Configuring SAP General Ledger Accounting Narayanan Veeriah 2020-08-27 This book on 'Configuring SAP General Ledger Accounting' in SAP S/4HANA Finance, covers configuring your SAP system for making use of the important functional areas of SAP General Ledger (G/L) Accounting. As with my other books on SAP, this book also follows a case-study approach to make your learning easy. Efforts have been taken, throughout the book, to guide you step-by-step in understanding how to configure your SAP system, to meet your exact business needs. Each configuration activity has been discussed with appropriate screen shots (from an SAP system) and illustrations to help you 'see' what is being discussed in that activity / step. You will see a lot of additional information, provided across the Chapters and the Sections, to help you comprehend a topic or a configuration setting or a concept better. The entire content of the book, vide various Chapters, has been presented as in SAP IMG (Implementation Guide), for easy reference. You will come across with appropriate menu paths and Transactions, to help you to navigate the various activities. The coverage includes: Case Study SAP General Ledger Accounting: Overview Features & Functionalities Pre-requisites for Configuring SAP G/L Accounting Master Data Business Transactions Periodic Processing Preparation for Productive Start Information System The book starts with a case study, setting up the tone for further discussions, outlining the various business processes that you will be configuring towards implementing SAP G/L Accounting for your business. You will come across with the case study brief per configuration activity / step, in each Chapter. We discuss the overview of SAP G/L Accounting, before

moving on to discuss its important features and functionalities. You will learn about extensibility, ledger concept, document splitting, parallel accounting, segment reporting, fast close and integration of SAP FI with SAP Controlling. We, then, move on to discuss the pre-requisites for configuring SAP G/L Accounting. Here, you will learn about the important FI general settings and also on how to configure the fields, ledgers and currencies. You will learn more about parallel accounting and the FI integration with CO. While on G/L master data, we discuss the G/L account master data, the profit center master data and segment master data. We bring out, in detail, the preparations that you need to make for creating these master data, besides elaborating their creation and processing. You will, then, be taken to learn about the functionality as well as the configuration of G/L business transactions, including document splitting, open item clearing, bank account interest calculation, and adjustment posting / reversal. In periodic processing for G/L, you will learn about the various closing operations like check/count, valuate, reclassify, allocation and carry forward. We, then, discuss the preparations that you need to make for productive start of SAP G/L Accounting system. You will learn about the preparations, in detail, for new implementation, as well as for migration from an existing non-HANA SAP system. Finally, towards the end, we discuss the G/L information system. You will learn about the various G/L reports that are available for your business, including the drilldown reports and reports created with Report Painter / Report Writer. In all, you can use this book as a desktop-reference or a refresher for configuring SAP G/L Accounting. As the Chapters have been progressively elaborated, you will

Auditing and GRC Automation in SAP Maxim Chuprunov 2013-04-09 Over the last few years, financial statement scandals, cases of fraud and corruption, data protection violations, and other legal violations have led to numerous liability cases, damages claims, and losses of reputation. As a reaction to these developments, several regulations have been issued: Corporate Governance, the Sarbanes-Oxley Act, IFRS, Basel II and III, Solvency II and BilMoG, to name just a few. In this book, compliance is understood as the process, mapped not only in an internal control system, that is intended to guarantee conformity with legal requirements but also with internal policies and enterprise objectives (in particular, efficiency and profitability). The current literature primarily confines itself to mapping controls in SAP ERP and auditing SAP systems. Maxim Chuprunov not only addresses this subject but extends the aim of internal controls from legal compliance to include efficiency and profitability and then well beyond,

because a basic understanding of the processes involved in IT-supported compliance management processes are not delivered along with the software. Starting with the requirements for compliance (Part I), he not only answers compliance-relevant questions in the form of an audit guide for an SAP ERP system and in the form of risks and control descriptions (Part II), but also shows how to automate the compliance management process based on SAP GRC (Part III). He thus addresses the current need for solutions for implementing an integrated GRC system in an organization, especially focusing on the continuous control monitoring topics. Maxim Chuprunov mainly targets compliance experts, auditors, SAP project managers and consultants responsible for GRC products as readers for his book. They will find indispensable information for their daily work from the first to the last page. In addition, MBA, management information system students as well as senior managers like CIOs and CFOs will find a wealth of valuable information on compliance in the SAP ERP environment, on GRC in general and its implementation in particular.

Transportation Management with SAP TM 9 Jayant Daithankar 2014-08-07 The implementation of a TMS solution is a highly complex and mission critical project. If executed correctly a good TMS can deliver a number of benefits to the organization in terms of optimization, greater efficiency, reduced errors and improved revenue through accurate invoicing. However a number of projects fail to realize these benefits for a host of reasons such as an incorrect product selection, over customization of the system and lack of detailed processes. The evaluation and selection of the right transportation management system is a very critical step in the successful implementation of a TMS product as

well as ensuring that the organization is able to realize the benefits expected from the system. Transportation Management with SAP TM 9 is a guide for CIO/CXOs evaluating options for various transportation management solutions available in the market and helps inappropriate decision making before committing investment. A proven evaluation framework and guidance provided in the book can help decision makers with product selection and help to create a business case for management approval and design a future roadmap for the organization. The book provides a comprehensive understanding of what SAP transportation management is and is useful for teams involved in TM Implementation and roll outs to ensure preparedness. The book explains end-to-end freight life cycle processes, functional system landscape, implementation challenges and post go-live precautions required to optimize investments in SAP TM. Transportation Management with SAP TM 9 also acts as a step by step implementation guide with details of configuration required to set up a TM9 system. This book also covers the upgrade of SAP TM8 to SAP TM9 which will be useful for existing clients who are on TM 8. Nonavailability of SAP TM skilled resources is a major challenge faced by organizations and the book provides a detailed competency building plan along with skill set requirements to create a competent and trained workforce to manage-transformation. The current book available in the market on SAP TM is based on Version 6 release which does not cover air freight processes. Our book covers end-to-end air freight configuration scenarios for logistic companies.

Configuring SAP Asset Accounting Narayanan Veeriah

2020-06-14 Configuring SAP Asset Accounting, based on the latest version of SAP S/4HANA Finance, is a complete guide to comprehend and configure SAP Asset Accounting (FI-AA). The book comes from the author who has written several books on SAP, including 'Configuring Financial

Accounting in SAP ERP' (3rd Edition), by SAP Press (2018). This book follows a case-study approach to make your learning easy. Efforts have been taken, throughout the book, to guide you step-by-step in understanding how to configure your SAP system, to meet your exact business needs. Each configuration activity has been discussed with appropriate screen shots and illustrations to help you 'see' what is being discussed in that activity / step. You will see a lot of context-based additional information across Chapters, for better assimilation of concepts / settings. The entire content of the book has been presented as in SAP Implementation Guide with appropriate menu paths and Transactions.

Coverage: SAP HANA SAP S/4HANA SAP S/4HANA Finance Case Study Asset Accounting: Overview Organizational Structures Structuring Fixed Assets in FI-AA Integration General Valuation Depreciation Special Valuations Master Data Transactions Information System Asset Data Transfer Preparations for Going Live Overview for Experts

In this book: You will learn about SAP HANA, SAP S/4HANA and SAP S/4HANA Finance. You will learn how to use SAP FI-AA to manage your business entity's fixed assets internationally. You will learn how to portray your organizational structure. You will understand what a 'chart of depreciation' is and how the 'depreciation areas' enable managing the rules for asset depreciation / valuation. You will learn how to structure assets. You will learn FI-AA's integration with SAP's other application components, including G/L Accounting. You will learn how to manage general / special valuation, to meet differing business needs. You will learn how SAP supports both automatic (ordinary & special depreciation) and manual depreciation (unplanned depreciation & transfer of reserves). You will

understand how SAP carries out depreciation calculation using 'Depreciation Calculation Program'. You will learn how information is arranged in an asset master record, in general master data area and in the data area for calculating asset values. You will learn about various 'transaction types', for carrying out asset transactions including acquisitions, retirements, transfers etc. You will learn about SAP Queries, asset history sheet etc., as a part of FI-AA Information System. You will learn how to undertake legacy asset data transfer into SAP FI-AA. As a part of going live, you will learn about production startup activities. You will learn how to use the 'overview for experts' functionality to check / verify configuration. In all, you will find this book easy to use as a desktop-reference for configuring SAP FI-AA.
