The Scramble for Africa 2014-01-14 M. E. Chamberlain In 1870 barely one tenth of Africa was under European control. By 1914 only about one tenth – Abyssinia (Ethiopia) and Liberia – was not. This book offers a clear and concise account of the 'scramble' or 'race' for Africa, the period of around 20 years during which European powers carved up the continent with little or no consultation of its inhabitants. In her classic overview, M.E. Chamberlain: Contrasts the Victorian image of Africa with what we now know of African civilisation and history Examines in detail case histories from Egypt to Zimbabwe Argues that the history and background of Africa are as important as European politics and diplomacy in understanding the 'scramble' Considers the historiography of the topic, taking into account Marxist and anti-Marxist, financial, economic, political and strategic theories of European imperialism This indispensable introduction, now in a fully updated third edition, provides the most accessible survey of the 'scramble for Africa' currently available. The new edition includes primary source material unpublished elsewhere, new illustrations and additional pedagogical features. It is the perfect starting point for any study of this period in African history.

Imperialism 1902 John Atkinson Hobson This document is from Empire Online, a powerful and interactive collection of primary source documents, sourced from leading archives around the world. This project has been developed to encourage undergraduates, postgraduates, academics and researchers to explore colonial history, politics, culture and society. Material in the collection spans five centuries, charting the story of the rise and fall of empires; from the explorations of Columbus, Captain Cook, and others, right through to de-colonisation in the second half of the twentieth century and debates over American Imperialism.

Constitutional Law in Malta 2022-03-21 Ivan Mifsud Derived from the renowned multi-volume International Encyclopaedia of Laws, this very useful analysis of constitutional law in Malta provides essential information on the country's sources of constitutional law, its form of government, and its administrative structure. Lawyers who handle transnational matters will appreciate the clarifications of particular terminology and its application. Throughout the book,

the treatment emphasizes the specific points at which constitutional law affects the interpretation of legal rules and procedure. Thorough coverage by a local expert fully describes the political system, the historical background, the role of treaties, legislation, jurisprudence, and administrative regulations. The discussion of the form and structure of government outlines its legal status, the jurisdiction and workings of the central state organs, the subdivisions of the state, its decentralized authorities, and concepts of citizenship. Special issues include the legal position of aliens, foreign relations, taxing and spending powers, emergency laws, the power of the military, and the constitutional relationship between church and state. Details are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for both practising and academic jurists. Lawyers representing parties with interests in Malta will welcome this guide, and academics and researchers will appreciate its value in the study of comparative constitutional law.

Disrupting Africa 2021-07-29 Olufunmilayo B. Arewa In the digital era, many African countries sit at the crossroads of a potential future that will be shaped by digital-era technologies with existing laws and institutions constructed under conditions of colonial and post-colonial authoritarian rule. In Disrupting Africa, Olufunmilayo B. Arewa examines this intersection and shows how it encompasses existing and new zones of contestation based on ethnicity, religion, region, age, and other sources of division. Arewa highlights specific collisions between the old and the new, including in the 2020 #EndSARS protests in Nigeria, which involved young people engaging with varied digital era technologies who provoked a violent response from rulers threatened by the prospect of political change. In this groundbreaking work, Arewa demonstrates how lawmaking and legal processes during and after colonialism continue to frame contexts in which digital technologies are created, implemented, regulated, and used in Africa today.

Nonviolent Action 2013-07-04 Ronald M. McCarthy This comprehensive guide to research, sources, and theories about nonviolent action as a technique of struggle in social and political conflicts discusses the methods and techniques used by groups in various encounters. Although violence and its causes have received a great deal of attention, nonviolent action has not received its due as an international phenomenon with a long history. An introduction that explains the theories and research used in the study provides a practical guide to this essential bibliography of English-language sources. The first part of the book covers case-study materials divided by region and subdivided by country. Within each country, materials are arranged chronologically and topically. The second major part examines the methods and theory of nonviolent action, principled nonviolence, and several closely related areas in social science, such as conflict analysis and social movements. The book is indexed by author and subject.

Racism: a Very Short Introduction 2020-03-26 Ali Rattansi There is often a demand for a short, sharp definition of racism, for example as captured in the popular formula Power + Prejudice = Racism. But in reality, racism is a complex, multidimensional phenomenon that cannot be captured by such definitions. In our world today there are a variety of racisms at play, and it is necessary to distinguish between issues such as individual prejudice, and systematic racisms which entrench racialized inequalities over time. This Very Short Introduction explores the history of racial ideas and a wide range of racisms - biological, cultural, colour-blind, and structural - and illuminates issues that have been the subject of recent debates. Is Islamophobia a form of racism? Is there a new antisemitism? Why has whiteness become an important source of debate? What is Intersectionality? What is unconscious or implicit bias, and what is its importance in understanding racial discrimination? Ali Rattansi tackles these questions, and also shows why African Americans and other ethnic minorities in the USA and Europe continue to suffer from discrimination today that results in ongoing disadvantage in these white dominant societies. Finally he explains why there has been a resurgence of national populist and far-right movements and explores their implications for the future of racism. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of

titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Imperialism in the Twenty-First Century 2016-01-22 John Smith Winner of the first Paul A. Baran-Paul M. Sweezy Memorial Award for an original monograph concerned with the political economy of imperialism, John Smith's Imperialism in the Twenty-First Century is a seminal examination of the relationship between the core capitalist countries and the rest of the world in the age of neoliberal globalization. Deploying a sophisticated Marxist methodology, Smith begins by tracing the production of certain iconic commodities-the T-shirt, the cup of coffee, and the iPhone-and demonstrates how these generate enormous outflows of money from the countries of the Global South to transnational corporations headquartered in the core capitalist nations of the Global North. From there, Smith draws on his empirical findings to powerfully theorize the current shape of imperialism. He argues that the core capitalist countries need no longer rely on military force and colonialism (although these still occur) but increasingly are able to extract profits from workers in the Global South through market mechanisms and, by aggressively favoring places with lower wages, the phenomenon of labor arbitrage. Meticulously researched and forcefully argued, Imperialism in the Twenty-First Century is a major contribution to the theorization and critique of global capitalism.

Settler Colonialism in the Twentieth Century 2012-11-12 Caroline Elkins Postcolonial states and metropolitan societies still grapple today with the divisive and difficult legacies unleashed by settler colonialism. Whether they were settled for trade or geopolitical reasons, these settler communities had in common their shaping of landholding, laws, and race relations in colonies throughout the world. By looking at the detail of settlements in the twentieth century--from European colonial projects in Africa and expansionist efforts by the Japanese in Korea and Manchuria, to the Germans in Poland and the historical trajectories of Israel/Palestine and South Africa--and analyzing the dynamics set in motion by these settlers, the contributors to this volume establish points of comparison to offer a new framework for understanding the character and fate of twentieth-century empires.

The Acquisition of Africa (1870-1914) 2016-10-13 Mieke van der Linden In the 'Scramble for Africa' during the Age of New Imperialism (1870-1914), European States and non-State actors mainly used treaties to acquire territory. The question is raised whether Europeans did or did not on a systematic scale breach these treaties in their expansion of empire.

Violence and Colonial Order 2012-09-20 Martin Thomas A striking new interpretation of colonial policing and political violence in three empires between the two world wars.

Rational Empires 2012-04-09 Leo J. Blanken The nineteenth century marked the high point of imperialism, when tsarist Russia expanded to the Pacific and the sun was said never to set on the British Empire. Imperialism remains a perennial issue in international relations today, and nowhere is this more evident than in the intensifying competition for global resources. Leo J. Blanken explains imperialism through an analysis of the institutions of both the expanding state and its targets of conquest. While democratic states favoring free trade generally resort to imperialism only to preempt aggressive rivals—or when they have reason to believe another state's political institutions will not hold up when making bargains—authoritarian states tend toward imperialism because they don't stand to benefit from free trade. The result is three distinct strategies toward imperialism: actors fighting over territory, actors peaceably dividing territory among themselves, and actors refraining from seizing territory altogether. Blanken examines these dynamics through three case studies: the scramble for Africa, the unequal treaties imposed on Qing Dynasty China, and the evolution of Britain's imperial policy in India. By separating out the different types of imperialism, Blanken provides insight into its sources, as well as the potential implications of increased competition in the current international arena.

Unmasking Ideology in Imperial and Colonial Archaeology 2018-12-31 Bonnie Effros This volume addresses the entanglement between archaeology, imperialism, colonialism, capitalism, and war. Popular sentiment in the West has tended to embrace the adventure rather than ponder the legacy of archaeological explorers; allegations by imperial powers of "discovering" archaeological sites or "saving" world heritage from neglect or destruction have often provided the pretext for expanding political influence. Consequently, citizens have often fallen victim to the imperial war machine, seeing their lands confiscated, their artifacts looted, and the ancient remains in their midst commercialized. Spanning the globe with case studies from East Asia, Siberia, Australia, North and South America, Europe, and Africa, sixteen contributions written by archaeologists, art historians, and historians from four continents offer unusual breadth and depth in the assessment of various claims to patrimonial heritage, contextualized by the imperial and colonial ventures of the last two centuries and their postcolonial legacy.

Female Imperialism and National Identity 2002 Katie Pickles Through a study of the British Empire's largest women's patriotic organisation, formed in 1900, and still in existence, this book examines the relationship between female imperialism and national identity. Indentured Labor in the Age of Imperialism, 1834-1922 1995-06-30 David Northrup The indentured labour trade was begun to replace freed slaves on sugar plantations in British colonies in the 1830s, but expanded to many other locations around the world. This is the first survey of the global flow of indentured migrants from Africa that developed after the end of the slave trade and continued until shortly after the First World War. This volume describes the experiences of the two million Asians, Africans, and South Pacific Islanders who signed long-term labour contracts in return for free passage overseas, modest wages, and other benefits. The experience of these indentured migrants of different origins and destinations is compared in terms of their motives, conditions of travel, and subsequent creation of permanent overseas settlements.

Political Economy of Development in Turkey 2022-03-10 Emre Özçelik Adopting a political-economy perspective, this book is an original collection of research chapters that focus on Turkey's economic-development experience from the nineteenth century to the present. It provides a systematic and chronological examination of Turkey's major historical dynamics in the economic and socio-political spheres. The chapters are organized according to the consecutive phases of Turkey's political-economic development. Each chapter not only reflects on the country-specific aspects of those development phases, but also clarifies the dependence of domestic-policy orientations on the dynamics of the world economy. As such, the book provides a historically-conscious, political-economic account of Turkey's dependent-development experience. The book serves as a quality reference on the political economy of modern Turkey, bringing together fourteen prominent experts as contributing authors who have devoted their intellectual lives to the understanding and explanation of political-economic dynamics in both Turkey and the world. All contributors write on a historical period of the Turkish economy in which they are most specialized. This aspect of the book is a momentous advantage in the field of Turkey's political economy, enabling the highest degree of academic expertise to concentrate in each chapter.

Gentlemanly Capitalism, Imperialism and Global History 2002-10-31 S. Akita British imperial history can now be seen as a bridge to global history. This study tries to renew the debate on British imperialism by combining Western and Asian historiography and constructing a new global history as an aid to the understanding of globalization in the late twentieth and twenty-first centuries. Part One takes a predominantly metropolitan view of the globalizing forces unleashed by British imperialism; Part Two focuses on the international order of East Asia and its connection with gentlemanly capitalism.

Culture and Imperialism 2012-10-24 Edward W. Said A landmark work from the author of Orientalism that explores the long-overlooked connections between the Western imperial endeavor and the culture that both reflected and reinforced it. In the

nineteenth and early twentieth centuries, as the Western powers built empires that stretched from Australia to the West Indies, Western artists created masterpieces ranging from *Mansfield Park* to *Heart of Darkness* and *Aida*. Yet most cultural critics continue to see these phenomena as separate. Edward Said looks at these works alongside those of such writers as W. B. Yeats, Chinua Achebe, and Salman Rushdie to show how subject peoples produced their own vigorous cultures of opposition and resistance. Vast in scope and stunning in its erudition, *Culture and Imperialism* reopens the dialogue between literature and the life of its time.

Financing India's Imperial Railways, 1875–1914 2015-10-06 Stuart Sweeney The Indian railway network began as a liberal experiment to promote trade and commerce, the distribution of food and military mobility. Sweeney's study focuses on Britain's largest overseas investment project during the nineteenth century, offering a new perspective on the Anglo-Indian experience.

Marxist Theories of Imperialism 2002-09-11 Tony Brewer The last two hundred years have seen a massive increase in the size of the world economy and equally massive inequalities of wealth and power between different parts of the world. They have also witnessed the rise to dominance of the capitalist mode of production. Marxists, from Marx himself through to present day thinkers, have argued that these changes are profoundly interconnected. This book offers a unique account of Marxist theories of Imperialism. It has been fully updated and expanded to cover all the developments since its initial publication and will be essential reading for any student of Marxism.

London to Ladysmith & Ian Hamilton's March 2013-01-23 Winston Churchill In addition to his enduring fame as a statesman, Winston Churchill was a Nobel Prize-winning author whose military histories offer the unique perspective of a participant in world affairs. *London to Ladysmith and Ian Hamilton's March* reflect his early career as a Boer War correspondent for *London's Morning Post* in 1899 and 1900. *London to Ladysmith* chronicles the Boer War's first five months, from the author's arrival in South Africa to his capture during a Boer ambush of an armored train. Churchill's gripping narrative of his escape from a prisoner-of-war camp traces a grueling journey across enemy territory and back to British lines. *Ian Hamilton's March* picks up the action immediately afterward, documenting the eponymous general's 400-mile advance from Bloemfontein to Pretoria. The march saw ten major battles and numerous skirmishes, culminating in the release of prisoners from the camp where Churchill himself was held. Written mostly in the field, this book offers a vivid, personal account of the conditions under which the Boer War was fought, as well as a fascinating look at the formative years of one of the twentieth century's preeminent leaders.

Science, Colonialism, and Indigenous Peoples 2009-08-24 Laurelyn Whitt Examines how contemporary relations between indigenous and Western nations are shaped by the dynamics of power, the politics of property, and the apologetics of law.

Contemporary Health Studies 2021-04-20 Louise Warwick-Booth *Contemporary Health Studies* provides an accessible introduction to current issues and key debates in understanding and promoting health. Its up-to-date, global focus places a strong

emphasis on the social, political and environmental dimensions of health. Part One sets the scene by looking closely at the definition of 'health' and outlining the aims and purpose of health studies. Part Two explores the different disciplines that underpin health studies, such as sociology, psychology, anthropology and health psychology, incorporating new theoretical frameworks to help readers understand health. Part Three applies this knowledge to address the determinants of health, including chapters on individual factors, the role of public health, the latest policy influences on health and the growing importance of the global context. Each chapter contains contemporary statistics and evidence alongside carefully developed learning features designed to highlight the fundamentals of each topic, to apply these to in-depth case studies – from global antibiotic resistance to the challenge and promise of digital data –, and to pose questions for reflection and debate. *Contemporary Health Studies* is an essential guide for undergraduate health students written by three authors who have a wealth of teaching experience in this subject area. Their book will inspire readers to consider the human experience of health within contemporary global society as it is mediated by individual, societal and global contexts.

Empires in World History 2021-05-11 Jane Burbank How empires have used diversity to shape the world order for more than two millennia Empires—vast states of territories and peoples united by force and ambition—have dominated the political landscape for more than two millennia. *Empires in World History* departs from conventional European and nation-centered perspectives to take a remarkable look at how empires relied on diversity to shape the global order. Beginning with ancient Rome and China and continuing across Asia, Europe, the Americas, and Africa, Jane Burbank and Frederick Cooper examine empires' conquests, rivalries, and strategies of domination—with an emphasis on how empires accommodated, created, and manipulated differences among populations. Burbank and Cooper examine Rome and China from the third century BCE, empires that sustained state power for centuries. They delve into the militant monotheism of Byzantium, the Islamic Caliphates, and the short-lived Carolingians, as well as the pragmatically tolerant rule of the Mongols and Ottomans, who combined religious protection with the politics of loyalty. Burbank and Cooper discuss the influence of empire on capitalism and popular sovereignty, the limitations and instability of Europe's colonial projects, Russia's repertoire of exploitation and differentiation, as well as the "empire of liberty"—devised by American revolutionaries and later extended across a continent and beyond. With its investigation into the relationship between diversity and imperial states, *Empires in World History* offers a fresh approach to understanding the impact of empires on the past and present.

Myths of Empire 2013-05-21 Jack Snyder Overextension is the common pitfall of empires. Why does it occur? What are the forces that cause the great powers of the industrial era to pursue aggressive foreign policies? Jack Snyder identifies recurrent myths of empire, describes the varieties of overextension to which they lead, and criticizes the traditional explanations offered by historians and political scientists. He tests three competing theories—realism, misperception, and domestic coalition politics—against five detailed case studies: early

twentieth-century Germany, Japan in the interwar period, Great Britain in the Victorian era, the Soviet Union after World War II, and the United States during the Cold War. The Resulting insights run counter to much that has been written about these apparently familiar instances of empire building.

Exceptional State 2007-06-29 Ashley Dawson Exceptional State analyzes the nexus of culture and contemporary manifestations of U.S. imperialism. The contributors, established and emerging cultural studies scholars, define culture broadly to include a range of media, literature, and political discourse. They do not posit September 11, 2001 as the beginning of U.S. belligerence and authoritarianism at home and abroad, but they do provide context for understanding U.S. responses to and uses of that event. Taken together, the essays stress both the continuities and discontinuities embodied in a present-day U.S. imperialism constituted through expressions of millennialism, exceptionalism, technological might, and visions of world dominance. The contributors address a range of topics, paying particular attention to the dynamics of gender and race. Their essays include a surprising reading of the ostensibly liberal movies Wag the Dog and Three Kings, an exploration of the rhetoric surrounding the plan to remake the military into a high-tech force less dependent on human bodies, a look at the significance of the popular Left Behind series of novels, and an interpretation of the Abu Ghraib prison photos. They scrutinize the national narrative created to justify the U.S. invasions of Afghanistan and Iraq, the ways that women in those countries have responded to the invasions, the contradictions underlying calls for U.S. humanitarian interventions, and the role of Africa in the U.S. imperial imagination. The volume concludes on a hopeful note, with a look at an emerging anti-imperialist public sphere. Contributors. Mystery of the Missing Diamond

It was a gloomy and tempestuous night. The downpour was falling heavily, and the wind was roaring. In the middle of the town, there was a museum, where a priceless diamond was on exhibit. The diamond was known as the African Star, and it was the biggest and most gorgeous diamond in the earth. It was secured by a sophisticated security system, and a team of armed guards. No one could rob it, or so they believed. But an individual did. An individual succeeded to get around the security, to evade the guards, to break the pane, and to steal the diamond. And no one observed them, no one heard them, no one identified who they were. They departed from no mark, no hint, no evidence. They vanished into the night, with the Star of Africa. And the enigma of the missing diamond began.

Galactic Conflicts which Changed Chronicle

It was the time 23, and the world stood at the brink of battle. The United States and China, the two world powers, were locked in a intense contest, competing for resources, influence, and supremacy. They had both engineered sophisticated arms, including lasers, unmanned aerial vehicles, and satellites, that can attack anywhere, any time. They had clandestinely established space stations, that could launch nuclear missiles, that can obliterate the world. They were ready to employ them, if at all necessary. But they were not the sole ones. There existed a third power, a secret force, which had been monitoring them, waiting for them both, getting ready for them. They were aliens, and they had come to stop them. They had come to save the globe, or to finish it all. They had come arrived to initiate the space wars which transformed chronicle.

Journey of a Thousand Miles

He was tired of his living. He was uninterested, unhappy, and unsatisfied. He had a work he detested, a manager he despised, and a significant other he didn't cherish. He had no passion, no aim, no meaning. He felt like he was misusing his time, his capability, his life. He desired to alter, he desired to run away, he wanted to survive. He decided to quit his job, to break up with his significant other, to get rid of his belongings, and to acquire a direct fare to the other side of the world. He didn't realize where he was heading, he didn't realize what he was carrying out, he didn't know what he was seeking. He only knew that he had to leave, that he had to investigate, that he had to find out. He started on a voyage of a thousand kilometers, a trip of excitement, of challenge, of education, of progress, of transformation.
