Technology and the Making of Experimental Film Culture Powers 2023 The Bolex camera, 16mm reversal film stocks, commercial film laboratories, and low-budget optical printers were the small-gauge media technologies that provided the infrastructure for experimental filmmaking at the height of its cultural impact. *Technology and the Making of Experimental Film Culture* examines how the avant-garde embraced these material resources and invested them with meanings and values adjacent to those of semiprofessional film culture. By reasserting the physicality of the body in making time-lapse and kinesthetic sequences with the Bolex, filmmakers conversed with other art forms and integrated broader spheres of humanistic and scientific inquiry into their artistic process. Drawing from the photographic qualities of stocks such as Tri-X and Kodachrome, they discovered pliant metaphors that allowed them to connect their artistic practice to metaphysics, spiritualism, and Hollywood excess. By framing film labs as mystical or adversarial, they cultivated an oppositionality that valorized control over the artistic process. And by using the optical printer as a tool for excavating latent meaning out of found footage, they posited the reworking of images as fundamental to the exploration of personal and cultural identity. Providing a wealth of new detail about the making of canonized avant-garde classics by such luminaries as Carolee Schneemann, Jack Smith, and Stan Brakhage, as well as rediscovering works from overlooked artists such as Chick Strand, Amy Halpern, and Gunvor Nelson, *Technology and the Making of Experimental Film Culture* uses technology as a lens for examining the process of making: where ideas come from, how they are put into practice, and how arguments about those ideas foster cultural and artistic

commitments and communities.

The New Politics of the Handmade Anthea Black 2020-12-10 Contemporary craft, art and design are inseparable from the flows of production and consumption under global capitalism. The New Politics of the Handmade features twenty-three voices who critically rethink the handmade in this dramatically shifting economy. The authors examine craft within the conditions of extreme material and economic disparity; a renewed focus on labour and materiality in contemporary art and museums; the political dimensions of craftivism, neoliberalism, and state power; efforts toward urban renewal and sustainability; the use of digital technologies; and craft's connections to race, cultural identity and sovereignty in texts that criss-cross five continents. They claim contemporary craft as a dynamic critical position for understanding the most immediate political and aesthetic issues of our time.

Most business owners started their company because they wanted more freedom—to work on their own schedules, make the kind of money they deserve, and eventually retire on the fruits of their labor. Unfortunately, according to John Warrillow, most owners find that stepping out of the picture is extremely difficult because their business relies too heavily on their personal involvement. Without them, their company—no matter how big or profitable—is essentially worthless. But the good news is that entrepreneurs can take specific steps—no matter what stage a business is in—to create a valuable, sellable company. Warrillow shows exactly what it takes to create a solid business that can thrive long into the future.
