## The Fluency Construct

2015-12-11 Kelli D. Cummings This book provides a comprehensive overview of fluency as a construct and its assessment in the context of curriculum-based measurement (CBM). Comparing perspectives from language acquisition, reading, and mathematics, the book

parses the vagueness and complexities surrounding fluency concepts and their resulting impact on testing, intervention, and students' educational development. Applications of this knowledge in screening and testing, ideas for creating more targeted measures, and advanced methods for studying fluency data demonstrate the overall salience of fluency within CBM. Throughout, contributors argue for greater specificity and nuance in isolating skills to be measured and improved, and for terminology that reflects those educational benchmarks. Included in the coverage: Indicators of fluent writing in beginning writers. Fluency in language acquisition, reading, and mathematics. Foundations of fluency-based assessments in behavioral and psychometric paradigms. Using response time and accuracy data to inform the measurement of fluency. Using individual growth curves to model reading fluency. Latent class analysis for reading fluency research. The Fluency Construct: Curriculum-Based Measurement Concepts and Applications is an essential resource for researchers, graduate students, and professionals in clinical child and school psychology, language and literature, applied linguistics, special education, neuropsychology, and social work.

Using opportunities to learn and best practices in gifted education to inform interventions and practice, the text offers in-depth explanation of how place-based approaches can be used to identify gifted students and ensure that curricula are designed to respect the setting, students, and teachers. The text is structured into three parts, providing the reader with a logical and comprehensive progression through theoretical foundations, the practicalities of implementation, and the process and outcomes of measuring and validating outcomes. Given its unique approach to gifted education programs, this book will prove to be an indispensable and timely resource for scholars working to develop gifted education and educational interventions with and for rural schools.

Developed by Lloyd M. Dunn and Douglas M. Dunn, the assessment is made to evaluate vocabulary comprehension for American English. It is swift and easy to conduct, saving valuable time so that focus can be placed on implementing successful interventions.

The PPVT-4 test subject matter covers an extensive array of vocabulary comprehension levels, ranging from pre-kindergarten through adult age. The test problems extensively sample words that represent 20 topic areas (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes),

and home and school vocabulary.

The test offers two identical editions which include different vocabulary items, guaranteeing that the person has not “learned” the evaluation. One edition can be used before intervention implementation to measure test-takers’ vocabulary understanding and the other form can be utilized for re-testing to evaluate and note advancement. The PPVT-4 also includes a unique Growth Scale Value (GSV) which is sensitive to small changes with time.
