U.S. Army Signals Intelligence In World War II James L. Gilbert 2004-06-01 This book is part of the Army historical community's commemoration of the fiftieth anniversary of World War II. American victory in that conflict was brought about not only by the valor of our fighting men and the immensity of our productive capacity, but also by the availability of superb military intelligence. Much of this intelligence came from the ability of our armed forces to intercept and decipher the most secret communications of their adversaries. For many years security considerations prevented any public mention of these successes in the official histories. Now much of the story can be told. To preserve the memory of the Army's role in this intelligence war, the U. S. Army Center of Military History has joined with the History Office, U. S. Army Intelligence and Security Command (INSCOM), to publish this collection of documents on Army signals intelligence in World War II. INSCOM carries on the heritage of the Army's World War II Signal Security Agency, which by breaking the Japanese diplomatic ciphers and military codes helped speed the way of our forces to victory. The book is intended both for an Army audience and for the general public - including those World War II veterans who participated in the signals intelligence war and who for so many years were constrained to keep their contributions secret. The security barriers have now been lifted, and the Army is proud to acknowledge those contributions. Harold W. NelsonCharles F. Integration of the Armed Forces, 1940-1965 Morris J. MacGregor 2020-06-18 "In the quarter century that followed American entry into World War II, the nation's armed forces moved from the reluctant inclusion of a few segregated Negroes to their routine acceptance in a racially integrated military establishment. Nor was this change confined to military installations. By the time it was over, the armed forces had redefined their traditional obligation for the welfare of their members to include a promise of equal treatment for black servicemen wherever they might be. In the name of equality of treatment and opportunity, the Department of Defense began to challenge racial injustices deeply rooted in American society. For all its sweeping implications, equality in the armed forces obviously had its pragmatic aspects. In one sense it was a practical answer to pressing political problems that had plagued several national administrations. In another, it was the services' expression of those liberalizing tendencies that were permeating American society during the era of civil rights activism. But to a considerable extent the policy of racial equality that evolved in this quarter century was also a response to the need for military efficiency. So easy did it become to demonstrate the connection between inefficiency and discrimination that, even when other reasons existed, military efficiency was the one most often evoked by defense officials to justify a change in racial policy." x000D Morris J. MacGregor, Jr., received the A.B. and M.A. degrees in history from the Catholic University of America. He continued his graduate studies at the Johns Hopkins University and the University of Paris on a Fulbright grant. Before joining the staff of the U.S. Army Center of Military History in 1968 he served for ten years in the Historical Division of the Joint Chiefs of Staff.

AI and Big Data on IBM Power Systems Servers Scott Vetter 2019-04-10 As big data becomes more ubiquitous, businesses are wondering how they can best leverage it into their most important business questions. Using machine learning (ML) and deep learning (DL) in big data environments can identify historical patterns and build artificial intelligence (AI) models that can help businesses to improve customer experience, add services and offerings, identify new revenue streams or lines of business (LOBs), and optimize business or manufacturing operations. The power of AI for predictive analytics is being harnessed across all industries, so it is important that businesses familiarize themselves with all of the tools and techniques that are available for integration with their data lake environments. In this IBM® Redbooks® publication, we cover the best practices for deploying and integrating some of the best AI solutions on the market, including: IBM Watson Machine Learning Accelerator (see note for product naming) IBM Watson Studio Local IBM Power Systems™ IBM Spectrum™

Scale IBM Data Science Experience (IBM DSX) IBM Elastic Storage™ Server Hortonworks Data Platform (HDP) Hortonworks DataFlow (HDF) H2O Driverless AI We map out all the integrations that are possible with our different AI solutions and how they can integrate with your existing or new data lake. We also walk you through some of our client use cases and show you how some of the industry leaders are using Hortonworks, IBM PowerAI, and IBM Watson Studio Local to drive decision making. We also advise you on your deployment options, when to use a GPU, and why you should use the IBM Elastic Storage Server (IBM ESS) to improve storage management. Lastly, we describe how to integrate IBM Watson Machine Learning Accelerator and Hortonworks with or without IBM Watson Studio Local, how to access real-time data, and security. Note: IBM Watson Machine Learning Accelerator is the new product name for IBM PowerAI Enterprise. Note: Hortonworks merged with Cloudera in January 2019. The new company is called Cloudera. References to Hortonworks as a business entity in this publication are now referring to the merged company. Product names beginning with Hortonworks continue to be marketed and sold under their original names.

Army Leadership and the Profession (ADP 6-22) Headquarters Department of the Army 2019-10-09 ADP 6-22 describes enduring concepts of leadership through the core competencies and attributes required of leaders of all cohorts and all organizations, regardless of mission or setting. These principles reflect decades of experience and validated scientific knowledge. An ideal Army leader serves as a role model through strong intellect, physical presence, professional competence, and moral character. An Army leader is able and willing to act decisively, within superior leaders' intent and purpose, and in the organization's best interests. Army leaders recognize that organizations, built on mutual trust and confidence, accomplish missions. Every member of the Army, military or civilian, is part of a team and functions in the role of leader and subordinate. Being a good subordinate is part of being an effective leader. Leaders do not just lead subordinates—they also lead other leaders. Leaders are not limited to just those designated by position, rank, or authority.

The Employment of Negro Troops Ulysses Lee 2015-08-12 Recognizing that the story of Negro participation in military service during World War II was of national interest as well as of great value for future military planning, the Assistant Secretary of War in February 1944 recommended preparation of a book on this subject. The opportunity to undertake it came two years later with the assignment to the Army's Historical Division of the author, then a captain and a man highly qualified by training and experience to write such a work. After careful examination of the sources and reflection Captain Lee concluded that it would be impracticable to write a comprehensive and balanced history about Negro soldiers in a single volume. His plan, formally approved in August 1946, was to focus his own work on the development of Army policies in the use of Negroes in military service and on the problems associated with the execution of these policies at home and abroad, leaving to the authors of other volumes in the Army's World War II series, then taking shape, the responsibility for covering activities of Negroes in particular topical areas. This definition of the author's objective is needed in order to understand why he has described his work "in no sense a history of Negro troops in World War II." Writing some years ago, he explained: "The purpose of the present volume is to bring together the significant experience of the Army in dealing with an important national question: the full use of the human resources represented by that 10 percent of national population that is Negro. It does not attempt to follow, in narrative form, the participation of Negro troops in the many branches, commands, and units of the Army. . . . A fully descriptive title for the present volume, in the nineteenth century manner, would read: 'The U.S. Army and Its Use of Negro Troops in World War II: Problems in the Development and Application of Policy with Some Attention to the Results, Public and Military.'" Thus, in accordance with his objective, the author gives considerably more attention to the employment of Negroes as combat soldiers than to their use as service troops overseas. Even though a large majority of the Negroes sent overseas saw duty in service rather than in combat units, their employment in service forces did not present the same number or degree of problems.
