence to navigate the maze of scholarly metrics, identify quality journals in which to publish, and measure the impact of scholarly works. Both librarians and professors can be overwhelmed by the bewildering number of scholarly metrics. This user-friendly book demystifies them, helping librarians become familiar with scholarly metrics and giving them the confidence to assist faculty at their institutions. It also equips faculty authors with the knowledge to evaluate journals and use metrics to track their scholarly impact. Several controversies exist in the scholarly metrics landscape, including a disagreement between the proponents of altmetrics and traditional bibliometrics. Even more contentious debates are breaking out over predatory journals and open access publishing. Authors Mark Vinyard and Jaimie Beth Colvin, who successfully launched a faculty publishing initiative, explain which aspects of metrics are truly essential to grasp, and they place these numbers in context. They help readers identify the metrics that are the best fit for their scholarship and give librarians and professors the tools to make smart decisions in this changing scholarly metrics landscape.

Psychiatry and Its Discontents Andrew Scull 2021-06-08 Written by one of the world's most distinguished historians of psychiatry,

Psychiatry and Its Discontents provides a wide-ranging and critical perspective on the profession that dominates the treatment of mental illness. Andrew Scull traces the rise of the field, the midcentury hegemony of psychoanalytic methods, and the paradigm's decline with the ascendance of biological and pharmaceutical approaches to mental illness. The book's historical sweep is broad, ranging from the age of the asylum to the rise of psychopharmacology and the dubious triumphs of "community care." The essays in Psychiatry and Its Discontents provide a vivid and compelling portrait of the recurring crises of legitimacy experienced by "mad-doctors," as psychiatrists were once called, and illustrates the impact of psychiatry's ideas and interventions on the lives of those afflicted with mental illness.

Parenting Life Now Kelly Jean Welch 2023-04-03 With its conversational tone and blend of theory and application, Parenting Life Now offers an informative and practical introduction to the study of parenting, rearing, and educating children. Authors Kelly J. Welch and Victor William Harris illustrate the ways in which parents, and professionals who work with parents—from teachers and healthcare providers, to therapists, sociologists and childcare providers—can implement best practices to provide effective, quality education and care.

The Seductions of Quantification Sally Engle Merry 2016-06-10 We live in a world where seemingly everything can be measured. We rely on indicators to translate social phenomena into simple, quantified terms, which in turn can be used to guide individuals, organizations, and governments in establishing policy. Yet counting things requires finding a way to make them comparable. And in the process of translating the confusion of social life into neat categories, we inevitably strip it of context and meaning—and risk hiding or distorting as much as we reveal. With The Seductions of Quantification, leading legal anthropologist Sally Engle Merry investigates the techniques by which information is gathered and analyzed in the production of global indicators on human rights, gender violence, and sex trafficking. Although such numbers convey an aura of objective truth and scientific validity, Merry argues persuasively that measurement systems constitute a form of power by incorporating theories about social change in their design but rarely explicitly acknowledging them. For instance, the US State Department's Trafficking in Persons Report, which ranks countries in terms of their compliance with antitrafficking activities, assumes that prosecuting traffickers as criminals is an effective corrective strategy—overlooking cultures where women and children are frequently sold by their own families. As Merry shows, indicators are indeed seductive in their promise of providing concrete knowledge about how the world works, but they are implemented most successfully when paired with context-rich qualitative accounts grounded in local knowledge.

Real World Psychology Catherine A. Sanderson 2019-12-24 Real World Psychology balances comprehensive coverage of the key concepts in introductory psychology with a concise presentation style and engages students with current and interesting research that explores these concepts in real-life contexts. Real World Psychology features the incomparable author team of Karen Huffman (Palomar College) and Catherine Sanderson (Amherst College) who create an outstanding text that is appealing to students and instructors at a wide range of academic institutions. The new edition has been thoroughly updated and features a new focus on Scientific Thinking and Practical Applications underscoring the fact that connecting the principles of psychological science to everyday life is critical to student engagement, and ultimately key to their success – not only in the introductory psychology course, but in whatever their chosen field of study and in everyday life. Students will leave the course with an appreciation of how a basic, yet scientific understanding of human behavior can benefit them in their studies, in their personal lives, and in their professional endeavors.

Psychopharmacology Algorithms David Osser 2020-09-22 Algorithms serve an important purpose in the field of psychopharmacology as heuristics for avoiding the biases and cognitive lapses that are common when prescribing for many conditions whose treatment is based on complex data. Unique in the field, this title compiles twelve papers from the Psychopharmacology Algorithm Project at the Harvard South Shore Psychiatry Residency Training Program and presents practical ways to adopt evidence-based practices into the day-to-day treatment of patients. Psychopharmacology Algorithms is a useful resource for practicing psychiatrists, residents, and fellows, as well as psychiatric nurse practitioners, psychiatric physician assistants who prescribe, advanced practice pharmacists who prescribe, and primary care clinicians. Teachers of psychopharmacology may find it particularly valuable. Researchers in clinical psychopharmacology may find it helpful in identifying important practice areas that are in need of further study.

Empowering Asian Youth through Volunteering Elaine Suk Ching Liu 2019-09-09 This book describes the origin, development and current state of volunteerism in Asia and Hong Kong. It also presents a field-tested model of empowering through volunteerism (namely, the CYEP at City University), that involves youth, governmental and non-governmental agencies and their clients in a rapidly changing society. Volunteerism is then described as a "win-win" situation for all stakeholders/actors. Volunteerism converges the needs, the struggles, the personal motives and the aspirations of the volunteers, together with the dreams and the difficulties of the clients, the expertise of the professionals and the (lack of) resources of the agencies, the new values emerging in society, the effects of globalization and the new policies. This book presents actual Asian case examples with the voices of the people involved on the CYEP (volunteers, officers, service recipients) who explain how volunteering changed their lives, their values, their attitudes toward social, civic and political participation, their ethics and sense of individual responsibility. These stories from the frontlines can be adopted and/or adopted for use by other institutions, but it is also the chance for understanding the emergence of volunteering in Asia overall, and its future direction.

Impact of Global University Ranking Systems on Developing Countries Onyancha, Omwoyo Bosire 2023-06-01 The emotive discourses on the subject of university rankings are directly linked to the effect of such rankings on the performance of universities throughout the

world. It has been observed that the top-ranked universities attract major financial commitments from the industry, the best students, quality researchers, and a wide range of other quality endowments such as equipment, libraries, and laboratories. It is not surprising that the ranking of universities has gained popularity and become a significant factor shaping not only the reputation of universities but also the performance of said institutions around the world, including the developing countries. Impact of Global University Ranking Systems on Developing Countries presents a collection of perspectives from scholars and other stakeholders on the impact of the global ranking systems on developing countries. The book is an additional resource for discussion and discourse as far as the global university ranking systems are concerned and opens new frontiers for further research. Covering key topics such as assessment, ethics, and academic freedom, this premier reference source is ideal for administrators, policymakers, researchers, scholars, academicians, practitioners, instructors, and students.

Disasters George Christodoulou 2016-05-11 The issue of the mental health consequences of disasters is always timely, but, at present, its consideration serves a pressing need if one takes into account the great number of co-existing and super-imposed disasters occurring throughout the world. Taking Greece as an example, on top of the economic disaster that has produced serious mental health problems, the country is faced with a serious refugee problem produced by human-made disasters that have occurred elsewhere and produce serious mental health problems to the refugees and the host population alike. This volume deals with the mental health consequences of Natural Disasters, Human-made Disasters, and a third category, Economic Disasters. This volume will help contribute to more efficient management and mitigation of the mental health effects of such disasters.
